## Deloitte.

## Broadcast sports rights: premium plus

Deloitte predicts that in 2014 the value of premium sports broadcast rights worldwide will increase to \$24.2 billion, a 14 percent rise, or \$2.9 billion over 2013<sup>138</sup>. This increase in rights fees will be driven by new agreements with certain top tier European domestic football (soccer) leagues and major North American sports leagues. The double digit growth compares to average growth of five percent between 2009 and 2013, and is likely to exceed forecast increases in global pay TV revenues for 2014<sup>139</sup>. Premium sports rights fee growth is outpacing that of the broader economy<sup>140</sup>.

We have defined premium sports broadcast rights as the most popular sports competitions in the biggest sports around the world. These include: the top-tier domestic football leagues in each European, Asian, Latin American, Middle East and African country; the respective top regional clubs' football competition on each continent; the four major North American professional leagues — Major League Baseball (MLB), National Basketball Association (NBA), National Football League (NFL), National Hockey League (NHL); the top US college sports conferences; National Association for Stock Car Auto Racing (NASCAR), Formula 1, the Indian Premier League and Indian national team cricket.

The premium sports in each market represent a small proportion of all professional sports activity measured by the number of minutes televised but they represent the vast majority of viewer interest and the bulk of all television revenues.

In 2014 about three quarters of the total value of premium broadcast rights fees will be generated by 10 competitions: the top-tier domestic football leagues in England, France, Germany, Italy and Spain, the UEFA Champions League, and the four major North American professional leagues. The substantial revenue growth in 2014 has been driven largely by new broadcast deals for England's Premier League, Germany's Bundesliga and Major League Baseball<sup>141</sup>.

Television and premium sports are well matched for each other: at the highest level, sport is great unscripted live drama for television, and constant advances in technology lead to ever more sophisticated, compelling ways in which sports can be portrayed.

- 138 Our methodology for determining the value of premium sports rights is based on recurring annual competitions only, we have not included the Olympic Games, FIRA World Cup or UEFA European Championship. Rights fees have been averaged over the duration of the respective contract. Fees have been converted into USS where applicable, using the June 30 exchange rate in that particular year. Values for each year are based on cumulative rights fees generated in that particular year for competitions operating a cross calendar years, so for example, 2009 refers to competitions portain ja cross called years, so for example, 2009 refers to competition sperating in 2009 and 2008/09. We have obtained information principally from publicity available information reprincipally from publicity available information released by rights holders, trade publications, confidential and proprietrary sources.
- Global pay TV revenues are forecast to increase by about four percent in the year to 2014 from S245 billion to 2555 billion. ## Methodology for calculating the value of premium sports rights

Our methodology for determining the value of premium sports rights takes the following approach:

- Only recurring annual competitions/seasons are included. Olympic Winter and Summer Games, FIFA World Cup and UEFA European Championship are not included.
- Rights fees have been averaged over the duration of the respective contract.
- Fees have been converted into US dollars where applicable, using the June 30 exchange rate in that particular year.
- Values for each year are based on cumulative rights fees generated either in that particular year for competitions operating on a calendar year. For competitions operating across calendar years, it is the year in which the competition finishes. So 2009 refers to competitions operating in 2009 and 2008/09.
- We have obtained information from publicly available information released by rights holders, and trade publications, and from confidential and proprietary sources.

While many commentators continue to ask when the sports rights value bubble will burst<sup>142</sup>, leading to stagnating or declining rights fees, our view is that rights fees for live content to premium properties overall will likely continue to grow.

Premium live sport continues to deliver large audiences, typically characterized by an attractive demographic profile. It drives subscriptions and/or generates advertising for broadcasters, particularly in an increasingly altered media landscape. In some cases, premium sports broadcast rights fees seem to have been insulated from wider economic pressures by multi-year contracts.

The development of pay-TV in particular has transformed the broadcasting of premium sports leagues. Live content is a key subscription driver for those leagues and underpins pay-TV business models. As the pay-TV subscriber base rises and revenue per user grows, operators are investing increasing sums to secure this key content.

New market entrants looking for attractive differentiating sports content have intensified competition driving substantial uplifts in rights fees. For example, BT's entry into the UK sports rights market, acquiring sports content to help retain and build its telephony, broadband, and pay-TV services, has resulted in substantial revenue uplifts.

The Premier League enjoyed a 71 percent increase in the value of its domestic live rights from 2013/14, while the amount paid for UK rights to UEFA's top club competitions should double in value from 2015/16<sup>143</sup>.

There used to be just one video sports product – broadcast television - often funded by advertising or by license fee.

The range of sports video products has diversified significantly, even if consumption of sport has remained principally via the television set. Sports fans now have a wealth of video products as well as broadcast: from online video clips, to streamed video to any device.

- For example see: TV Sports a Spectacular Bubble, Forbes, 16 January 2013: http://www.forbes.com/sites/igorgre wald/2013/01/16/tv-sports-a-specta-ular-bubble/' talk of a bubble in spo ular-bubble/ talk of a bubble in sports rights has existed for decades – and may well persist for decades. See: Talk of rights bubble bursting is still strong — and still wrong, Sports Business Daily, 22 July 2013: http://www.sportsbusinessdaily. com/Journal/Issues/2013/07/22/Media/ Sports-Media.aspx
- 143 The BT Champions League deal is worth £299 million (\$488 million) a season from £299 million (\$488 million) a season from 2015/16. See: BT wins all live UK TV rights to UEFA Champions League and UEFA Euro pa League, British Telecom, 9 November 2013: http://www.btplc.com/News/Articles ShowArticle.cfm/ArticleID=15D869F4-C14E-44A2-956E-A2C18B1751A9
- 144 For example, Sony trialed UHD (4k) at the Confederation Cup in Brazil, 2013; 4k footage was also captured at Wimbledon 2013, Sony and FIFA began testing the 4k technology in the FIFA Confederations Cup 2013, Sony, 25 April 2013:http://www.sony.es/pro/press/prifia-4k; JBC and Sony to trial 4K TV at Wimbledon, TechRadar, 24 April 2013:http://www.techradar.com/mews/homews/

## **Bottom line**

Sport as a contest has had a passionate following for millennia. Television's role has been to show this to a global audience with each viewer having the best seat in the house. The price paid for broadcast sports rights may surprise, but the symbiosis between television and sports is potent, and may become more so. Sports' mix of elite contest, success and disappointment make compelling television.

Along with substantial growth in rights fee spend, there continues to be increased investment in the quality of broadcast production for sports. Premium rights owners face a continuing challenge to ensure cutting edge broadcast quality, for example by evaluating the viability of ultra-high definition (UHD, also known as 4K) coverage, while broadcasters are required to consider their investment in terms of both rights fee and production spend<sup>144</sup>.

It is important for broadcasters and production teams to review continuously the technologies available to them to enhance the value that their viewers and customers derive from being able to watch sport. For the television experience, this includes UHD, super-slow motion and a choice of live matches. On-demand services for viewers include a choice of live matches, camera angles, player tracking and instant replays, statistics and commentary. Making all this available not just via the television but also any other device that the fan may want to use should increase perceived value, even if these additional viewing options are seldom exercised.

Sports rights owners and new technology companies continue to develop their relationship, and consider how sports content can be both broadcast and appropriately monetized. A number of rights owners are experimenting with YouTube or other online video platforms, in order to stream live content in territories where broadcast rights have not been sold or to provide additional content. We see this trend continuing.

Owners of non-premium rights should not despair: rights fees for non-premium sports have in many cases increased, but at a fraction of the rate or scale achieved by premium properties. For these competitions and events, the challenge is to secure distribution through a suitable media platform, to obtain exposure. While rights fees themselves may be comparatively low, they may typically be a relatively important source of revenue that can also have benefits for other revenue streams.

There is also room for innovation to create new sports and formats for a global TV audience. Consider for example the case of Ultimate Fighting Championship (UFC), whose growth has been driven significantly by pay-TV television exposure. UFC was purchased by its current owners for \$2 million in 2001; it now turns over \$500 million annually, is broadcast in 148 countries, and pay-per-view fees are up to \$50 per transaction145

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee, and its network of member firms, each of which is a legally separate and independent entity. Please see www.deloitte.com/about for a detailed description of the legal structure of Deloitte Touche Tohmatsu Limited and its member firms.

Deloitte provides audit, tax, consulting, and financial advisory services to public and private clients spanning multiple industries.

With a globally connected network of member firms in more than 150 countries, Deloitte brings world-class capabilities and high quality service to clients, delivering the insights they need to address their most complex business challenges. Deloitte has in the region of 200,000 professionals, all committed to becoming the standard of excellence.

This publication contains general information only, and none of Deloitte Touche Tohmatsu Limited, its member firms, or their related entities (collectively the "Deloitte Network") is, by means of this publication, rendering professional advice or services.
