Elevate Your Digital Transformation

Set innovation and agility in motion with ELEVATE, a cloud migration and delivery approach offered by Deloitte Consulting LLP and Oracle Consulting

ORACLE
Consulting

“Lift and shift” is a phrase often used to describe the process of migrating on-premises workloads to the cloud. But migrating your existing technology to the Cloud is only the beginning of your journey. Today’s modern business requires the ability to swiftly react to ever-changing market dynamics while staying focused on decreasing operational expenses. Leading companies establish targeted transformation strategies to move from on-premise to a flexible, autonomous, and cost-efficient environment specifically designed to handle enterprise-class workloads, like Oracle’s Gen 2 Cloud Infrastructure.

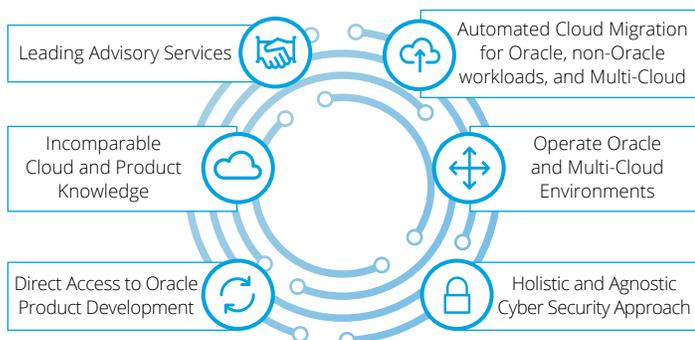

Cloud migration can span the spectrum from a single application to an entire data center migration and transformation. The journey warrants careful planning, taking into account not only the technical aspects of migrating to the cloud but also the business ramifications and impact on employees and customers. Today, it’s not always clear where to start, let alone how to proceed moving quickly, cost-effectively, and safely. And how do you run your business and extract insights from your data once you get there?

Leading organizations are exploring:

- How can we culturally prepare our organization for the cloud?
- How do we modernize our multi-vendor infrastructure while maximizing existing investments?
- How will migrating to Oracle’s Gen 2 Cloud Infrastructure make life better for our employees and customers?
- Can risk be reduced via a single project governance model?
- How do we get fortified cyber defenses with a holistic approach to security?
- How can we get industry-specific analytics that leverage Autonomous Database?
- How do we run and maintain our multi-cloud environment while driving innovation into our business?
- How can we transform our datacenter so that we reduce OPEX while rapidly responding to competitive and market drivers?

ELEVATE, a collaboration between Oracle Consulting and Deloitte Consulting LLP, can help answer these questions. ELEVATE combines the cloud business acumen of Deloitte Consulting with deep technical experience from Oracle Consulting to drive transformational results for clients. ELEVATE is designed to leverage modern, industry-leading cloud infrastructure in order to create opportunities for innovation, acceleration, and growth.

With ELEVATE, Deloitte and Oracle bring together:

Building a foundation faster

Whether you’re still contemplating a move to the cloud or you’re well on your way to building a foundation for digital transformation, ELEVATE can accelerate your journey by helping you rapidly migrate and manage workloads on Oracle Autonomous Database and Oracle’s Gen 2 Cloud Infrastructure.

Deloitte provides robust end-to-end cloud offerings coupled with business insights, cyber security, and industry knowledge. These capabilities complement Oracle Consulting’s technical acumen, in-depth product experience, and migration services. The integrated ELEVATE team guides companies from strategy to build through to run and maintain. The collaboration is powered by two cutting-edge, proprietary tools: Oracle Soar, Gen 2 Cloud Migration, which provides automated cloud migration; and Deloitte’s ATADATA™ cloud discovery and automation migration platform.

A heightened value proposition

ELEVATE’s tailored approach supports your organization in potentially reducing risk through a single and effective delivery model, accountability structure, executive sponsorship, and industry and technology capabilities. With the Imagine, Modernize, Innovate framework below, ELEVATE focused on driving **Datacenter Transformation**, offering **Integrated Insights** and enabling **Platform Modernization**.

IMAGINE

Design digital transformation roadmaps based on business outcomes.

MODERNIZE

Automated cloud migration and management of Oracle and non-Oracle workloads in Gen 2 OCI or with multi-cloud.

INNOVATE

Continuously and systematically build and apply innovative technologies to every part of the business.

Upping the Cloud Game

ELEVATE doesn’t simply “lift and shift” a technology environment. It seeks to move and improve, providing end-to-end services for any organization seeking to enrich the human experience and drive innovation through true cloud-enabled digital transformation. To learn more about how you can Leverage business and IT insights through advanced analytics, AI/ML, mobility, and integrations connect with us today.
