About this publication

Model financial statements for the year ended 31 December 2018

About this publication

Purpose

These International GAAP Holdings Limited model financial statements illustrate the presentation and disclosure requirements of IFRSs for the year ended 31 December 2018 by an entity that is not a first-time adopter of IFRSs. They comprise consolidated financial statements that illustrate the impact of the application of IFRSs that are mandatorily effective for the annual period beginning on 1 January 2018.

The International GAAP Holdings Limited model financial statements however, do not illustrate all the presentation and disclosure requirements specific to annual reports prepared in Australia. Therefore, we have developed the *Australian Financial Reporting Guide* to assist users to use these model financial statements in the preparation of **general purpose financial reports** in Australia in accordance with:

- Provisions of the *Corporations Act 2001*
- Accounting Standards and Interpretations issued by the Australian Accounting Standards Board
- Other requirements and guidelines current as at the date of issue, including Australian Securities Exchange (ASX) Listing Rules, Australian Securities and Investments Commission (ASIC) Class Orders/Corporations Instruments, Regulatory Guides and Media Releases.

This International GAAP Holdings Limited model financial report includes disclosures that apply to general purpose financial statements (Tier 1 and Tier 2 (RDR)). It is intended to be read in conjunction with the *Australian financial reporting guide*, which is designed to 'bring it all together' so that you can understand reporting requirements, ensure compliance and develop your own reporting in line with best practice. The *Guide* is available at www.deloitte.com/au/models.

See section 9 *Using the illustrative financial statements* in the *Guide* for how to use these Deloitte model financial statements in conjunction with the *Guide*. This section of the *Guide* provides a breakdown of the content of a typical general purpose financial report and where (i.e. in section 10 *Illustrative disclosures* of the *Guide* or in these model financial statements) illustrative disclosures relevant to Australian entities can be located for each requirement. In some instances, the illustrative disclosures in section 10 of the *Guide* replace the illustrative disclosures in these model financial statements.

Limitations

This illustration is not designed to meet specific needs of a first-time adopter of Australian Accounting Standards, not-for-profit entities, specialised industries (e.g. life insurance companies, credit unions, etc.) or the specific information needs of any particular special purpose users. Rather, it is intended to illustrate the minimum information to be disclosed in the annual report of a company that is a reporting entity in order to satisfy the reporting requirements of the *Corporations Act 2001*.

Basis of preparation

Accounting policy choices

For the purposes of presenting the statements of profit or loss and other comprehensive income and cash flows, the alternatives allowed under Australian Accounting Standards for those statements have been illustrated. Preparers should select the alternatives most appropriate to their circumstances.

Showing 'nil' amounts

In these model financial statements, no amounts are shown, but line items are included to illustrate items that are commonly encountered in practice. This does not mean that we have illustrated all possible disclosures. Nor should it be taken to mean that, in practice, entities are required to display line items for 'nil' amounts in both periods.

Assumptions

As this model does not cover all situations that may be encountered in practice, knowledge of the disclosure provisions of the *Corporations Act 2001*, Accounting Standards and Interpretations are prerequisites for the preparation of annual reports.

Source references

References to the relevant requirements are provided in the left hand column of each page of this illustration. Where doubt exists as to the appropriate treatment, examination of the source of the disclosure requirement is recommended.

Understanding source references in these model financial statements

The source references included in this model financial report generally refer to the international versions of pronouncements, rather than their Australian equivalents. Accordingly:

- References to "IFRS X" should instead be read as a reference to the Australian equivalent "AASB X"
- References to "IAS X" should instead be read as a reference to the Australian equivalent "AASB 10X" (where X is less than 10) or "AASB 1X" (otherwise)
- References to "IFRIC X" should instead be read as a reference to the Australian equivalent "Interpretation X"
- References to "SIC X" should instead be read as a reference to the Australian equivalent "Interpretation 10X" (where X is less than 10) or "Interpretation 1X" (otherwise)

The illustrative disclosures in this publication and the Australian Financial Reporting Guide which are not applicable to Tier 2 general purpose financial statements have been shaded in grey. If an entity applying Tier 2 (RDR) chooses to present additional disclosures, they must be prepared in accordance with the relevant Accounting Standards.

* The comparative information has been restated as a result of the initial application of IFRS 9 and IFRS 15 as discussed in note 2.

Commentary:

In accordance with IFRS 9, reclassification adjustments do not arise if a cash flow hedge or the accounting for the time value of an option (or the forward element of a forward contract or the foreign currency basis spread of a financial instrument) results in amounts that are removed from the cash flow hedge reserve or the cost of hedging reserve, respectively, and included directly in the initial cost of a hedged non-financial asset or non-financial liability, or in the carrying amount of a firm commitment for a non-financial asset or a non-financial liability for which fair value hedge accounting is applied (collectively referred to in the rest of these statements as 'hedged non-financial asset or non-financial liability' for ease of reference). These amounts are directly transferred to the related assets or liabilities and are generally referred to as 'basis adjustments'. The gains and losses recognised in cash flow hedge reserve and cost of hedging reserve that will be subject to basis adjustments are therefore presented as amounts that will not be subsequently reclassified to profit or loss; whereas those that are not subject to basis adjustments are presented as amounts that may be reclassified subsequently to profit or loss.

Commentary:**One statement vs. two statements**

IAS 1 permits an entity to present profit or loss and other comprehensive income (OCI) in either a single statement or in two separate but consecutive statements. Alt 1 above illustrates the presentation of profit or loss and OCI in two separate but consecutive statements with expenses analysed by function. Alt 2 (see the following pages) illustrates the presentation of profit or loss and OCI in one statement with expenses analysed by nature.

Whichever presentation approach is adopted, the distinction is retained between items recognised in profit or loss and items recognised in OCI. Under both approaches, profit or loss, total OCI, as well as comprehensive income for the period (being the total of profit or loss and OCI) should be presented. Under the two-statement approach, the separate statement of profit or loss ends at 'profit for the year', and this 'profit for the year' is then the starting point for the statement of profit or loss and other comprehensive income. In addition, the analysis of 'profit for the year' between the amount attributable to the owners of the Company and the amount attributable to non-controlling interests is presented as part of the separate statement of profit or loss.

Note that where the two-statement approach is adopted (as below), as required by IAS 1:10A, the statement of profit or loss must be displayed immediately before the statement of comprehensive income.

OCI: items that may or may not be reclassified

Irrespective of whether the one-statement or the two-statement approach is followed, the items of OCI should be classified by nature and grouped into those that, in accordance with other IFRS Standards: (a) will not be reclassified subsequently to profit or loss; and (b) may be reclassified subsequently to profit or loss when specific conditions are met. An entity should present its share of OCI of associates and joint ventures accounted for using the equity method separately from those arising from the Group.

Presentation options for reclassification adjustments

In addition, in accordance with IAS 1:94, an entity may present reclassification adjustments in the statement of profit or loss and other comprehensive income or in the notes. In these model financial statements the reclassification adjustments have been presented in the notes.

Presentation options for income tax relating to items of OCI

Furthermore, for items of OCI, additional presentation options are available as follows: the individual items of OCI may be presented net of tax in the statement of profit or loss and other comprehensive income, or they may be presented gross with a single line deduction for tax relating to those items by allocating the tax between the items that may be reclassified subsequently to the profit or loss section and those that will not be reclassified subsequently to profit or loss section as presented in these model financial statements. Whichever option is selected, the income tax relating to each item of OCI must be disclosed, either in the statement of profit or loss and other comprehensive income or in the notes (see Note 13).

Subtotals

When an entity presents subtotals, those subtotals should:

- comprise of line items made up of amounts recognised and measured in accordance with IFRS Standards;
- be presented and labelled in a manner that makes the line items that constitute the subtotal clear and understandable;
- be consistent from period to period; and
- not be displayed with more prominence than the subtotals and totals required in IFRS Standards.

Immaterial items

An entity need not provide a specific disclosure required by an IFRS Standard if the information resulting from that disclosure is not material. This is the case even if the IFRS Standard contains a list of specific requirements or describes them as minimum requirements.

The transition provisions of IFRS 9 allow an entity not to restate comparatives. However, the Group has elected to restate comparatives in respect of the classification and measurement of financial instruments.</p> <p>Additionally, the Group adopted consequential amendments to IFRS 7 <i>Financial Instruments: Disclosures</i> that were applied to the disclosures for 2018 and to the comparative period.</p> <p>IFRS 9 introduced new requirements for:</p> <ol style="list-style-type: none"> 1) The classification and measurement of financial assets and financial liabilities, 2) Impairment of financial assets, and 3) General hedge accounting. <p>Details of these new requirements as well as their impact on the Group's consolidated financial statements are described below.</p> <p>The Group has applied IFRS 9 in accordance with the transition provisions set out in IFRS 9.</p>
IAS 8:28(b)	<p><i>(a) Classification and measurement of financial assets</i></p> <p>The date of initial application (i.e. the date on which the Group has assessed its existing financial assets and financial liabilities in terms of the requirements of IFRS 9) is 1 January 2018. Accordingly, the Group has applied the requirements of IFRS 9 to instruments that continue to be recognised as at 1 January 2018 and has not applied the requirements to instruments that have already been derecognised as at 1 January 2018. Comparative amounts in relation to instruments that continue to be recognised as at 1 January 2018 have been restated where appropriate.</p>

Source

International GAAP Holdings Limited

Commentary:

The date of initial application of IFRS 9 is significant because it is the date on which certain conditions for classification and measurement are assessed. On the date of initial application, an entity assesses whether a financial asset meets the business model test for amortised cost and FVTOCI measurement on the basis of the facts and circumstances that exist at that date. The resulting classification is applied retrospectively irrespective of the entity's business model in prior reporting periods.

All recognised financial assets that are within the scope of IFRS 9 are required to be measured subsequently at amortised cost or fair value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

Specifically:

- debt instruments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are measured subsequently at amortised cost;
- debt instruments that are held within a business model whose objective is both to collect the contractual cash flows and to sell the debt instruments, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are measured subsequently at fair value through other comprehensive income (FVTOCI);
- all other debt investments and equity investments are measured subsequently at fair value through profit or loss (FVTPL).

Despite the foregoing, the Group may make the following irrevocable election/designation at initial recognition of a financial asset:

- the Group may irrevocably elect to present subsequent changes in fair value of an equity investment that is neither held for trading nor contingent consideration recognised by an acquirer in a business combination in other comprehensive income; and
- the Group may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

In the current year, the Group has not designated any debt investments that meet the amortised cost or FVTOCI criteria as measured at FVTPL.

When a debt investment measured at FVTOCI is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment. When an equity investment designated as measured at FVTOCI is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is subsequently transferred to retained earnings.

Debt instruments that are measured subsequently at amortised cost or at FVTOCI are subject to impairment. See (b) below.

See note 2 section 10 Illustrative disclosures in the December 2018 Guide for an Australian specific version of note 2 (including details of RDR shading)

Source

International GAAP Holdings Limited

The directors of the Company reviewed and assessed the Group's existing financial assets as at 1 January 2018 based on the facts and circumstances that existed at that date and concluded that the initial application of IFRS 9 has had the following impact on the Group's financial assets as regards their classification and measurement:

- the Group's investments in redeemable notes were classified as available-for-sale financial assets under IAS 39 *Financial Instruments: Recognition and Measurement*. The notes have been reclassified as financial assets at amortised cost because they are held within a business model whose objective is to collect the contractual cash flows and they have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding;
- the Group's investment in corporate bonds that were classified as available-for-sale financial assets under IAS 39 have been classified as financial assets at FVTOCI because they are held within a business model whose objective is both to collect contractual cash flows and to sell the bonds, and they have contractual cash flows that are solely payments of principal and interest on principal outstanding. The change in the fair value on these redeemable notes continues to accumulate in the investment revaluation reserve until they are derecognised or reclassified;
- the Group's investments in equity instruments (neither held for trading nor a contingent consideration arising from a business combination) that were previously classified as available-for-sale financial assets and were measured at fair value at each reporting date under IAS 39 have been designated as at FVTOCI. The change in fair value on these equity instruments continues to be accumulated in the investment revaluation reserve;
- there is no change in the measurement of the Group's investments in equity instruments that are held for trading; those instruments were and continue to be measured at FVTPL;
- financial assets classified as held-to-maturity and loans and receivables under IAS 39 that were measured at amortised cost continue to be measured at amortised cost under IFRS 9 as they are held within a business model to collect contractual cash flows and these cash flows consist solely of payments of principal and interest on the principal amount outstanding.

Note (e) below tabulates the change in classification of the Group's financial assets upon application of IFRS 9.

The change in classification of the investment in redeemable notes has resulted in the fair value gain on available-for-sale financial assets of CU___ (net of tax) accumulated in revaluation reserve being reclassified to the carrying value of the redeemable notes on 1 January 2017 and similarly the subsequent changes in the fair value of CU___ (net of tax) that were recognised in other comprehensive income during 2017 were reversed. The remaining amount accumulated in revaluation reserve of CU___ (2017: CU___) that used to be subsequently reclassified to profit or loss was split into two parts:

- 1) Those arising on equity investments designated as FVTOCI that will not be subsequently reclassified to profit or loss of CU___ (2017: CU___); and
- 2) Those arising from investment in corporate bonds measured at FVTOCI that may be subsequently reclassified to profit or loss of CU___ (2017: CU___).

Note (f) below details the adjustments arising from such classifications.

None of the other reclassifications of financial assets have had any impact on the Group's financial position, profit or loss, other comprehensive income or total comprehensive income in either year.

(b) Impairment of financial assets

In relation to the impairment of financial assets, IFRS 9 requires an expected credit loss model as opposed to an incurred credit loss model under IAS 39. The expected credit loss model requires the Group to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in credit risk since initial recognition of the financial assets. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognised.

Specifically, IFRS 9 requires the Group to recognise a loss allowance for expected credit losses on:

- (1) Debt investments measured subsequently at amortised cost or at FVTOCI;
- (2) Lease receivables;
- (3) Trade receivables and contract assets; and
- (4) Financial guarantee contracts to which the impairment requirements of IFRS 9 apply.

In particular, IFRS 9 requires the Group to measure the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses (ECL) if the credit risk on that financial instrument has increased significantly since initial recognition, or if the financial instrument is a purchased or originated credit-impaired financial asset. However, if the credit risk on a financial instrument has not increased significantly since initial recognition (except for a purchased or originated credit-impaired financial asset), the Group is required to measure the loss allowance for that financial instrument at an amount equal to 12-months ECL. IFRS 9 also requires a simplified approach for measuring the loss allowance at an amount equal to lifetime ECL for trade receivables, contract assets and lease receivables in certain circumstances.

Commentary:

The references to 'contract assets' above are as used in IFRS 9 and refer to those rights that IFRS 15 specifies are accounted for in accordance with IFRS 9 for the purposes of recognising and measuring impairment gains or losses.

Because the Group has elected to restate comparatives, for the purpose of assessing whether there has been a significant increase in credit risk since initial recognition of financial instruments that remain recognised on the date of initial application of IFRS 9 (i.e. 1 January 2018), the directors have compared the credit risk of the respective financial instruments on the date of their initial recognition to their credit risk as at 1 January 2017.

The result of the assessment is as follows:

See note 2 section 10 Illustrative disclosures in the December 2018 Guide for an Australian specific version of note 2 (including details of RDR shading)

Source	International GAAP Holdings Limited		Cumulative additional loss allowance recognised on:			
	Items existing as at 01/01/18 that are subject to the impairment provisions of IFRS 9	Note	Credit risk attributes at 01/01/17 and 01/01/18	01/01/17	01/01/18	
				CU	CU	
IFRS 9:B5.5.23	Loans to related parties	25	The directors have concluded that it would require undue cost and effort to determine the credit risk of each loan on their respective dates of initial recognition. These loans are also assessed to have credit risk other than low. Accordingly, the Group recognises lifetime ECL for these loans until they are derecognised.			
	Loans to other entities	25				
	Debentures	25				
	Bills of exchange (external credit rating: A)	25	These items are assessed to have low credit risk at each reporting date based on their respective external credit ratings. As such, the Group assumes that the credit risk on these financial instruments has not increased significantly since initial recognition as permitted by IFRS 9 and recognises 12-months ECL for these assets.			
	Corporate Bonds (external credit rating: BBB)	25				
	Redeemable notes (external credit rating: AA)	25				
	Trade receivables	31	The Group applies the simplified approach and recognises lifetime ECL for these assets.	No impairment on finance lease receivables due to existence of collateral		
	Finance lease receivables	30				
	Contract assets	29				
	Cash and bank balances	54	All bank balances are assessed to have low credit risk at each reporting date as they are held with reputable international banking institutions.			
Financial guarantee contracts	38	All financial guarantee contracts were issued in 2017. There has been no significant increase in the risk of default on the underlying loans since initial recognition up to 1 January 2018. The Group therefore recognises 12-months ECL for these contracts.	N/A			
<p>The additional credit loss allowance of CU___ as at 1 January 2018 and CU___ as at 1 January 2017 has been recognised against retained earnings on the respective dates, net of their related deferred tax impact of CU___ and CU___ respectively, resulting in a net decrease in retained earnings of CU___ and CU___ as at 1 January 2018 and 2017 respectively. The additional loss allowance is charged against the respective asset or provision for financial guarantee, except for the investment in redeemable notes which is measured at FVTOCI, the loss allowance for which is recognised against the investment revaluation reserve (see note 42). The application of the IFRS 9 impairment requirements has resulted in additional loss allowance of CU___ to be recognised in year ended 31 December 2017. See (e) and (f) below for further financial details of the adjustments.</p>						
See note 2 section 10 Illustrative disclosures in the December 2018 Guide for an Australian specific version of note 2 (including details of RDR shading)						

Source	International GAAP Holdings Limited
IFRS 7:42P	<p>The reconciliation between the ending provision for impairment in accordance with IAS 39 and the provision in accordance with IAS 37 (for the financial guarantee contracts) to the opening loss allowance determined in accordance with IFRS 9 for the above financial instruments on 1 January 2017 and 1 January 2018 is disclosed in their respective notes.</p> <p>The consequential amendments to IFRS 7 have also resulted in more extensive disclosures about the Group's exposure to credit risk in the consolidated financial statements (see notes 25, 28, 30, 31, 34 and 62(c) for details).</p> <p><i>(c) Classification and measurement of financial liabilities</i></p> <p>A significant change introduced by IFRS 9 in the classification and measurement of financial liabilities relates to the accounting for changes in the fair value of a financial liability designated as at FVTPL attributable to changes in the credit risk of the issuer.</p> <p>Specifically, IFRS 9 requires that the changes in the fair value of the financial liability that is attributable to changes in the credit risk of that liability be presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss, but are instead transferred to retained earnings when the financial liability is derecognised. Previously, under IAS 39, the entire amount of the change in the fair value of the financial liability designated as at FVTPL was presented in profit or loss.</p> <p>This change in accounting policy has affected the Group's accounting for changes in the fair value of redeemable cumulative preference shares issued by the Group in the current year that were designated by the Group on initial recognition as financial liabilities at FVTPL. Specifically, the gain arising from changes in the fair value of the redeemable cumulative preference shares attributable to changes in the credit risk of the liabilities of CU___ has been presented in other comprehensive income in the current year. The remaining amount of change in the fair value of the liabilities of CU___ has been presented in profit or loss.</p> <p>Accordingly, this aspect of the application of IFRS 9 has resulted in the profit reported for 2018 being decreased by CU___ (CU___ net of tax of CU___), with a corresponding increase in other comprehensive income thus leaving total comprehensive income for 2018 unchanged. Profit and other comprehensive income reported for 2017 have not been affected as the Group did not have any financial liabilities designated as at FVTPL in the prior year.</p> <p>Apart from the above, the application of IFRS 9 has had no impact on the classification and measurement of the Group's financial liabilities.</p> <p>Please refer to (e) below and (f) below for further details regarding the change in classification upon the application of IFRS 9.</p> <p><i>(d) General hedge accounting</i></p> <p>The new general hedge accounting requirements retain the three types of hedge accounting. However, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is also no longer required. Enhanced disclosure requirements about the Group's risk management activities have also been introduced.</p> <p>In accordance with IFRS 9's transition provisions for hedge accounting, the Group has applied the IFRS 9 hedge accounting requirements prospectively from the date of initial application on 1 January 2018. The Group's qualifying hedging relationships in place as at 1 January 2018 also qualify for hedge accounting in accordance with IFRS 9 and were therefore regarded as continuing hedging relationships. No rebalancing of any of the hedging relationships was necessary on 1 January 2018. As the critical terms of the hedging instruments match those of their corresponding hedged items, all hedging relationships continue to be effective under IFRS 9's effectiveness assessment requirements. The Group has also not designated any hedging relationships under IFRS 9 that would not have met the qualifying hedge accounting criteria under IAS 39.</p> <p>See note 2 section 10 Illustrative disclosures in the December 2018 Guide for an Australian specific version of note 2 (including details of RDR shading)</p>

Source	International GAAP Holdings Limited
--------	-------------------------------------

IFRS 9 requires hedging gains and losses to be recognised as an adjustment to the initial carrying amount of non-financial hedged items (basis adjustment). In addition, transfers from the hedging reserve to the initial carrying amount of the hedged item are not reclassification adjustments under IAS 1 *Presentation of Financial Statements* and hence they do not affect other comprehensive income. Hedging gains and losses subject to basis adjustments are categorised as amounts that will not be subsequently reclassified to profit or loss in other comprehensive income. This is consistent with the Group's practice prior to the adoption of IFRS 9.

Consistent with prior periods, when a forward contract is used in a cash flow hedge or fair value hedge relationship, the Group has designated the change in fair value of the entire forward contract, i.e. including the forward element, as the hedging instrument.

When the option contracts are used to hedge the forecast transactions, the Group designates only the intrinsic value of the options as the hedging instrument. Under IAS 39 the changes in the fair value of time value of option (i.e. non-designated component) were recognised immediately in profit or loss. Under IFRS 9, the changes in the time value of the options that relate to the hedged item ('aligned time value') are recognised in other comprehensive income and accumulated in the cost of hedging reserve within equity. The amounts accumulated in equity are either reclassified to profit or loss when the hedged item affects profit or loss or removed directly from equity and included in the carrying amount of non-financial item. IFRS 9 requires that the accounting for non-designated time value of option should be applied retrospectively. This only applies to hedging relationships that existed at 1 January 2017 or were designated thereafter. Accordingly, as of 1 January 2017 the retained earnings increased by CU___ (net of tax) and cost of hedging reserve decreased by CU___ (net of tax). As of 31 December 2017 the profit or loss decreased by CU___ (net of tax) due to reversal of previously recognised change in fair value of time value of options during 2017, other comprehensive income net increase of CU___ (net of tax) caused by recognised change in fair value of time value of options of CU___ (net of tax) during 2017 less reclassification of amount accumulated in cost of hedging reserve of CU___ (net of tax). Additionally, CU___ (net of tax) was removed from cost of hedging reserve and included in the initial carrying value of the inventory as of 31 December 2017.

Apart from this, the application of the IFRS 9 hedge accounting requirements has had no other impact on the results and financial position of the Group for the current and/or prior years. Please refer to note 62(c) for detailed disclosures regarding the Group's risk management activities.

(e) Disclosures in relation to the initial application of IFRS 9

Commentary:

When IFRS 9 was finalised in 2014, consequential amendments were made to IFRS 7 to require certain disclosures when an entity first applies IFRS 9. The disclosures apply regardless of whether an entity restates comparatives.

IFRS 7:42I(c);
IFRS 7:42J(b)

There were no financial assets or financial liabilities which the Group had previously designated as at FVTPL under IAS 39 that were subject to reclassification or which the Group has elected to reclassify upon the application of IFRS 9. There were no financial assets or financial liabilities which the Group has elected to designate as at FVTPL at the date of initial application of IFRS 9.

IFRS 7:42K;
IFRS 7:42L;
IFRS 7:42O

The table below shows information relating to financial assets that have been reclassified as a result of transition to IFRS 9.

IAS 8:28(f)(i)	The application of IFRS 9 has had no impact on the consolidated cash flows of the Group.																		
IAS 8:28(f)(ii)	The impact of the application of IFRS 9 on basic and diluted earnings per share is disclosed in note 16.																		
	<p>Impact of application of IFRS 15 Revenue from Contracts with Customers</p> <p>In the current year, the Group has applied IFRS 15 <i>Revenue from Contracts with Customers</i> (as amended in April 2016) which is effective for an annual period that begins on or after 1 January 2018. IFRS 15 introduced a 5-step approach to revenue recognition. Far more prescriptive guidance has been added in IFRS 15 to deal with specific scenarios. Details of the new requirements as well as their impact on the Group's consolidated financial statements are described below.</p> <p>The Group has applied IFRS 15 in accordance with the fully retrospective transitional approach without using the practical expedients for completed contracts in IFRS 15:C5(a), and (b), or for modified contracts in IFRS 15:C5(c) but using the expedient in IFRS 15:C5(d) allowing both non-disclosure of the amount of the transaction price allocated to the remaining performance obligations, and an explanation of when it expects to recognise that amount as revenue for all reporting periods presented before the date of initial application, i.e. 1 January 2018.</p> <p>IFRS 15 uses the terms 'contract asset' and 'contract liability' to describe what might more commonly be known as 'accrued revenue' and 'deferred revenue', however the Standard does not prohibit an entity from using alternative descriptions in the statement of financial position. The Group has adopted the terminology used in IFRS 15 to describe such balances. The term deferred income is used in respect of the government grant balances that are disclosed in note 59 and are not within the scope of IFRS 15.</p> <p>The Group's accounting policies for its revenue streams are disclosed in detail in note 3 below. Apart from providing more extensive disclosures for the Group's revenue transactions, the application of IFRS 15 has not had a significant impact on the financial position and/or financial performance of the Group. The amount of adjustment for each financial statement line item affected by the application of IFRS 15 is illustrated below.</p>

	<p>(1) For internet sales of electronic equipment there is a timing difference between payment for the goods and when control of the goods passes to the customer on delivery. An adjustment to revenue has therefore been made to reflect the change in accounting. A contract liability has also been recognised for this amount.</p> <p>(2) The amounts allocated to the maintenance service for electronic equipment increased as a result of the allocation method required under IFRS 15 (i.e. an allocation based on stand-alone selling price). Such services are paid up-front as part of the initial sales transaction whereas revenue is recognised proportionally over the three-year period over which maintenance services are provided to the customer. Based on the previous allocation method, no amounts were deferred as the impact was not considered to be material. There has been an adjustment to revenue and the recognition of a contract liability to reflect the change in accounting.</p> <p>(3) Under the Group's standard contract terms for the sale of leisure goods and electronic equipment, customers have a right of return within 30 days. At the point of sale, a refund liability and a corresponding adjustment to revenue is recognised for those products expected to be returned. At the same time, the Group has a right to recover the product from customers when they exercise their right of return so consequently recognises a right to returned goods asset and a corresponding adjustment to cost of sales.</p> <p>(4) The Group incurs incremental commission fees paid to intermediaries in connection with obtaining residential property sales contracts. When the Group expects that these incremental costs will be recovered, it capitalises these and amortises them over the period during which the residential property is transferred to the customer. These amounts were previously expensed as incurred.</p> <p>(5) To recognise the impact on deferred income tax of the other adjustments recognised.</p> <p>(6) The installation process for software services takes an average of six months to complete and the company is not entitled to bill the customer until the process is complete. Under IFRS 15, revenue recognised prior to the date on which it is invoiced to the customer is recognised as a contract asset. This balance was previously recognised as part of amounts due from customers under construction contracts and so has been reclassified. There was no impact on the statement of profit or loss as a result of these reclassifications.</p>			
	See note 2 section 10 Illustrative disclosures in the December 2018 Guide for an Australian specific version of note 2 (including details of RDR shading)			

Source	International GAAP Holdings Limited
	<p>(7) The adjustment to deferred revenue relates to the reclassification of a balance that was previously recognised as part of deferred revenue and that has been reclassified as a contract liability. This balance relates to the Group's Maxi-Points scheme. This had no impact on the statement of profit or loss. The remaining deferred revenue balance relates to an amount recognised for a government grant that is now presented as deferred income.</p> <p>(8) The contract asset (liability) balance also includes an amount reclassified from amounts due from (to) customers under construction contracts. This had no impact on the statement of profit or loss.</p> <p>In the current year, the Group has applied a number of amendments to IFRS Standards and Interpretations issued by the International Accounting Standards Board (IASB) that are effective for an annual period that begins on or after 1 January 2018. Their adoption has not had any material impact on the disclosures or on the amounts reported in these financial statements.</p> <p>IFRS 2 (amendments) <i>Classification and Measurement of Share-based Payment Transactions</i> The Group has adopted the amendments to IFRS 2 for the first time in the current year. The amendments clarify the following:</p> <ol style="list-style-type: none"> 1. In estimating the fair value of a cash-settled share-based payment, the accounting for the effects of vesting and non-vesting conditions should follow the same approach as for equity-settled share-based payments. 2. Where tax law or regulation requires an entity to withhold a specified number of equity instruments equal to the monetary value of the employee's tax obligation to meet the employee's tax liability which is then remitted to the tax authority (typically in cash), i.e. the share-based payment arrangement has a 'net settlement feature', such an arrangement should be classified as equity-settled in its entirety, provided that the share-based payment would have been classified as equity-settled had it not included the net settlement feature. 3. A modification of a share-based payment that changes the transaction from cash-settled to equity-settled should be accounted for as follows: <ol style="list-style-type: none"> (i) the original liability is derecognised; (ii) the equity-settled share-based payment is recognised at the modification date fair value of the equity instrument granted to the extent that services have been rendered up to the modification date; and (iii) any difference between the carrying amount of the liability at the modification date and the amount recognised in equity should be recognised in profit or loss immediately.
	<p>See note 2 section 10 Illustrative disclosures in the December 2018 Guide for an Australian specific version of note 2 (including details of RDR shading)</p>

IAS 40 (amendments) <i>Transfers of Investment Property</i>	The Group has adopted the amendments to IAS 40 Investment Property for the first time in the current year. The amendments clarify that a transfer to, or from, investment property necessitates an assessment of whether a property meets, or has ceased to meet, the definition of investment property, supported by observable evidence that a change in use has occurred. The amendments further clarify that the situations listed in IAS 40 are not exhaustive and that a change in use is possible for properties under construction (i.e. a change in use is not limited to completed properties).
<i>Annual Improvements to IFRS Standards 2014 – 2016 Cycle</i>	<i>The Group has adopted the amendments to IAS 28 included in the Annual Improvements to IFRS Standards 2014–2016 Cycle for the first time in the current year. The amendments clarify that the option for a venture capital organisation and other similar entities to measure investments in associates and joint ventures at FVTPL is available separately for each associate or joint venture, and that election should be made at initial recognition.</i>
Amendments to IAS 28 <i>Investments in Associates and Joint Ventures</i>	In respect of the option for an entity that is not an investment entity (IE) to retain the fair value measurement applied by its associates and joint ventures that are IEs when applying the equity method, the amendments make a similar clarification that this choice is available for each IE associate or IE joint venture.
IFRIC 22 <i>Foreign Currency Transactions and Advance Consideration</i>	IFRIC 22 addresses how to determine the 'date of transaction' for the purpose of determining the exchange rate to use on initial recognition of an asset, expense or income, when consideration for that item has been paid or received in advance in a foreign currency which resulted in the recognition of a non-monetary asset or non-monetary liability (for example, a non-refundable deposit or deferred revenue). The Interpretation specifies that the date of transaction is the date on which the entity initially recognises the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the Interpretation requires an entity to determine the date of transaction for each payment or receipt of advance consideration.

IAS 8:30 - 31

New and revised IFRS Standards in issue but not yet effective

Commentary:

Entities are required to disclose in their financial statements the potential impact of new and revised IFRS that have been issued but are not yet effective. The disclosures below reflect a cut-off date of 30 September 2018. The potential impact of the application of any new and revised IFRS issued by the IASB after 30 September 2018 but before the financial statements are issued should also be considered and disclosed. The impact of the application of the new and revised IFRS (see below) is for illustrative purposes only. Entities should analyse the impact based on their specific facts and circumstances.

At the date of authorisation of these financial statements, The Group has not applied the following new and revised IFRS Standards that have been issued but are not yet effective [and [in some cases] had not yet been adopted by the EU]:

Commentary:

The above statement should be tailored to be specific to the entity.

Most jurisdictions have a mechanism for incorporating IFRS into their financial reporting system. These mechanisms range from direct adoption of 'IFRS as issued by the IASB', through adopting local standards that are 'equivalent to IFRS', to the extensive endorsement mechanism used in the European Union.

The impact of the application of the new and revised IFRS Standards below is for illustrative purposes only. Entities should analyse the impact of these new or revised IFRS Standards on their financial statements based on their specific facts and circumstances and make appropriate disclosures.

IFRS 16	<i>Leases</i>
IFRS 17	<i>Insurance Contracts</i>
Amendments to IFRS 9	<i>Prepayment Features with Negative Compensation</i>
Amendments to IAS 28	<i>Long-term Interests in Associates and Joint Ventures</i>
Annual Improvements to IFRS Standards 2015–2017 Cycle	<i>Amendments to IFRS 3 Business Combinations, IFRS 11 Joint Arrangements, IAS 12 Income Taxes and IAS 23 Borrowing Costs</i>
Amendments to IAS 19 Employee Benefits	<i>Plan Amendment, Curtailment or Settlement</i>
IFRS 10 Consolidated Financial Statements and IAS 28 (amendments)	<i>Sale or Contribution of Assets between an Investor and its Associate or Joint Venture</i>
IFRIC 23	<i>Uncertainty over Income Tax Treatments</i>
<p>The directors do not expect that the adoption of the Standards listed above will have a material impact on the financial statements of the Group in future periods, except as noted below:</p>	
<p>IFRS 16 Leases</p>	
<p><u>General impact of application of IFRS 16 Leases</u></p>	
<p>IFRS 16 provides a comprehensive model for the identification of lease arrangements and their treatment in the financial statements for both lessors and lessees. IFRS 16 will supersede the current lease guidance including IAS 17 Leases and the related Interpretations when it becomes effective for accounting periods beginning on or after 1 January 2019. The date of initial application of IFRS 16 for the Group will be 1 January 2019.</p>	
<p>The Group has chosen the full retrospective application of IFRS 16 in accordance with IFRS 16:C5(a). Consequently, the Group will restate the comparative information.</p>	
<p>In contrast to lessee accounting, IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17.</p>	
<p><u>Impact of the new definition of a lease</u></p>	
<p>The Group will make use of the practical expedient available on transition to IFRS 16 not to reassess whether a contract is or contains a lease. Accordingly, the definition of a lease in accordance with IAS 17 and IFRIC 4 will continue to apply to those leases entered or modified before 1 January 2019.</p>	
<p>The change in definition of a lease mainly relates to the concept of control. IFRS 16 distinguishes between leases and service contracts on the basis of whether the use of an identified asset is controlled by the customer. Control is considered to exist if the customer has:</p>	
<ul style="list-style-type: none"> – The right to obtain substantially all of the economic benefits from the use of an identified asset; and – The right to direct the use of that asset. 	
<p>The Group will apply the definition of a lease and related guidance set out in IFRS 16 to all lease contracts entered into or modified on or after 1 January 2019 (whether it is a lessor or a lessee in the lease contract). In preparation for the first-time application of IFRS 16, the Group has carried out an implementation project. The project has shown that the new definition in IFRS 16 will not change significantly the scope of contracts that meet the definition of a lease for the Group.</p>	
<p><u>Impact on Lessee Accounting</u></p>	
<p><i>Operating leases</i></p>	
<p>IFRS 16 will change how the Group accounts for leases previously classified as operating leases under IAS 17, which were off-balance sheet.</p>	
<p>On initial application of IFRS 16, for all leases (except as noted below), the Group will:</p>	
<ul style="list-style-type: none"> a) Recognise right-of-use assets and lease liabilities in the consolidated statement of financial position, initially measured at the present value of the future lease payments; 	
<ul style="list-style-type: none"> b) Recognise depreciation of right-of-use assets and interest on lease liabilities in the consolidated statement of profit or loss; 	
<p>See note 2 section 10 Illustrative disclosures in the December 2018 Guide for an Australian specific version of note 2 (including details of RDR shading)</p>	

Source	International GAAP Holdings Limited
	<p>c) Separate the total amount of cash paid into a principal portion (presented within financing activities) and interest (presented within operating activities) in the consolidated cash flow statement.</p> <p>Lease incentives (e.g. rent-free period) will be recognised as part of the measurement of the right-of-use assets and lease liabilities whereas under IAS 17 they resulted in the recognition of a lease liability incentive, amortised as a reduction of rental expenses on a straight-line basis.</p> <p>Under IFRS 16, right-of-use assets will be tested for impairment in accordance with IAS 36 <i>Impairment of Assets</i>. This will replace the previous requirement to recognise a provision for onerous lease contracts.</p> <p>For short-term leases (lease term of 12 months or less) and leases of low-value assets (such as personal computers and office furniture), the Group will opt to recognise a lease expense on a straight-line basis as permitted by IFRS 16.</p> <p>As at 31 December 2018, the Group has non-cancellable operating lease commitments of CU__.</p> <p>A preliminary assessment indicates that CU__ of these arrangements relate to leases other than short-term leases and leases of low-value assets, and hence the Group will recognise a right-of-use asset of CU__ and a corresponding lease liability of CU__ in respect of all these leases. The impact on profit or loss is to decrease Other expenses by CU__, to increase depreciation by CU__ and to increase interest expense by CU__. The provision for onerous lease contracts which was required under IAS 17 of CU__ will be derecognised. Lease liability incentives of CU__ previously recognised in respect of the operating leases will be derecognised and the amount factored into the measurement of the right-to-use assets and lease liabilities.</p> <p>The preliminary assessment indicates that CU__ of these arrangements relate to short-term leases and leases of low-value assets.</p> <p>Under IAS 17, all lease payments on operating leases are presented as part of cash flows from operating activities. The impact of the changes under IFRS 16 would be to reduce the cash generated by operating activities by CU__ and to increase net cash used in financing activities by the same amount.</p> <p><i>Finance leases</i></p> <p>The main differences between IFRS 16 and IAS 17 with respect to assets formerly held under a finance lease is the measurement of the residual value guarantees provided by the lessee to the lessor. IFRS 16 requires that the Group recognises as part of its lease liability only the amount expected to be payable under a residual value guarantee, rather than the maximum amount guaranteed as required by IAS 17. On initial application the Group will present equipment previously included in property, plant and equipment within the line item for right-of-use assets and the lease liability, previously presented within borrowing, will be presented in a separate line for lease liabilities.</p> <p>Based on an analysis of the Group's finance leases as at 31 December 2018 on the basis of the facts and circumstances that exist at that date, the directors of the Company have assessed that the impact of this change will not have an impact on the amounts recognised in the Group's consolidated financial statements.</p> <p><u>Impact on Lessor Accounting</u></p> <p>Under IFRS 16, a lessor continues to classify leases as either finance leases or operating leases and account for those two types of leases differently. However, IFRS 16 has changed and expanded the disclosures required, in particular regarding how a lessor manages the risks arising from its residual interest in leased assets.</p> <p>Under IFRS 16, an intermediate lessor accounts for the head lease and the sublease as two separate contracts. The intermediate lessor is required to classify the sublease as a finance or operating lease by reference to the right-of-use asset arising from the head lease (and not by reference to the underlying asset as was the case under IAS 17).</p> <p>Because of this change the Group will reclassify certain of its sublease agreements as finance leases. As required by IFRS 9, an allowance for expected credit losses will be recognised on the finance lease receivables. The leased assets will be derecognised and finance lease asset receivables recognised. This change in accounting will change the timing of recognition of the related revenue (recognised in finance income).</p>

	<p>Commentary:</p> <p><i>IAS 8:30 requires entities to give known or reasonably estimable information relevant to assessing the possible impact that application of any new or revised IFRS will have on the entity's financial statements in the period of initial application. The regulatory requirements in the various jurisdictions may differ as to how detailed the disclosures need to be; some regulators may require both qualitative and quantitative information to be disclosed whereas others may consider that qualitative information (e.g. key areas that may be affected by the new or revised IFRS) suffices in many circumstances. For this reason, relevant regulatory guidance should also be taken into account in preparing the disclosure.</i></p> <p><i>This applies to all new or revised IFRS that have been issued but are not yet effective.</i></p>
	<p>IFRS 17 Insurance Contracts</p> <p>The new Standard establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts and supersedes IFRS 4 <i>Insurance Contracts</i>.</p> <p>The Standard outlines a General Model, which is modified for insurance contracts with direct participation features, described as the Variable Fee Approach. The General Model is simplified if certain criteria are met by measuring the liability for remaining coverage using the Premium Allocation Approach.</p> <p>The General Model will use current assumptions to estimate the amount, timing and uncertainty of future cash flows and it will explicitly measure the cost of that uncertainty, it takes into account market interest rates and the impact of policyholders' options and guarantees.</p> <p>The implementation of the Standard is likely to bring significant changes to an entity's processes and systems, and will require much greater co-ordination between many functions of the business, including finance, actuarial and IT.</p> <p>The Standard is effective for annual reporting periods beginning on or after 1 January 2021, with early application permitted. It is applied retrospectively unless impracticable, in which case the modified retrospective approach or the fair value approach is applied.</p> <p>For the purpose of the transition requirements, the date of initial application is the start of the annual reporting period in which the entity first applies the Standard, and the transition date is the beginning of the period immediately preceding the date of initial application. The directors of the Company do not anticipate that the application of the Standard in the future will have an impact on the Group's consolidated financial statements.</p> <p>Amendments to IFRS 9 Prepayment Features with Negative Compensation</p> <p>The amendments to IFRS 9 clarify that for the purpose of assessing whether a prepayment feature meets the SPPI condition, the party exercising the option may pay or receive reasonable compensation for the prepayment irrespective of the reason for prepayment. In other words, prepayment features with negative compensation do not automatically fail SPPI.</p> <p>The amendment applies to annual periods beginning on or after 1 January 2019, with earlier application permitted. There are specific transition provisions depending on when the amendments are first applied, relative to the initial application of IFRS 9.</p> <p>The directors of the Company do not anticipate that the application of the amendments in the future will have an impact on the Group's consolidated financial statements.</p> <p>Amendments to IAS 28 Long-term Interests in Associates and Joint Ventures</p> <p>The amendment clarifies that IFRS 9, including its impairment requirements, applies to long-term interests. Furthermore, in applying IFRS 9 to long-term interests, an entity does not take into account adjustments to their carrying amount required by IAS 28 (i.e., adjustments to the carrying amount of long-term interests arising from the allocation of losses of the investee or assessment of impairment in accordance with IAS 28).</p> <p>The amendments apply retrospectively to annual reporting periods beginning on or after 1 January 2019. Earlier application is permitted. Specific transition provisions apply depending on whether the first-time application of the amendments coincides with that of IFRS 9.</p> <p>The directors of the Company do not anticipate that the application of the amendments in the future will have an impact on the Group's consolidated financial statements.</p>

	<p data-bbox="309 232 1497 293">Annual Improvements to IFRS Standards 2015–2017 Cycle Amendments to IFRS 3 Business Combinations, IFRS 11 Joint Arrangements, IAS 12 Income Taxes and IAS 23 Borrowing Costs</p> <p data-bbox="309 309 1497 338">The <i>Annual Improvements</i> include amendments to four Standards.</p> <p data-bbox="309 353 1497 383"><i>IAS 12 Income Taxes</i></p> <p data-bbox="309 398 1497 528">The amendments clarify that an entity should recognise the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognised the transactions that generated the distributable profits. This is the case irrespective of whether different tax rates apply to distributed and undistributed profits.</p> <p data-bbox="309 544 1497 573"><i>IAS 23 Borrowing Costs</i></p> <p data-bbox="309 589 1497 685">The amendments clarify that if any specific borrowing remains outstanding after the related asset is ready for its intended use or sale, that borrowing becomes part of the funds that an entity borrows generally when calculating the capitalisation rate on general borrowings.</p> <p data-bbox="309 701 1497 730"><i>IFRS 3 Business Combinations</i></p> <p data-bbox="309 745 1497 875">The amendments to IFRS 3 clarify that when an entity obtains control of a business that is a joint operation, the entity applies the requirements for a business combination achieved in stages, including remeasuring its previously held interest (PHI) in the joint operation at fair value. The PHI to be remeasured includes any unrecognised assets, liabilities and goodwill relating to the joint operation.</p> <p data-bbox="309 891 1497 920"><i>IFRS 11 Joint Arrangements</i></p> <p data-bbox="309 936 1497 1032">The amendments to IFRS 11 clarify that when a party that participates in, but does not have joint control of, a joint operation that is a business obtains joint control of such a joint operation, the entity does not remeasure its PHI in the joint operation.</p> <p data-bbox="309 1048 1497 1108">All the amendments are effective for annual periods beginning on or after 1 January 2019 and generally require prospective application. Earlier application is permitted.</p> <p data-bbox="309 1124 1497 1184">The directors of the Company do not anticipate that the application of the amendments in the future will have an impact on the Group's consolidated financial statements.</p> <p data-bbox="309 1200 1497 1238">Amendments to IAS 19 Employee Benefits Plan Amendment, Curtailment or Settlement</p> <p data-bbox="309 1254 1497 1440">The amendments clarify that the past service cost (or of the gain or loss on settlement) is calculated by measuring the defined benefit liability (asset) using updated assumptions and comparing benefits offered and plan assets before and after the plan amendment (or curtailment or settlement) but ignoring the effect of the asset ceiling (that may arise when the defined benefit plan is in a surplus position). IAS 19 is now clear that the change in the effect of the asset ceiling that may result from the plan amendment (or curtailment or settlement) is determined in a second step and is recognised in the normal manner in other comprehensive income.</p> <p data-bbox="309 1456 1497 1682">The paragraphs that relate to measuring the current service cost and the net interest on the net defined benefit liability (asset) have also been amended. An entity will now be required to use the updated assumptions from this remeasurement to determine current service cost and net interest for the remainder of the reporting period after the change to the plan. In the case of the net interest, the amendments make it clear that for the period post plan amendment, the net interest is calculated by multiplying the net defined benefit liability (asset) as remeasured under IAS 19.99 with the discount rate used in the remeasurement (also taking into account the effect of contributions and benefit payments on the net defined benefit liability (asset)).</p> <p data-bbox="309 1697 1497 1827">The amendments are applied prospectively. They apply only to plan amendments, curtailments or settlements that occur on or after the beginning of the annual period in which the amendments to IAS 19 are first applied. The amendments to IAS 19 must be applied to annual periods beginning on or after 1 January 2019, but they can be applied earlier if an entity elects to do so.</p> <p data-bbox="309 1843 1497 1904">The directors of the Company do not anticipate that the application of the amendments in the future will have an impact on the Group's consolidated financial statements.</p>

Source	International GAAP Holdings Limited
	<p>IFRS 10 Consolidated Financial Statements and IAS 28 (amendments) <i>Sale or Contribution of Assets between an Investor and its Associate or Joint Venture</i></p> <p>The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture.</p> <p>The effective date of the amendments has yet to be set by the IASB; however, earlier application of the amendments is permitted. The directors of the Company anticipate that the application of these amendments may have an impact on the Group's consolidated financial statements in future periods should such transactions arise.</p> <p>The directors of the Company do not anticipate that the application of the amendments in the future will have an impact on the Group's consolidated financial statements.</p> <p>IFRIC 23 Uncertainty over Income Tax Treatments</p> <p>IFRIC 23 sets out how to determine the accounting tax position when there is uncertainty over income tax treatments. The Interpretation requires an entity to:</p> <ul style="list-style-type: none"> • determine whether uncertain tax positions are assessed separately or as a group; and • assess whether it is probable that a tax authority will accept an uncertain tax treatment used, or proposed to be used, by an entity in its income tax filings: <ul style="list-style-type: none"> – If yes, the entity should determine its accounting tax position consistently with the tax treatment used or planned to be used in its income tax filings. – If no, the entity should reflect the effect of uncertainty in determining its accounting tax position. <p>The Interpretation is effective for annual periods beginning on or after 1 January 2019. Entities can apply the Interpretation with either full retrospective application or modified retrospective application without restatement of comparatives retrospectively or prospectively.</p> <p>The directors of the Company do not anticipate that the application of the amendments in the future will have an impact on the Group's consolidated financial statements.</p>

IAS 1:112(a); IAS 1:119 - 121	<p data-bbox="316 230 687 259">3. Significant accounting policies</p> <p data-bbox="316 320 464 349">Commentary:</p> <p data-bbox="316 365 1469 521"><i>The following are <u>examples</u> of the types of accounting policies that might be disclosed in this entity's financial statements. Entities are required to disclose in the summary of significant accounting policies the measurement basis (or bases) used in preparing the financial statements and the other accounting policies used that are relevant to an understanding of the financial statements. An accounting policy may be significant because of the nature of the entity's operations even if amounts for the current and prior periods are not material.</i></p> <p data-bbox="316 544 1461 667"><i>In deciding whether a particular accounting policy should be disclosed, management considers whether disclosure would assist users in understanding how transactions, other events and conditions are reflected in the reported financial performance and financial position. Disclosure of particular accounting policies is especially useful to users when those policies are selected from alternatives allowed in Standards and Interpretations.</i></p> <p data-bbox="316 689 1445 813">Each entity considers the nature of its operations and the policies that users of its financial statements would expect to be disclosed for that type of entity. It is also appropriate to disclose each significant accounting policy that is not specifically required by IFRS, but that is selected and applied in accordance with IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors.</p> <p data-bbox="316 835 1481 891"><i>For completeness, in these Model Financial Statements, accounting policies have been provided for some immaterial items, although this is not required under IFRS. In general, immaterial and irrelevant policies should be omitted.</i></p>
IAS 1:117(a); IAS 1:16	<p data-bbox="316 925 536 954">Basis of accounting</p> <p data-bbox="316 999 1481 1088">The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS Standards). [The financial statements have also been prepared in accordance with IFRS Standards adopted by the European Union and therefore the Group financial statements comply with Article 4 of the EU IAS Regulation].</p> <p data-bbox="316 1111 464 1140">Commentary:</p> <p data-bbox="316 1162 943 1191"><i>The above statement should be tailored to be specific to the entity.</i></p> <p data-bbox="316 1214 1485 1303"><i>Most jurisdictions have a mechanism for incorporating IFRS into their financial reporting system. These mechanisms range from direct adoption of 'IFRS as issued by the IASB', through adopting local standards that are 'equivalent to IFRS', to the extensive endorsement mechanism used in the European Union.</i></p> <p data-bbox="316 1326 1385 1355"><i>See note 1.1 section 10 Illustrative disclosures of the December 2018 Guide for the Australian specific disclosure.</i></p>
IAS 1:117(b); IAS 1:112(a); IAS 1:17(b)	<p data-bbox="316 1373 1497 1507">The financial statements have been prepared on the historical cost basis, except for the revaluation of certain properties and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.</p> <p data-bbox="316 1529 1501 1809">Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2, leasing transactions that are within the scope of IAS 17 <i>Leases</i>, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 <i>Inventories</i> or value in use in IAS 36 <i>Impairment of Assets</i>.</p> <p data-bbox="316 1832 927 1861">The principal accounting policies adopted are set out below.</p> <p data-bbox="316 1883 563 1912">Basis of consolidation</p> <p data-bbox="316 1935 1481 2002">The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries) made up to 31 December each year. Control is achieved when the Company:</p> <ul data-bbox="316 2024 1225 2092" style="list-style-type: none"> • has the power over the investee; • is exposed, or has rights, to variable returns from its involvement with the investee; and

Source	International GAAP Holdings Limited
	<ul style="list-style-type: none"> • has the ability to use its power to affects its returns. <p>The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.</p> <p>When the Company has less than a majority of the voting rights of an investee, it considers that it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:</p> <ul style="list-style-type: none"> • the size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders; • potential voting rights held by the Company, other vote holders or other parties; • rights arising from other contractual arrangements; and • any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings. <p>Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, the results of subsidiaries acquired or disposed of during the year are included in profit or loss from the date the Company gains control until the date when the Company ceases to control the subsidiary.</p> <p>Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of the subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.</p> <p>Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used into line with the Group's accounting policies.</p> <p>All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between the members of the Group are eliminated on consolidation.</p> <p>Non-controlling interests in subsidiaries are identified separately from the Group's equity therein. Those interests of non-controlling shareholders that are present ownership interests entitling their holders to a proportionate share of net assets upon liquidation may initially be measured at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement is made on an acquisition-by-acquisition basis. Other non-controlling interests are initially measured at fair value. Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity. Total comprehensive income is attributed to non-controlling interests even if this results in the non-controlling interests having a deficit balance.</p> <p>Changes in the Group's interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amount of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the Company.</p> <p>When the Group loses control of a subsidiary, the gain or loss on disposal recognised in profit or loss is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), less liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as required/permitted by applicable IFRS Standards). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IFRS 9 Financial Instruments when applicable, or the cost on initial recognition of an investment in an associate or a joint venture.</p>

	<p data-bbox="309 230 576 259">Business combinations</p> <p data-bbox="309 277 1497 434">Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interest issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognised in profit or loss as incurred.</p> <p data-bbox="309 452 1497 517">At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value at the acquisition date, except that:</p> <ul data-bbox="309 535 1497 786" style="list-style-type: none"> <li data-bbox="309 535 1497 600">• deferred tax assets or liabilities and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IAS 12 Income Taxes and IAS 19 Employee Benefits respectively; <li data-bbox="309 618 1497 705">• liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with IFRS 2 Share-Based Payments at the acquisition date (see below); and <li data-bbox="309 723 1497 786">• assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations are measured in accordance with that Standard. <p data-bbox="309 804 1497 1025">Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.</p> <p data-bbox="309 1043 1497 1265">When the consideration transferred by the Group in a business combination includes contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.</p> <p data-bbox="309 1283 1497 1440">The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Other contingent consideration is remeasured to fair value at subsequent reporting dates with changes in fair value recognised in profit or loss.</p> <p data-bbox="309 1458 1497 1615">When a business combination is achieved in stages, the Group's previously held interests in the acquired entity are remeasured to its acquisition-date fair value and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss, where such treatment would be appropriate if that interest were disposed of.</p> <p data-bbox="309 1632 1497 1789">If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognised as of that date.</p>

Source	International GAAP Holdings Limited
	<p>Goodwill</p> <p>Goodwill is initially recognised and measured as set out above.</p> <p>Goodwill is not amortised but is reviewed for impairment at least annually. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognised for goodwill is not reversed in a subsequent period.</p> <p>On disposal of a cash generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.</p> <p>The Group's policy for goodwill arising on the acquisition of an associate is described below.</p> <p>Investments in associates and joint ventures</p> <p>An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.</p> <p>A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.</p> <p>The results and assets and liabilities of associates or joint ventures are incorporated in these financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case it is accounted for in accordance with IFRS 5.</p> <p>Under the equity method, an investment in an associate or a joint venture is recognised initially in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate or joint venture. When the Group's share of losses of an associate or a joint venture exceeds the Group's interest in that associate or joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate or joint venture), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.</p> <p>An investment in an associate or a joint venture is accounted for using the equity method from the date on which the investee becomes an associate or a joint venture. On acquisition of the investment in an associate or a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.</p> <p>The requirements of IAS 36 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in an associate or a joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised is not allocated to any asset, including goodwill that forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.</p>

Source	International GAAP Holdings Limited
	<p>The Group discontinues the use of the equity method from the date when the investment ceases to be an associate or a joint venture. When the Group retains an interest in the former associate or a joint venture and the retained interest is a financial asset, the Group measures the retained interest at fair value at that date and the fair value is regarded as its fair value on initial recognition in accordance with IFRS 9. The difference between the carrying amount of the associate or a joint venture at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate or a joint venture is included in the determination of the gain or loss on disposal of the associate or joint venture. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that associate on the same basis as would be required if that associate had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognised in other comprehensive income by that associate or joint venture would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when the associate or joint venture is disposed of.</p> <p>When the Group reduces its ownership interest in an associate or a joint venture but the Group continues to use the equity method, the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.</p> <p>When a group entity transacts with an associate or a joint venture of the Group, profits and losses resulting from the transactions with the associate or joint venture are recognised in the Group's consolidated financial statements only to the extent of interests in the associate or joint venture that are not related to the Group.</p> <p>Interests in joint operations</p> <p>A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.</p> <p>When a group entity undertakes its activities under joint operations, the Group as a joint operator recognises in relation to its interest in a joint operation:</p> <ul style="list-style-type: none"> • its assets, including its share of any assets held jointly; • its liabilities, including its share of any liabilities incurred jointly; • its revenue from the sale of its share of the output arising from the joint operation; • its share of the revenue from the sale of the output by the joint operation; and • its expenses, including its share of any expenses incurred jointly. <p>The Group accounts for the assets, liabilities, revenue and expenses relating to its interest in a joint operation in accordance with the IFRS Standards applicable to the particular assets, liabilities, revenue and expenses.</p> <p>When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a sale or contribution of assets), the Group is considered to be conducting the transaction with the other parties to the joint operation, and gains and losses resulting from the transactions are recognised in the Group's consolidated financial statements only to the extent of other parties' interests in the joint operation.</p> <p>When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a purchase of assets), the Group does not recognise its share of the gains and losses until it resells those assets to a third party.</p> <p>Non-current assets held for sale</p> <p>Non-current assets (and disposal groups) classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell.</p> <p>Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale which should be expected to qualify for recognition as a completed sale within one year from the date of classification.</p> <p>When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.</p>

Source	International GAAP Holdings Limited
	<p>When the Group is committed to a sale plan involving disposal of an investment in an associate or, a portion of an investment in an associate, the investment, or the portion of the investment in the associate that will be disposed of is classified as held for sale when the criteria described above are met, and the Group ceases to apply the equity method in relation to the portion that is classified a held for sale. Any retained portion of an investment in an associate that has not been classified as held for sale continues to be accounted for using the equity method.</p>
	<p>Revenue recognition</p>
	<p>The Group recognises revenue from the following major sources:</p>
	<ul style="list-style-type: none"> • Sale of leisure goods and electronic equipment, including the related loyalty programme 'Maxi-Points Scheme', as disclosed in note 60, maintenance included in the price of products sold, as well as warranties granted under local legislation as disclosed in note 39; • Installation of computer software for specialised business applications; and • Construction of residential properties.
<p>IFRS 15:31; IFRS 15:46; IFRS 15:47; IFRS 15:119</p>	<p>Revenue is measured based on the consideration to which the Group expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Group recognises revenue when it transfers control of a product or service to a customer.</p>
	<p><i>Sale of leisure goods</i></p>
<p>IFRS 15:119(e); IFRS 15:B30</p>	<p>The Group sells sport shoes, sport equipment and outdoor play equipment both to the wholesale market and directly to customers through its own retail outlets. Sales-related warranties associated with leisure goods cannot be purchased separately and they serve as an assurance that the products sold comply with agreed-upon specifications. Accordingly, the Group accounts for warranties in accordance with IAS 37 <i>Provisions, Contingent Liabilities and Contingent Assets</i> (see note 39).</p>
<p>IFRS 15:125</p>	<p>For sales of leisure goods to the wholesale market, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the wholesaler's specific location (delivery). Following delivery, the wholesaler has full discretion over the manner of distribution and price to sell the goods, has the primary responsibility when onselling the goods and bears the risks of obsolescence and loss in relation to the goods.</p>
<p>IFRS 15:125 IFRS 15:108</p>	<p>A receivable is recognised by the Group when the goods are delivered to the wholesaler as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due.</p>
<p>IFRS 15:125</p>	<p>For sales of goods to retail customers, revenue is recognised when control of the goods has transferred, being at the point the customer purchases the goods at the retail outlet. Payment of the transaction price is due immediately at the point the customer purchases the goods.</p>
<p>IFRS 15:55; IFRS 15:119(d); IFRS 15:126(b); IFRS 15:126(d); IFRS 15:B21</p>	<p>Under the Group's standard contract terms, customers have a right of return within 30 days. At the point of sale, a refund liability and a corresponding adjustment to revenue is recognised for those products expected to be returned. At the same time, the Group has a right to recover the product when customers exercise their right of return so consequently recognises a right to returned goods asset and a corresponding adjustment to cost of sales. The Group uses its accumulated historical experience to estimate the number of returns on a portfolio level using the expected value method. It is considered highly probable that a significant reversal in the cumulative revenue recognised will not occur given the consistent level of returns over previous years.</p>
	<p><i>Sale of electronic equipment</i></p>
	<p>The Group sells electronic equipment to the wholesale market and directly to customers both through its own retail outlets and through internet sales.</p>
<p>IFRS 15:55; IFRS 15:125; IFRS 15:119(d); IFRS 15:B21</p>	<p>For sales of electronic equipment to the wholesale market and through retail outlets and internet sales, revenue is recognised by the Group at a point in time in line with the policy outlined above for the sale of leisure goods. For sales to retail customers (from both retail outlet and internet sales) there exists the same 30-day right of return and accordingly a refund liability and a right to returned goods asset are recognised in relation to electronic equipment expected to be returned.</p>
<p>IFRS 15:106; IFRS 15:117; IFRS 15:125</p>	<p>For internet sales, revenue is recognised when control of the goods has transferred to the customer, being at the point the goods are delivered to the customer. Delivery occurs when the goods have been shipped to the customer's specific location. When the customer initially purchases the goods online the transaction price received by the Group is recognised as a contract liability until the goods have been delivered to the customer.</p>

Source	International GAAP Holdings Limited
IFRS 15:B39; IFRS 15:B40	<p><i>'Maxi-Points' customer loyalty programme</i></p> <p>The Group operates a 'Maxi-Points' loyalty programme through which retail customers accumulate points on purchases of leisure goods and electronic equipment that entitle them to discounts on future purchases. These points provide a discount to customers that they would not receive without purchasing the leisure goods or electronic equipment (i.e. a material right). The promise to provide the discount to the customer is therefore a separate performance obligation.</p>
IFRS 15:74; IFRS 15:106; IFRS 15:117; IFRS 15:B42 IFRS 15:126(c) IFRS 15:119	<p>The transaction price is allocated between the product, the maintenance services (if the product is electronic equipment, as described below) and the points on a relative stand-alone selling price basis. The stand-alone selling price per point is estimated based on the discount to be given when the points are redeemed by the customer and the likelihood of redemption, as evidenced by the Group's historical experience. A contract liability is recognised for revenue relating to the loyalty points at the time of the initial sales transaction. Revenue from the loyalty points is recognised when the points are redeemed by the customer. Revenue for points that are not expected to be redeemed is recognised in proportion to the pattern of rights exercised by customers.</p>
IFRS 15:B41	<p><i>Maintenance relating to electronic equipment</i></p> <p>Included in the transaction price for the sale of electronic equipment is an after-sales service. This service relates to maintenance work that may be required to be carried out on the equipment for a three-year period after sale. This period can then be extended if the customer requires additional years of maintenance services. The renewal of services after the three-year period will be for the price at which these are sold by the Group to all of its customers as at the date of renewal regardless of the existence of a renewal option. Consequently, the option to extend the renewal period does not provide customers with any advantage when they enter into the initial contract and therefore no revenue has been deferred relating to this renewal option.</p>
IFRS 15:27; IFRS 15:74; IFRS 15:81; IFRS 15:126 (c); IFRS 15:B29	<p>The maintenance service is considered to be a distinct service as it is both regularly supplied by the Group to other customers on a stand-alone basis and is available for customers from other providers in the market. A portion of the transaction price is therefore allocated to the maintenance services based on the stand-alone selling price of those services. Discounts are not considered as they are only given in rare circumstances and are never material.</p>
IFRS 15:35(a); IFRS 15:123(a); IFRS 15:124; IFRS 15:106; IFRS 15:117 (RDR: see AASB 15.124) IFRS 15:35(b); IFRS 15:124; IFRS 15:107; IFRS 15:117 (RDR: see AASB 15.124)	<p>Revenue relating to the maintenance services is recognised over time. The transaction price allocated to these services is recognised as a contract liability at the time of the initial sales transaction and is released on a straight-line basis over the period of service (i.e. three years when the services are purchased together with the underlying equipment).</p> <p><i>Installation of software services</i></p> <p>The Group provides a service of installation of various software products for specialised business operations. Such services are recognised as a performance obligation satisfied over time. Revenue is recognised for these installation services based on the stage of completion of the contract. The directors have assessed that the stage of completion determined as the proportion of the total time expected to install that has elapsed at the end of the reporting period is an appropriate measure of progress towards complete satisfaction of these performance obligations under IFRS 15. Payment for installation of software services is not due from the customer until the installation services are complete and therefore a contract asset is recognised over the period in which the installation services are performed representing the entity's right to consideration for the services performed to date.</p>
IFRS 15:35(c), IFRS 15:124 (RDR: see AASB 15.124)	<p><i>Construction of residential properties</i></p> <p>The Group constructs and sells residential properties under long-term contracts with customers. Such contracts are entered into before construction of the residential properties begins. Under the terms of the contracts, the Group is contractually restricted from redirecting the properties to another customer and has an enforceable right to payment for work done. Revenue from construction of residential properties is therefore recognised over time on a cost-to-cost method, i.e. based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs. The directors consider that this input method is an appropriate measure of the progress towards complete satisfaction of these performance obligations under IFRS 15.</p>

Source	International GAAP Holdings Limited
IFRS 15:117; IFRS 15:106; IFRS 15:107; IFRS 15:126	<p>The Group becomes entitled to invoice customers for construction of residential properties based on achieving a series of performance-related milestones. When a particular milestone is reached the customer is sent a relevant statement of work signed by a third party assessor and an invoice for the related milestone payment. The Group will previously have recognised a contract asset for any work performed. Any amount previously recognised as a contract asset is reclassified to trade receivables at the point at which it is invoiced to the customer. If the milestone payment exceeds the revenue recognised to date under the cost-to-cost method then the Group recognises a contract liability for the difference. There is not considered to be a significant financing component in construction contracts with customers as the period between the recognition of revenue under the cost-to-cost method and the milestone payment is always less than one year.</p> <p>Leases</p> <p>Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.</p> <p><i>The Group as lessor</i></p> <p>Amounts due from lessees under finance leases are recognised as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.</p> <p>Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.</p> <p><i>The Group as lessee</i></p> <p>Assets held under finance leases are recognised as assets of the Group at their fair value or, if lower, at the present value of the minimum lease payments, each determined at the inception of the lease. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.</p> <p>Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Group's general policy on borrowing costs (see below). Contingent rentals are recognised as expenses in the periods in which they are incurred.</p> <p>Rentals payable under operating leases are charged to income on a straight-line basis over the term of the relevant lease except where another more systematic basis is more representative of the time pattern in which economic benefits from the lease asset are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.</p> <p>In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.</p> <p>Foreign currencies</p> <p>In preparing the financial statements of the individual companies, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing on the dates of the transactions. At each reporting date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.</p> <p>Exchange differences are recognised in profit or loss in the period in which they arise except for:</p> <ul style="list-style-type: none"> • exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings; • exchange differences on transactions entered into to hedge certain foreign currency risks (see below under financial instruments/hedge accounting); and

Source	International GAAP Holdings Limited
IAS 20:39(a)	<ul style="list-style-type: none"> • exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur in the foreseeable future (therefore forming part of the net investment in the foreign operation), which are recognised initially in other comprehensive income and reclassified from equity to profit or loss on disposal or partial disposal of the net investment. <p>For the purpose of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated at exchange rates prevailing on the reporting date. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the date of transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in a separate component of equity (attributed to non-controlling interests as appropriate).</p> <p>On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation or a partial disposal of an interest in a joint arrangement or an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in a separate component of equity in respect of that operation attributable to the owners of the company are reclassified to profit or loss.</p> <p>In addition, in relation to a partial disposal of a subsidiary that includes a foreign operation that does not result in the Group losing control over the subsidiary, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (i.e. partial disposals of associates or joint arrangements that do not result in the Group losing significant influence or joint control), the proportionate share of the accumulated exchange differences is reclassified to profit or loss.</p> <p>Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.</p> <p>Borrowing costs</p> <p>Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.</p> <p>To the extent that variable rate borrowings are used to finance a qualifying asset and are hedged in an effective cash flow hedge of interest rate risk, the effective portion of the derivative is recognised in other comprehensive income and reclassified to profit or loss when the qualifying asset impacts profit or loss. To the extent that fixed rate borrowings are used to finance a qualifying asset and are hedged in an effective fair value hedge of interest rate risk, the capitalised borrowing costs reflect the hedged interest rate.</p> <p>Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.</p> <p>All other borrowing costs are recognised in profit or loss in the period in which they are incurred.</p> <p>Government grants</p> <p>Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.</p> <p>Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.</p> <p>Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.</p> <p>The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.</p> <p>Government grants towards staff re-training costs are recognised as income over the periods necessary to match them with the related costs and are deducted in reporting the related expense.</p>

Source	International GAAP Holdings Limited
	<p>Government grants relating to the acquisition of property, plant and equipment are treated as deferred income and released to profit or loss over the expected useful lives of the assets concerned.</p> <p>Retirement and termination benefit costs</p> <p>Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions. Payments made to state-managed retirement benefit plans are accounted for as payments to defined contribution plans where the Group's obligations under the plans are equivalent to those arising in a defined contribution retirement benefit plan.</p> <p>For defined benefit retirement benefit plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurements comprising actuarial gains and losses, the effect of the asset ceiling (if applicable) and the return on plan assets (excluding interest) are recognised immediately in the statement of financial position with a charge or credit to the statement of comprehensive income in the period in which they occur. Remeasurements recognised in the statement of comprehensive income are not reclassified. Past service cost is recognised in profit or loss when the plan amendment or curtailment occurs, or when the Group recognises related restructuring costs or termination benefits, if earlier. Gains or losses on settlement of a defined benefit plan are recognised when the settlement occurs.</p> <p>Net interest is calculated by applying a discount rate to the net defined benefit liability or asset. Defined benefit costs are split into three categories:</p> <ul style="list-style-type: none"> – service costs, which includes current service cost, past service cost and gains and losses on curtailments and settlements; – net interest expense or income; and – remeasurements. <p>The Group recognises service costs within profit or loss as cost of sales and administrative expenses (see note 58).</p> <p>Net interest expense or income is recognised within finance costs (see note 12).</p> <p>The retirement benefit obligation recognised in the consolidated statement of financial position represents the deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.</p> <p>[If applicable or include alternative explanation about rights to refunds – The Trust Deed provides International GAAP Holdings Limited with an unconditional right to a refund of surplus assets assuming the full settlement of plan liabilities in the event of a plan wind-up. Furthermore, in the ordinary course of business the Trustee has no rights to unilaterally wind up, or otherwise augment the benefits due to members of, the plan. Based on these rights, any net surplus in the plan is recognised in full.]</p> <p>A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.</p> <p>Discretionary contributions made by employees or third parties reduce service cost upon payment of these contributions to the plan.</p> <p>When the formal terms of the plans specify that there will be contributions from employees or third parties, the accounting depends on whether the contributions are linked to service, as follows:</p> <ul style="list-style-type: none"> • If the contributions are not linked to services (e.g. contributions are required to reduce a deficit arising from losses on plan assets or from actuarial losses), they are reflected in the remeasurement of the net defined benefit liability (asset). • If contributions are linked to services, they reduce service costs. For the amount of contribution that is dependent on the number of years of service, the entity reduces service cost by attributing the contributions to periods of service using the attribution method required by IAS 19:70 for the gross benefits. For the amount of contribution that is independent of the number of years of service, the entity [reduces service cost in the period in which the related service is rendered/reduces service cost by attributing contributions to the employees' periods of service in accordance with IAS 19:70].

Source	International GAAP Holdings Limited
	<p>Short-term and other long-term employee benefits</p> <p>A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.</p> <p>Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.</p> <p>Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Group in respect of services provided by employees up to the reporting date.</p> <p>Taxation</p> <p>The income tax expense represents the sum of the tax currently payable and deferred tax.</p> <p><i>Current tax</i></p> <p>The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.</p> <p>A provision is recognised for those matters for which the tax determination is uncertain but it is considered probable that there will be a future outflow of funds to a tax authority. The provisions are measured at the best estimate of the amount expected to become payable. The assessment is based on the judgement of tax professionals within the Company supported by previous experience in respect of such activities and in certain cases based on specialist independent tax advice.</p> <p><i>Deferred tax</i></p> <p>Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, a deferred tax liability is not recognised if the temporary difference arises from the initial recognition of goodwill.</p> <p>Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.</p> <p>The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.</p> <p>Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on tax laws and rates that have been enacted or substantively enacted at the reporting date.</p> <p>The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.</p> <p>Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.</p>

IAS 16:73(a) - (c)	<p>For the purposes of measuring deferred tax liabilities and deferred tax assets for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. The directors reviewed the Group's investment property portfolios and concluded that none of the Group's investment properties are held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, the directors have determined that the 'sale' presumption set out in the amendments to IAS 12 is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of the investment properties as the Group is not subject to any income taxes on the fair value changes of the investment properties on disposal.</p> <p>Current tax and deferred tax for the year</p> <p>Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.</p>					
	<p>Property, plant and equipment</p> <p>Land and buildings held for use in the production or supply of goods or services for rental to others (excluding investment properties), or for administrative purposes, are stated in the statement of financial position at their revalued amounts, being the fair value at the date of revaluation, less any accumulated depreciation and accumulated impairment losses. Revaluations are performed with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair values at the reporting date.</p> <p>Any revaluation increase arising on the revaluation of such land and buildings is credited to the properties revaluation reserve, except to the extent that it reverses a revaluation decrease for the same asset previously recognised as an expense, in which case the increase is credited to profit or loss to the extent of the decrease previously expensed. A decrease in carrying amount arising on the revaluation of such land and buildings is charged as an expense to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset.</p> <p>Depreciation on revalued buildings is recognised in profit or loss. On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the properties revaluation reserve is transferred directly to retained earnings.</p> <p>Properties in the course of construction for production, supply or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Depreciation of these assets, determined on the same basis as other property assets, commences when the assets are ready for their intended use.</p> <p>Freehold land is not depreciated.</p> <p>Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment loss.</p> <p>Depreciation is recognised so as to write off the cost or valuation of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method, on the following bases:</p> <table data-bbox="319 1747 957 1881"> <tbody> <tr> <td>Buildings</td> <td>4% per annum</td> </tr> <tr> <td>Plant and machinery</td> <td>10% – 25% per annum</td> </tr> <tr> <td>Fixtures and fittings</td> <td>10% – 30% per annum</td> </tr> </tbody> </table> <p>The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.</p> <p>Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives.</p>	Buildings	4% per annum	Plant and machinery	10% – 25% per annum	Fixtures and fittings
Buildings	4% per annum					
Plant and machinery	10% – 25% per annum					
Fixtures and fittings	10% – 30% per annum

IAS 40:75(a)	<p>An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.</p> <p><i>[Provide additional explanation if the Group has elected to use fair value or a previous revaluation as deemed cost on transition to IFRS Standards.]</i></p>
(RDR: see AASB 140:75(b))	<p>Investment property</p> <p>Investment property, which is property held to earn rentals and/or for capital appreciation (including property under construction for such purposes), is measured initially at cost, including transaction costs. Subsequent to initial recognition, investment property is measured at fair value. All of the Group's property interests held under operating leases to earn rentals or for capital appreciation purposes are accounted for as investment properties and are measured using the fair value model. Gains or losses arising from changes in the fair value of investment property are included in profit or loss in the period in which they arise.</p> <p>An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognised.</p>
	<p>Commentary:</p> <p><i>A Group that elects to use the cost model for investment property (not illustrated in these Model Financial Statements) should disclose an appropriate policy and make reference, if relevant, to the use of the elections to use fair value or previous revaluations as deemed cost on transition.</i></p>
IAS 38:118(a)	<p>Intangible assets acquired separately</p> <p>Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.</p> <p>Internally-generated intangible assets – research and development expenditure</p> <p>Expenditure on research activities is recognised as an expense in the period in which it is incurred.</p> <p>An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following conditions have been demonstrated:</p> <ul style="list-style-type: none"> • the technical feasibility of completing the intangible asset so that it will be available for use or sale; • the intention to complete the intangible asset and use or sell it; • the ability to use or sell the intangible asset; • how the intangible asset will generate probable future economic benefits; • the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and • the ability to measure reliably the expenditure attributable to the intangible asset during its development. <p>The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.</p>
IAS 38:118(b)	<p>Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.</p> <p>Intangible assets acquired in a business combination</p> <p>Intangible assets acquired in a business combination and recognised separately from goodwill are recognised initially at their fair value at the acquisition date (which is regarded as their cost).</p>

Source	International GAAP Holdings Limited
IAS 38:118(b)	<p>Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.</p> <p>Derecognition of intangible assets</p> <p>An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.</p> <p>Patents and trademarks</p> <p>Patents and trademarks are measured initially at purchase cost and are amortised on a straight-line basis over their estimated useful lives.</p> <p>Impairment of tangible and intangible assets excluding goodwill</p> <p>At each reporting date, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.</p> <p>Intangible assets with an indefinite useful life are tested for impairment at least annually and whenever there is an indication that the asset may be impaired.</p> <p>Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.</p> <p>If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.</p> <p>Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.</p>
IAS 2:36(a)	<p>Inventories</p> <p>Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the weighted average cost method. Net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.</p>
IFRS 7:21	<p>Financial instruments</p> <p>Financial assets and financial liabilities are recognised in the Group's statement of financial position when the Group becomes a party to the contractual provisions of the instrument.</p> <p>Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.</p>

Source	International GAAP Holdings Limited
IFRS 7:B5(c)	<p>Financial assets</p> <p>All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.</p> <p>All recognised financial assets are measured subsequently in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.</p> <p>Classification of financial assets</p> <p>Debt instruments that meet the following conditions are measured subsequently at amortised cost:</p> <ul style="list-style-type: none"> • the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and • the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. <p>Debt instruments that meet the following conditions are measured subsequently at fair value through other comprehensive income (FVTOCI):</p> <ul style="list-style-type: none"> • the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and • the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. <p>By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL).</p> <p>Despite the foregoing, the Group may make the following irrevocable election/designation at initial recognition of a financial asset:</p> <ul style="list-style-type: none"> • the Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if certain criteria are met (see (iii) below); and • the Group may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch (see (iv) below). <p>(i) Amortised cost and effective interest method</p> <p>The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.</p> <p>For financial assets other than purchased or originated credit-impaired financial assets (i.e. assets that are credit-impaired on initial recognition), the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated by discounting the estimated future cash flows, including expected credit losses, to the amortised cost of the debt instrument on initial recognition.</p> <p>The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.</p>
IFRS 7:B5(e)	<p>Interest income is recognised using the effective interest method for debt instruments measured subsequently at amortised cost and at FVTOCI. For financial assets other than purchased or originated credit-impaired financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset.</p>

Source	International GAAP Holdings Limited
	<p>For purchased or originated credit-impaired financial assets, the Group recognises interest income by applying the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition. The calculation does not revert to the gross basis even if the credit risk of the financial asset subsequently improves so that the financial asset is no longer credit-impaired.</p> <p>Interest income is recognised in profit or loss and is included in the "finance income – interest income" line item (note 10).</p> <p>(ii) Debt instruments classified as at FVTOCI</p> <p>The corporate bonds held by the Group are classified as at FVTOCI. Fair value is determined in the manner described in note 62(a)(i). The corporate bonds are initially measured at fair value plus transaction costs. Subsequently, changes in the carrying amount of these corporate bonds as a result of foreign exchange gains and losses (see below), impairment gains or losses (see below), and interest income calculated using the effective interest method (see (i) above) are recognised in profit or loss. The amounts that are recognised in profit or loss are the same as the amounts that would have been recognised in profit or loss if these corporate bonds had been measured at amortised cost. All other changes in the carrying amount of these corporate bonds are recognised in other comprehensive income and accumulated under the heading of investments revaluation reserve. When these corporate bonds are derecognised, the cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss.</p> <p>(iii) Equity instruments designated as at FVTOCI</p> <p>On initial recognition, the Group may make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognised by an acquirer in a business combination.</p> <p>A financial asset is held for trading if:</p> <ul style="list-style-type: none"> • it has been acquired principally for the purpose of selling it in the near term; or • on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has evidence of a recent actual pattern of short-term profit-taking; or • it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument). <p>Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the investments revaluation reserve. The cumulative gain or loss is not be reclassified to profit or loss on disposal of the equity investments, instead, it is transferred to retained earnings.</p> <p>Dividends on these investments in equity instruments are recognised in profit or loss in accordance with IFRS 9, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the 'finance income' line item (note 10) in profit or loss.</p> <p>The Group has designated all investments in equity instruments that are not held for trading as at FVTOCI on initial application of IFRS 9 (see notes 2 and 25).</p> <p>(iv) Financial assets at FVTPL</p> <p>Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI (see (i) to (iii) above) are measured at FVTPL. Specifically:</p> <ul style="list-style-type: none"> • Investments in equity instruments are classified as at FVTPL, unless the Group designates an equity investment that is neither held for trading nor a contingent consideration arising from a business combination as at FVTOCI on initial recognition (see (iii) above). • Debt instruments that do not meet the amortised cost criteria or the FVTOCI criteria (see (i) and (ii) above) are classified as at FVTPL. In addition, debt instruments that meet either the amortised cost criteria or the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency (so called 'accounting mismatch') that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Group has not designated any debt instruments as at FVTPL.

Source	International GAAP Holdings Limited
IFRS 7:B5(e)	<p>Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss to the extent they are not part of a designated hedging relationship (see hedge accounting policy). The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the 'other gains and losses' line item (note 11). Fair value is determined in the manner described in note 62(a)(i).</p> <p>Foreign exchange gains and losses</p> <p>The carrying amount of financial assets that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. Specifically;</p> <ul style="list-style-type: none"> • for financial assets measured at amortised cost that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss in the 'other gains and losses' line item (note 11); • for debt instruments measured at FVTOCI that are not part of a designated hedging relationship, exchange differences on the amortised cost of the debt instrument are recognised in profit or loss in the 'other gains and losses' line item (note 11). Other exchange differences are recognised in other comprehensive income in the investments revaluation reserve; • for financial assets measured at FVTPL that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss in the 'other gains and losses' line item (note 11); and • for equity instruments measured at FVTOCI, exchange differences are recognised in other comprehensive income in the investments revaluation reserve. <p>See hedge accounting policy regarding the recognition of exchange differences where the foreign currency risk component of a financial asset is designated as a hedging instrument for a hedge of foreign currency risk.</p>
IFRS 7:35F	<p>Impairment of financial assets</p> <p>The Group recognises a loss allowance for expected credit losses on investments in debt instruments that are measured at amortised cost or at FVTOCI, lease receivables, trade receivables and contract assets, as well as on financial guarantee contracts. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.</p> <p>The Group always recognises lifetime ECL for trade receivables, contract assets and lease receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.</p> <p>For all other financial instruments, the Group recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL.</p> <p>Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.</p>
IFRS 7:35F(a); IFRS 7:35G(b)	<p>(i) Significant increase in credit risk</p> <p>In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from economic expert reports, financial analysts, governmental bodies, relevant think-tanks and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group's core operations.</p>
IFRS 7:35F(a); IFRS 7:35G(a)(ii)	<p>In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:</p>

Source	International GAAP Holdings Limited
	<ul style="list-style-type: none"> • an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating; • significant deterioration in external market indicators of credit risk for a particular financial instrument, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor, or the length of time or the extent to which the fair value of a financial asset has been less than its amortised cost; • existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations; • an actual or expected significant deterioration in the operating results of the debtor; • significant increases in credit risk on other financial instruments of the same debtor; • an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations. <p>Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.</p> <p>Despite the foregoing, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if:</p> <ol style="list-style-type: none"> (1) The financial instrument has a low risk of default, (2) The debtor has a strong capacity to meet its contractual cash flow obligations in the near term, and (3) Adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations. <p>IFRS 7:35F(a)(i) The Group considers a financial asset to have low credit risk when the asset has external credit rating of 'investment grade' in accordance with the globally understood definition or if an external rating is not available, the asset has an internal rating of 'performing'. Performing means that the counterparty has a strong financial position and there is no past due amounts.</p>
	<p>For financial guarantee contracts, the date that the Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of a financial guarantee contracts, the Group considers the changes in the risk that the specified debtor will default on the contract.</p> <p>The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.</p> <p>IFRS 7:35F(b)</p>
	<p>(ii) Definition of default</p> <p>The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that financial assets that meet either of the following criteria are generally not recoverable:</p> <ul style="list-style-type: none"> • when there is a breach of financial covenants by the debtor; or • information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collateral held by the Group). <p>Irrespective of the above analysis, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.</p>
<p>IFRS 7:35F(d); IFRS 7:35G(a)(iii)</p>	<p>(iii) Credit-impaired financial assets</p> <p>A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:</p>

Source	International GAAP Holdings Limited
	<p>(a) significant financial difficulty of the issuer or the borrower;</p> <p>(b) a breach of contract, such as a default or past due event (see (ii) above);</p> <p>(c) the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider;</p> <p>(d) it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or</p> <p>(e) the disappearance of an active market for that financial asset because of financial difficulties.</p>
IFRS 7:35F(e)	<p><i>(iv) Write-off policy</i></p> <p>The Group writes off a financial asset when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or in the case of trade receivables, when the amounts are over two years past due, whichever occurs sooner. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.</p>
IFRS 7:35G(a)	<p><i>(v) Measurement and recognition of expected credit losses</i></p> <p>The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date; for financial guarantee contracts, the exposure includes the amount drawn down as at the reporting date, together with any additional amounts expected to be drawn down in the future by default date determined based on historical trend, the Group's understanding of the specific future financing needs of the debtors, and other relevant forward-looking information.</p> <p>For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate. For a lease receivable, the cash flows used for determining the expected credit losses is consistent with the cash flows used in measuring the lease receivable in accordance with IAS 17 Leases.</p> <p>For a financial guarantee contract, as the Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed, the expected loss allowance is the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Group expects to receive from the holder, the debtor or any other party.</p> <p>If the Group has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Group measures the loss allowance at an amount equal to 12-month ECL at the current reporting date, except for assets for which simplified approach was used.</p>
	<p>The Group recognises an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognised in other comprehensive income and accumulated in the investment revaluation reserve, and does not reduce the carrying amount of the financial asset in the statement of financial position.</p> <p><i>Derecognition of financial assets</i></p> <p>The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.</p>

Source	International GAAP Holdings Limited
	<p>On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in equity instrument which the Group has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to retained earnings.</p> <p>Financial liabilities and equity</p> <p><i>Classification as debt or equity</i></p> <p>Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.</p> <p><i>Equity instruments</i></p> <p>An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.</p> <p>Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.</p> <p><i>Compound instruments</i></p> <p>The component parts of convertible loan notes issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.</p> <p>At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar non-convertible instrument. This amount is recorded as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.</p> <p>The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to [share premium/other equity [describe]]. Where the conversion option remains unexercised at the maturity date of the convertible loan note, the balance recognised in equity will be transferred to [retained profits/other equity [describe]]. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option.</p> <p>Transaction costs that relate to the issue of the convertible loan notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible loan notes using the effective interest method.</p> <p>Financial liabilities</p> <p>All financial liabilities are measured subsequently at amortised cost using the effective interest method or at FVTPL.</p> <p>However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, and financial guarantee contracts issued by the Group, are measured in accordance with the specific accounting policies set out below.</p> <p><i>Financial liabilities at FVTPL</i></p> <p>Financial liabilities are classified as at FVTPL when the financial liability is (i) contingent consideration of an acquirer in a business combination, (ii) held for trading or (iii) it is designated as at FVTPL.</p> <p>A financial liability is classified as held for trading if:</p> <ul style="list-style-type: none"> • it has been acquired principally for the purpose of repurchasing it in the near term; or • on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or

Source	International GAAP Holdings Limited
IFRS 7:B5(e)	<ul style="list-style-type: none"> • it is a derivative, except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument. <p>A financial liability other than a financial liability held for trading or contingent consideration of an acquirer in a business combination may be designated as at FVTPL upon initial recognition if:</p> <ul style="list-style-type: none"> • such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or • the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or • it forms part of a contract containing one or more embedded derivatives, and IFRS 9 permits the entire combined contract to be designated as at FVTPL. <p>Financial liabilities at FVTPL are measured at fair value, with any gains or losses arising on changes in fair value recognised in profit or loss to the extent that they are not part of a designated hedging relationship (see Hedge accounting policy). The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'other gains and losses' line item (note 11) in profit or loss.</p> <p>However, for financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognised in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. The remaining amount of change in the fair value of liability is recognised in profit or loss. Changes in fair value attributable to a financial liability's credit risk that are recognised in other comprehensive income are not subsequently reclassified to profit or loss; instead, they are transferred to retained earnings upon derecognition of the financial liability.</p> <p>Gains or losses on financial guarantee contracts issued by the Group that are designated by the Group as at FVTPL are recognised in profit or loss.</p> <p>Fair value is determined in the manner described in note 62(a)(i).</p> <p><i>Financial liabilities measured subsequently at amortised cost</i></p> <p>Financial liabilities that are not (i) contingent consideration of an acquirer in a business combination, (ii) held-for-trading, or (iii) designated as at FVTPL, are measured subsequently at amortised cost using the effective interest method.</p> <p>The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.</p> <p><i>Financial guarantee contract liabilities</i></p> <p>A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.</p> <p>Financial guarantee contract liabilities are measured initially at their fair values and, if not designated as at FVTPL and do not arise from a transfer of an asset, are measured subsequently at the higher of:</p> <ul style="list-style-type: none"> • the amount of the loss allowance determined in accordance with IFRS 9 (see financial assets above); and • the amount recognised initially less, where appropriate, cumulative amortisation recognised in accordance with the revenue recognition policies set out above. <p><i>Foreign exchange gains and losses</i></p> <p>For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments. These foreign exchange gains and losses are recognised in the 'other gains and losses' line item in profit or loss (note 11) for financial liabilities that are not part of a designated hedging relationship. For those which are designated as a hedging instrument for a hedge of foreign currency risk foreign exchange gains and losses are recognised in other comprehensive income and accumulated in a separate component of equity.</p>

Source	International GAAP Holdings Limited
IFRS 7:21	<p>The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss for financial liabilities that are not part of a designated hedging relationship.</p> <p><i>Derecognition of financial liabilities</i></p> <p>The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.</p> <p>When the Group exchanges with the existing lender one debt instrument into another one with the substantially different terms, such exchange is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, the Group accounts for substantial modification of terms of an existing liability or part of it as an extinguishment of the original financial liability and the recognition of a new liability. It is assumed that the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective rate is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability. If the modification is not substantial, the difference between: (1) the carrying amount of the liability before the modification; and (2) the present value of the cash flows after modification should be recognised in profit or loss as the modification gain or loss within other gains and losses.</p> <p>Derivative financial instruments</p> <p>The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, options and interest rate swaps. Further details of derivative financial instruments are disclosed in notes 34 and 62(c).</p> <p>Derivatives are recognised initially at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.</p> <p>A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability. Derivatives are not offset in the financial statements unless the Group has both legal right and intention to offset. The impact of the Master Netting Agreements on the Group's financial position is disclosed in note 34. A derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the instrument is more than 12 months and it is not expected to be realised or settled within 12 months. Other derivatives are presented as current assets or current liabilities.</p> <p><i>Embedded derivatives</i></p> <p>An embedded derivative is a component of a hybrid contract that also includes a non-derivative host – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative.</p> <p>Derivatives embedded in hybrid contracts with a financial asset host within the scope of IFRS 9 are not separated. The entire hybrid contract is classified and subsequently measured as either amortised cost or fair value as appropriate.</p> <p>Derivatives embedded in hybrid contracts with hosts that are not financial assets within the scope of IFRS 9 (e.g. financial liabilities) are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.</p> <p>If the hybrid contract is a quoted financial liability, instead of separating the embedded derivative, the Group generally designates the whole hybrid contract at FVTPL.</p> <p>An embedded derivative is presented as a non-current asset or non-current liability if the remaining maturity of the hybrid instrument to which the embedded derivative relates is more than 12 months and is not expected to be realised or settled within 12 months.</p>
IFRS 7:21	<p>Hedge accounting</p> <p>The Group designates certain derivatives as hedging instruments in respect of foreign currency risk and interest rate risk in fair value hedges, cash flow hedges, or hedges of net investments in foreign operations. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.</p>

Source	International GAAP Holdings Limited
	<p>At the inception of the hedge relationship, the Group documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk, which is when the hedging relationships meet all of the following hedge effectiveness requirements:</p> <ul style="list-style-type: none"> • there is an economic relationship between the hedged item and the hedging instrument; • the effect of credit risk does not dominate the value changes that result from that economic relationship; and • the hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group actually hedges and the quantity of the hedging instrument that the Group actually uses to hedge that quantity of hedged item. <p>If a hedging relationship ceases to meet the hedge effectiveness requirement relating to the hedge ratio but the risk management objective for that designated hedging relationship remains the same, the Group adjusts the hedge ratio of the hedging relationship (i.e. rebalances the hedge) so that it meets the qualifying criteria again.</p> <p>The Group designates the full change in the fair value of a forward contract (i.e. including the forward elements) as the hedging instrument for all of its hedging relationships involving forward contracts.</p> <p>The Group designates only the intrinsic value of option contracts as a hedged item, i.e. excluding the time value of the option. The changes in the fair value of the aligned time value of the option are recognised in other comprehensive income and accumulated in the cost of hedging reserve. If the hedged item is transaction-related, the time value is reclassified to profit or loss when the hedged item affects profit or loss. If the hedged item is time-period related, then the amount accumulated in the cost of hedging reserve is reclassified to profit or loss on a rational basis – the Group applies straight-line amortisation. Those reclassified amounts are recognised in profit or loss in the same line as the hedged item. If the hedged item is a non-financial item, then the amount accumulated in the cost of hedging reserve is removed directly from equity and included in the initial carrying amount of the recognised non-financial item. Furthermore, if the Group expects that some or all of the loss accumulated in cost of hedging reserve will not be recovered in the future, that amount is immediately reclassified to profit or loss.</p> <p>Note 62(a) sets out details of the fair values of the derivative instruments used for hedging purposes.</p> <p>Movements in the hedging reserve in equity are detailed in note 47.</p> <p><i>Fair value hedges</i></p> <p>The fair value change on qualifying hedging instruments is recognised in profit or loss except when the hedging instrument hedges an equity instrument designated at FVTOCI in which case it is recognised in other comprehensive income.</p> <p>The carrying amount of a hedged item not already measured at fair value is adjusted for the fair value change attributable to the hedged risk with a corresponding entry in profit or loss. For debt instruments measured at FVTOCI, the carrying amount is not adjusted as it is already at fair value, but the hedging gain or loss is recognised in profit or loss instead of other comprehensive income. When the hedged item is an equity instrument designated at FVTOCI, the hedging gain or loss remains in other comprehensive income to match that of the hedging instrument.</p> <p>Where hedging gains or losses are recognised in profit or loss, they are recognised in the same line as the hedged item.</p> <p>The Group discontinues hedge accounting only when the hedging relationship (or a part thereof) ceases to meet the qualifying criteria (after rebalancing, if applicable). This includes instances when the hedging instrument expires or is sold, terminated or exercised. The discontinuation is accounted for prospectively. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to profit or loss from that date.</p> <p><i>Cash flow hedges</i></p> <p>The effective portion of changes in the fair value of derivatives and other qualifying hedging instruments that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedging reserve, limited to the cumulative change in fair value of the hedged item from inception of the hedge. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.</p>

Source	International GAAP Holdings Limited
	<p>Amounts previously recognised in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously recognised in other comprehensive income and accumulated in equity are removed from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability. This transfer does not affect other comprehensive income. Furthermore, if the Group expects that some or all of the loss accumulated in the cash flow hedging reserve will not be recovered in the future, that amount is immediately reclassified to profit or loss.</p> <p>The Group discontinues hedge accounting only when the hedging relationship (or a part thereof) ceases to meet the qualifying criteria (after rebalancing, if applicable). This includes instances when the hedging instrument expires or is sold, terminated or exercised. The discontinuation is accounted for prospectively. Any gain or loss recognised in other comprehensive income and accumulated in cash flow hedge reserve at that time remains in equity and is reclassified to profit or loss when the forecast transaction occurs. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in cash flow hedge reserve is reclassified immediately to profit or loss.</p> <p><i>Hedges of net investments in foreign operations</i></p> <p>Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the foreign currency forward contracts relating to the effective portion of the hedge is recognised in other comprehensive income and accumulated in the foreign currency translation reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.</p> <p>Gains and losses on the hedging instrument accumulated in the foreign currency translation reserve are reclassified to profit or loss on the disposal or partial disposal of the foreign operation.</p> <p>Provisions</p> <p>Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.</p> <p>The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).</p> <p>When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.</p> <p><i>Restructurings</i></p> <p>A restructuring provision is recognised when the Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.</p> <p><i>Warranties</i></p> <p>Provisions for the expected cost of warranty obligations under local sale of goods legislation are recognised at the date of sale of the relevant products, at the directors' best estimate of the expenditure required to settle the Group's obligation.</p> <p><i>Onerous contracts</i></p> <p>Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.</p> <p><i>Contingent liabilities acquired in a business combination</i></p> <p>Contingent liabilities acquired in a business combination are initially measured at fair value at the acquisition date. At the end of subsequent reporting periods, such contingent liabilities are measured at the higher of the amount that would be recognised in accordance with IAS 37 and the amount recognised initially less cumulative amount of income recognised in accordance with the principles of IFRS 15.</p>

Source	International GAAP Holdings Limited
	<p>Own shares</p> <p>Own shares represent the shares of the parent company International GAAP Holdings Limited that are held in treasury or by the Employee Benefit Trust. Own shares are recorded at cost and deducted from equity.</p> <p>Share-based payments</p> <p><i>Share-based payment transactions of the Company</i></p> <p>Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. The fair value excludes the effect of non-market-based vesting conditions. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 57.</p> <p>The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of the number of equity instruments that will eventually vest. At each reporting date, the Group revises its estimate of the number of equity instruments expected to vest as a result of the effect of non-market-based vesting conditions. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to reserves.</p> <p>Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service.</p> <p>For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At each reporting date until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year.</p> <p><i>Share-based payment transactions of the acquiree in a business combination</i></p> <p>When the share-based payment awards held by the employees of an acquiree (acquiree awards) are replaced by the Group's share-based payment awards (replacement awards), both the acquiree awards and the replacement awards are measured in accordance with IFRS 2 ("market-based measure") at the acquisition date. The portion of the replacement awards that is included in measuring the consideration transferred in a business combination equals the market-based measure of the acquiree awards multiplied by the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the acquiree award. The excess of the market-based measure of the replacement awards over the market-based measure of the acquiree awards included in measuring the consideration transferred is recognised as remuneration cost for post-combination service.</p> <p>However, when the acquiree awards expire as a consequence of a business combination and the Group replaces those awards when it does not have an obligation to do so, the replacement awards are measured at their market-based measure in accordance with IFRS 2. All of the market-based measure of the replacement awards is recognised as remuneration cost for post-combination service.</p> <p>At the acquisition date, when the outstanding equity-settled share-based payment transactions held by the employees of an acquiree are not exchanged by the Group for its share-based payment transactions, the acquiree share-based payment transactions are measured at their market-based measure at the acquisition date. If the share-based payment transactions have vested by the acquisition date, they are included as part of the non-controlling interest in the acquiree. However, if the share-based payment transactions have not vested by the acquisition date, the market-based measure of the unvested share-based payment transactions is allocated to the non-controlling interest in the acquiree based on the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the share-based payment transaction. The balance is recognised as remuneration cost for post-combination service.</p>

<p>IAS 1:122</p> <p>IAS 7:21</p> <p>IAS 1:54</p> <p>IFRS 7:39(c)</p> <p>IFRS 7:44A - E</p>	<p>Commentary:</p> <p>Supplier financing arrangements</p> <p>An entity may enter into arrangements under which a 'factor' (typically, a financial institution) pays a supplier on its behalf, with the entity (i.e. the purchaser) then reimbursing the factor. Such arrangements may be referred to as, for example, 'supplier financing', 'reverse factoring' or 'structured payable arrangements'. When such arrangements are material, clear disclosure should be provided of the following:</p> <ul style="list-style-type: none"> • the approach to the presentation of significant supplier financing arrangements and, in accordance with IAS 1:122, the judgements made in applying that policy; • how supplier financing transactions have been reflected in the statement of cash flows; • the carrying amount of the liabilities in question and the line item(s) in which they are presented; and • when supplier financing arrangements have been used as a tool to manage liquidity risk, the disclosures required by IFRS 7:39(c). <p>When an entity enters into arrangements for factoring of receivables where they are not fully derecognised, it is important that the policy adopted for the treatment of cash flows arising is clearly explained and that any non-cash financing transactions are disclosed in accordance with IAS 7:43. In particular, an explanation of whether the cash flows received on the receivables are treated as operating inflows with associated financing outflows that are deemed to repay the financing liability that was recognised when the receivables were transferred. Balances that will give rise to financing cash flows should also be included in the disclosure of changes in such balances required by IAS 7:44A-44E.</p>
	<p>4. Critical accounting judgements and key sources of estimation uncertainty</p> <p>Commentary:</p> <p>The following are examples of the types of disclosures that might be required in this area. The nature of these disclosures is very specific to an individual Group's particular circumstances. Although the Model Financial Statements illustrate disclosures to comply with these requirements, it is unlikely that these specific model disclosures would be appropriate other than in very rare circumstances.</p> <p>IFRS 12.7 requires entities to disclose information about significant judgements and assumptions they have made in determining (i) whether they have control of another entity, (ii) whether they have joint control of an arrangement or significant influence over another entity, and (iii) the type of joint arrangement when the arrangement has been structured through a separate vehicle.</p> <p>In the application of the Group's accounting policies, which are described in note 3, the directors are required to make judgements (other than those involving estimations) that have a significant impact on the amounts recognised and to make estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.</p> <p>The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.</p> <p>Critical judgements in applying the Group's accounting policies</p> <p>The following are the critical judgements, apart from those involving estimations (which are presented separately below), that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in financial statements.</p> <p>Judgements in determining the timing of satisfaction of performance obligations,</p> <p>Note 8 describes the expenditure required in the year for rectification work carried out on goods supplied to one of the Group's major customers. These goods were delivered to the customer in the months of ___ to ___ 2018, and shortly thereafter the defects were identified by the customer. Following negotiations, a schedule of works was agreed, which will involve expenditure by the Group until 2019. In the light of the problems identified, management was required to consider whether it was appropriate to recognise the revenue from these transactions of CU ___ million in the current year, in line with the Group's general policy of recognising revenue when goods are delivered, or whether it was more appropriate to defer recognition until the rectification work was complete.</p>

Source	International GAAP Holdings Limited
IFRS 12:7(a); IFRS 12:9(b)	<p>In making their judgement, the directors considered the detailed criteria for the recognition of revenue set out in IFRS 15 and, in particular, whether the Group had transferred control of the goods to the customer. Following the detailed quantification of the Group's liability in respect of rectification work, and the agreed limitation on the customer's ability to require further work or to require replacement of the goods, the directors are satisfied that control has been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate warranty provision for the rectification costs.</p>
	<p><i>Capitalisation of borrowing costs</i></p> <p>As described in note 3, the Group capitalises borrowing costs directly attributable to the acquisition, construction or production of qualifying assets. Capitalisation of the borrowing costs relating to construction of the Group's premises in [A Land] was suspended in 2017, while the development was delayed as management reconsidered its detailed plans. Capitalisation of borrowing costs recommenced in 2018 – following the finalisation of revised plans, and the resumption of the activities necessary to prepare the asset for its intended use. Although construction of the premises was not restarted until May 2018, borrowing costs have been capitalised from February 2018, at which time the technical and administrative work associated with the project recommenced.</p>
	<p><i>Business model assessment</i></p> <p>Classification and measurement of financial assets depends on the results of the SPPI and the business model test (please see financial assets sections of note 3). The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Group monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Group's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets. No such changes were required during the periods presented.</p>
	<p><i>Significant increase in credit risk</i></p> <p>As explained in note 3, ECL are measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial recognition. IFRS 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased the Group takes into account qualitative and quantitative reasonable and supportable forward looking information.</p>
	<p><i>Deferred taxation on investment properties</i></p> <p>For the purposes of measuring deferred tax liabilities or deferred tax assets arising from investment properties that are measured using the fair value model, the directors have reviewed the Group's investment property portfolios and concluded that the Group's investment properties are not held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, in determining the Group's deferred taxation on investment properties, the directors have determined that the presumption that the carrying amounts of investment properties measured using the fair value model are recovered entirely through sale is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of investment properties as the Group is not subject to any income taxes on the fair value changes of the investment properties on disposal.</p>
<p><i>Control over Subsidiary B Limited</i></p> <p>Note 21 describes that Subsidiary B Limited is a subsidiary of the Group even though the Group has only a 45 per cent ownership interest and has only 45 per cent of the voting rights in Subsidiary B Limited. Subsidiary B Limited is listed on the stock exchange of [A Land]. The Group has held its 45 per cent ownership since June 2016 and the remaining 55 per cent of the ownership interests are held by thousands of shareholders that are unrelated to the Group.</p>	

Source	International GAAP Holdings Limited
IFRS 12:7(b); IFRS 12:9(e)	<p>The directors of the Company assessed whether or not the Group has control over Subsidiary B Limited based on whether the Group has the practical ability to direct the relevant activities of Subsidiary B Limited unilaterally. In making their judgement, the directors considered the Group's absolute size of holding in Subsidiary B Limited and the relative size of and dispersion of the shareholdings owned by the other shareholders. After assessment, the directors concluded that the Group has a sufficiently dominant voting interest to direct the relevant activities of Subsidiary B Limited and therefore the Group has control over Subsidiary B Limited.</p> <p>If the directors had concluded that the 45 per cent ownership interest was insufficient to give the Group control, Subsidiary B Limited would instead have been classified as an associate and the Group would have accounted for it using the equity method of accounting.</p> <p>Significant influence over Associate B Limited</p>
IAS 1:125; IAS 1:128; IAS 1:129; IAS 1:131	<p>Note 22 describes that Associate B Limited is an associate of the Group although the Group only owns a 17 per cent ownership interest in Associate B Limited. The Group has significant influence over Associate B Limited by virtue of its contractual right to appoint two out of seven directors to the board of directors of that company.</p> <p>Key sources of estimation uncertainty</p>
	<p>The key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.</p>
	<p>Taxation provisions</p> <p>The Group's current tax provision of CU___ relates to management's assessment of the amount of tax payable on open tax positions where the liabilities remain to be agreed with [insert name of relevant Tax Authority]. Uncertain tax items for which a provision of CU___ is made, relate principally to the interpretation of tax legislation regarding arrangements entered into by the Group. Due to the uncertainty associated with such tax items, there is a possibility that, on conclusion of open tax matters at a future date, the final outcome may differ significantly. Whilst a range of outcomes is reasonably possible, the extent of the reasonably possible range is from additional liabilities of up to CU___ to a reduction in liabilities of up to CU___.</p>
	<p>Impairment testing</p> <p>Following the assessment of the recoverable amount of goodwill allocated to 'Leisure goods – retail outlets', to which goodwill of CU___ is allocated, the directors consider the recoverable amount of goodwill allocated to 'Leisure goods – retail outlets' to be most sensitive to the achievement of the 2019 budget. Budgets comprise forecasts of revenue, staff costs and overheads based on current and anticipated market conditions that have been considered and approved by the Board. Whilst the Group is able to manage most of 'Leisure goods – retail outlets' costs, the revenue projections are inherently uncertain due to the short-term nature of the business and unstable market conditions. Revenue of the CGUs is most sensitive to changes in the market price of Commodity X as the CGUs products are used by companies operating in that marketplace.</p>
	<p>The market for 'Leisure goods – retail outlets' products has seen a significant slowdown over the past 18 months due to a decline in the market price of Commodity X which has only recently begun to stabilise. It is possible that further underperformance may occur in 2019 if prevailing market prices drop further or our customers reduce their capital expenditure.</p>
	<p>The sensitivity analysis in respect of the recoverable amount of 'Leisure goods – retail outlets' goodwill is presented in note 17.</p>
	<p>Calculation of loss allowance</p> <p>When measuring ECL the Group uses reasonable and supportable forward looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.</p> <p>Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.</p>

Source	International GAAP Holdings Limited
	<p>Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.</p> <p>If the ECL rates on trade receivables between 61 and 90 days past due had been X% higher (lower) as of December 2018, the loss allowance on trade receivables would have been CU__ million (2017: CU__ million) higher (lower).</p> <p>If the ECL rates on trade receivables between 31 and 60 days past due had been X% higher (lower) as of December 2018, the loss allowance on trade receivables would have been CU__ million (2017: CU__ million) higher (lower).</p> <p><i>Discount rate used to determine the carrying amount of the Group's defined benefit obligation</i></p> <p>The determination of the Group's defined benefit obligation depends on certain assumptions, which include selection of the discount rate. The discount rate is set by reference to market yields at the end of the reporting period on high quality corporate bonds. Significant assumptions are required to be made when setting the criteria for bonds to be included in the population from which the yield curve is derived. The most significant criteria considered for the selection of bonds include the issue size of the corporate bonds, quality of the bonds and the identification of outliers which are excluded. These assumptions are considered to be a key source of estimation uncertainty as relatively small changes in the assumptions used may have a significant effect on the Group's financial statements within the next year. Further information on the carrying amounts of the Group's defined benefit obligation and the sensitivity of those amounts to changes in discount rate are provided in note 58.</p> <p><i>Fair value measurements and valuation processes</i></p> <p>Some of the Group's assets and liabilities are measured at fair value for financial reporting purposes. The board of directors of the Company has set up a valuation committee, which is headed up by the Chief Financial Officer of the Company, to determine the appropriate valuation techniques and inputs for fair value measurements.</p> <p>In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group engages third party qualified valuers to perform the valuation. The valuation committee works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model. The Chief Financial Officer reports the valuation committee's findings to the board of directors of the Company every quarter to explain the cause of fluctuations in the fair value of the assets and liabilities.</p> <p>The valuations of private equity investments, contingent consideration in business combinations and non-derivative financial assets held for trading are particularly sensitive to changes in one or more unobservable inputs which are considered reasonably possible within the next financial year. Further information on the carrying amounts of these assets and the sensitivity of those amounts to changes in unobservable inputs are provided in note 62(a)(i).</p> <p><i>Provision for restoration of contaminated land</i></p> <p>On 15 December 2018, new legislation in [A Land] was enacted which resulted in the requirement for the Company to clean up historically contaminated waste sites in [A Land] and bear the costs thereof. Consequently, a provision of CU__ million has been recognised. In estimating the provision, the directors have made assumptions regarding the interpretation of the legislation and have estimated costs based on currently available information about the likely extent of contamination and potential clean-up techniques. Due to the associated uncertainty, it is possible that estimates may need to be revised during the next year as interpretations of the legislation evolve and the extent of contamination and potential approaches to clean-up are assessed in more detail. Whilst a range of outcomes is possible, the directors believe that the reasonably possible range is an increase in provisions of up to CU__ million to a reduction in provisions of up to CU__ million. See note 39 for further details.</p>
IFRS 15:113(a)	5. Revenue
IFRS 15:115	The Group derives its revenue from contracts with customers for the transfer of goods and services over time and at a point in time in the following major product lines. This is consistent with the revenue information that is disclosed for each reportable segment under IFRS 8 Operating Segments (see note 6).

IFRS 15:114	<p>Disaggregation of revenue</p> <p>Electronic equipment – direct sale customers</p> <p>Electronic equipment – wholesale customers</p> <p>Electronic equipment – internet customers</p> <p>Leisure goods – wholesale customers</p> <p>Leisure goods – Retail outlets</p> <p>Computer software installation</p> <p>Construction</p> <p>Total</p>	<hr/> <hr/>	<hr/> <hr/>
	<p>Commentary:</p> <p><i>IFRS 15:114 requires an entity to disaggregate revenue recognised from contracts with customers into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors. This disaggregation will depend on the entity's individual facts and circumstances.</i></p> <p><i>The Group has assessed that the disaggregation of revenue by operating segments is appropriate in meeting this disclosure requirement as this is the information regularly reviewed by the chief operating decision maker (CODM) in order to evaluate the financial performance of the entity.</i></p> <p><i>If an entity discloses disaggregated revenue on a basis other than that used for revenue information disclosed for each reportable segment then the entity should disclose sufficient information to allow users of the financial statements to understand the relationship between these two disclosures.</i></p>		
IFRS 15:C5(d); IFRS 15:C6	<p>The transaction price allocated to (partially) unsatisfied performance obligations at 31 December 2018 are as set out below. As permitted under the transitional provisions in IFRS 15, the transaction price allocated to (partially) unsatisfied performance obligations as of 31 December 2017 is not disclosed.</p>

The remaining _%, CU_ million will be recognised in the 2020 financial year and CU_ million in the 2021 financial year.</p>		

Source	International GAAP Holdings Limited								
	<p>Commentary:</p> <p><i>There is no requirement in IFRS 15 for contract balances (i.e. contract assets, receivables and contract liabilities) to be disclosed together at a single place in the financial statements. Indeed it will likely be more practical for many entities to continue to include balances arising from contracts with customers within the same financial statement line item and related note as previously under IAS 18 e.g. contract liabilities within a deferred revenue note. IFRS 15 allows entities to use terms other than contract asset and contract liability to describe such balances.</i></p> <p><i>Contract balances and the related disclosures have been included in the following places in the notes to the Group's accounts:</i></p> <table border="0" data-bbox="316 533 1077 705"> <tr> <td><i>Receivables</i></td> <td><i>balance described as 'Trade receivables' (Note 31)</i></td> </tr> <tr> <td><i>Contract assets</i></td> <td><i>Note 28</i></td> </tr> <tr> <td><i>Contract costs</i></td> <td><i>Note 29</i></td> </tr> <tr> <td><i>Contract liabilities</i></td> <td><i>Note 60</i></td> </tr> </table> <p><i>Materiality considerations will affect the line items to be disclosed separately within each relevant IFRS 15 contract balance. A single net contract asset or liability should be presented for each contract balance.</i></p>	<i>Receivables</i>	<i>balance described as 'Trade receivables' (Note 31)</i>	<i>Contract assets</i>	<i>Note 28</i>	<i>Contract costs</i>	<i>Note 29</i>	<i>Contract liabilities</i>	<i>Note 60</i>
<i>Receivables</i>	<i>balance described as 'Trade receivables' (Note 31)</i>								
<i>Contract assets</i>	<i>Note 28</i>								
<i>Contract costs</i>	<i>Note 29</i>								
<i>Contract liabilities</i>	<i>Note 60</i>								
	<p>6. Operating segments</p> <p>Commentary:</p> <p><i>When are entities required to present segment information?</i></p> <p><i>The following segment information is required by IFRS 8 Operating Segments to be presented in the consolidated financial statements of a group with a parent (and in the separate or individual financial statements of an entity):</i></p> <ul style="list-style-type: none"> <i>• whose debt or equity instruments are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets); or</i> <i>• that files, or is in the process of filing, its (consolidated) financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market.</i> <p><i>What needs to be disclosed when entities aggregate operating segments into a single operating segment?</i></p> <p><i>IFRS 8:22 requires entities to give a brief description of the operating segments that have been aggregated and the economic indicators that have been assessed in determining the aggregated operating segments share similar economic characteristics.</i></p> <p><i>According to IFRS 8:12, two or more operating segments may be aggregated into a single operating segment if the segments have similar economic characteristics and the segments are similar in each of the following respects:</i></p> <ul style="list-style-type: none"> <i>• the nature of the products and services;</i> <i>• the nature of the production processes;</i> <i>• the type or class of customer for their products and services;</i> <i>• the methods used to distribute their products or provide their services; and</i> <i>• if applicable, the nature of the regulatory environment, for example, banking, insurance or public utilities.</i> 								
IFRS 8:22	<p>Products and services from which reportable segments derive their revenues</p> <p>Information reported to the Group's Chief Executive (the Chief Operating Decision Maker (CODM)) for the purposes of resource allocation and assessment of segment performance is focused on the category of customer for each type of activity. The principal categories of customer are direct sales to major customers, wholesalers and internet sales. The Group's reportable segments under IFRS 8 are therefore as follows:</p>								

Source	International GAAP Holdings Limited
	<p>[Segment A] – Electronic equipment – direct sale customers</p> <p>[Segment B] – Electronic equipment – wholesale customers</p> <p>[Segment C] – Electronic equipment – internet customers</p> <p>[Segment D] – Leisure goods – wholesale customers</p> <p>[Segment E] – Leisure goods – Retail outlets</p> <p>[Segment F] – Computer software – Installation of computer software for specialised business applications</p> <p>[Segment G] – Construction – Construction of residential properties</p>
IFRS 8:22(aa)	<p>The leisure goods segments supply sports shoes and equipment, as well as outdoor play equipment.</p> <p>The electronic equipment (direct sales) segment includes a number of direct sales operations in various cities within Country A each of which is considered as a separate operating segment by the CODM. For financial statements presentation purposes, these individual operating segments have been aggregated into a single operating segment taking into account the following factors:</p> <ul style="list-style-type: none"> • these operating segments have similar long-term gross profit margins; • the nature of the products and production processes are similar; and • the methods used to distribute the products to the customers are the same. • <i>[Other factors, please specify]</i>
IFRS 5:5B	<p>Two operations (the manufacture and sale of toys and bicycles) were discontinued in the current year. The segment information reported on the next pages does not include any amounts for these discontinued operations, which are described in more detail in note 14.</p> <p>Other operations include <i>[identify other operations and their sources of revenue if any.]</i></p>

IFRS 8:27	The accounting policies of the reportable segments are the same as the Group's accounting policies described in note 3. Segment profit represents the profit earned by each segment without allocation of the share of profits of associates and joint ventures, central administration costs including directors' salaries, finance income, non-operating gains and losses in respect of financial instruments and finance costs, and income tax expense. This is the measure reported to the Group's Chief Executive for the purpose of resource allocation and assessment of segment performance.

IFRIC 19:11	(Gain)/loss on debt for equity swap		
	(i) The net loss on the redeemable preference shares designated as at FVTPL includes a gain of CU___ resulting from the decrease in fair value of the liabilities other than changes in the fair value of the liabilities attributable to the liabilities' credit risk, offset by dividends of CU___ paid during the year (note 12).		
	(ii) The amount represents a net gain on investments in listed equity shares (see note 25) and comprises an increase in fair value of CU___ (2017: CU___), including dividends of CU___ received during the year (2017: CU___).		
	(iii) The amount represents a net loss arising on an interest rate swap that economically hedges the fair value of the redeemable cumulative preference shares, but for which hedge accounting is not applied (see note 34). The net loss on the interest rate swap comprises an increase in fair value of CU___ of the swap, including interest of CU___ paid during the year.		
	No other gains or losses have been recognised in respect of financial assets and financial liabilities other than as disclosed in notes 10, 11 and 12 and the loss allowance recognised/reversed in respect of certain financial assets as disclosed in note 8.		
	The (gain)/loss arising on adjustment for the hedged item in a designated fair value hedge accounting relationship relates to the fixed rate bank loan, details of which are disclosed in note 32. This (gain)/loss forms part of the net gains or net losses on other financial liabilities carried at amortised cost.		
	During the year the Group extinguished some of its borrowings by issuing equity instruments. In accordance with IFRIC 19 Extinguishing Financial Liabilities with Equity Instruments, the (gain)/loss recognised on these transactions was CU___ (2017: CU___).

	Tax expense for the year		

Source	International GAAP Holdings Limited																																																																																																																																							
IAS 12:85	<i>[The above reconciliation should be based on the applicable tax rate that provides the most meaningful information to the users of its financial statements. Often, the most meaningful rate is the domestic rate of tax in the country in which the entity is domiciled, aggregating the tax rate applied for national taxes with the rates applied for any local taxes which are computed on a substantially similar level of taxable profit (tax loss). However, for an entity operating in several jurisdictions, it may be more meaningful to aggregate separate reconciliations prepared using the domestic rate in each individual jurisdiction].</i>																																																																																																																																							
IAS 12:84	<i>[The reconciliation should enable users of financial statements to understand whether the relationship between tax expense (income) and accounting profit is unusual and to understand the significant factors that could affect that relationship in the future. Distinguishing between recurring and non-recurring items may assist with this. It is also informative to state the effective tax rate. The relationship between tax expense (income) and accounting profit may be affected by such factors as revenue that is exempt from taxation, expenses that are not deductible in determining taxable profit (tax loss), the effect of tax losses and the effect of foreign tax rates and it is useful to explain these items.]</i>

	14. Discontinued operations	
	On [date] 2018, the Group entered into a sale agreement to dispose of [name of subsidiary], which carried out all of the Group's [___] operations. The disposal was effected in order to generate cash flow for the expansion of the Group's other businesses. The disposal was completed on [date] 2018, on which date control of [name of subsidiary] passed to the acquirer. Details of the assets and liabilities disposed of, and the calculation of the profit or loss on disposal, are disclosed in note 52.	
IFRS 5:33(b); IFRS 5:34	The results of the discontinued operations, which have been included in the profit for the year, were as follows:	

Source	International GAAP Holdings Limited	Period ended [date] 2018 CU	Year ended 31/12/2017 CU
IFRS 5:33(b)(i)	Revenue		
IFRS 5:33(b)(i)	Expenses		
IFRS 5:33(b)(i)	Profit before tax		
IFRS 5:33(b)(ii); IAS 12:81(h)	Attributable tax expense

IFRS 5:33(b)(iv); IAS 12:81(h)	Attributable tax expense		
IFRS 5:33(d)	Net loss attributable to discontinued operations (attributable to owners of the Company)		
IFRS 5:33(c)	<p>During the year, [name of subsidiary] contributed CU__ million (2017: CU__ million) to the Group's net operating cash flows, paid CU__ million (2017: CU__ million) in respect of investing activities and paid CU__ million (2017: CU__ million) in respect of financing activities.</p> <p>A loss of CU__ million arose on the disposal of [name of subsidiary], being the difference between the proceeds of disposal and the carrying amount of the subsidiary's net assets and attributable goodwill.</p> <p>In addition, on [date] the board resolved to dispose of the Group's [specify] operations and negotiations with several interested parties have subsequently taken place. The disposal is consistent with the Group's long-term policy to focus its activities on the Group's other businesses. These operations, which are expected to be sold within 12 months, have been classified as a disposal group held for sale and presented separately in the statement of financial position. The proceeds of disposal are expected to substantially exceed the carrying amount of the related net assets and accordingly no impairment losses have been recognised on the classification of these operations as held for sale. The major classes of assets and liabilities comprising the operations classified as held for sale are as follows:</p>

		_____	_____
		_____	_____
(RDR: see AASB 101.107) IAS 1:107	Proposed final dividend for the year ended 31 December 2018 of CU___ (2017: CU___) per share		
IAS 1:137(a); IAS 10:13	The proposed final dividend is subject to approval by shareholders at the Annual General Meeting and has not been included as a liability in these financial statements. The proposed dividend is payable to all shareholders on the Register of Members on <i>[insert date]</i> . The total estimated dividend to be paid is CU___ per share. The payment of this dividend will not have any tax consequences for the Group.		
	Under an arrangement dated <i>[date]</i> , Mr _____ who holds <i>[number]</i> ordinary shares representing __ per cent of the company's called up share capital, has agreed to waive all dividends due to him for a period of <i>[specify]</i> .		
	16. Earnings per share		
	Commentary:		
	<i>IAS 33 Earnings per Share requires that earnings per share (EPS) information be presented in the consolidated financial statements of a group with a parent (and in the separate or individual financial statements of an entity):</i>		
	<ul style="list-style-type: none"> • whose ordinary shares or potential ordinary shares are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local or regional markets); or • that files, or is in the process of filing, its (consolidated) financial statements with a securities commission or other regulatory organisation for the purpose of issuing ordinary shares in a public market. 		
	<i>If other entities choose to disclose EPS information voluntarily in their financial statements that comply with IFRS, the disclosures in relation to the EPS information should comply fully with the requirements set out in IAS 33.</i>		
	From continuing and discontinued operations		
	The calculation of the basic and diluted earnings per share is based on the following data:		
IAS 33:70(a)	Earnings	31/12/2018	31/12/2017
		CU	CU (Restated)
	Earnings for the purposes of basic earnings per share being net profit attributable to owners of the Company

Carrying amount

At 31 December 2018

At 31 December 2017

At 1 January 2017

IAS 36:134 - 135

The carrying amount of goodwill has been allocated to CGUs as follows:

	31/12/2018	31/12/2017
	CU	CU
[Segment C]: Electronic equipment – internet sales		
[Segment E]: Leisure goods – retail outlets		
[Segment G]: Construction operations – Alpha Construction		
[Segment G]: Construction operations – other		
	_____	_____

The Group tests goodwill annually for impairment, or more frequently if there are indications that goodwill might be impaired.

Electronic equipment – internet sales

The recoverable amount of the ‘electronic equipment – internet sales’ segment as a cash-generating unit is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of __% per annum (2017: __% per annum).

Cash flows beyond that five-year period have been extrapolated using a steady __% (2017: __%) per annum growth rate. This growth rate exceeds by __ percentage points the long-term average growth rate for the international electronic equipment market. However, among other factors, the internet sales cash-generating unit benefits from the protection of a 20-year patent on the Series Z electronic equipment, granted in 2012, which is still acknowledged as one of the top models in the market.

The steady growth rate of __% is estimated by the directors of the Company based on past performance of the cash-generating unit and their expectations of market development. The directors estimate that a decrease in growth rate by __% to __% would reduce the headroom in the cash-generating unit to nil but would not result in an impairment charge.

Leisure goods – retail outlets

The recoverable amount of this cash-generating unit is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of __% per annum (2017: __% per annum).

Cash flow projections during the budget period are based on the same expected gross margins and inventory price inflation throughout the budget period. The cash flows beyond that five-year period have been extrapolated using a steady __% (2017: __%) per annum growth rate which is the projected long-term average growth rate for the international leisure goods market.

Construction operations – Alpha Construction

The goodwill associated with Alpha Construction arose when that business was acquired by the Group in 2011. The business has continued to operate on a satisfactory basis, but without achieving any significant increase in market share.

IFRS 36.130(a),(b)

During the year, the government of [A Land] introduced new regulations requiring registration and certification of builders for government contracts. In the light of the decision to focus the Group's construction activities through the other operating units in Subsidiary C Limited, the directors have decided not to register Alpha Construction for this purpose, which means that it has no prospects of obtaining future contracts. The directors have consequently determined to write off the goodwill directly related to Alpha Construction amounting to CU____. No other write-down of the assets of Alpha Construction is considered necessary. Contracts in progress at the end of the year will be completed without loss to the Group. The recoverable amount of the Alpha Construction cash-generating unit amounted to CU____ as at 31 December 2018.

The impairment loss has been included in profit or loss in the [other operating expenses/cost of sales] line item.

Construction operations – other

The recoverable amount of the Group's remaining construction operations has been determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of __% per annum (2017: __% per annum).

Cash flows beyond that five-year period have been extrapolated using a steady __% (2017: __%) per annum growth rate. This growth rate does not exceed the long-term average growth rate for the construction market in [A Land].

Sensitivity analysis

The Group has conducted an analysis of the sensitivity of the impairment test to changes in the key assumptions used to determine the recoverable amount for each of the group of CGUs to which goodwill is allocated. The directors believe that any reasonably possible change in the key assumptions on which the recoverable amount of 'Electronic equipment – internet sales' and 'Construction operations – other' is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of the related CGUs.

At the beginning of the financial year the recoverable amount of 'Leisure goods – retail outlets' was substantially in excess of its book value. Due to current market conditions at the year-end, as discussed in note 4, the recoverable amount is closer to book value.

A __% underperformance against budgeted sales for 'Leisure goods – retail outlets' is considered reasonably possible based on recent experience and would lead to an impairment charge of CU____.

A __% underperformance against budgeted sales would reduce the headroom in 'Leisure goods – retail outlets' to nil but would not result in an impairment charge.

	Level 1	Level 2	Level 3	Fair value as at 31/12/17
	CU	CU	CU	CU
A manufacturing plant in X land contains:				
Freehold land				
Buildings				

Commentary:

The categorisation of fair value measurements into the different levels of the fair value hierarchy depends on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement. The above categorisations are for illustrative purpose only. It is worth noting the following points:

- The classification into the 3-level hierarchy is not an accounting policy choice. For land and buildings, given their unique nature, it is extremely rare that the fair value measurement would be identified as a Level 1 measurement. Whether the fair value measurement in its entirety should be classified into Level 2 or Level 3 would depend on the extent to which the inputs and assumptions used in arriving at the fair value are observable. In many situations where valuation techniques (with significant unobservable inputs) are used in estimating the fair value of the real estate properties, the fair value measurement as a whole would be classified as Level 3.
- The level within which the fair value measurement is categorised bears no relation to the quality of the valuation. For example, the fact that a real estate property is classified as a Level 3 fair value measurement does not mean that the property valuation is not reliable – it merely indicates that significant unobservable inputs have been used and significant judgement was required in arriving at the fair value.

IFRS 13:93(c)

There were no transfers between Level 1 and Level 2 during the year.

IFRS 13:95

[Where there had been a transfer between different levels of the fair value hierarchy, the Group should disclose the reasons for the transfer and the Group's policy for determining when transfers between levels are deemed to have occurred (for example, at the beginning or end of the reporting period or at the date of the event that caused the transfer).]

IAS 16:77(e)

Had the Group's freehold land and buildings (other than land and buildings classified as held for sale or included in a disposal group) been measured on a historical cost basis, their carrying amount would have been as follows.

	As at 31/12/18	As at 31/12/17
	CU	CU
Freehold land		
Buildings		

Source	International GAAP Holdings Limited
	<p>The revaluation surplus is disclosed in note 42. The revaluation surplus arises in a subsidiary and cannot be distributed to the parent due to legal restrictions in the country of incorporation.</p>
	<p>At 31 December 2018, had the land and buildings other than investment property of the Group been carried at historical cost less accumulated depreciation and accumulated impairment losses, their carrying amount would have been approximately CU__ million (2017: CU__ million).</p>
	<p>At 31 December 2018, the Group had entered into contractual commitments for the acquisition of property, plant and equipment amounting to CU__ million (2017: CU__ million).</p>
	<p>Impairment losses recognised in the year</p>
IAS 36:130(a) - (g)	<p>During the year, as the result of the unexpected poor performance of a manufacturing plant, the Group carried out a review of the recoverable amount of that manufacturing plant and the related equipment. These assets are used in the Group's [name segment] reportable segment. The review led to the recognition of an impairment loss of CU__, which has been recognised in profit or loss. The Group also estimated the fair value less costs of disposal of the manufacturing plant and the related equipment, which is based on the recent market prices of assets with similar age and obsolescence. The fair value less costs of disposal is less than the value in use and hence the recoverable amount of the relevant assets has been determined on the basis of their value in use. The discount rate used in measuring value in use was __ per cent per annum. No impairment assessment was performed in 2017 as there was no indication of impairment.</p>
IAS 36:131	<p>Additional impairment losses recognised in respect of property, plant and equipment in the year amounted to CU__ million. These losses are attributable to greater than anticipated wear and tear. Those assets have been impaired in full and they belong to the Group's [name segment] reportable segment.</p>
IAS 36:126(a)	<p>The impairment losses have been included in the profit and loss in the [other expenses/cost of sales] line item.</p> <p>The impairment loss on fixtures and equipment arose in connection with the restructuring following the disposal of [specify/provide cross-reference].</p>
IAS 16:74(a)	<p>Assets pledged as security</p> <p>Freehold land and buildings with a carrying amount of CU__ million (2017: CU__ million) have been pledged to secure borrowings of the Group (see note 32). The Group is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.</p>
IAS 17:31(a)	<p>In addition, the Group's obligations under finance leases (see note 36), all of which relate to plant and machinery and have a carrying amount of CU__ million (2017: CU__ million), are secured by the lessors' title to the leased assets.</p>

	Level 1	Level 2	Level 3	Fair value as at 31/12/17
	CU	CU	CU	CU
Commercial property units:				
located in land X				
buildings				

IFRS 13:93(c)

There were no transfers between Levels 1 and 2 during the year.

IFRS 13:93(c)

[Where there had been a transfer between the different levels of the fair value hierarchy, the Group should disclose the reasons for the transfer and the Group's policy for determining when transfers between levels are deemed to have occurred (for example, at the beginning or end of the reporting period or at the date of the event that caused the transfer).

The Group shall transfer a property to, or from, investment property when, and only when, there is evidence of a change in use. A change of use occurs if property meets, or ceases to meet, the definition of investment property. A change in management's intentions for the use of a property by itself does not constitute evidence of a change in use.]

Commentary:

Fair value hierarchy

The categorisation of fair value measurements into the different levels of the fair value hierarchy depends on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement. The above categorisations are for illustrative purpose only. It is worth noting the following points:

- *The classification into the 3-level hierarchy is not an accounting policy choice. For land and buildings, given their unique nature, it is extremely rare that the fair value measurement would be identified as a Level 1 measurement. Whether the fair value measurement in its entirety should be classified into Level 2 or Level 3 would depend on the extent to which the inputs and assumptions used in arriving at the fair value are observable. In many situations where valuation techniques (with significant unobservable inputs) are used in estimating the fair value of the real estate properties, the fair value measurement as a whole would be classified as Level 3.*
- *The level within which the fair value measurement is categorised bears no relation to the quality of the valuation. For example, the fact that a real estate property is classified as a Level 3 fair value measurement does not mean that the property valuation is not reliable – it merely indicates that significant unobservable inputs have been used and significant judgement was required in arriving at the fair value.*

Fair value disclosures for investment properties measured using the cost model

For investment properties that are measured using the cost model, IAS 40:79(e) requires the fair value of the properties to be disclosed in the notes to the financial statements. In that case, the fair value of the properties (for disclosure purpose) should be measured in accordance with IFRS 13. In addition, IFRS 13:97 requires the following disclosures:

- *the level in which fair value measurement is categorised (i.e. Level 1, 2 or 3);*
- *when the fair value measurement is categorised within Level 2 or Level 3, a description of the valuation technique(s) and the inputs used in the fair value measurement; and*
- *the highest and best use of the properties (if different from their current use) and the reasons why the properties are being used in a manner that is different from their highest and best use.*

Source		International GAAP Holdings Limited		
IFRS 13:93(d)		Valuation technique(s)	Significant unobservable input(s)	Sensitivity
IFRS 13:93(h)(i)	Commercial property units located in Land X – CC City	Income Capitalisation Approach	<p>Capitalisation rate, taking into account the capitalisation of rental income potential, nature of the property, and prevailing market condition, of ___% - ___% (2017: ___% - ___%).</p> <p>Monthly market rent, taking into account the differences in location, and individual factors, such as frontage and size, between the comparables and the property, at an average of CU__ (2017: CU__) per square metre ("sqm") per month.</p>	<p>A slight increase in the capitalisation rate used would result in a significant decrease in fair value, and vice versa.</p> <p>A significant increase in the market rent used would result in a significant increase in fair value, and vice versa.</p>
<p>Commentary:</p> <p><i>In considering the level of disaggregation of the properties for the above disclosure, management of the entity should take into account the nature and characteristics of the properties in order to provide meaningful information to the users of the financial statements regarding the fair value measurement information of the different types of properties. The breakdown above is for illustrative purposes only.</i></p> <p><i>As illustrated above, for fair value measurements categorised within Level 3 of the fair value hierarchy, an entity provides quantitative information about the significant unobservable inputs used in the fair value measurement. An entity is not required to create quantitative information to comply with this disclosure requirement if quantitative unobservable inputs are not developed by the entity when measuring fair value (e.g. when an entity uses prices from prior transactions or third-party pricing information without adjustment). However, when providing this disclosure an entity cannot ignore quantitative unobservable inputs that are significant to the fair value measurement and are reasonably available to the entity.</i></p>				
			The Group has pledged all of its investment property to secure general banking facilities granted to the Group.	
IAS 40:75(f)			The property rental income earned by the Group from its investment property, all of which is leased out under operating leases, amounted to CU__ million (2017: CU__ million). Direct operating expenses arising on the investment property, all of which generated rental income in the year, amounted to CU__ million (2017: CU__ million).	
IAS 40:75(h)			The Group has entered into a contract for the maintenance of its investment property for the next five years, which will give rise to an annual charge of CU__ million.	
<p>21. Subsidiaries</p> <p>Commentary:</p> <p><i>IFRS Standards do not explicitly require an entity to disclose a list of its subsidiaries in the consolidated financial statements. Nevertheless, local laws or regulations may require an entity to make such a disclosure. The disclosure below is for information only and may have to be modified to comply with the additional local requirements.</i></p>

Subsidiary A (i)	[A Land]						
Subsidiary B (ii)	[B Land]						
Individually immaterial subsidiaries with non-controlling interests							
Total							

IFRS 12:9(b)

(i) The Group owns __ per cent of the equity shares of Subsidiary A. However, based on the contractual arrangements between the Group and other investors, the Group has the power to appoint and remove the majority of the board of directors of Subsidiary A. The relevant activities of Subsidiary A are determined by the board of directors of Subsidiary A based on simple majority votes. Therefore, the directors of the Group concluded that the Group has control over Subsidiary A and Subsidiary A is consolidated in these financial statements.

(ii) Subsidiary B Limited is listed on the stock exchange of [A Land]. Although the Group has only __ per cent ownership in Subsidiary B Limited, the directors concluded that the Group has a sufficiently dominant voting interest to direct the relevant activities of Subsidiary B Limited on the basis of the Group's absolute size of shareholding and the relative size of and dispersion of the shareholdings owned by other shareholders. The __ per cent ownership interests in Subsidiary B Limited are owned by thousands of shareholders that are unrelated to the Group, none individually holding more than __ per cent.

(RDR: see AASB 12:13)

The reconciliation of non-controlling interests in note 51 includes an analysis of the profit or loss allocated to non-controlling interests of each subsidiary where the non-controlling interest is material.

IFRS 12:13

There are no significant restrictions on the ability of the Group to access or use assets and settle liabilities.

IFRS 12:18

During the year, the Group disposed of a __ per cent of its interest in [name of subsidiary]. The proceeds on disposal of CU__ million were received in cash. An amount of CU__ million (being the proportion share of the carrying amount of net assets in [name of subsidiary]) has been transferred to non-controlling interests (see note 51). The gain on disposal of [name of subsidiary] is disclosed in note 52. No investment was retained in the former subsidiary. The gain on disposal is included in the loss on discontinued operations, which is analysed in note 15.

(RDR: see AASB 12:13)

IFRS 12:14 - 17
IFRS 12:12,14,16

[When the Group gives financial support to a consolidated structured entity, the nature and risks (including the type and amount of support provided) should be disclosed in the financial statements. Please see IFRS 12:15 for details.]

22. Associates

IFRS 12:21(a)

Details of material associates

(RDR: see AASB 12:21(a))

Details of each of the Group's material associates at the end of the reporting period are as follows:

Commentary:

For illustrative purposes, the following associates are assumed to be material to the Group.

Name of associate	Principal activity	Place of incorporation and principal place of business	Proportion of ownership interest and voting rights held by the Group	
			31/12/18	31/12/17
Associate A Limited (i) & (ii)	[Insert activity X]			
Associate B Limited (iii)	[Insert activity Y]			

IFRS 12:21(b)(i)

All of the above associates are accounted for using the equity method in these consolidated financial statements as set out in the Group's accounting policies in note 3.

Source	International GAAP Holdings Limited
--------	-------------------------------------

IFRS 12:21(a)(iv)	(i) Pursuant to a shareholder agreement, the Company has the right to cast __ per cent of the votes at shareholder meetings of Associate A Limited.
IFRS 12:22(b); IFRS 12:21(b)(iii); IFRS 13:97	(ii) The financial year end date of Associate A Limited is 31 October. This was the reporting date established when that company was incorporated, and a change of reporting date is not permitted in __ Land. For the purposes of applying the equity method of accounting, the financial statements of Associate A Limited for the year ended 31 October 2018 have been used, and appropriate adjustments have been made for the effects of significant transactions between that date and 31 December 2018. As at 31 December 2018, the fair value of the Group's interest in Associate A Limited, which is listed on the stock exchange of [A Land], was CU__ million (2017: CU__ million) based on the quoted market price available on the stock exchange of [A Land], which is a Level 1 input in terms of IFRS 13.
IFRS 12:9(e)	(iii) Although the Group holds less than __ per cent of the equity shares of Associate B Limited, and it has less than __ per cent of the voting power at shareholder meetings, the Group exercises significant influence by virtue of its contractual right to appoint two out of seven directors to the board of directors of that company. Dividends received from associates below represent the actual amounts attributable and hence received by the Group. The other summary information that precedes the reconciliation to the Group's carrying amount represents amounts included in the IFRS financial statements of the associate, not the entity's share of these amounts, although they are adjusted to reflect fair value adjustments upon acquisition or accounting policy alignments.
IFRS 12:21(b)(ii); IFRS 12:B12; IFRS 12:B14(a)	Summarised financial information in respect of each of the Group's material associates is set out below. The summarised financial information below represents amounts in associates' financial statements prepared in accordance with IFRS Standards <i>[adjusted by the Group for equity accounting purposes]</i> .

IAS 28:22 IAS 1.98(d)	<p>In the prior year, the Group held a __ per cent interest in E Plus Limited and accounted for the investment as an associate. In December 2018, the Group disposed of a __ per cent interest in E Plus Limited to a third party for proceeds of CU__ million (received in January 2019). The Group has accounted for the remaining __ per cent interest as a financial asset at FVTOCI whose fair value at the date of disposal was CU__, which was determined using a discounted cash flow model <i>[please describe key factors and assumptions used in determining the fair value]</i>. This transaction has resulted in the recognition of a gain in profit or loss, calculated as follows.</p>			

Proceeds of disposal	
Plus: fair value of investment retained (_%)	
Less: carrying amount of investment on the date of loss of significant influence	_____
Gain recognised	_____

The gain recognised in the current year comprises a realised profit of CU__ (being the proceeds of CU__ less CU__ carrying amount of the interest disposed of) and an unrealised profit of CU__ (being the fair value less the carrying amount of the __ per cent interest retained). A current tax expense of CU__ arose on the gain realised in the current year, and a deferred tax expense of CU__ has been recognised in respect of the portion of the profit recognised that is not taxable until the remaining interest is disposed of.

IFRS 12:22(a)

Significant restriction
 [When there are significant restrictions on the ability of associates to transfer funds to the Group in form of cash dividends, or to repay loans or advances made by the Group, the Group should disclose the nature and extent of significant restrictions in the financial statements.]

23. Joint ventures

Commentary:
 In this model, the Group only has one joint venture, JV A Limited, and for illustrative purposes, JV A Limited is assumed to be material to the Group.

Details of material joint ventures

IFRS 12:21(a)
 (RDR: see AASB 12:21(a))

Details of each of the Group's material joint ventures at the end of the reporting period are as follows:

Name of joint venture	Principal activity	Place of incorporation and principal place of business	Proportion of ownership interest and voting rights held by the Group	
			31/12/18	31/12/17
JV A Limited	[Insert Activity X]	[A Land]		

IFRS 12:21(b)(i)

All of the above joint ventures are accounted for using the equity method in these consolidated financial statements as set out in the Group's accounting policies in note 3.

IFRS 7:42J(a)	<p>The investments in listed corporate bond issued by <i>[name of entity]</i> are paying ___ per cent of interest per annum and the bonds will mature on <i>[insert date]</i>. At maturity the Group will receive nominal amount of CU____. The corporate bonds are held by the Group within a business model whose objective is both to collect their contractual cash flows which are solely payments of principal and interest on the principal amount outstanding and to sell these financial assets. Hence the corporate bonds are classified as at FVTOCI. See below for impairment assessment.</p> <p>The Group holds ___ per cent of the ordinary share capital of Rocket Corp Limited, a company involved in the refining and distribution of fuel products. The directors of the Company do not consider that the Group is able to exercise significant influence over Rocket Corp Limited as the other ___ per cent of the ordinary share capital is held by one shareholder, who also manages the day-to-day operations of that company.</p> <p>At 31 December 2018, the Group also continues to hold a ___ per cent interest in E Plus Limited, a former associate.</p> <p>The respective fair value of these investments is disclosed in note 62(a)(i).</p>
IFRS 7:11A(a), (c); IFRS 7:11A(b); IFRS 7:42J(a)	<p>These investments in equity instruments are not held for trading. Instead, they are held for medium to long-term strategic purposes. Accordingly, the directors of the Company have elected to designate these investments in equity instruments as at FVTOCI as they believe that recognising short-term fluctuations in these investments' fair value in profit or loss would not be consistent with the Group's strategy of holding these investments for long-term purposes and realising their performance potential in the long run.</p>
IFRS 7:11B	<p>Apart from the disposal of ___ per cent of E Plus Limited as disclosed in note 22 which resulted in the Group's loss of significance influence there over, no other shares have been disposed of during the current reporting period.</p> <p>The bills of exchange have maturity dates ranging between ___ to ___ months from the reporting date and return a variable rate of interest. The weighted average interest rate on these securities is ___ per cent per annum (2017: ___ per cent per annum). The counterparties have a minimum A credit rating. See below for impairment assessment.</p> <p>The debentures return interest of ___ per cent per annum payable monthly, and mature on <i>[date]</i>. The counterparties have a minimum BBB- credit rating. See below for impairment assessment.</p> <p>The Group holds listed redeemable notes returning ___ per cent per annum. The notes are redeemable at par value on <i>[date]</i>. The notes are held with a single counterparty with an AA credit rating. The Group holds no collateral over these notes. See below for impairment assessment.</p> <p>The Group has provided its associates with short-term loans at rates comparable to the average commercial rate of interest. Further information about these loans is contained in note 64. See below for impairment assessment.</p> <p>The redeemable notes, bills of exchange, debentures and short-term loan to associates and loans to other parties are held by the Group within a business model whose objective is to collect their contractual cash flows which are solely payments of principal and interest on the principal amount outstanding. Hence all of those financial assets are classified as at amortised cost.</p> <p>The fair value of the investments carried at amortised cost is disclosed in note 62(a).</p>
IFRS 7:35G	<p>Impairment of financial assets</p> <p>For the purposes of impairment assessment, the corporate bonds, investments in redeemable notes, bills of exchange and debentures are considered to have low credit risk as the counterparties to these investments have a minimum BBB- credit rating. Accordingly, for the purpose of impairment assessment for these financial assets, the loss allowance is measured at an amount equal to 12-month ECL. As for the loans to related and other parties, as disclosed in note 2(b), lifetime ECL has been provided for them upon initial application of IFRS 9 until these financial assets are derecognised as it was determined on initial application of IFRS 9 that it would require undue cost and effort to determine whether their credit risk has increased significantly since initial recognition to the date of initial application of IFRS 9.</p> <p>In determining the expected credit losses for these assets, the directors of the Company have taken into account the historical default experience, the financial position of the counterparties, as well as the future prospects of the industries in which the issuers of the redeemable notes, bills of exchange and debentures operate obtained from economic expert reports, financial analyst reports and considering various external sources of actual and forecast economic information, as appropriate, in estimating the probability of default of each of these financial assets occurring within their respective loss assessment time horizon, as well as the loss upon default in each case.</p>
IFRS 7:35G(c)	<p>There has been no change in the estimation techniques or significant assumptions made during the current reporting period in assessing the loss allowance for these financial assets.</p>

Source International GAAP Holdings Limited

IFRS 7:35M

Note 62(d)(ii) details the gross carrying amount, loss allowance as well as the measurement basis of expected credit losses for each of these financial assets by credit risk rating grades.

IFRS 7:35H

The following table shows the movement in expected credit losses that has been recognised for the respective financial assets:

	12-month ECL			Lifetime ECL - not credit impaired		Total
	Bills of exchange	Redeemable notes	Debentures	Loans to related parties	Loans to other entities	
	CU	CU	CU	CU	CU

Balance as at 1 January 2017 – As restated						
Increase in loss allowance arising from new financial assets recognised in the year						
Decrease in loss allowance from derecognition of financial assets in the year						
Balance as at 31 December 2017 – As restated						
Original balance under IAS 39						
Adjustment upon application of IFRS 9						
Balance as at 1 January 2018 – As restated						
Increase in loss allowance arising from new financial assets recognised in the year						
Decrease in loss allowance from derecognition of financial assets in the year						
Balance as at 31 December 2018						

Source	International GAAP Holdings Limited
--------	-------------------------------------

IFRS 7:35B(b);
IFRS 7:35H

The significant increase in loss allowance for loans to related and other parties arose from the recognition of lifetime ECL for these loans on 1 January 2017 as upon initial application of IFRS 9, the directors of the Company considered that it would take undue cost and effort to determine whether the credit risk on these loans has increased significantly since initial recognition (see note 2(b)). Previously, no provision for impairment had been recognised for these loans as no loss event had occurred.

The loss allowance for the corporate bonds measured at FVTOCI is recognised in other comprehensive income. The movement in loss allowance is disclosed in note 42.

IAS 2:36(b)	26. Inventories	
	31/12/2018	31/12/2017
	CU	CU

IAS 2:36(d)

The cost of inventories recognised as an expense during the year in respect of continuing operations was CU__ million (2017: CU__ million).

IAS 2:36(e) - (g)

The cost of inventories recognised as an expense includes CU__ million (2017: CU__ million) in respect of write-downs of inventory to net realisable value, and has been reduced by CU__ million (2017: CU__ million) in respect of the reversal of such write-downs. Previous write-downs have been reversed as a result of increased sales prices in certain markets.

IAS 1:61

Inventories of CU__ million (2017: CU__ million) are expected to be recovered after more than 12 months.

Inventories with a carrying amount of CU__ million (2017: CU__ million; 2016: CU__ million) have been pledged as security for certain of the Group's bank overdrafts.

IFRS 15:B21(c)	27. Right to returned goods asset	
	31/12/2018	31/12/2017
	CU	CU

IFRS 15:126(a);
IFRS 15:126(d)

The right to returned goods asset represents the Group's right to recover products from customers where customers exercise their right of return under the Group's 30-day returns policy. The Group uses its accumulated historical experience to estimate the number of returns on a portfolio level using the expected value method.

IFRS 15:116(a)

28. Contract assets

	31/12/2018	31/12/2017	1/1/2017
	CU	CU	CU
Construction contracts			
Installation of software services			
Current			
Non-Current			

IFRS 15:117

Amounts relating to contract assets are balances due from customers under construction contracts that arise when the Group receives payments from customers in line with a series of performance related milestones. The Group will previously have recognised a contract asset for any work performed. Any amount previously recognised as a contract asset is reclassified to trade receivables at the point at which it is invoiced to the customer.

Payment for installation of software services is not due from the customer until the installation services are complete and therefore a contract asset is recognised over the period in which the installation services are performed to represent the entity's right to consideration for the services transferred to date.

IFRS 15:118

Commentary:
 IFRS 15:118 contains a requirement to explain the significant changes in the contract asset (and contract liability) balance during the reporting period. This explanation should include qualitative and quantitative information. Examples of changes in the contract asset and liability balances may include any of the following:

- a) changes due to business combinations;
- b) cumulative catch-up adjustments to revenue that affect the corresponding contract asset or contract liability, including adjustments arising from a change in the measure of progress, a change in an estimate of the transaction price (including any changes in the assessment of whether an estimate of variable consideration is constrained) or a contract modification;
- c) impairment of a contract asset;
- d) a change in the time frame for a right to consideration to become unconditional (i.e. for a contract asset to be reclassified to a receivable); and
- e) a change in the time frame for a performance obligation to be satisfied (i.e. for the recognition of revenue arising from a contract liability).

IFRS 7:34(a)

The directors of the Company always measure the loss allowance on amounts due from customers at an amount equal to lifetime ECL, taking into account the historical default experience and the future prospects of the construction industry. None of the amounts due from customers at the end of the reporting period is past due.

IFRS 7:35G(c)

There has been no change in the estimation techniques or significant assumptions made during the current reporting period in assessing the loss allowance for the amounts due from customers under construction contracts.

IFRS 7:35M;

IFRS 7:35N;

IFRS 9:B5.5.35

The following table details the risk profile of amounts due from customers based on the Group's provision matrix. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished between the Group's different customer base (see note 31).

Balance as at 31 December 2018		

IFRS 7:35B(b);
IFRS 7:35I

There has not been any significant change in the gross amounts of contract assets that has affected the estimation of the loss allowance.

29. Contract costs

	31/12/2018	31/12/2017
	CU	CU
Costs to obtain contracts		
Current		
Non-Current		

IFRS 15:128(a)
(RDR: see
AASB 15.128(a))

(RDR: see
AASB 15.127)
IFRS 15:127;
IFRS 15:128(b)

Costs to obtain contracts relate to incremental commission fees of ___ per cent paid to intermediaries as a result of obtaining residential property sales contracts.

These costs are amortised on a straight-line basis over the period of construction (in general, 2 years) as this reflects the period over which the residential property is transferred to the customer. In 2018, amortisation amounting to CU_____ (2017: CU_____) was recognised as part of cost of sales in the consolidated statement of profit or loss. There was no impairment loss in relation to the costs capitalised.

30. Finance lease receivables

IAS 17:47(b)

Current finance lease receivables (recoverable within 12 months)		

Source International GAAP Holdings Limited

IAS 17:47(f); IFRS 7:7 The Group enters into finance leasing arrangements for certain of its electronic equipment. The average term of finance leases entered into is __ years.

IAS 17:47(c) Unguaranteed residual values of assets leased under finance leases at the reporting date are estimated at CU__ million (2017: CU__ million).

IFRS 7:7 The interest rate inherent in the leases is fixed at the contract date for all of the lease term. The average effective interest rate contracted approximates __ per cent (2017: __ per cent) per annum.

IFRS 7:34(a) The directors of the Company estimate the loss allowance on finance lease receivables at the end of the reporting period at an amount equal to lifetime ECL. None of the finance lease receivables at the end of the reporting period is past due, and taking into account the historical default experience and the future prospects of the industries in which the lessees operate, together with the value of collateral held over these finance lease receivables (see note 62(d)(i)), the directors of the Company consider that no finance lease receivables is impaired.

IFRS 7:35G(c) There has been no change in the estimation techniques or significant assumptions made during the current reporting period in assessing the loss allowance for finance lease receivables.

31. Trade and other receivables

	31/12/2018	31/12/2017
	CU	CU
		(Restated)
Trade receivables

Trade receivables

The average credit period on sales of goods is 60 days. No interest is charged on outstanding trade receivables.

IFRS 7:35G The Group always measures the loss allowance for trade receivables at an amount equal to lifetime ECL. The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. The Group has recognised a loss allowance of 100% against all receivables over 120 days past due because historical experience has indicated that these receivables are generally not recoverable.

IFRS 7:35G (c) There has been no change in the estimation techniques or significant assumptions made during the current reporting period.

IFRS 7:35F(e); IFRS 7:35L The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or when the trade receivables are over two years past due, whichever occurs earlier. None of the trade receivables that have been written off is subject to enforcement activities.

IFRS 7:35M;
IFRS 7:35N;
IFRS 9:B5.5.35

The following table details the risk profile of trade receivables based on the Group's provision matrix. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished between the Group's different customer base.

31/12/2018	Trade receivables – days past due						Total
	Not past due	<30	31 - 60	61 - 90	91 - 120	>120

	Bank loans				
	Finance lease liabilities				

The other principal features of the Group's borrowings are as follows.

- (i) Bank overdrafts are repayable on demand. Overdrafts of CU__ million (2017: CU__ million; 2016: CU__ million) have been secured by a charge over certain debentures held by the Group dated [date]. In line with the minimum required security, the carrying value of these debentures is CU__ million (2017: CU__ million). The average effective interest rate on bank overdrafts approximates __ per cent (2017: __ per cent) per annum and are determined based on __ per cent plus prime rate.
- (ii) The Group has two principal bank loans:
- (a) A loan of CU__ million (2017: CU__ million). The loan was taken out on [date]. Repayments commenced on [date] and will continue until [date]. The loan is secured by a floating charge over certain of the Group's trade receivables dated [date], whose carrying value is CU__ million (2017: CU__ million). The Group is required to maintain trade receivables that are neither past due nor impaired with carrying value of CU__ million as security for the loan (see note 31). The loan carries interest rate at __ per cent above 3-month LIBOR.
- (b) An unsecured loan of CU__ million (2017: CU__ million). This loan was advanced on [date] and is due for repayment in full on [date]. The bank loan carries fixed interest rate at __ per cent (2017: __ per cent) per annum. The Group hedges a portion of the loan for interest rate risk using an interest rate swap exchanging fixed rate interest for variable rate interest. The outstanding balance is adjusted for fair value movements in the hedged risk, being movements in the 6-month LIBOR rate. The cumulative fair value adjustment to the loan was CU__ million (2017: CU__ million).
- (iii) Bills of exchange with a variable interest rate were issued on [date]. The current weighted average effective interest rate on the bills is __ per cent (2017: __ per cent) per annum.
- (iv) Amounts repayable to related parties of the Group carry interest of __ per cent to __ per cent (2017: __ per cent to __ per cent) per annum charged on the outstanding loan balances.
- (v) Redeemable cumulative preference shares of CU__ million were issued on [date] at an issue price of CU__ per share. The shares carry __ per cent non-discretionary dividends and are mandatorily redeemable on [date] at CU__ per share. The preference shares do not carry any equity component and are classified as financial liabilities in their entirety. At the same date when the preference shares were issued, the Group entered into pay-floating, receive-fixed interest rate swap to reduce the fair value risk of changing interest rates. The swap's notional is CU__ million and matches the principal of the preference shares. The swap matures on [date]. To mitigate the accounting mismatch arising on measuring the liability as amortised cost and measuring the derivative at FVTPL, the Group designated the preference shares as at FVTPL. The changes in the fair value of the preference shares due to the changes in the credit risk do not create or enlarge the accounting mismatch and, therefore, they are recognised in other comprehensive income and accumulated in revaluation reserve. The cumulative amount change in fair value due to credit risk was CU____ (2017: CU____). See note 2(e) and note 42 (reconciliation of revaluation reserve). The difference between the carrying amount (i.e. the fair value) of the preference shares and the contractual amount that will be required to pay at maturity is CU____ (2017: CU____). The valuation methodology and inputs used are disclosed in note 62(a)(i).
- (vi) Perpetual notes of CU__ million carrying interest of __ per cent were issued on [date] at principal value. Issue costs of CU__ million were incurred.
- (vii) On [date], the Group received an interest-free loan of CU__ million from the government of [country] to finance [description of what loan is for]. The loan is repayable in full at the end of a two-year period. Using prevailing market interest rates for an equivalent loan of __ per cent, the fair value of the loan is estimated at CU__ million. The difference of CU__ between the gross proceeds and the fair value of the loan is the benefit derived from the interest-free loan and is recognised as deferred income (see note 59). Interest charges will be recognised on this loan in 2019 (CU__) and 2020 (CU__).
- (viii) Finance lease liabilities are secured by the assets leased. The borrowings are a mix of variable and fixed interest rate debt with repayment periods not exceeding five years.

The weighted average interest rates paid during the year were as follows:

	31/12/2018	31/12/2017
	%	%
Bank overdrafts		
Bills of exchange		
Loans from related parties		
Redeemable cumulative preference shares		
Perpetual notes		
Bank loans		

IFRS 7:18
(RDR: see
AASB 7.RDR18.1)

Breach of a loan agreement

During the current year, the Group was late in paying interest for the first quarter on one of its loans with a carrying amount of CU__ million. The delay arose because of a temporary lack of funds on the date interest was payable due to a technical problem on settlement. The interest payment outstanding of CU__ million was repaid in full on the following day, including the additional interest and penalty. The lender did not request accelerated repayment of the loan and the terms of the loan were not changed. Management has reviewed the Group's settlement procedures to ensure that such circumstances do not recur.

33. Convertible loan notes

The convertible loan notes were issued on [date] at an issue price of CU__ per note. The notes are convertible into ordinary shares of the Company at any time between the date of issue of the notes and their settlement date. On issue, the loan notes were convertible at __ shares per CU__ loan note. The conversion price is at a __ per cent premium to the share price of the ordinary shares at the date the convertible loan notes were issued.

If the notes have not been converted, they will be redeemed on [date] at par. Interest of __ per cent will be paid annually up until that settlement date.

IAS 32:28

The net proceeds received from the issue of the convertible loan notes have been split between the financial liability element and an equity component, representing the fair value of the embedded option to convert the financial liability into equity of the Company, as follows:

	CU
Proceeds of issue of convertible loan notes	_____
Transaction costs	_____
Net proceeds from issue of convertible loan notes	_____
Equity component	_____
Transaction costs relating to equity component	_____
Amount classified as equity	_____
Liability component at date of issue (net of transaction costs)	_____
Interest charged	_____
Interest paid	(_____)
Carrying amount of liability component at 31 December 2018	_____

The equity component of CU__ million has been credited to the option premium on convertible notes reserve (see note 44).

The interest expensed for the year is calculated by applying an effective interest rate of __ per cent to the liability component for the __ months period since the loan notes were issued. The liability component is measured at amortised cost. The difference between the carrying amount of the liability component at the date of issue and the amount reported in the reporting at 31 December 2018 represents the effective interest rate less interest paid to that date.

34. Derivative financial instruments

IFRS 7:8(a)
(RDR: see
AASB 7.8(a))

	31/12/2018	31/12/2017

IFRS 7:13B;

IFRS 7:13C

The Group has entered into master netting agreements with the following counterparties [*state the name*].

Derivatives subject to offsetting, master netting agreements and any collateral pledged or received are presented below.

	31/12/2018	31/12/2017
	CU	CU
Counterparty A:		
Derivative assets		
Derivative liabilities		
Net amount of financial assets/(liabilities) presented in the statement of financial position		
Cash collateral (received)/paid		
Net amount		
Counterparty B:		
Derivative assets		
Derivative liabilities		
Net amount		

The derivative asset and liability with Counterparty A meet the offsetting criteria in IAS 32. Consequently, the gross derivative liability is set off against the gross derivative asset, resulting in the presentation of a net derivative asset of CU_ million in the Group's statement of financial position.

Cash collateral has also been received from Counterparty A for a portion of the net derivative asset (CU_ million). The cash collateral of CU_ million does not meet the offsetting criteria in IAS 32, but it can be set off against the net amount of the derivative asset and derivative liability in the case of default and insolvency or bankruptcy, in accordance with associated collateral arrangements.

The derivative asset and liability with Counterparty B do not meet the offsetting criteria in IAS 32. Consequently, the gross amount of the derivative asset (CU_ million) and gross amount of derivative liability (CU__ million) are presented separately in the Group's statement of financial position.

The Group did not enter into any other enforceable netting arrangements than discussed above.

Further details of derivative financial instruments are provided in note 62(c).

IAS 12:81(g)

35. Deferred tax

The following are the major deferred tax liabilities and assets recognised by the Group and movements thereon during the current and prior reporting period.

	Accelerated tax depreciation	Deferred development costs	Revaluation of building	Revaluation of financial assets	Convertible loan note - equity component	Retirement benefit obligations	Share-based payments	Tax losses	Total
	CU	CU	CU	CU	CU	CU	CU	CU	CU
At 1 January 2017 - As restated									
Charge to profit or loss									
Charge to other comprehensive income									
Charge direct to equity									
Exchange differ- ences									
At 1 January 2018 - As restated									
Charge/(credit) to profit or loss									
Charge to other comprehensive income									
Charge direct to equity									
Acquisition of subsidiary									
Disposal of sub- sidiary									
Exchange differ- ences									
Effect of change in tax rate:									
- profit or loss									
- other comprehen- sive income									
- direct to equity									
At 31 December 2018									

IAS 12:74

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis. The following is the analysis of the deferred tax balances (after offset) for financial reporting purposes:

Source		International GAAP Holdings Limited	
		31/12/2018	31/12/2017
		CU	CU
			(Restated)
	Deferred tax liabilities		
	Deferred tax assets		
IAS 12:81(e)	At the reporting date, the Group has unused tax losses of CU_ million (2017: CU_ million) available for offset against future profits. A deferred tax asset has been recognised in respect of CU_ million (2017: CU_ million) of such losses. No deferred tax asset has been recognised in respect of the remaining CU_ million (2017: CU_ million) as it is not considered probable that there will be future taxable profits available. Included in unrecognised tax losses are losses of CU_ million (2017: CU_ million) that will expire in [year]. Other losses may be carried forward indefinitely.		
IAS 12:81(f)	No deferred tax liability is recognised on temporary differences of CU_ million (2017: CU_ million) relating to the unremitted earnings of overseas subsidiaries as the Group is able to control the timings of the reversal of these temporary differences and it is probable that they will not reverse in the foreseeable future. Temporary differences arising in connection with interests in associates are insignificant.		
	36. Obligations under finance leases		
		Minimum lease payments

Financial guarantee contracts																						

IFRS 7:35G(a) - (b)

The Group's major supplier, Entity A, borrowed CU100 million from Bank Z on 30 June 2017. The bank loan has a maturity of 3 years. The Group guaranteed this bank loan and in the event of default of Entity A will have to pay Bank Z. The maximum Group exposure is CU100 million and the given guarantee covers time until maturity of underlying bank loan. The Group received a premium of CU___. The carrying amount of the guarantee is established as the higher of: amount of loss allowance calculated in accordance with IFRS 9; and

(1) premium received less cumulative amortisation of the premium to date (according to Group's policy amortisation is calculated on straight-line basis until maturity of the contract).

At the end of the reporting period, the directors of the Company have assessed the past due status of the debts under guarantee, the financial position of the debtors as well as the economic outlook of the industries in which the debtors operate, and concluded that there has not been a significant increase in the credit risk since initial recognition of the financial guarantee contracts. Accordingly, the loss allowance for financial guarantee contract issued by the Group is measured at an amount equal to 12-month ECL. Note 62(d)(ii) contains the credit risk rating grades for this financial guarantee contract.

IFRS 7:35G(c)

There has been no change in the estimation techniques or significant assumptions made during the current reporting period in assessing the loss allowance for these financial assets.

In both years the amount of loss allowance is lower than the premium less cumulative amortisation, therefore no loss allowance was recognised in profit or loss for the financial guarantee contract.

IAS 37:84(e)	Unwinding of discount					
IAS 37:84(e)	Adjustment for change in discount rate					
	Exchange difference					
IAS 37:84(a)	At 31 December 2018					
IAS 37:85(a) - (b) (RDR: see AASB 137.85(b))	The warranty provision represents management's best estimate of the Group's liability under 12-month warranties granted on electrical products, based on past experience and industry averages for defective products.					
IAS 37:85(a) - (b) (RDR: see AASB 137.85(b))	The restructuring provision relates to redundancy costs incurred on the disposal of <i>[name of subsidiary]</i> (see note 52). As at 31 December 2018, approximately 50 per cent of the affected employees had left the Group's employment, with the remainder departing in January 2019.					
IAS 37:85(a) - (b) (RDR: see AASB 137.85(b))	The restoration provision has been created upon the enactment of new environmental legislation in <i>[A Land]</i> on 15 December 2018 which requires companies in <i>[A Land]</i> to clean up contaminated land by 30 June 2020 and bear the associated costs thereof. Management is in the process of clarifying certain aspects of the legislation and therefore the final assessment of costs that the Company will need to incur may change materially based on the outcome of this process. Based on the current interpretation of the legislation, the directors have estimated a liability of CU__m. In estimating the liability, the directors have made assumptions regarding the following: local site volume of contamination, proximity to approved landfill sites, technology available to decontaminate and costs required to dispose of specialised raw materials.					
	<i>[Describe other provision.]</i>					

Commentary:

Notes 40 to 51 below set out detailed descriptions and reconciliations for each class of share capital and each component of equity, as required by IAS 1:79, IAS 1:106 and IAS 1:106A. IAS 1 permits some flexibility regarding the level of detail presented in the statement of changes in equity and these supporting notes. IAS 1 allows an analysis of other comprehensive income by item for each component of equity to be presented either in the statement of changes in equity or in the notes. For the purposes of the preparation of this model, the Group has elected to present the analysis of other comprehensive income in the notes.

IAS 1 also allows that some of the details regarding items of other comprehensive income (income tax and reclassification adjustments) may be disclosed in the notes rather than in the statement of profit or loss and other comprehensive income. Entities will determine the most appropriate presentation for their circumstances – electing to present much of the detail in the notes (as we have done in these model financial statements) ensures that the primary financial statements are not cluttered by unnecessary detail, but it does result in very detailed supporting notes.

Whichever presentation is selected, entities will need to ensure that the following requirements are met:

- detailed reconciliations are required for each class of share capital (in the statement of changes in equity or in the notes);
- detailed reconciliations are required for each component of equity – separately disclosing the impact on each such component of (i) profit or loss, (ii) each item of other comprehensive income, and (iii) transactions with owners in their capacity as owners (in the statement of changes in equity or in the notes);
- the amount of income tax relating to each item of other comprehensive income should be disclosed (in the statement of profit or loss and other comprehensive income or in the notes); and
- reclassification adjustments should be presented separately from the related item of other comprehensive income (in the statement of profit or loss and other comprehensive income or in the notes).

40. Share capital

		31/12/2018	31/12/2017
		Number	Number
IAS 1:79(a)	Authorised: __ million ordinary shares of CU__ each	_____	_____
IAS 1:79(a)	Issued and fully paid: At 1 January __ million ordinary shares of CU__ each Issued during the year Own shares acquired in the year At 31 December __ million ordinary shares of CU__ each	_____ _____ _____ _____	_____ _____ _____ _____
IAS 1:79(a)	[Give details of changes in share capital during the year.] The Company has one class of ordinary shares which carry no right to fixed income. Additionally the Company has authorised, issued and fully paid __ million redeemable cumulative preference shares of CU__ each classified as liabilities. These shares do not carry voting rights. Further details are provided in note 32.

	42. Revaluation reserves	
	<u>Properties revaluation reserve</u>	
	<p>The properties revaluation reserve arises on the revaluation of land and buildings. When revalued land or buildings are sold, the portion of the properties revaluation reserve that relates to that asset is transferred directly to retained earnings. Items of other comprehensive income included in the properties revaluation reserve will not be reclassified subsequently to profit or loss.</p> <p>Distributions from the properties revaluation reserve can be made where they are in accordance with the requirements of the Company's constitution and company law. Amounts may also be effectively distributed out of the properties revaluation reserve as part of a share buy-back. Generally, there is no restriction on the payment of 'bonus shares' out of the properties revaluation reserve. However, the payment of cash distributions out of the reserve is restricted by the terms of the Company's constitution. These restrictions do not apply to any amounts transferred to retained profits. The directors do not currently intend to make any distribution from the properties revaluation reserve.</p>

Investments revaluation reserve

The investments revaluation reserve represents the cumulative gains and losses arising on the revaluation of:

- (i) investments in equity instruments designated as at FVTOCI, net of cumulative gain/loss transferred to retained earnings upon disposal; and
- (ii) investments in debt instruments classified as at FVTOCI, net of cumulative loss allowance recognised on these investments and cumulative gain/loss reclassified to profit or loss upon disposal or reclassification of these investments.

The reconciliation of movements in the investment revaluation reserve for years 2018 and 2017 is presented below:

Balance at 31 December								

IAS 1:79(b); IAS 1:82A

The cash flow hedge reserve represents the cumulative amount of gains and losses on hedging instruments deemed effective in cash flow hedges. The cumulative deferred gain or loss on the hedging instrument is recognised in profit or loss only when the hedged transaction impacts the profit or loss, or is included directly in the initial cost or other carrying amount of the hedged non-financial items (basis adjustment).

Commentary:

The reclassified/transferred amounts disclosed in note 47 are usually disclosed in the Statement of Changes in Equity. Therefore this note may not be applicable for Tier 2 (RDR) general purpose financial statements.

IAS 1:106(d)

IAS 1:79(b);

IAS 1:82A

48. Cost of hedging reserve

The cost of hedging reserve includes the effects of the following:

- changes in fair value of the time value of option when only the intrinsic value of the option is designated as the hedging instrument;
- changes in fair value of the forward element of a forward contract when only the change in the value of the spot element of the forward contract is designated as the hedging instrument (consistent with the Group's accounting policy to recognise non-designated component of forward contracts in equity); and
- changes in fair value of the foreign currency basis spread of a financial instrument when the foreign currency basis spread of a financial instrument is excluded from the designation of that financial instrument as the hedging instrument (consistent with the Group's accounting policy to recognise non-designated component of foreign currency derivative in equity).

The changes in fair value of the time value of an option, forward element of a forward contract and foreign currency basis spread of a financial instrument, in relation to a transaction-related hedged item accumulated in the cost of hedging reserve, are reclassified to profit or loss only when the hedged transaction affects profit or loss, or included as a basis adjustment to the non-financial hedged item. The changes in fair value of the time value of an option, forward element of a forward contract and foreign currency basis spread of a financial instrument, in relation to a time-period related hedged item accumulated in the cash flow hedging reserve, are amortised to profit or loss on a rational basis over the term of the hedging relationship.

IFRS 7:24F

The changes in fair value of the *[time value of an option / forward element of a forward contract / foreign currency basis spread of a financial instrument]* and their related reclassification adjustments and amortisation per risk category is presented below:

	Foreign exchange risk		Interest rate risk		Commodity risk		Total

52. Disposal of subsidiary

As referred to in note 14, on *[date]* the Group disposed of its interest in *[name of subsidiary]*.

The net assets of *[name of subsidiary]* at the date of disposal were as follows:

	<u>[date]</u>
	CU
Property, plant and equipment	
Inventories	
Trade receivables	
Bank balances and cash	
Retirement benefit obligation	
Deferred tax liability	
Current tax liability	
Trade payables	
Bank overdraft	
Attributable goodwill	
Gain on disposal	
Total consideration	
Satisfied by:	
Cash and cash equivalents	
Deferred consideration	
Net cash inflow arising on disposal:	
Consideration received in cash and cash equivalents	
Less: cash and cash equivalents disposed of	

There were no disposals of subsidiaries made in 2017.

The deferred consideration will be settled in cash by the purchaser on or before *[date]*.

The impact of *[name of subsidiary]* on the Group's results in the current and prior years is disclosed in note 14.

IFRS 12:19

The gain on disposal is included in the profit for the year from discontinued operations (see note 14).

	Non-controlling interest – outstanding share options granted by [Acquisition B Limited]	
	Total consideration	
	Satisfied by:	
	Cash	
	Equity instruments (___ ordinary shares of parent company)	
IFRS 3:B64(f); IAS 7:40(a)	Total consideration transferred	
	Net cash outflow arising on acquisition:	
IAS 7:40(b)	Cash consideration	
IAS 7:40(c)	Less: cash and cash equivalent balances acquired	
IFRS 3:B67(a)	The initial accounting for the acquisition of [Acquisition B Limited] has only been provisionally determined at the end of the reporting period. For tax purposes, the tax values of [Acquisition B Limited]'s assets are required to be reset based on market values of the assets. At the date of finalisation of these consolidated financial statements, the necessary market valuations and other calculations had not been finalised and they have therefore only been provisionally determined based on the directors' best estimate of the likely tax values.	
IFRS 3:B64(h)	The fair value of the financial assets includes receivables [describe type of receivables] with a fair value of CU__ million and a gross contractual value of CU__ million. The best estimate at acquisition date of the contractual cash flows not to be collected are CU__ million.	
IFRS 3:B64(e)	The goodwill of CU__ million arising from the acquisition consists of [describe factors that make up goodwill recognised].	
IFRS 3:B64(k)	None of the goodwill is expected to be deductible for income tax purposes.	
IAS 36:84; IAS 36:133	<p>Commentary:</p> <p><i>If the initial allocation of goodwill acquired in a business combination during the period cannot be completed before the end of the reporting period, the amount of the unallocated goodwill should be disclosed together with the reasons why that amount remains unallocated.</i></p>	

The fair value of the __ ordinary shares issued as part of the consideration paid for [Acquisition B Limited] (CU__ million) was determined on the basis of [describe method for determining fair value].

IFRS 3:B64(o) The non-controlling interest (20% ownership interest in [Acquisition B Limited]) recognised at the acquisition date was measured by reference to the fair value of the non-controlling interest and amounted to CU____. This fair value was estimated by applying an income approach. The following were the key model inputs used in determining the fair value:

- assumed discount rate of __%;
- assumed long-term sustainable growth rates of __% to __%; and
- assumed adjustments because of the lack of control or lack of marketability that market participants would consider when estimating the fair value of the non-controlling interests in [Acquisition B Limited].

All outstanding share options granted by [Acquisition B Limited] to its employees had vested by the acquisition date. These share options were measured in accordance with IFRS 2 at their market-based measure of CU____ and were included in the non-controlling interest in [Acquisition B Limited]. Methods and significant assumptions used in determining the market-based measure at the acquisition date are set out in note 57.

IFRS 3:B64(m) Acquisition-related costs (included in administrative expenses) amount to CU__ million.

IFRS 3:B64(q) [Name of company acquired] contributed CU__ million revenue and CU__ million to the Group's profit for the period between the date of acquisition and the reporting date.

IFRS 3:B64(q) If the acquisition of [name of company acquired] had been completed on the first day of the financial year, Group revenues for the year would have been CU__ million and Group profit would have been CU__ million.

IFRS 3:B65 (RDR: see AASB 3.RDRB65.1) IFRS 3:B66 [The disclosures illustrated should be given separately for each business combination except that certain disclosures may be disclosed in aggregate for business combinations that are individually immaterial.]

The Standard also imposes identical disclosure requirements for business combinations that are effected after the reporting date but before the financial statements are authorised for issue.

IAS 7:45 54. Notes to the cash flow statement
Cash and cash equivalents

	31/12/2018	31/12/2017
	CU	CU
Cash and bank balances	_____	_____
Bank overdrafts (see note 32)	_____	_____
Cash and bank balances included in disposal group held for sale (see note 14)	_____	_____

See note 54 of section 10 Illustrative disclosures in the December 2018 Guide for a disclosure of the reconciliation of the net cash flows from operating activities to profit (loss) when an entity uses the direct method to present its statement of cash flows.

Cash and cash equivalents comprise cash and short-term bank deposits with an original maturity of three months or less, net of outstanding bank overdrafts. The carrying amount of these assets is approximately equal to their fair value. Cash and cash equivalents at the end of the reporting period as shown in the consolidated statement of cash flows can be reconciled to the related items in the consolidated reporting position as shown above.

IAS 7:43

Non-cash transactions

Additions to fixtures and equipment during the year amounting to CU_ million were financed by new finance leases. Additions of CU_ million in 2018 (2017: CU_ million) were acquired on deferred payment terms, the settlement of which are still outstanding at year end.

IAS 7:44A - E

Changes in liabilities arising from financing activities

The table below details changes in the Group's liabilities arising from financing activities, including both cash and non-cash changes. Liabilities arising from financing activities are those for which cash flows were, or future cash flows will be, classified in the Group's consolidated cash flow statement as cash flows from financing activities.

	Non-cash changes								
	1 January 2017	Financing cash flows (i)	Equity component of convertible loan notes	Acquisition of subsidiary (note 53)	Disposal of subsidiary (note 52)	Fair value adjustments (notes 11, 12 and 62)	New finance leases	Other changes (ii)	31 December 2017
	CU	CU	CU	CU	CU	CU	CU	CU	CU
Convertible loan notes (note 33)									
Perpetual notes (note 32)									
Bank loans (note 32)									
Loans from related parties (note 32)									
Finance lease liabilities (note 36)									
Bills of exchange (note 32)									
Redeemable preference shares (note 33)									
Interest rate swaps fair value hedging or economically hedging financing liabilities (note 34)									
Contingent consideration (note 38)									
Total liabilities from financing activities									

	Non-cash changes								31 December 2018
	1 January 2018	Financing cash flows (i)	Equity component of convertible loan notes	Acquisition of subsidiary (note 53)	Disposal of subsidiary (note 52)	Fair value adjustments (notes 11, 12 and 62)	New finance leases	Other changes (ii)	
	CU	CU	CU	CU	CU	CU	CU	CU	CU
Convertible loan notes (note 33)									
Perpetual notes (note 32)									
Bank loans (note 32)									
Loans from related parties (note 32)									
Finance lease liabilities (note 36)									
Bills of exchange (note 32)									
Redeemable preference shares (note 33)									
Interest rate swaps fair value hedging or economically hedging financing liabilities (note 34)									
Contingent consideration (note 38)									
Total liabilities from financing activities									

(i) The cash flows from bank loans, loans from related parties and other borrowings make up the net amount of proceeds from borrowings and repayments of borrowings in the cash flow statement.

(ii) Other changes include interest accruals and payments.

55. Contingent liabilities

During the reporting period, a customer of the Group instigated proceedings against it for alleged defects in an electronic product which, it is claimed, were the cause of a major fire in the customer's premises on [date]. Total losses to the customer have been estimated at CU__ million and this amount is being claimed from the Group.

The Group's lawyers have advised that they do not consider that the claim has merit, and they have recommended that it be contested. No provision has been made in these financial statements as the Group's management does not consider that there is any probable loss.

IFRS 12:23(b)	Contingent liabilities incurred by the Group arising from its interest in associates [<i>disclose details</i>]		
	Group's share of associates' contingent liabilities		
	The amount disclosed represents the Group's share of contingent liabilities of associates. The extent to which an outflow of funds will be required is dependent on the future operations of the associates being more or less favourable than currently expected.		
	56. Operating lease arrangements		
IAS 17:35(c)	The Group as lessee		
		31/12/2018	31/12/2017
		CU	CU
	Minimum lease payments under operating leases recognised as an expense in the year		
	Contingent rentals		
	Sub-lease payments received		
IAS 17:35(a)	At the reporting date, the Group had outstanding commitments for future minimum lease payments under non-cancellable operating leases, which fall due as follows:		
		31/12/2018	31/12/2017
		CU	CU
	Within one year		
	In the second to fifth years inclusive		
	After five years		
IAS 17:35(d)	Operating lease payments represent rentals payable by the Group for certain of its office properties. Leases are negotiated for an average term of [<i>number</i>] years and rentals are fixed for an average of [<i>number</i>] years with an option to extend for a further [<i>number</i>] years at the then prevailing market rate.		
	Liabilities recognised in respect of non-cancellable operating leases:		
		31/12/2018	31/12/2017
		CU	CU
	Lease incentives		
	Current		
	Non-current		

Lease incentives relate to the rent free period (__ months) on the leased offices in [*please insert*]. The annual, contractual rent after rent free period is CU_ million. The lease agreement will expire in __ years.

IAS 17:56(c)

The Group as lessor

As set out in note 20 property rental income earned during the year was CU_ million (2017: CU_ million). Certain of the Group's properties held for rental purposes, with a carrying amount of CU_ million, have been disposed of since the reporting date. The remaining properties are expected to generate rental yields of __ per cent on an ongoing basis. All of the properties held have committed tenants for the next [*number*] years. All operating lease contracts contain market review clauses in the event that the lessee exercises its option to renew. The lessee does not have an option to purchase the property at the expiry of the lease period.

IAS 17:56(a)
(RDR: see
AASB 117.56(a))

At the reporting date, the Group had contracted with tenants for the following future minimum lease payments:

	31/12/2018	31/12/2017
	CU	CU
Within one year		
In the second to fifth years inclusive		
After five years		

IFRS 2:44;
IFRS 2:45(a)

57. Share-based payments

Equity-settled share option plan

The Company has a share option plan for all employees of the Group. In accordance with the terms of the plan, as approved by shareholders at a previous annual general meeting, employees with more than __ years' service with the Group may be granted options to purchase ordinary shares.

Each employee share option converts into one ordinary share of the Company on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

The number of options granted is calculated in accordance with the performance-based formula approved by shareholders at the previous annual general meeting and is subject to approval by the remuneration committee. The formula rewards employees to the extent of the Group's and the individual's achievement judged against both qualitative and quantitative criteria from the following financial and customer service measures:

- improvement in share price
- improvement in net profit
- improvement in return to shareholders
- reduction in warranty claims
- results of client satisfaction surveys
- reduction in rate of staff turnover

Options are exercisable at a price equal to the average quoted market price of the Company's shares on the date of grant. The vesting period is three years. If the options remain unexercised after a period of five years from the date of grant the options expire. Options are forfeited if the employee leaves the Group before the options vest.

IFRS 2:45(b)

Details of the share options outstanding during the year are as follows.

	31/12/2018	31/12/2017
	Number of share options	Weighted average exercise price (in CU)
Outstanding at beginning of year		
Granted during the year		
Forfeited during the year		
Exercised during the year		
Expired during the year		
Outstanding at the end of the year		
Exercisable at the end of the year		

(RDR: see
AASB 2.47(a))
IFRS 2:45(c)
IFRS 2:45(d)
IFRS 2:46;
IFRS 2:47(a)
(RDR: see
AASB 2.RDR46.1)
(RDR: see
AASB 2.47(a))

The weighted average share price at the date of exercise for share options exercised during the period was __. The options outstanding at 31 December 2018 had a weighted average exercise price of __, and a weighted average remaining contractual life of __ years. In 2018, options were granted on [dates]. The aggregate of the estimated fair values of the options granted on those dates is CU__ million. In 2017, options were granted on [dates]. The aggregate of the estimated fair values of the options granted on those dates is CU__ million. The inputs into the [Specify Model] model are as follows:

	31/12/2018	31/12/2017
Weighted average share price	CU__	CU__
Weighted average exercise price	CU__	CU__
Expected volatility		
Expected life	years	years
Risk-free rate	_%	_%
Expected dividend yields	_%	_%

Source International GAAP Holdings Limited

Expected volatility was determined by calculating the historical volatility of the Group's share price over the previous ___ years. The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioural considerations.

IFRS 2:47(c)

During 2018, the Group re-priced certain of its outstanding options. The strike price was reduced from CU_ to the then current market price of CU_. The incremental fair value of CU_ will be expensed over the remaining vesting period (two years). The Group used the inputs noted above to measure the fair value of the old and new options.

IFRS 2:51(a)

The Group recognised total expenses of CU_ and CU_ related to equity-settled share-based payment transactions in 2018 and 2017 respectively.

[The disclosure requirements for an LTIP plan are the same as a share option plan and should be inserted here if relevant.]

IFRS 2:51(b)

Cash-settled share-based payments

AASB 2.RDR46.2

The Group issues to certain employees share appreciation rights (SARs) that require the Group to pay the intrinsic value of the SAR to the employee at the date of exercise. The Group has recorded liabilities of CU_ and CU_ in 2018 and 2017. Fair value of the SARs is determined by using the *[Specify Model]* model using the assumptions noted in the above table. The Group recorded total expenses of CU_ and CU_ in 2018 and 2017, respectively. The total intrinsic value at 31 December 2018 and 2017 was CU_ and CU_, respectively.

Employee share option plan of a subsidiary acquired in the current year

IFRS 2:45(a)

[Acquisition B Limited] has a share option plan for its executives and senior employees. The outstanding share options were not replaced and were still in existence at the date of acquisition of *[Acquisition B Limited]*.

Each employee share option of *[Acquisition B Limited]* converts into one ordinary share of *[Acquisition B Limited]* on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry. All outstanding share options granted by *[Acquisition B Limited]* had been vested by the date when the Group acquired *[Acquisition B Limited]*.

The following share-based payment arrangements were in existence during the current year:

Options series	Number	Expiry date	Exercise price	Market-based measure at the acquisition date of Subsix Limited
			CU	CU

(1) Granted on 13 March 2017

(2) Granted on 18 September 2017

IFRS 2:46;
IFRS 2:47(a)

(RDR: see
AASB 2.RDR46.1)

All outstanding vested share options were measured in accordance with IFRS 2 at their market-based measure at the acquisition date. The weighted average market-based measure of the share options determined at the acquisition date of *[Acquisition B Limited]* is CU____. Options were priced using a *[Specify Model]* option pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions (including the probability of meeting market conditions attached to the option), and behavioural considerations. Expected volatility is based on the historical share price volatility over the past 5 years. To allow for the effects of early exercise, it was assumed that executives and senior employees would exercise the options after vesting date when the share price reaches three and a half times the exercise price.

	Option series	
	Series 1	Series 2
Acquisition date share price	CU__	CU__
Weighted average exercise price	CU__	CU__
Expected volatility		
Expected life	__years	__years
Risk-free rate	__%	__%
Expected dividend yields	__%	__%

IFRS 2:45(d)

No share options were granted or exercised after the Group obtained control over [Acquisition B Limited]. The share options outstanding at 31 December 2018 had an exercise price of CU__ and a weighted average remaining contractual life of __ days.

Other share-based payment plans

The employee share purchase plans are open to almost all employees and provide for a purchase price equal to the daily average market price on the date of grant, less __ per cent. The shares can be purchased during a two-week period each year. The shares so purchased are generally placed in the employee share savings plan for a five-year period. Pursuant to these plans, the Group issued __ ordinary shares in 2018, at weighted average share prices of __. The discount of CU__ million will be expensed over the vesting period of __ years.

58. Retirement benefit plans

Defined contribution plans

The Group operates defined contribution retirement benefit plans for all qualifying employees of its construction and leasing divisions in [A Land]. The assets of the plans are held separately from those of the Group in funds under the control of trustees. Where there are employees who leave the plans prior to vesting fully in the contributions, the contributions payable by the Group are reduced by the amount of forfeited contributions.

IAS 19:43

The employees of the Group's subsidiary in [B Land] are members of a state-managed retirement benefit plan operated by the government of [B Land]. The subsidiary is required to contribute a specified percentage of payroll costs to the retirement benefit plan to fund the benefits. The only obligation of the Group with respect to the retirement benefit plan is to make the specified contributions.

IAS 19:53

The total expense recognised in profit or loss of CU__ million (2017: CU__ million) represents contributions payable to these plans by the Group at rates specified in the rules of the plans. As at 31 December 2018, contributions of CU__ million (2017: CU__ million) due in respect of the current reporting period had not been paid over to the plans.

Defined benefit plans

IAS 19:139(a)
(RDR: see
AASB 119.139(a))

The Group sponsors defined benefit plans for qualifying employees of its subsidiaries in [D Land] and previously for the employees of [name of company]. The defined benefit plans are administered by a separate fund that is legally separated from the company. The trustees of the pension fund are required by law to act in the interest of the fund and of all relevant stakeholders in the plan. The trustees of the pension fund are responsible for the investment policy with regard to the assets of the fund.

Under the plans, the employees are entitled to post-retirement yearly instalments amounting to __ per cent of final salary on attainment of a retirement age of __. The pensionable salary is limited to CU__. The pensionable salary is the difference between the current salary of the employee and the state retirement benefit. In addition, the service period is limited to __ years resulting in a maximum yearly entitlement (life-long annuity) of __ per cent of final salary.

The defined benefit plans require contributions from employees. Contributions are in the following two forms; one is based on the number of years of service and the other one is based on a fixed percentage of salary of the employees. Employees can also make discretionary contributions to the plans.

IAS 19:139(b)

The plans in [D Land] typically expose the company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk. The risk relating to benefits to be paid to the dependants of plan members is re-insured by an external insurance company.

Investment risk	The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to high quality corporate bond yields; if the return on plan asset is below this rate, it will create a plan deficit. Currently the plan has a relatively balanced investment in equity securities, debt instruments and real estate. Due to the long-term nature of the plan liabilities, the trustees of the pension fund consider it appropriate that a reasonable portion of the plan assets should be invested in equity securities and in real estate to leverage the return generated by the fund.
Interest risk	A decrease in the bond interest rate will increase the plan liability but this will be partially offset by an increase in the return on the plan's debt investments.
Longevity risk	The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.
Salary risk	The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

No other post-retirement benefits are provided to these employees.

The most recent actuarial valuations of the plan assets and the present value of the defined benefit liability were carried out at 31 December 2018 by Mr _____, Fellow of the Institute of Actuaries. The present value of the defined benefit liability, and the related current service cost and past service cost, were measured using the projected unit credit method.

IAS 19:144

The principal assumptions used for the purposes of the actuarial valuations were as follows:

	Valuation at	
	31/12/2018	31/12/2017
	%	%

Key assumptions used:

Discount rate(s)

Expected rate(s) of salary increase

Average longevity at retirement age for current pensioners (years)*

Male

Female

Average longevity at retirement age for current employees (future pensioners) (years)*

Male

Female

Others [describe]

* Based on [A Land]'s standard mortality table with modifications to reflect expected changes in mortality/others [describe].

IAS 19:135;
IAS 19:120
(RDR: see
AASB 119.135

Source	International GAAP Holdings Limited
	<p>Derivatives are classified as Level 2 instruments and property as Level 3 instruments. It is the policy of the fund to use interest rate swaps to hedge its exposure to interest rate risk. It is the policy of the fund to cover __ per cent of the exposure to interest rate risk of the defined benefit obligation by the use of debt instruments in combination with interest rate swaps. This policy has been realised during the reporting and preceding period. Foreign currency exposures are fully hedged by the use of the forward foreign exchange contracts.</p>
IAS 19:143	<p>The plan assets include ordinary shares of International GAAP Holdings Limited with a fair value of CU__ million (2017: CU__ million) and property occupied by a subsidiary of International GAAP Holdings Limited with a fair value of CU__ million (2017: CU__ million).</p>
IAS 19:145(a) IAS 19:145(b)	<p>Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and mortality. The sensitivity analyses below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.</p> <p>If the discount rate is 100 basis points higher (lower), the defined benefit obligation would decrease/(increase) by CU__ million (2017: CU__ million).</p> <p>If the expected salary growth increases (decreases) by 1 per cent, the defined benefit obligation would increase/(decrease) by CU__ million (2017: CU__ million).</p> <p>If the life expectancy increases/(decreases) by one year for both men and women, the defined benefit obligation would increase/(decrease) by CU__ million (2017: CU__ million).</p> <p>The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the changes in assumptions would occur in isolation of one another as some of the assumptions may be correlated.</p>
IAS 19:145(c)	<p>In presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the statement of financial position.</p> <p>There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.</p>
IAS 19:146	<p>Each year an ALM (Asset-Liability Matching) study is performed in which the consequences of the strategic investment policies are analysed in terms of risk-and-return profiles. Investment and contribution policies are integrated within this study.</p> <p>The main strategic choices that are formulated in the actuarial and technical policy document of the Fund are:</p> <ul style="list-style-type: none"> - Asset mix based on __ per cent equity instruments, __ per cent debt instruments and __ per cent investment property; - Interest rate sensitivity caused by the duration of the defined benefit obligation should be reduced __ per cent by the use of debt instruments in combination with interest rate swaps; and - Maintaining an equity buffer that gives a __ per cent assurance that assets are sufficient within the next 12 months. <p>There has been no change in the processes used by the Group to manage its risks from prior periods.</p>
IAS 19:147	<p>The Group's subsidiaries should fund the cost of the entitlements expected to be earned on a yearly basis. Employees pay a fixed __ per cent of pensionable salary. The residual contribution (including back service payments) is paid by the entities of the Group. The funding requirements are based on a local actuarial measurement framework. In this framework the discount rate is set on a risk free rate. Furthermore, premiums are determined on a current salary base. Additional liabilities stemming from past service due to salary increases (back-service liabilities) should be paid immediately to the plan. Apart from paying the costs of the entitlements the Group's subsidiaries are not liable to pay additional contributions in case the plan does not hold sufficient assets. In that case the plan should take other measures to restore its solvency such as a reduction of the entitlements of the plan members.</p> <p>The average duration of the benefit obligation at the end of the reporting period is __ years (2017: __ years). This number can be subdivided into the duration related to:</p> <ul style="list-style-type: none"> • active members: __ years (2017: __ years); • deferred members: __ years (2017: __ years); and • retired members: __ years (2017: __ years). <p>The Group expects to make a contribution of CU__ million (2017: CU__ million) to the defined benefit plans during the next financial year. The Group is committed to paying into the plan for [X] future years, CU__ per annum in line with the agreed Schedule of Contributions.</p>

IAS 20:39(b)

59. Deferred income – government grant

	31/12/2018	31/12/2017
	CU	CU
Current		
Non-current		

The deferred income arises as a result of the benefit received from an interest-free government loan received on [date] (see note 32). The income will be offset against training costs to be incurred in 2019 (CU_) and 20VV (CU_).

60. Contract liabilities

IFRS 15:116(a)

	31/12/2018	31/12/2017	1/1/2017
	CU	CU	CU
Arising from customer loyalty programme (i)			
Amounts received in advance of delivery for internet Sales (ii)			
Maintenance services (iii)			
Amounts related to construction contracts (iv)			
Current			
Non-current			

IFRS 15:117

(i) A contract liability arises in respect of the Group's Maxi-Points Scheme as these points provide a benefit to customers that they would not receive without entering into a purchase contract and the promise to provide loyalty points to the customer is therefore a separate performance obligation. A contract liability is recognised for revenue relating to the loyalty points at the time of the initial sales transaction.

IFRS 15:117

(ii) For internet sales, revenue is recognised when control of the goods has transferred to the customer, being at the point the goods are delivered to the customer. When the customer initially purchases the goods online, the transaction price received at that point by the Group is recognised as contract liability until the goods have been delivered to the customer.

IFRS 15:117

(iii) Revenue relating to maintenance services is recognised over time although the customer pays up-front in full for these services. A contract liability is recognised for revenue relating to the maintenance services at the time of the initial sales transaction and is released over the service period.

IFRS 15:117

(iv) Contract liabilities relating to construction contracts are balances due to customers under construction contracts. These arise if a particular milestone payment exceeds the revenue recognised to date under the cost-to-cost method.

IFRS 15:118

There were no significant changes in the contract liability balances during the reporting period.

IFRS 15:116(b);
IFRS 15:116(c)

The following table shows how much of the revenue recognised in the current reporting period relates to brought-forward contract liabilities. There was no revenue recognised in the current reporting period that related to performance obligations that were satisfied in a prior year.

Source	International GAAP Holdings Limited	
	31/12/2018	31/12/2017
	CU	CU
Arising from customer loyalty programme		
Amounts received in advance of delivery for internet sales		
Maintenance services		
Amounts related to construction contracts		
61. Refund liability		
	31/12/2018	31/12/2017
	CU	CU
Refund liability		
IFRS 15:119(d); IFRS 15:126(a)	The refund liability relates to customers' right to return products within 30 days of purchase. At the point of sale, a refund liability and a corresponding adjustment to revenue is recognised for those products expected to be returned. The Group uses its accumulated historical experience to estimate the number of returns on a portfolio level using the expected value method.	

62. Financial Instruments

Commentary:

The following are examples of the types of disclosures that might be required in this area. The matters disclosed will be dictated by the circumstances of the individual entity, by the significance of judgements and estimates made to the results and financial position, and the information provided to key management personnel.

(a) Classes and categories of financial instruments and their fair values

The following table combines information about:

- classes of financial instruments based on their nature and characteristics;
- the carrying amounts of financial instruments;
- fair values of financial instruments (except financial instruments when carrying amount approximates their fair value); and
- fair value hierarchy levels of financial assets and financial liabilities for which fair value was disclosed.

Fair value hierarchy levels 1 to 3 are based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

IFRS 13:91
(RDR: see
AASB 13.91
AASB 13.93(d))

(a)(i) Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Financial assets/ financial liabilities	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship and sensitivity of unobservable inputs to fair value
1) Foreign currency forward contracts and interest rate swaps (note 34)	Discounted cash flow. Future cash flows are estimated based on forward exchange rates (from observable forward exchange rates at the end of the reporting period) and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.	N/A	N/A
2) Commodity options (note 34)	Black-Scholes model The following variables were taken into consideration: current underlying price of the commodity, options strike price, time until expiration (expressed as a percent of a year), implied volatility of the commodity and LIBOR.	N/A	N/A
3) Held-for-trading shares (note 25)	Quoted bid prices in an active market.	N/A	N/A
4) Investments in unlisted shares (note 25)	Income approach – in this approach, the discounted cash flow method was used to capture the present value of the expected future economic benefits to be derived from the ownership of these investees.	Long-term revenue growth rates, taking into account management's experience and knowledge of market conditions of the specific industries, ranging from _ to _ per cent (2017: _ – CU_ per cent).	The higher the revenue growth rate, the higher the fair value. If the revenue growth was _ per cent higher/lower while all other variables were held constant, the carrying amount would increase/decrease by CU_ million (2017: increase/decrease by CU_ million).
		Long-term pre-tax operating margin taking into account management's experience and knowledge of market conditions of the specific industries, ranging from _ to _ per cent (2017: _ to _ per cent).	The higher the pre-tax operating margin, the higher the fair value. If the pre-tax operating margin was _ per cent higher/lower while all other variables were held constant, the carrying amount would increase/decrease by CU_ million (2017: increase/decrease by CU_ million).
		Weighted average cost of capital, determined using a Capital Asset Pricing Model, ranging from _ to _ per cent (2017: _ to _ per cent).	The higher the weighted average cost of capital, the lower the fair value. If the weighted average cost of capital was _ per cent higher/lower while all other variables were held constant, the carrying amount would decrease/increase by CU_ million (2017: decrease/increase by CU_ million).
		Discount for lack of marketability, determined by reference to the share price of listed entities in similar industries, ranging from _ to _ per cent (2017: _ to _ per cent).	The higher the discount, the lower the fair value. If the discount was _ per cent higher/lower while all other variables were held constant, the carrying amount would decrease/increase by CU_ million (2017: decrease/increase by CU_ million).
5) Listed corporate bond (note 25)	Quoted bid prices in an active market.	N/A	N/A
6) Redeemable cumulative preference shares (note 32)	Discounted cash flow at a discount rate of _ per cent (2017: _ per cent) that reflects the Group's current borrowing rate at the end of the reporting period.	N/A	N/A
7) Contingent consideration in a business combination (note 38)	Discounted cash flow method was used to capture the present value of the Group arising from the contingent consideration.	Discount rate of _ per cent determined using a Capital Asset Pricing Model.	The higher the discount rate, the lower the fair value. If the discount rate was _ per cent higher/lower while all other variables were held constant, the carrying amount would decrease/increase by CU_ million (2017: decrease/increase by CU_ million).
		Probability-adjusted revenues and profits, with a range from CU_ to CU_ and a range from CU_ to CU_ respectively.	The higher the amounts of revenue and profit, the higher the fair value. If the revenue was _ per cent higher/lower while all other variables were held constant, the carrying amount would increase/decrease by CU_ million (2017: increase/decrease by CU_ million).

IFRS 13:93(c) There were no transfers between Level 1 and 2 during the current or prior year.

IFRS 13:93(h)(ii)

Commentary:

For financial assets and financial liabilities that are categorised within the Level 3 fair value hierarchy, if changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would significantly change the fair value determined, an entity should state that fact and disclose the effect of those changes. The entity should also disclose how the effect of a change to reflect a reasonably possible alternative assumption was calculated.

IFRS 13:93(e)

(a)(ii) Reconciliation of Level 3 fair value measurements of financial instruments

The following table only includes financial assets. The only financial liabilities measured subsequently at fair value on Level 3 fair value measurement represent contingent consideration relating to a business combination. No gain or loss for the year relating to this contingent consideration has been recognised in profit or loss.

IFRS 7:10(b)	<p>Difference between carrying amount and contractual amount at maturity:</p> <p>– Cumulative preference shares at fair value (note 32)</p> <p>– Amount payable at maturity</p> <hr/>	
IFRS 7:11(c)	<p>(i) The change in fair value attributable to change in credit risk is calculated as the difference between the total change in fair value of cumulative preference shares (CU_) and the change in fair value of cumulative redeemable preference shares due to change in market risk factors alone (CU_). The change in fair value due to market risk factors was calculated using benchmark interest yield curves as at the end of the reporting period holding credit risk margin constant. The fair value of cumulative redeemable preference shares was estimated by discounting future cash flows using quoted benchmark interest yield curves as at the end of the reporting period and by obtaining lender quotes for borrowings of similar maturity to estimate credit risk margin.</p> <p>A qualitative assessment of the terms of the cumulative preference shares and the matching interest rate swap (see note 34) indicates that the effects of changes in the cumulative preference shares' credit risk are not expected to be offset by changes in the fair value of the interest rate swap. Accordingly, management determines that presenting the effects of changes in the cumulative preference shares' credit risk in other comprehensive income would not create or enlarge an accounting mismatch in profit or loss.</p>	

IFRS 7:10A;

IFRS 7:11(c)

Commentary:

If an entity has designated a financial liability as at FVTPL and is required to present all changes in the fair value of that liability (including the effects of changes in the credit risk of the liability) in profit or loss (because recognising changes in the credit risk of the liability in other comprehensive income would enlarge an accounting mismatch in profit or loss), it shall disclose:

- *the amount of change, during the period and cumulatively, in the fair value of the financial liability that is attributable to changes in the credit risk of that liability (see above);*
- *the difference between the financial liability's carrying amount and the amount the entity would be contractually required to pay at maturity to the holder of the obligation (see above);and*
- *a detailed description of the methodology(ies) used to determine whether presenting the effects of changes in a liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss, and a detailed description of the economic relationship between the characteristics of the liability and the characteristics of the other financial instrument, when the effects of changes in the liability's credit risk are recognised in profit or loss.*

IFRS 7:31

(b) Financial risk management objectives

The Group's Corporate Treasury function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyses exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and price risk), credit risk, liquidity risk.

The Group seeks to minimise the effects of these risks by using derivative financial instruments to hedge these risk exposures. The use of financial derivatives is governed by the Group's policies approved by the board of directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Group does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

The Corporate Treasury function reports quarterly to the Group's risk management committee, an independent body that monitors risks and policies implemented to mitigate risk exposures.

(c) Market risk

The Group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates and interest rates (see below). The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign currency risk, including:

- forward foreign exchange contracts to hedge the exchange rate risk arising on the export of goods to [B Land] and [C Land];
- interest rate swaps to mitigate the risk of rising interest rates;
- commodity options to mitigate the price risk of purchased inventory; and
- forward foreign exchange contracts to hedge the exchange rate risk arising on translation of the Group's investment in foreign operation [name], which has the [currency] as its functional currency.

Market risk exposures are measured using value-at-risk (VaR) analysis supplemented by sensitivity analysis.

IFRS 7:33(c)

There has been no change to the Group's exposure to market risks or the manner in which these risks are managed and measured.

IFRS 7:41

Value-at-risk (VaR) analysis

The VaR measure estimates the potential loss in pre-taxation profit over a given holding period for a specified confidence level. The VaR methodology is a statistically defined, probability-based approach that takes into account market volatilities as well as risk diversification by recognising offsetting positions and correlations between products and markets. Risks can be measured consistently across all markets and products, and risk measures can be aggregated to arrive at a single risk number. The one-day 95 per cent VaR number used by the Group reflects the 95 per cent probability that the daily loss will not exceed the reported VaR.

VaR methodologies employed to calculate daily risk numbers include the historical and variance-covariance approaches. In addition to these two methodologies, Monte Carlo simulations are applied to the various portfolios on a monthly basis to determine potential future exposure.

Historical VaR (95%, one-day) by risk type

	Average		Minimum		Maximum		Year end	
	31/12/2018	31/12/2017	31/12/2018	31/12/2017	31/12/2018	31/12/2017	31/12/2018	31/12/2017
	CU							
Foreign exchange								
Interest rate								
Diversification								
Total VaR exposure								

The Group's VaR should be interpreted in light of the limitations of the methodologies used. These limitations include the following:

- Historical data may not provide the best estimate of the joint distribution of risk factor changes in the future and may fail to capture the risk of possible extreme adverse market movements which have not occurred in the historical window used in the calculations.
- VaR using a one-day time horizon does not fully capture the market risk of positions that cannot be liquidated or hedged within one day.
- VaR using a 95 per cent confidence level does not reflect the extent of potential losses beyond that percentile.

These limitations and the nature of the VaR measure mean that the Group can neither guarantee that losses will not exceed the VaR amounts indicated nor that losses in excess of the VaR amounts will not occur more frequently than once in 20 business days.

While VaR captures the Group's daily exposure to currency and interest rate risk, sensitivity analysis evaluates the impact of a reasonably possible change in interest or foreign currency rates over a year. The longer time frame of sensitivity analysis complements VaR and helps the Group to assess its market risk exposures. Details of sensitivity analysis for foreign currency risk and for interest rate risk are set below.

IFRS 7:33 - 34

(c)(i) Foreign currency risk management

The Group undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilising forward foreign exchange contracts.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the reporting date are as follows:

	Liabilities		Assets	
	31/12/2018	31/12/2017	31/12/2018	31/12/2017
	CU	CU	CU	CU
[Currency B]				
[Currency C]				
Other				

Foreign currency sensitivity analysis

The Group is mainly exposed to the currency of [B Land] ([Currency B]) and the currency of [C Land] ([Currency C]).

IFRS 7:34(a);
IFRS 7:40(b)

The following table details the Group's sensitivity to a __ per cent increase and decrease in currency units against the relevant foreign currencies. __ per cent is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the year-end for a __ per cent change in foreign currency rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the Group where the denomination of the loan is in a currency other than the currency of the lender or the borrower. A positive number below indicates an increase in profit and other equity where currency units strengthens __ per cent against the relevant currency. For a __ per cent weakening of currency units against the relevant currency, there would be a comparable impact on the profit and other equity, and the balances below would be negative.

IFRS 7:40(c)

[Where the assumptions used have changed from previous years, include detail of and reasons for those changes.]

	[Currency B] impact		[Currency C] impact	
	31/12/2018	31/12/2017	31/12/2018	31/12/2017
	CU	CU	CU	CU
Profit or loss	(i)		(iii)	
Other equity	(ii)		(iv)	

IFRS 7:40(a)

IFRS 7:40(a)

(i) This is mainly attributable to the exposure outstanding on [Currency B] receivables and payables in the Group at the reporting date.

(ii) This is the result of the changes in fair value of derivative instruments designated as cash flow hedges and net investment hedges.

(iii) This is mainly attributable to the exposure to outstanding [Currency C] payables at the reporting date.

(iv) This is mainly as a result of the changes in fair value of derivative instruments designated as cash flow hedges.

IFRS 7:33(c)

The Group's sensitivity to foreign currency has decreased during the current year mainly due to the disposal of [Currency B] denominated investments and the reduction in [Currency B] sales in the last quarter of the financial year which has resulted in lower [Currency B] denominated trade receivables.

IFRS 7:42

In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk as the year end exposure does not reflect the exposure during the year.

[Currency B] denominated sales are seasonal with lower sales volumes in the last quarter of the financial year, which results in a reduction in [Currency B] receivables at year end.

In addition, the change in equity due to a __ per cent change in the currency units against all exchange rates for the translation of net investment hedging instruments would be a decrease of CU__ million (2017: CU__ million). However, there would be no net effect on equity because there would be an offset in the currency translation of the foreign operation.

Source International GAAP Holdings Limited

IFRS 7:22A;
IFRS 7:22B;
IFRS 7:33 - 34

Foreign exchange forward contracts

It is the policy of the Group to enter into foreign exchange forward contracts to manage the foreign currency risk associated with anticipated sales and purchase transactions out to 6 months within ___ per cent to ___ per cent of the exposure generated. Basis adjustments are made to the initial carrying amounts of inventories when the anticipated purchases take place.

In the current year, the Group has designated certain forward contracts as a hedge of its net investment in *[name of foreign operation]*, which has *[Currency B]* as its functional currency. The Group's policy has been reviewed and, due to the increased volatility in *[Currency B]*, it was decided to hedge up to 50% of the net assets of the *[name of foreign operation]* for foreign currency forward risk arising on translation of the foreign operation. The Group utilises a rollover hedging strategy, using contracts with terms of up to 6 months. Upon the maturity of a forward contract, the Group enters into a new contract designated as a separate hedging relationship.

IFRS 7:22B

For the hedges of highly probable forecast sales and purchases, as the critical terms (i.e. the notional amount, life and underlying) of the foreign exchange forward contracts and their corresponding hedged items are the same, the Group performs a qualitative assessment of effectiveness and it is expected that the value of the forward contracts and the value of the corresponding hedged items will systematically change in opposite direction in response to movements in the underlying exchange rates. As for the hedge of the net investment in *[name of foreign operation]*, the Group assesses effectiveness by comparing past changes in the fair value of the foreign exchange forward contracts with changes in the fair value of a hypothetical derivative.

(RDR: see
AASB 7.23C)
IFRS 7:23C;
IFRS 7:23E

The main source of hedge ineffectiveness in these hedging relationships is the effect of the counterparty and the Group's own credit risk on the fair value of the forward contracts, which is not reflected in the fair value of the hedged item attributable to changes in foreign exchange rates. **No other sources of ineffectiveness emerged from these hedging relationships.**

IFRS 7:24A(a);
IFRS 7:24A(c) - (d)
(RDR: see
AASB 7.24A)

The following tables detail the foreign currency forward contracts outstanding at the end of the reporting period, as well as information regarding their related hedged items. Foreign currency forward contract assets and liabilities are presented in the line 'Derivative financial instruments' (either as asset or as liabilities) within the statement of financial position (see note 34 for further details):

Hedging instruments – Outstanding contracts	Average exchange rate		Notional value: Foreign currency		Notional value: Local currency		Change in fair value for recognising hedge ineffectiveness		Carrying amount of the hedging instruments assets/ (liabilities)	
	31/12/2018	31/12/2017	31/12/2018	31/12/2017	31/12/2018	31/12/2017	31/12/2018	31/12/2017	31/12/2018	31/12/2017

Cash flow hedges						
Forecast sales (i)						
Forecast purchases (ii)						
Net investment hedge						
Investment in [name of foreign operation] (iii)						
Investment in [name of foreign operation] (iii)						

(i) The Group has entered into contracts to supply goods to customers in [B Land]. The Group has entered into foreign exchange forward contracts (for terms not exceeding three months) to hedge the exchange rate risk arising from these anticipated future transactions. It is anticipated that the sales will take place during the first three months of the next financial year, at which time the amount deferred in equity will be reclassified to profit or loss.

(ii) The Group has entered into contracts to purchase raw materials from suppliers in [B Land] and [C Land]. The Group has entered into foreign exchange forward contracts (for terms not exceeding six months) to hedge the exchange rate risk arising from these anticipated future purchases.

As at 31 December 2018, the aggregate amount of gains under foreign exchange forward contracts deferred in the cash flow hedge reserve relating to these anticipated future purchase transactions is CU_ million (2017: gains of CU_ million). It is anticipated that the purchases will take place during the first six months of the next financial year at which time the amount deferred in equity will be removed from equity and included in the carrying amount of the raw materials. It is anticipated that the raw materials will be converted into inventory and sold within 12 months after purchase.

(iii) The Group had, in previous years, hedged its investment in [name of foreign operation] against the foreign currency risk arising from the translation of [name of foreign operation]'s net assets from [Currency A] into the Parent's functional currency. However, the Group ceased to hedge this investment a few years ago based on management's expectation of the continued strength of [Currency A]. The investment in [name of foreign operation] was fully disposed of in the current year and the cumulative amount arising from the previous hedging relationships which was deferred in equity was reclassified to profit or loss on disposal.

The following table details the effectiveness of the hedging relationships and the amounts reclassified from hedging reserve to profit or loss:

IFRS 7:23F	<p>(i) At the start of the third quarter of 2018, the Group reduced its forecasts on sales of electronic equipment to [B Land] due to increased local competition and higher shipping costs. The Group had previously hedged CU__ million of future sales of which CU_____ are no longer expected to occur, and CU_____ remain highly probable. Accordingly, the Group has reclassified CU_____ of gains on foreign currency forward contracts relating to forecast transactions that are no longer expected to occur from the cash flow hedging reserve to profit or loss.</p>
	<p>Commentary:</p> <p><i>The tables above provide an example of summary quantitative data about exposure to foreign exchange risks at the end of the reporting period that an entity may provide internally to key management personnel. Other presentations may also be appropriate.</i></p>
IFRS 7:33 - 34	<p>(c)(ii) Interest rate risk management</p> <p>The Group is exposed to interest rate risk because entities in the Group borrow funds at both fixed and floating interest rates. The risk is managed by the Group by maintaining an appropriate mix between fixed and floating rate borrowings, and by the use of interest rate swap contracts and forward interest rate contracts. Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite; ensuring the most cost-effective hedging strategies are applied.</p> <p>The Group's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.</p>
IFRS 7:34(a); IFRS 7:40(b)	<p>Interest rate sensitivity analysis</p> <p>The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the reporting date. For floating rate liabilities, the analysis is prepared assuming the amount of liability outstanding at reporting date was outstanding for the whole year. A __ per cent increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.</p>
IFRS 7:40(c)	<p><i>[Where the assumptions used have changed from previous years, include detail of and reasons for those changes.]</i></p>
IFRS 7:40(a)	<p>If interest rates had been __ per cent higher/lower and all other variables were held constant, the Group's:</p>
	<ul style="list-style-type: none"> • profit for the year ended 31 December 2018 would decrease/increase by CU__ million (2017: decrease/increase by CU__ million). This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings; and • other comprehensive income would decrease/increase by CU__ million (2017: decrease/increase by CU__ million) mainly as a result of the changes in the fair value of investment in corporate bonds classified as at FVTOCI.
IFRS 7:33(c)	<p>The Group's sensitivity to interest rates has decreased during the current year mainly due to the reduction in variable rate debt instruments and the increase in interest rate swaps to swap floating rate debt to fixed rate debt.</p>

Interest rate swap contracts

IFRS 7:22A;
IFRS 7:22B;
IFRS 7:33 - 34

Under interest rate swap contracts, the Group agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the Group to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt held and the cash flow exposures on the issued variable rate debt held. The fair value of interest rate swaps at the reporting date is determined by discounting the future cash flows using the curves at the reporting date and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the financial year.

IFRS 7:22B;
IFRS 7:23D;
IFRS 7:23E

As the critical terms of the interest rate swap contracts and their corresponding hedged items are the same, the Group performs a qualitative assessment of effectiveness and it is expected that the value of the interest rate swap contracts and the value of the corresponding hedged items will systematically change in opposite direction in response to movements in the underlying interest rates. The main source of hedge ineffectiveness in these hedge relationships is the effect of the counterparty and the Group's own credit risk on the fair value of the interest rate swap contracts, which is not reflected in the fair value of the hedged item attributable to the change in interest rates. No other sources of ineffectiveness emerged from these hedging relationships.

IFRS 7:23B;
IFRS 7:24A(b)

The following tables detail various information regarding interest rate swap contracts outstanding at the end of the reporting period and their related hedged items. Interest rate swap contract assets and liabilities are included in note 34.

IFRS 7:24A(a);

Hedged items									
Variable rate borrowings									Other gains and losses
									Finance costs

The interest rate swaps settle on a quarterly basis. The floating rate on the interest rate swaps is 3-month LIBOR. The Group will settle the difference between the fixed and floating interest rate on a net basis.

IFRS 7:22A;
IFRS 7:23A

All interest rate swap contracts exchanging floating rate interest amounts for fixed rate interest amounts are designated as cash flow hedges to reduce the Group's cash flow exposure resulting from variable interest rates on borrowings. The interest rate swaps and the interest payments on the loan occur simultaneously and the amount accumulated in equity is reclassified to profit or loss over the period that the floating rate interest payments on debt affect profit or loss.

(c)(iii) Commodity price risk

IFRS 7.33, 40

Commodity price risk in the Group primarily arises from price fluctuations and the availability of *[insert type of commodity]*. The Group may enter into derivative transactions to limit these risks. Hedging activities are evaluated regularly to align with Group expectations about the price changes and defined risk appetite; ensuring the most cost-effective hedging strategies are applied.

Commodity price sensitivity analysis

If the commodity prices of the hedged commodity had been X% higher (lower) as of December 2018, profit after tax would have been CU__ million (2017: CU__ million) higher (lower).

If the commodity prices of the hedging transactions accounted for using cash flow hedge accounting had been X% higher (lower) as of December 2018, equity would have been CU__ million (2017: CU__ million) higher (lower).

Commodity options

IFRS 7:22A

It is the policy of the Group to enter into commodity options to manage the commodity price risk associated with anticipated purchase transactions out to 24 months. The Group policy is to hedge up to 80 per cent the exposure generated within 3 months, about 60 per cent of exposure with maturity between 3 months and 12 months and no more than 40 per cent exposure generated in 2 years. Basis adjustments are made to the initial carrying amounts of inventories when the anticipated purchases take place. The Group always designates the intrinsic value of the options.

IFRS 7:22B(a)-(b)

In the current year, the Group has designated certain commodity options as a cash flow hedge of highly probable purchases. Because the critical terms (i.e. the quantity, maturity and underlying) of the commodity option and their corresponding hedged items are the same, the Group performs a qualitative assessment of effectiveness and it is expected that the intrinsic value of the commodity option and the value of the corresponding hedged items will systematically change in opposite direction in response to movements in the price of underlying commodity if the price of the commodity increases above the strike price of the derivative.

IFRS 7:23D

The main source of hedge ineffectiveness in these hedge relationships is the effect of the counterparty and the Group's own credit risk on the fair value of the option contracts, which is not reflected in the fair value of the hedged item and if forecast transaction will happen earlier or later than originally expected.

Source International GAAP Holdings Limited

IFRS 7:24A(b)

The following tables detail the commodity options outstanding at the end of the reporting period, as well as information regarding their related hedged items. Commodity options are presented in the line 'Derivative financial instruments' within the statement of financial position (see note 34 for further details):

(c)(iv) Other price risks

The Group is exposed to equity price risks arising from equity investments.

Equity investments in unlisted entities (see note 25) are held for strategic rather than trading purposes. The Group does not actively trade these investments.

The Group invested in portfolio of listed shares which are held for trading (see note 25). This type of investment is approved by the Board *[or insert name of the relevant committee]* as the alternative to investment in money market funds in order to generate higher investment return on the spare funds. In accordance with the policy, the Group may invest only in the entities that form part of the following indexes FTSE 100, DJIA, S&P 500, NASDAQ 100 etc.

Equity price sensitivity analysis

IFRS 7:40(b)

The sensitivity analyses below have been determined based on the exposure to equity price risks at the reporting date.

IFRS 7:40(a)

If equity prices had been _ per cent higher/lower:

- net profit for the year ended 31 December 2018 and 2017 would increase/decrease by CU_ million (2017: increase/decrease by CU_ million) as a result of the changes in fair value of the investments in listed shares; and
- other comprehensive income would increase/decrease by CU_ million (2017: increase/decrease by CU_ million) as a result of the changes in fair value of the investments in equity instruments.

The methods and assumptions used in preparing the sensitivity analysis above have not changed significantly from the prior year.

IFRS 7:40(c)

[Where the assumptions used have changed from previous years, include detail of and reasons for those changes.]

IFRS 7:33 - 34;
IFRS 7:35B

(d) Credit risk management

Note 62(d)(ii) details the Group's maximum exposure to credit risk and the measurement bases used to determine expected credit losses.

IFRS 7:35F(a)(i)

In order to minimise credit risk, the Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group only transacts with entities that are rated the equivalent of investment grade and investments in these instruments, including bills of exchange, debentures and redeemable notes as detailed in note 25, where the counterparties have minimum BBB- credit rating, are considered to have low credit risk for the purpose of impairment assessment. The credit rating information is supplied by independent rating agencies where available and, if not available, the Group uses other publicly available financial information and its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties.

IFRS 7:34(c)

Before accepting any new customer, a dedicated team responsible for the determination of credit limits uses an external credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed and approved twice a year by the risk management committee. 80% of the trade receivables have the best credit scoring attributable under the external credit scoring system used by the Group.

Credit approvals and other monitoring procedures are also in place to ensure that follow-up action is taken to recover overdue debts. Furthermore, the Group reviews the recoverable amount of each trade debt and debt investment on an individual basis at the end of the reporting period to ensure that adequate loss allowance is made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced. Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable and, where appropriate, credit guarantee insurance cover is purchased.

IFRS 7:B8;
IFRS 7:34(c);
IFRS 7:35B(c)

Of the trade receivables balance at the end of the year, CU__ million (2017: CU__ million) is due from Company A, the Group's largest customer. Apart from this, the Group does not have significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The Group defines counterparties as having similar characteristics if they are related entities. Concentration of credit risk related to Company A did not exceed 20% of gross monetary assets at any time during the year. Concentration of credit risk to any other counterparty did not exceed 5% of gross monetary assets at any time during the year. The concentration of credit risk is limited due to the fact that the customer base is large and unrelated.

The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

IFRS 7:B10(c)

In addition, the Group is exposed to credit risk in relation to financial guarantees given to banks. The Group's maximum exposure in this respect is the maximum amount the Group could have to pay if the guarantee is called on (see below). As at 31 December 2018, an amount of CU__(2017: CU__) has been estimated as a loss allowance in accordance with IFRS 9, however, no loss allowance was recognised in profit or loss because the premium received less cumulative amount recognised in profit or loss was higher than expected amount of loss allowance (see note 38).

IFRS 7:35K(b)

(d)(i) Collateral held as security and other credit enhancements

The Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets, except that the credit risk associated with finance lease receivables is mitigated because they are secured over the leased storage equipment. The carrying amount of finance lease receivables amounts to CU__ million (2017: CU__ million) and the fair value of the leased assets is estimated to be approximately CU__ million (2017: CU__million). The Group is not permitted to sell or repledge the collateral in the absence of default by the lessee. There has not been any significant changes in the quality of the collateral held for finance lease receivables. The Group has not recognised a loss allowance for the finance lease receivables as a result of these collaterals.

Commentary:

For all financial instruments to which the impairment requirements in IFRS 9 are applied, IFRS 7:35K(b) and (c) specifies that entities should disclose the following:

- *a narrative description of collateral held as security and other credit enhancements, including:*
 - (i) a description of the nature and quality of the collateral held;*
 - (ii) an explanation of any significant changes in the quality of that collateral or credit enhancements as a result of deterioration or changes in the collateral policies of the entity during the reporting period; and*
 - (iii) information about financial instruments for which an entity has not recognised a loss allowance because of the collateral.*
- *quantitative information about the collateral held as security and other credit enhancements (for example, quantification of the extent to which collateral and other credit enhancements mitigate credit risk) for financial assets that are credit-impaired at the reporting date. For all financial instruments within the scope of IFRS 7, but to which the impairment requirements in IFRS 9 are not applied, IFRS 7:36(b) specifies that entities should give a description of collateral held as security and of other credit enhancements, and their financial effect (e.g. a quantification of the extent to which collateral and other credit enhancements mitigate credit risk) in respect of the amount that best represents the maximum exposure to credit risk.*

IFRS 7:7;

IFRS 7:31

IFRS 7:35K(a)

(d)(ii) Overview of the Group's exposure to credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. As at 31 December 2018, the Group's maximum exposure to credit risk without taking into account any collateral held or other credit enhancements, which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties and financial guarantees provided by the Group arises from:

- the carrying amount of the respective recognised financial assets as stated in the consolidated statement of financial position; and
- the maximum amount the entity would have to pay if the financial guarantee is called upon, irrespective of the likelihood of the guarantee being exercised as disclosed in note 62(e)(i). The related loss allowance is disclosed in note 38.

IFRS 7:35M;

IFRS 7:B10(c)

IFRS 7:35B(a);

IFRS 7:35F(a)(i)

In order to minimise credit risk, the Group has tasked its Credit Management Committee to develop and maintain the Group's credit risk gradings to categorise exposures according to their degree of risk of default. The credit rating information is supplied by independent rating agencies where available and, if not available, the Credit Management Committee uses other publicly available financial information and the Group's own trading records to rate its major customers and other debtors. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties.

The Group's current credit risk grading framework comprises the following categories:

Category	Description	Basis for recognising expected credit losses
Performing	The counterparty has a low risk of default and does not have any past-due amounts	12-month ECL
Doubtful	Amount is >30 days past due or there has been a significant increase in credit risk since initial recognition	Lifetime ECL – not credit-impaired
In default	Amount is >90 days past due or there is evidence indicating the asset is credit-impaired	Lifetime ECL – credit-impaired
Write-off	There is evidence indicating that the debtor is in severe financial difficulty and the Group has no realistic prospect of recovery	Amount is written off

Commentary:

IFRS 7:35M requires the disclosure of information about an entity's credit risk exposure and significant concentrations of credit risk by credit risk grading at the reporting date. The number of credit risk rating grades used to disclose such information should be consistent with the number that the entity reports to key management personnel for credit risk management purposes. However, in some cases, delinquency and past due information may be the only borrower-specific information available without undue cost or effort, which is used to assess whether credit risk has increased significantly since initial recognition. In such cases, an entity should provide an analysis of those financial assets by past due status.

IFRS 7:35M;

IFRS 7:35N;

IFRS 7:36(a)

The tables below detail the credit quality of the Group's financial assets, contract assets and financial guarantee contracts, as well as the Group's maximum exposure to credit risk by credit risk rating grades

31/12/2018	Note	External credit rating	Internal credit rating	12-month or lifetime ECL?	Gross carrying amount (i)	Loss allowance	Net carrying amount (i)
					CU	CU	CU
Loans to related parties	25	N/A	Doubtful	Lifetime ECL (not credit impaired)			
Loans to other parties	25	N/A	Doubtful	Lifetime ECL (not credit impaired)			
Bills of exchange	25	A	Performing	12-month ECL			
Corporate bonds (iii)	25	BBB	Performing	12-month ECL			
Redeemable notes	25	AA	Performing	12-month ECL			
Debentures	25	BBB-	Performing	12-month ECL			
Trade receivables	31	N/A	(ii)	Lifetime ECL (simplified approach)			
Finance lease receivables	30	N/A	(ii)	Lifetime ECL (simplified approach)			
Contract assets	28	N/A	(ii)	Lifetime ECL (simplified approach)			
Financial guarantee contracts	38	N/A	Performing	12-month ECL			

31/12/2017	Note	External credit rating	Internal credit rating	12-month or lifetime ECL?	Gross carrying amount (i)	Loss allowance	Net carrying amount (i)
					CU	CU	CU (Restated)
Loans to related parties	25	N/A	Doubtful	Lifetime ECL (not credit impaired)			
Loans to other parties	25	N/A	Doubtful	Lifetime ECL (not credit impaired)			
Bills of exchange	25	A	Performing	12-month ECL			
Corporate bonds (iii)	25	BBB	Performing	12-month ECL			
Redeemable notes	25	AA	Performing	12-month ECL			
Debentures	25	BBB-	Performing	12-month ECL			
Trade receivables	31	N/A	(ii)	Lifetime ECL (simplified approach)			
Finance lease receivables	30	N/A	(ii)	Lifetime ECL (simplified approach)			
Contract assets	28	N/A	(ii)	Lifetime ECL (simplified approach)			
Financial guarantee contracts	38	N/A	Performing	12-month ECL			

(i) For financial guarantee contracts, the gross carrying amount represents the maximum amount the Group has guaranteed under the respective contracts, and the net carrying amount represents the loss allowance recognised for the contracts.

(ii) For trade receivables, finance lease receivables and contract assets, the Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. The Group determines the expected credit losses on these items by using a provision matrix, estimated based on historical credit loss experience based on the past due status of the debtors, adjusted as appropriate to reflect current conditions and estimates of future economic conditions. Accordingly, the credit risk profile of these assets is presented based on their past due status in terms of the provision matrix. Notes 28, 30 and 31 include further details on the loss allowance for these assets respectively.

(iii) The loss allowance on corporate bonds measured at FVTOCI is recognised against other comprehensive income and accumulated in the investment revaluation reserve. See note 42.

The carrying amount of the Group's financial assets at FVTPL as disclosed in note 25 best represents their respective maximum exposure to credit risk. The Group holds no collateral over any of these balances.

IFRS 7:36(a) - (b);

IFRS 7:B10(b)

Commentary:

For all financial instruments within the scope of IFRS 7, but to which the impairment requirements in IFRS 9 are not applied, IFRS 7:36(a) requires an entity to disclose by class of financial instrument the amount that best represents the entity's maximum credit risk exposure at the end of the reporting period, excluding the effect of any collateral and other amounts that do not qualify for offset in accordance with IAS 32. Examples of financial instruments that are within the scope of IFRS 7 but that are not subject to the IFRS 9 impairment requirements include:

- Financial assets and derivatives measured at FVTPL;
- Financial guarantee contracts issued measured at FVTPL; and
- Loan commitments issued measured at FVTPL.

Equity investments, regardless of whether they are measured at FVTPL or FVTOCI, are also in the scope of IFRS 7 but not subject to the IFRS 9 impairment requirements; however, they do not give rise to an exposure to credit risk and therefore are not subject to the IFRS 7 credit risk disclosures.

IFRS 7:33 - 34

(e) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. Details of additional undrawn facilities that the Group has at its disposal to further reduce liquidity risk are set out below.

IFRS 7:34 - 35;

IFRS 7:39(c)

(e)(i) Liquidity and interest risk tables

The following tables detail the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The table includes both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the reporting date.

IFRS 7:B10(c)

The amounts included in the following table for financial guarantee contracts are the maximum amount the Group could be forced to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to the guarantee (see note 38). Based on expectations at the end of the reporting period, the Group considers that it is more likely than not that no amount will be payable under the arrangement. However, this estimate is subject to change depending on the probability of the counterparty claiming under the guarantee which is a function of the likelihood that the financial receivables held by the counterparty which are guaranteed suffer credit losses.

The contractual maturity is based on the earliest date on which the Group may be required to pay.

Commentary:

The tables below include the weighted average effective interest rate and the carrying amount of the respective financial liabilities as reflected in the consolidated statement of financial position as an example of summary quantitative data about exposure to interest rates at the end of the reporting period that an entity may provide internally to key management personnel.

	Weighted average effective interest rate	Less than 1 month	1 - 3 months	3 months to 1 year	1 - 5 years	5+ years	Total	Carrying amount

– amount unused		
Secured bank loan facilities with various maturity dates through to 2019 and which may be extended by mutual agreement:		
– amount used		
– amount unused		

IAS 1:134 - 135

(f) Capital risk management

The Group manages its capital to ensure that entities in the Group will be able to continue as going concerns while maximising the return to shareholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from 2017.

The capital structure of the Group consists of net debt (borrowings disclosed in notes 32 and 33 after deducting cash and bank balances) and equity of the Group (comprising issued capital, reserves, retained earnings and non-controlling interests as disclosed in notes 40 to 51).

The Group is not subject to any externally imposed capital requirements.

The Group's risk management committee reviews the capital structure on a semi-annual basis. As part of this review, the committee considers the cost of capital and the risks associated with each class of capital. The Group has a target gearing ratio of __ per cent to __ per cent determined as the proportion of net debt to equity. The gearing ratio at 31 December 2018 of __ per cent (see below) was at below the target range, and has returned to a more typical level of __ per cent since the reporting date.

Gearing ratio

The gearing ratio at the year-end is as follows:

	31/12/2018	31/12/2017 (Restated)
	CU	CU
Debt		
Cash and cash equivalents (including cash and bank balances in a disposal group held for sale)		
Net debt		
Equity		
Net debt to equity ratio	%	%

Debt is defined as long- and short-term borrowings (excluding derivatives and financial guarantee contracts) as detailed in notes 32 and 33.

Equity includes all capital and reserves of the Group that are managed as capital.

IAS 10:21

63. Events after the reporting period

On [date] the premises of [name of subsidiary] were seriously damaged by fire. Insurance claims have been put in hand but the cost of refurbishment is currently expected to exceed these by CU___.

IAS 24:13

64. Related party transactions

Balances and transactions between the company and its subsidiaries, which are related parties, have been eliminated on consolidation and are not disclosed in this note. Transactions between the Group and its associates are disclosed below.

IAS 24:18 - 19

Trading transactions

During the year, group companies entered into the following transactions with related parties who are not members of the Group:

	Sale of goods		Purchase of goods	
	31/12/2018	31/12/2017	31/12/2018	31/12/2017
	CU	CU	CU	CU
X Holdings				
Associates				

The following amounts were outstanding at the reporting date

	Amounts owed by related parties		Amounts owed to related parties	
	31/12/2018	31/12/2017	31/12/2018	31/12/2017
	CU	CU	CU	CU
X Holdings				
Associates				

See note 64 of section 10 Illustrative disclosures in the December 2018 Guide for additional Australian disclosures.

IAS 24:23 X Holdings is a related party of the Group because *[give reasons]*.
 Sales of goods to related parties were made at the Group's usual list prices, less average discounts of __ per cent. Purchases were made at market price discounted to reflect the quantity of goods purchased and the relationships between the parties.

IAS 24:17 The amounts outstanding are unsecured and will be settled in cash. No guarantees have been given or received. No provisions have been made for doubtful debts in respect of the amounts owed by related parties. Amounts repayable to X Holdings carry interest of __ per cent to __ per cent (2017: __ per cent to __ per cent) per annum charged on the outstanding loan balances (see note 32).

Remuneration of key management personnel

The remuneration of the directors, who are the key management personnel of the Group, is set out below in aggregate for each of the categories specified in IAS 24 *Related Party Disclosures*.

	31/12/2018	31/12/2017
	CU	CU

Post-employment benefits		
Other long-term benefits		
Termination benefits		
Share-based payments		

IAS 24:18 **Loans to related parties**

	31/12/2018	31/12/2017
	CU	CU
Loans to associates:		
X Limited		
Y Limited		
Loans to other related parties:		
<i>[Name of related party]</i>		

The Group has provided its associates with short-term loans at rates comparable to the average commercial rate of interest (see note 25).

See notes 64A Remuneration of auditors **and 64B** Parent entity information **of section 10** Illustrative disclosures in the December 2018 Guide for additional Australian disclosures.

See ASX disclosures **of section 10** Illustrative disclosures in the December 2018 Guide for illustrative disclosures required by ASX which are suitable as a guide only.

IAS 10:17

65. Approval of the financial statements

The financial statements were approved by the board of directors and authorised for issue on [Date].

Independent Auditor's Report**Commentary:**

Following the changes to audit reports under ISAs applicable to periods commencing on or after 15 December 2016, audit reports are likely to contain more entity-specific material. Accordingly, no example audit report is provided.

Appendix 1 – Prior year adjustment

[In practice, this would usually be presented as an additional note to the accounts rather than as an appendix.]

IAS 8:14 - 15

IAS 1:106(b)
