

Cloud DevOp

We're looking for ambitious **Cloud DevOps** to join our dynamic Cloud Engineering team at Deloitte to deliver interesting public cloud projects: implementation, migration and development of new cloud computing solutions.

What we expect:

- At least 3 years of experience with DevOps solutions.
- Experience in implementing public cloud solutions.
- Knowledge of infrastructure management tools (CloudFormation, Terraform, Ansible).
- Knowledge of CI/CD solutions.
- Solid understanding of the key services in a selected, main public cloud and readiness to learn more in other clouds.
- Ability to configure high availability and secure environments.
- Basic knowledge of Docker and Kubernetes.
- Verbal and written communication skills in English.
- Knowledge of tools monitoring public cloud services and implementations.
- Basic understanding of SRE.
- Advanced problem-solving skills.

Your future role:

- Developing Infrastructure as Code implementations.
- Automating deployments and building infrastructure based on Infrastructure as Code.
- Auditing existing public cloud solutions.
- Designing and implementing secure, high availability and cost-effective public cloud solutions.
- Developing tools based on Serverless and PaaS technologies

What we offer:

- Opportunity to develop innovative multi-cloud projects using the latest technologies.
- Unique culture of the function and the entire organisation focused on growth, interesting projects and mutual trust.
- Latest tools and access to training and mentor support.
- Medical package for you and your family.
