

Wind industry in Argentina: Industry Insight

Provinces with the greatest wind potential

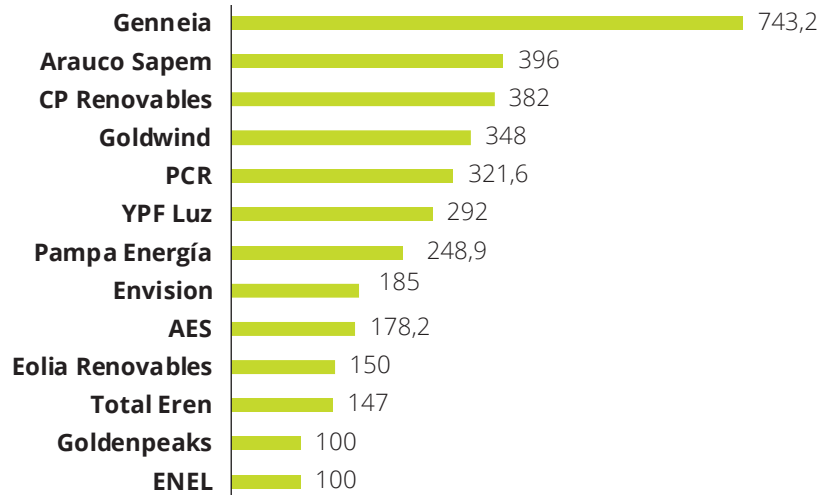

2017

Resolution 281:

Companies can generate the energy they consume and turn it over to the network in the Mater.

Energy Generation, by Company (MW)

2025

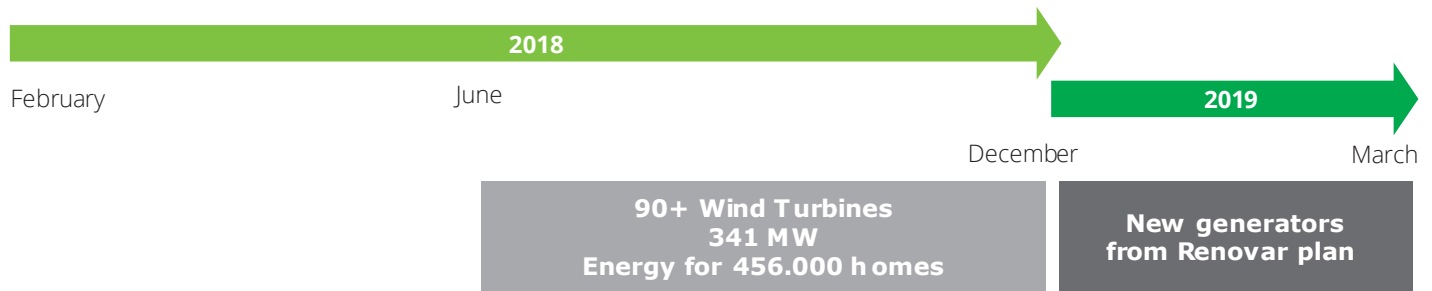

Objective:

20% of the energy matrix from renewable resources.

Opportunities:

- The cost of installing wind turbines decreases exponentially.
- Multilateral organizations are predisposed to lend money when it comes to renewable energy projects.

1,2%

Percentage of all the country's electricity generation that comes from renewable resources

8%

Projection
