

2023 Global Automotive Consumer Study

Key Findings: AUSTRIA

January 2023

Contents

1.	Vehicle electrification	04
2.	Future vehicle intentions	16
3.	Vehicle brand and service experience	23
4.	Connectivity	29
5.	About the study	34

From September through October 2022, Deloitte surveyed more than 26,000 consumers in 24 countries (including 1,004 respondents in Austria) to explore opinions regarding a variety of critical issues impacting the automotive sector, including consumer interest in electric vehicle (EV) adoption, brand perception, and advanced technologies. The overall goal of this annual study is to answer important questions that can help companies prioritize and better position their business strategies and investments.

1

The shift to EVs is happening, but is it moving fast enough?

Consumer interest in EVs is growing as consumers, pressured by hyper-inflationary conditions, look to lower their operating costs. However, there are a variety of challenges standing in the way, including driving range, affordability, and lack of sustainability.

2

An unintended benefit of the vehicle inventory crisis

Product quality still tops the list of factors driving consumer decisions when it comes to which vehicle brand to buy, and expectations regarding the acceptable length of time to wait for delivery may be starting to stretch out, potentially opening the door to a “build-to-order” paradigm.

3

Dealers engender the most trust among consumers

When asked who they trust most, surveyed consumers point to the relationship they have with either their servicing or selling dealer, signaling the important role dealers play in the automotive value chain and a key consideration in the conversation around direct-to-consumer sales.

4

Subscriptions to connected vehicle services could be a challenge

Consumer interest in connected vehicle features that helps them get maintenance updates, traffic/road safety updates, and suggestions for alternate routes. are relatively high, but people would much rather pay for connected technologies on a per use basis compared to a subscription.

Note: Sum of the values for a few questions in the following slides may not add to 100% due to rounding.

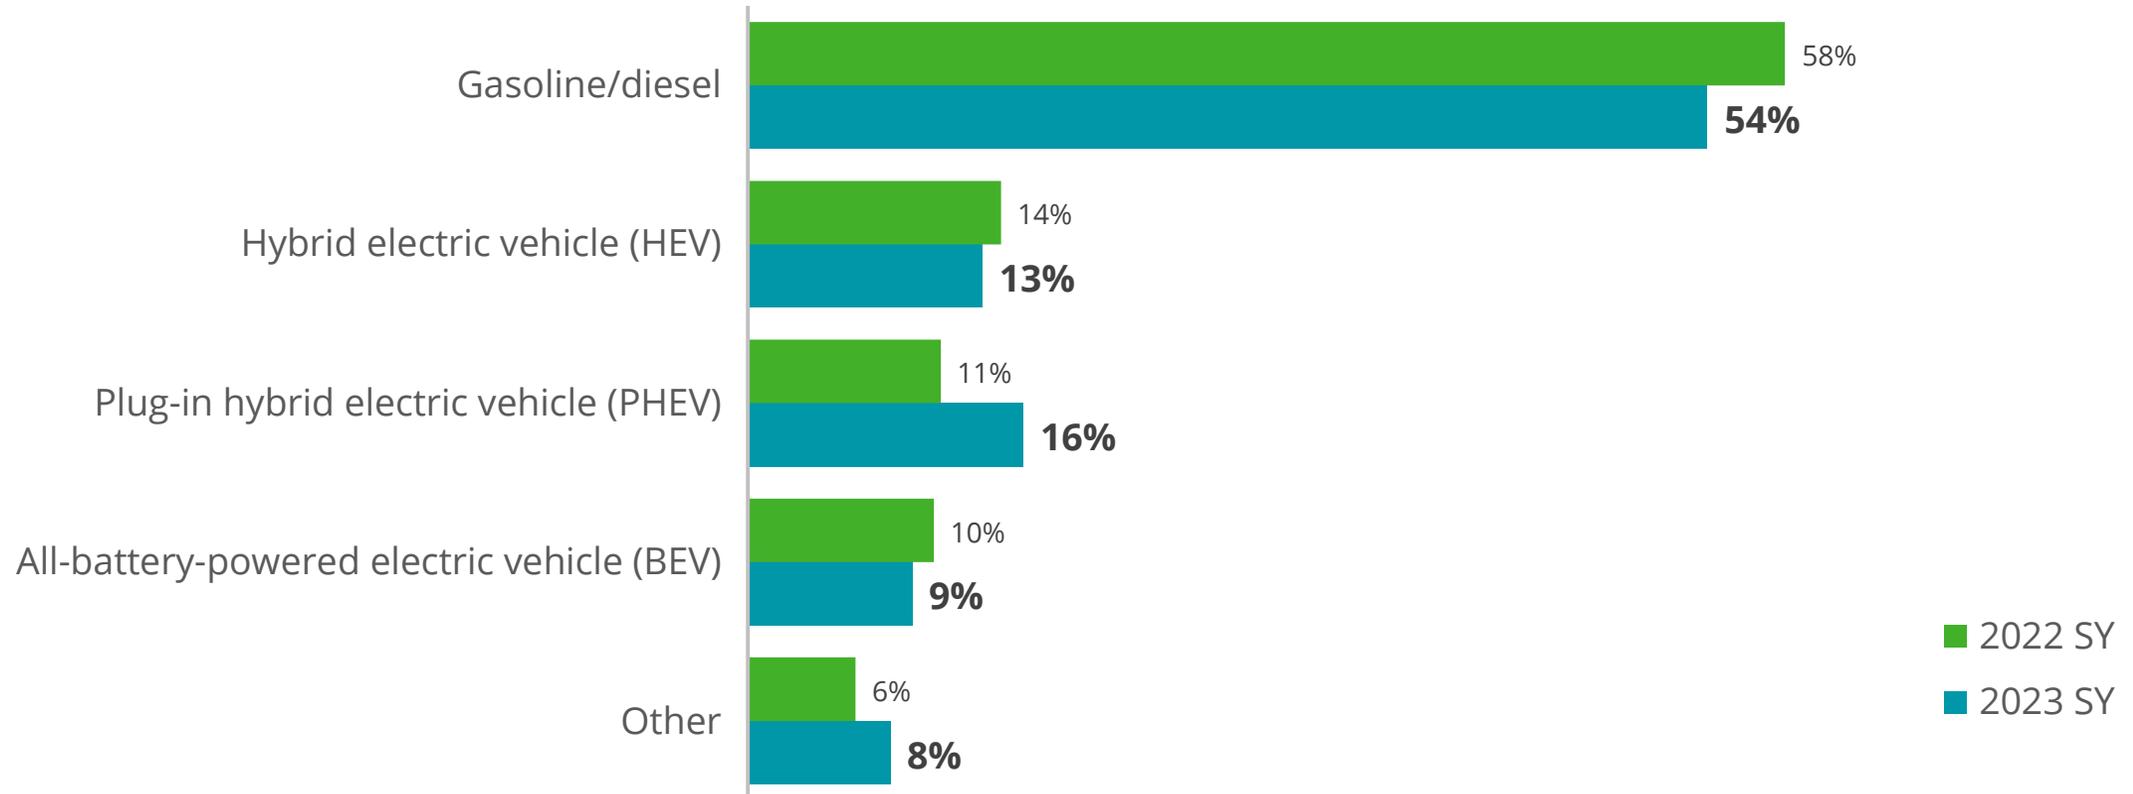

1

Vehicle electrification

The needle is moving toward an electric mobility future, but are we moving fast enough to achieve the ambitious goals that have been set for carbon emissions reduction?

Preference for type of engine in next vehicle

Note: Other includes vehicles with engine types such as compressed natural gas, ethanol, and hydrogen fuel cells; don't know responses weren't considered.

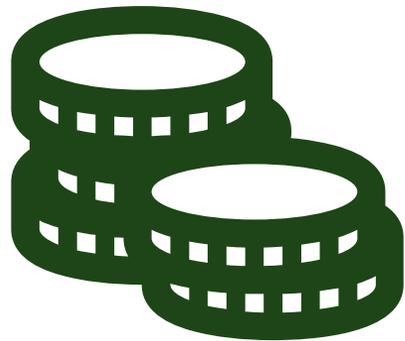

Q40. What type of engine would you prefer in your next vehicle?

Sample size: n= 793 [2022]; 735 [2023]

The draw for EVs continues to center on the consumer perception that fuel costs will be significantly lower, outweighing the concern for climate change.

Top 5 reasons for choosing an EV for next vehicle

#1
Lower fuel costs

#2

Government incentives

#3

Concern about climate change

#4

Extra taxes on ICE vehicles

#5

Less maintenance

Q41. Please rank the following factors in terms of their impact on your decision to acquire an electrified vehicle (highest to lowest).

Sample size: n= 279

AUSTRIA

2023 Deloitte Global Automotive Consumer Study

6

A majority of both ICE and EV intenders are expecting to pay less than €50K for their next vehicle, signaling a potential affordability risk given ever-increasing transaction prices.

Preferred price ranges for next vehicles

Q39. In which of the following price ranges will you be shopping for your next vehicle? (Please indicate what you would expect to pay after any discounts and/or incentives that might be available.)

Sample size: [Overall] n= 871; [ICE intender] n= 397; [EV intender] n= 279

AUSTRIA

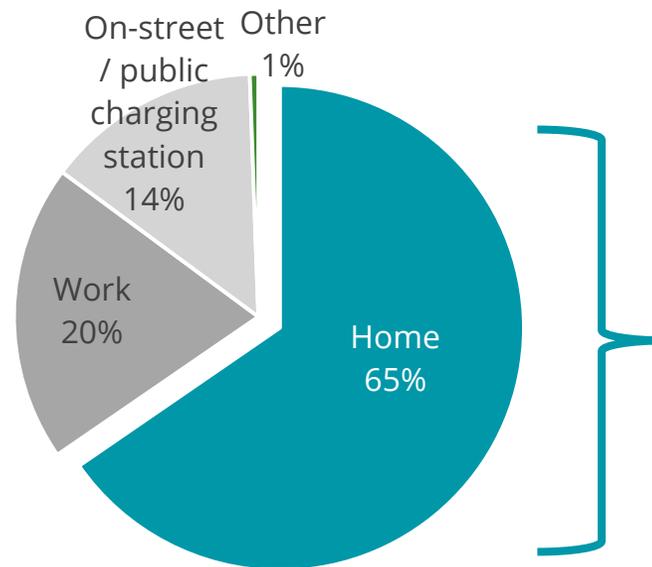

2023 Deloitte Global Automotive Consumer Study

Two-thirds of EV intenders plan to charge their vehicle at home by connecting to a regular power grid. Those not intending to charge at home cite lack of possibility to install and high installation costs, opening the door for installers and finance providers to offer solutions.

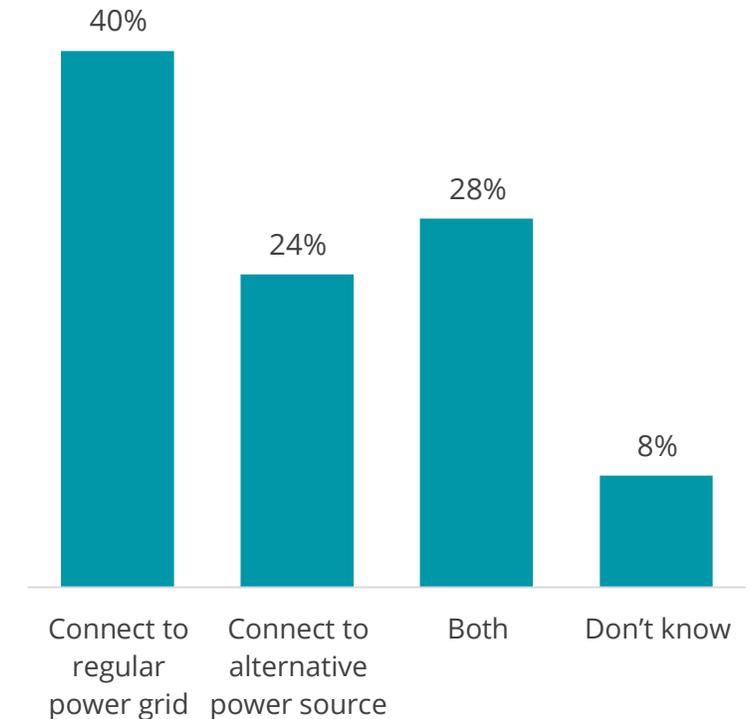

Reasons for not charging an electrified vehicle at home

Expecting to charge electrified vehicle most often at...

Intending to charge electric vehicles at home using...

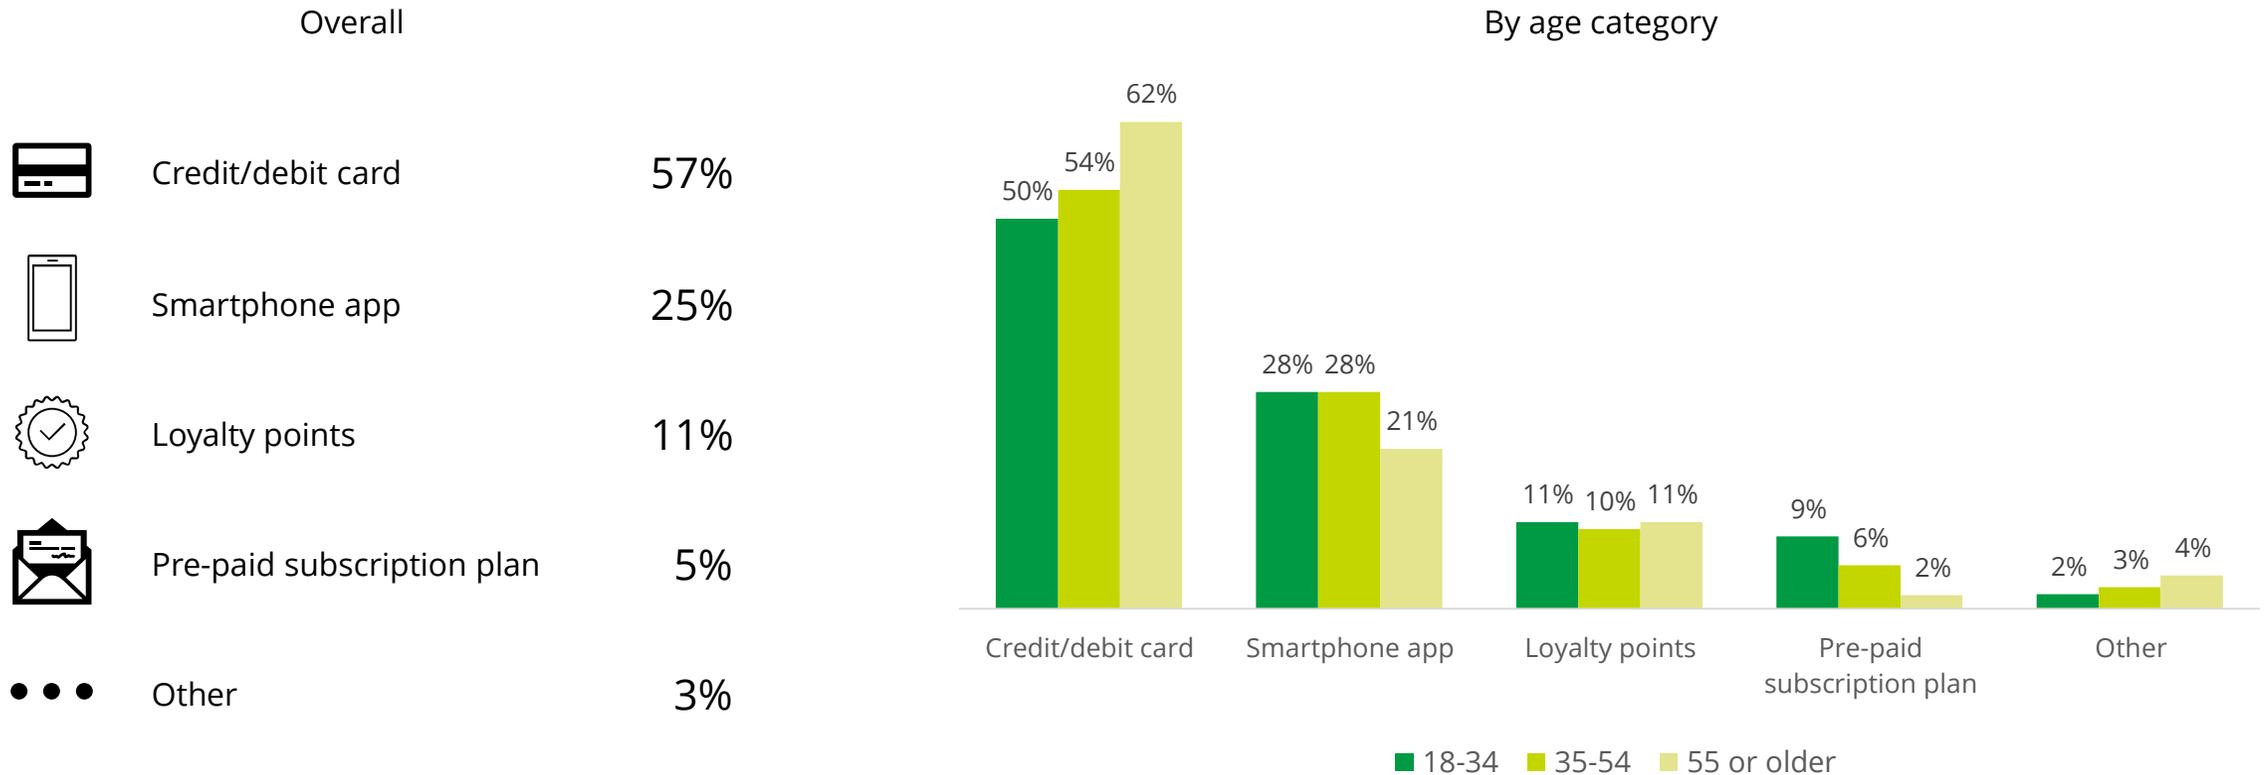

Q43: Where do you expect to charge your electrified vehicle most often?; Q44: How do you intend to charge your electrified vehicle at home?; Q45: What is the main reason you do not intend to charge your electrified vehicle at home?

Sample size: n= 182 [Q43]; 119 [Q44]; 63 [Q45]

Across all age groups, consumers would prefer to pay for public EV charging via credit/debit cards, signaling the need for standardizing the public charging experience to maximize utility and convenience.

Most preferred way to pay for public EV charging

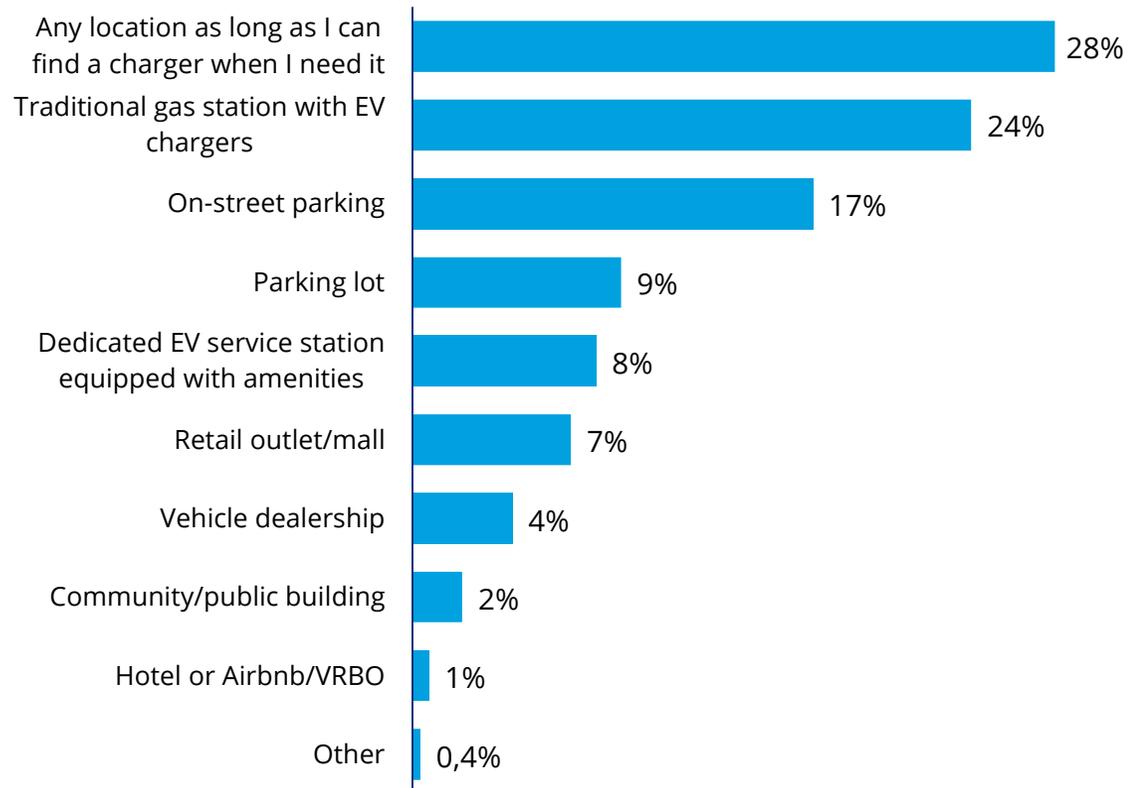

Q49: How would you most prefer to pay for public EV charging?

Sample size: n= 279 [Overall]; 54 [18-34], 108 [35-54], 117 [55+]

In terms of specific charging locations, consumers would prefer traditional gas stations that are equipped with chargers and have basic amenities like beverages, restrooms, and Wi-Fi.

Public locations that the consumers would prefer to charge their EV when they are away from their home

Type of amenities that the consumers want to have access to while their vehicle is charging at a public location

Note: Sum of the percentages in the right-side chart exceed 100% as respondents can select multiple options.

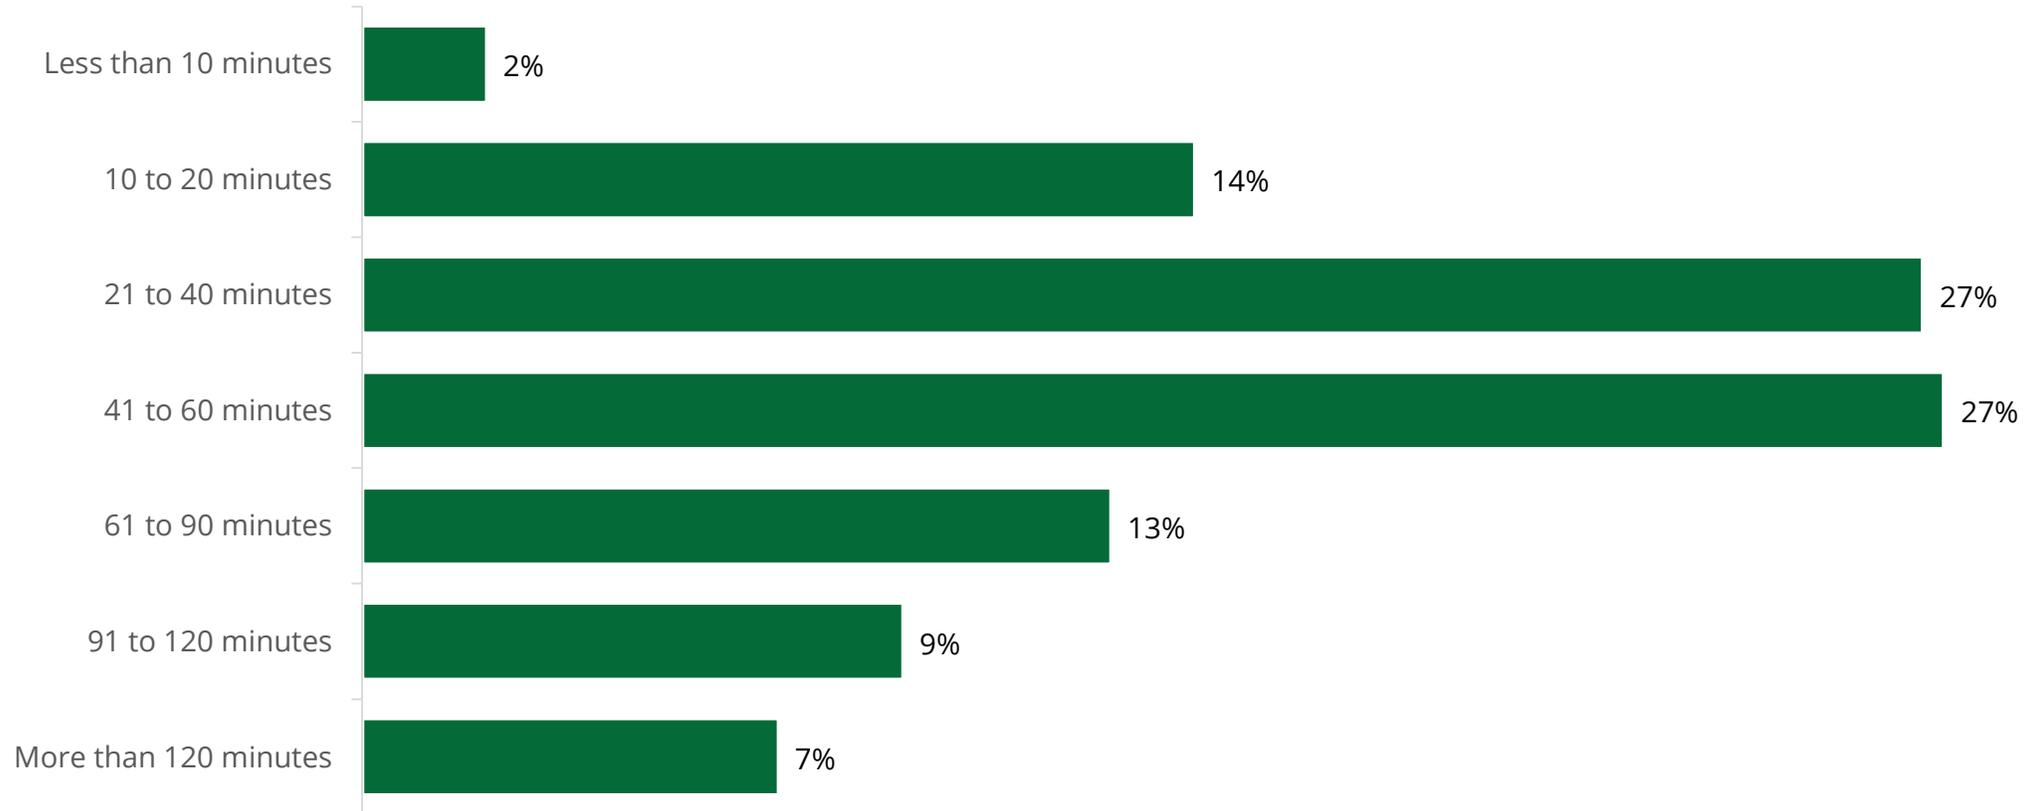

Q46: Which of the following public locations makes the most sense to charge your EV when you are away from home?

Q48: What type of amenities would you want to have access to while your vehicle is charging at a public location?

Sample size: n= 279 [Q46]; 279 [Q48]

4 in 10 surveyed consumers would wait between 10 and 40 minutes for their vehicle to charge from empty to 80% at a public charging station, challenging conventional wisdom that matching the fossil fuel experience is “table stakes”.

Expected wait time to charge an EV at public charging stations from empty to 80%

Q47: How long would you expect it to take to charge your EV from empty to 80% at a public charging location?

Sample size: n= 279

Vehicle product quality is the defining factor for consumers when choosing one brand over another. The availability of EV options rates much lower in terms of importance.

Most important factors driving the choice of brand for your next vehicle

Note: Sum of the percentages exceed 100% as respondents can select multiple options.

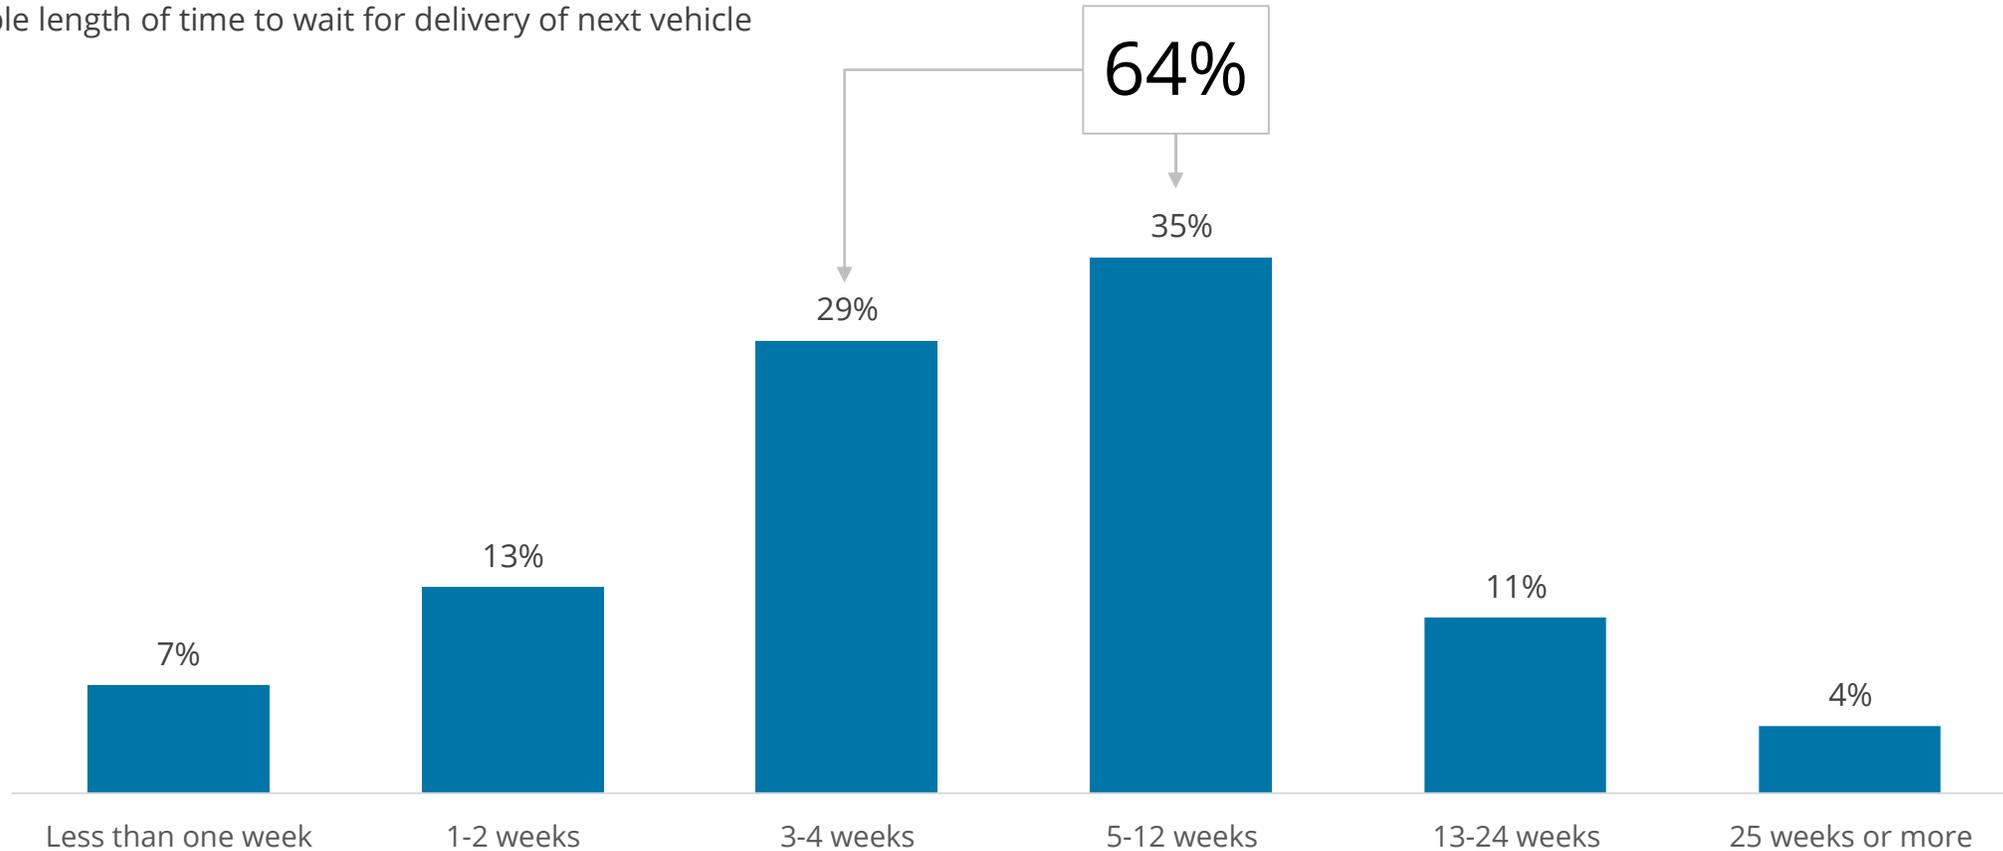

Q35. What are the most important factors driving the choice of brand for your next vehicle? (Please select all that apply).

Sample size: n= 871

Copyright © 2023 Deloitte Development LLC. All rights reserved.

The current inventory crisis may be training consumers to expect longer wait times for delivery of a new vehicle, opening the door to a more “build-to-order” retail paradigm.

Acceptable length of time to wait for delivery of next vehicle

Q37: In your opinion, what is an acceptable length of time to wait for delivery of your next vehicle if it meant you got exactly what you wanted (i.e., features, color, etc.)?

Sample size: n= 871

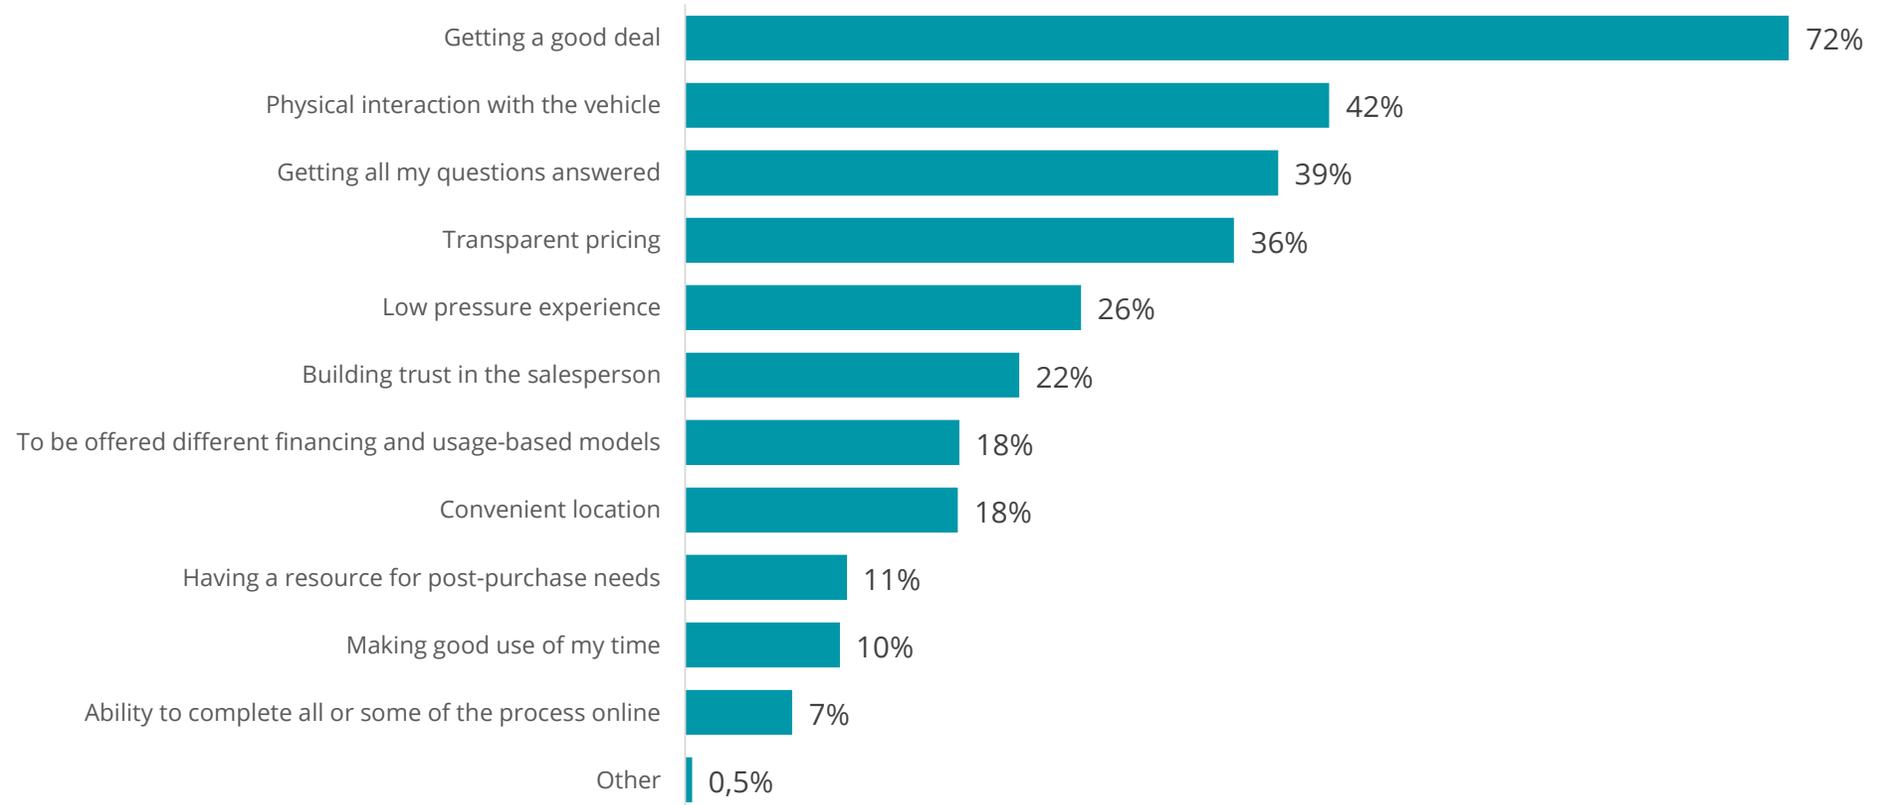

Copyright © 2023 Deloitte Development LLC. All rights reserved.

AUSTRIA

2023 Deloitte Global Automotive Consumer Study

Having said that, some things never change as consumers still need a good deal and hands-on physical interaction before they commit to buying a vehicle.

Most important aspects of the vehicle purchase experience

Note: Sum of the percentages exceed 100% as respondents can select multiple options.

Q59: When looking to acquire your next vehicle, what are the top three most important aspects of the purchase experience?

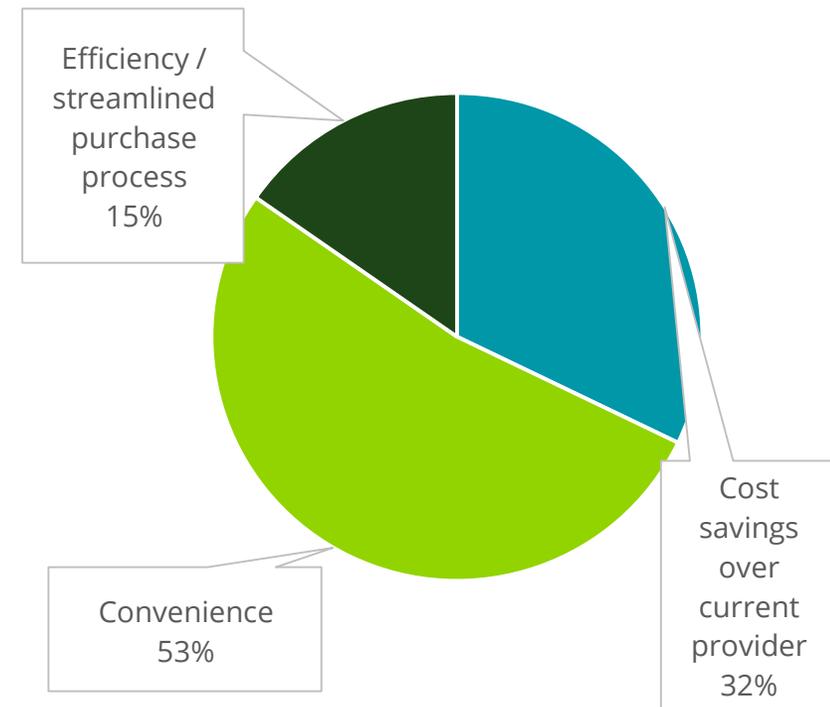

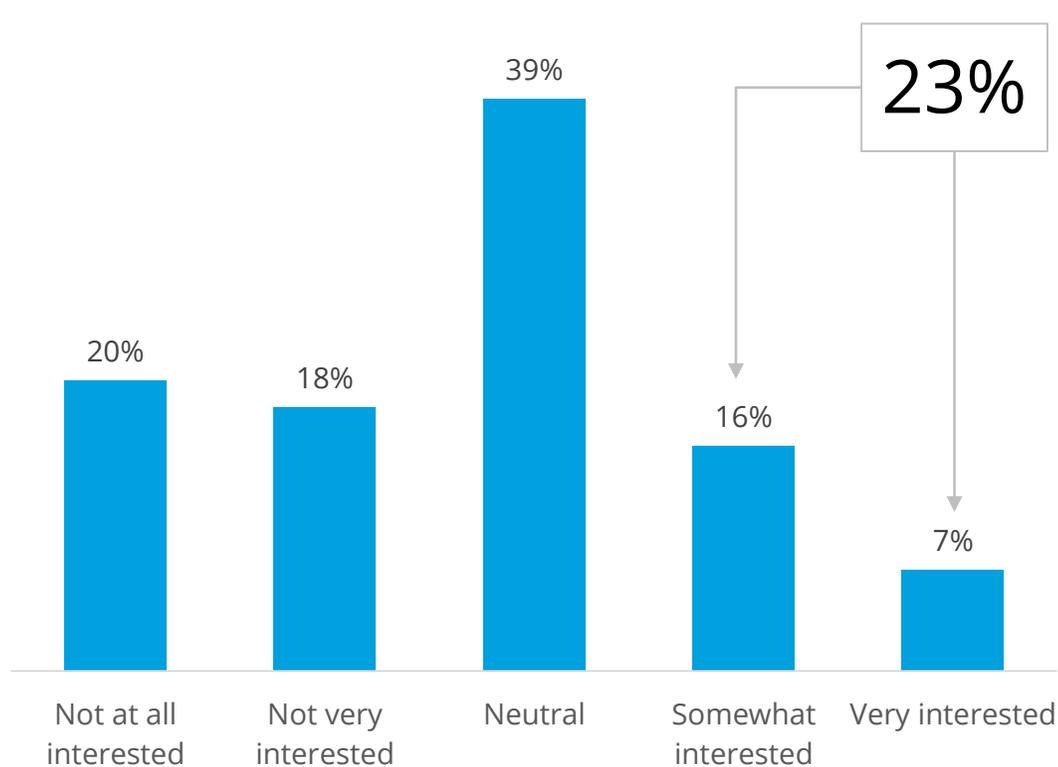

Sample size: n= 871

While 8 in 10 consumers believe that their vehicle brands create quality products and services, significantly fewer people believe OEMs demonstrate transparency and empathy.

Consumer opinions on the brand of vehicle they currently own

NPS*

*Net promoter score (percentage agree minus percentage disagree).

Note: Disagree includes strongly disagree, disagree, and somewhat disagree values; Agree includes strongly agree, agree, and somewhat agree values.

Q18: To what extent do you agree or disagree with the following statements relative to the brand of vehicle you currently own?

Sample size: n= 832

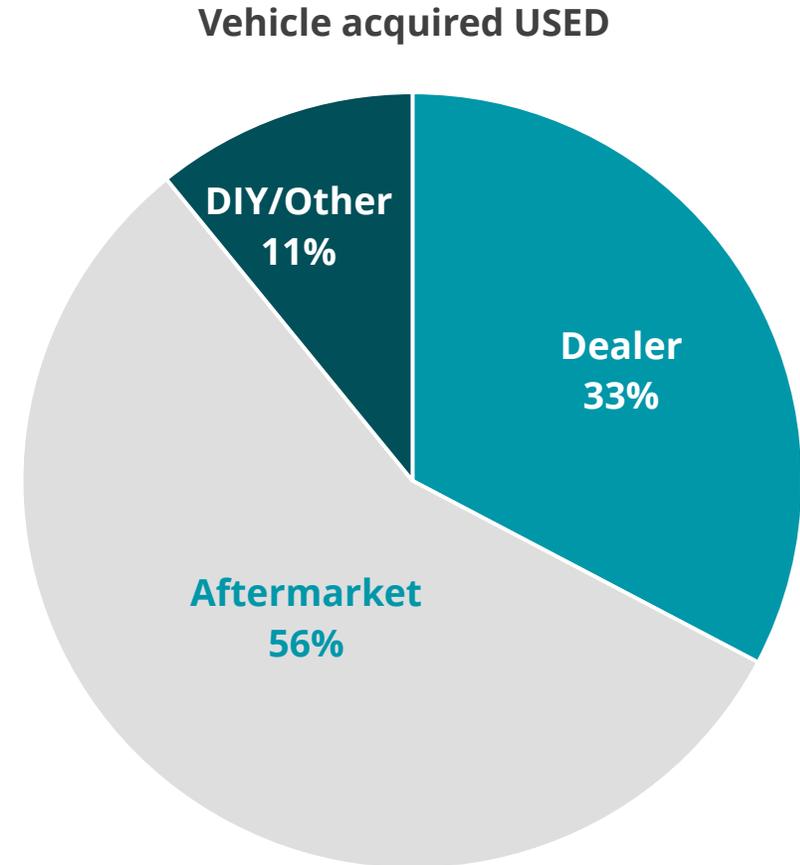

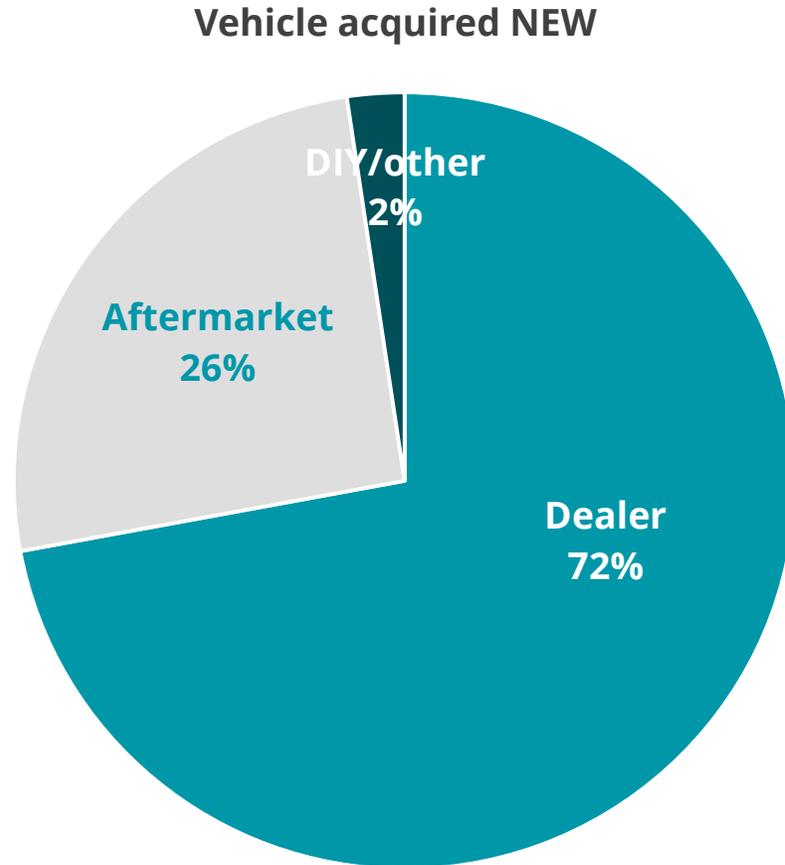

Copyright © 2023 Deloitte Development LLC. All rights reserved.

AUSTRIA

2023 Deloitte Global Automotive Consumer Study

Nearly 3 in 4 consumers who originally acquired their vehicle new routinely take it back to the dealer for service, whereas only one-third of used vehicle owners do the same.

Preferred vehicle service provider by how current vehicle was acquired

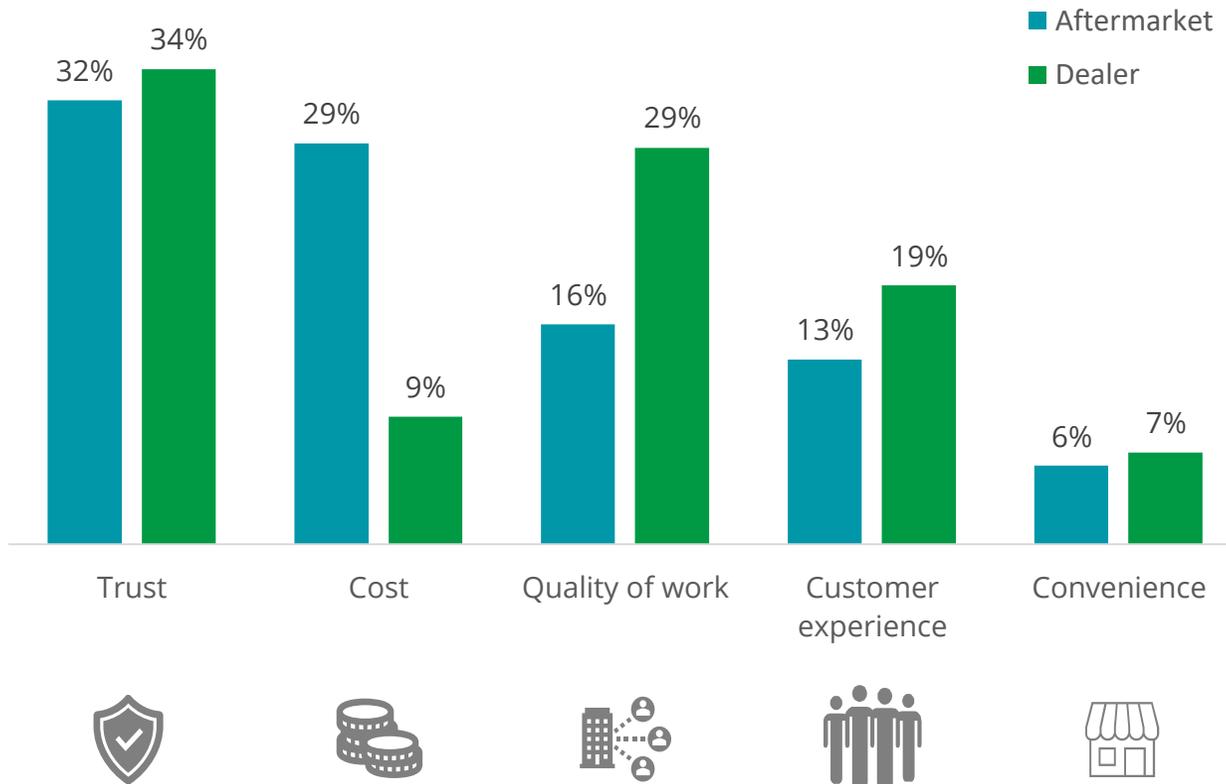

Q24: Where do you normally service your vehicle?

Sample size: n= 380 [New], 452 [Used]

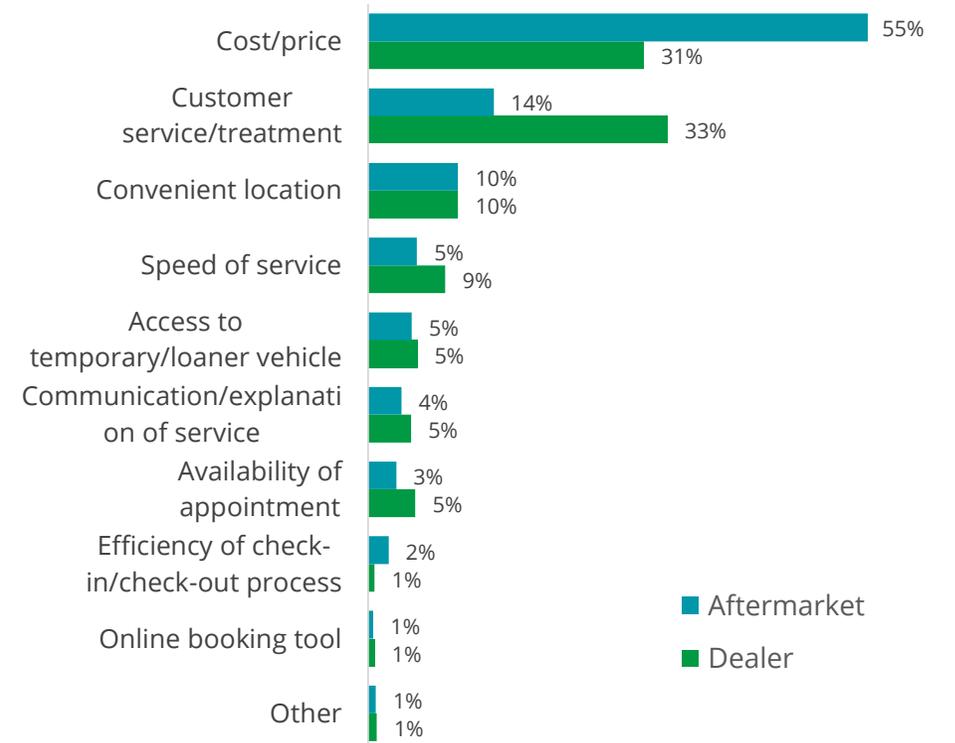

Copyright © 2023 Deloitte Development LLC. All rights reserved.

Trust is the main reason for consumers when choosing a vehicle service provider. When it comes to the service experience, cost/price of service ranks at the top.

Reasons for choosing vehicle service provider (by preferred provider)

Most important aspect of the vehicle service experience (by preferred provider)

Note: "Other" reasons not shown for choosing a vehicle service provider.

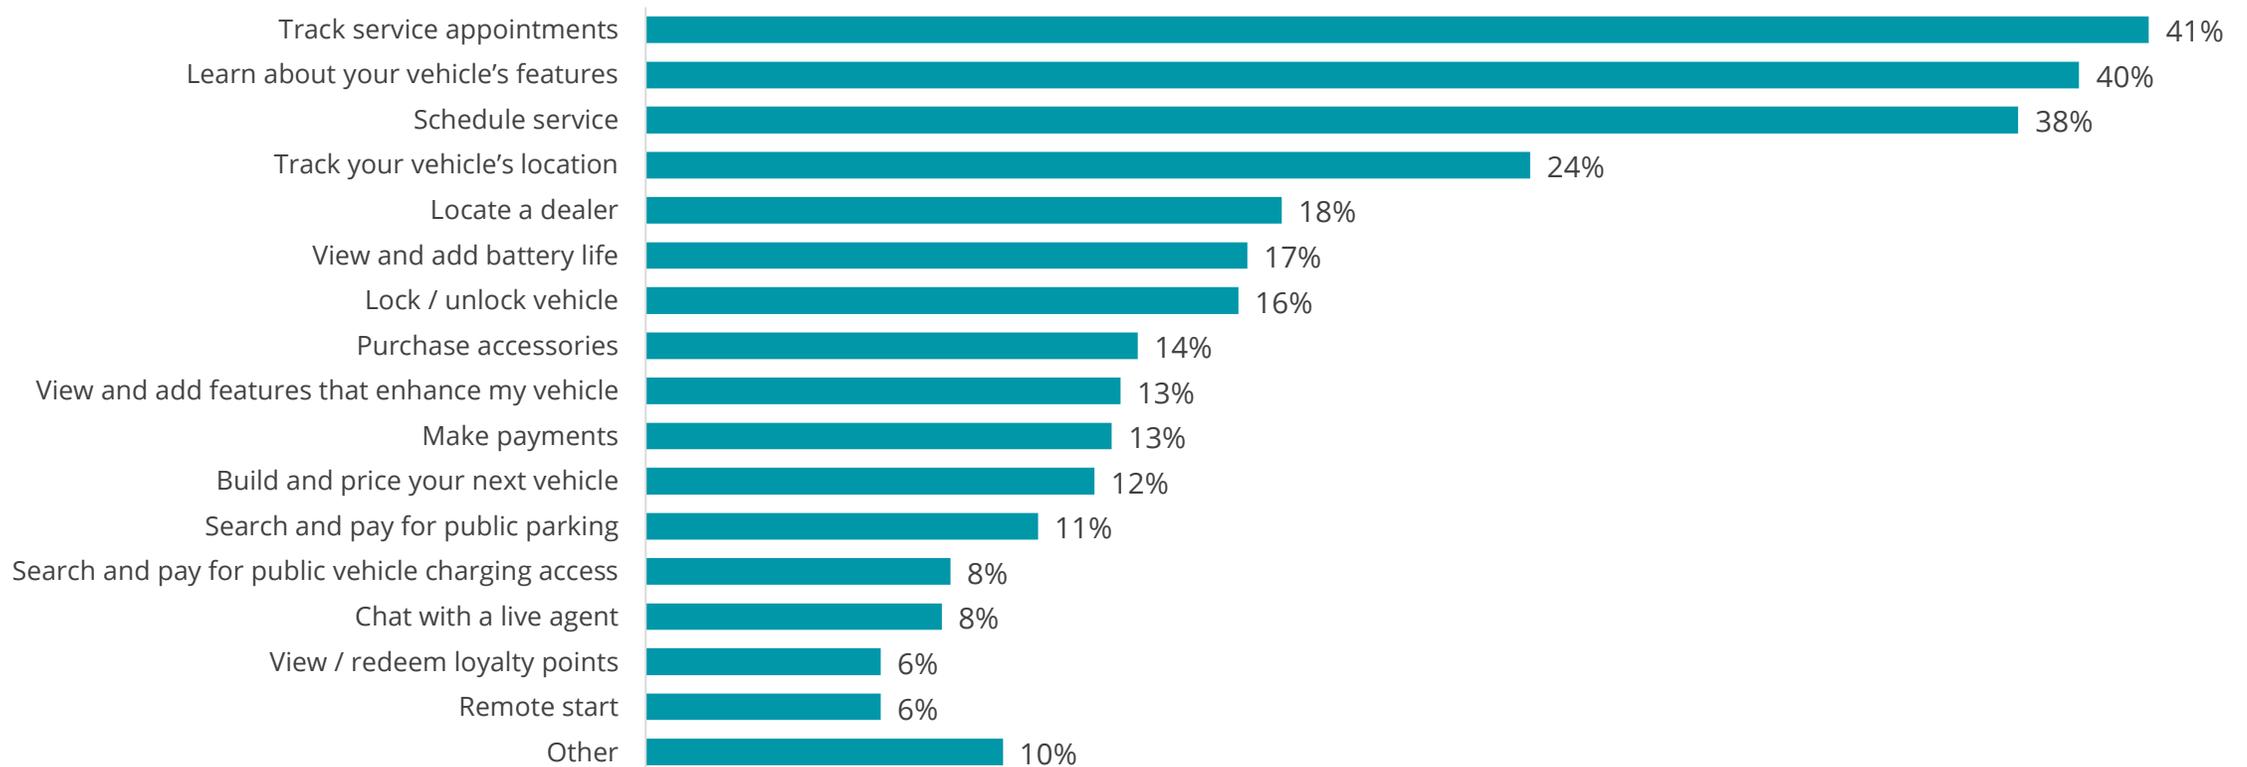

Q25: What is the most important reason for your preferred choice of vehicle service provider?; Q26: What is the most important aspect of a vehicle service experience?

Sample size: n= 422 [Dealer] and 352 [Aftermarket] for Q25 and Q26

Copyright © 2023 Deloitte Development LLC. All rights reserved.

Consumers most prefer to access features/applications that help them in scheduling/tracking service appointments and learning about their vehicle's features.

Important features of a vehicle brand app

Note: Sum of the percentages exceed 100% as respondents can select multiple options.

Q28: What are the most important features of a vehicle brand app? Please select all that apply.

Sample size: n= 832

About the study

About the study

Survey timing

September 30 to October 07, 2022

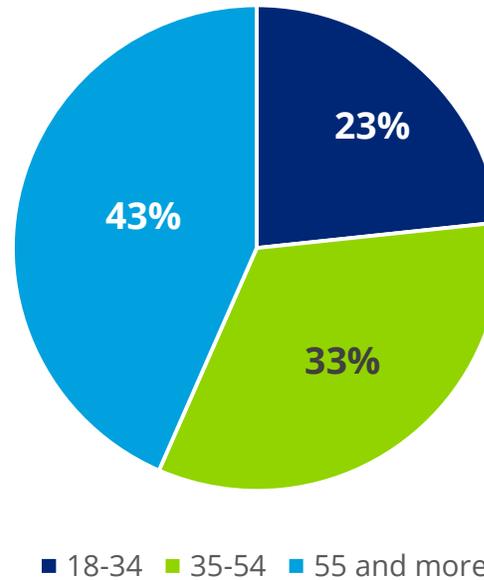

Sample

The survey polled a sample of 1,004 consumers in Austria. The survey has a margin of error for the entire sample of +/-3.1%

Methodology

The study is fielded using an online panel methodology where consumers of driving age are invited to complete the questionnaire (translated into local languages where applicable) via email.
