

Open Energy Timeline

Open Energy is a framework under which consumers have the right to share their own energy data with third-party providers.

Initial Retailers

- AGL
- Origin
- Energy Australia

Large Retailers

- 10,000 or more small customers and
- 10,000 or more small customers at all times during a financial year that begins on or after the amendment day is also a larger retailer on and from the day 12 months after the end of that financial year

Small retailers

- Retailers below the threshold of 10,000 customers are considered small retailers under the CDR Rules. No obligations under the CDR Rules unless:
- they become accredited
 - participate in the CDR system as data holders voluntarily

Implementation Timeframe

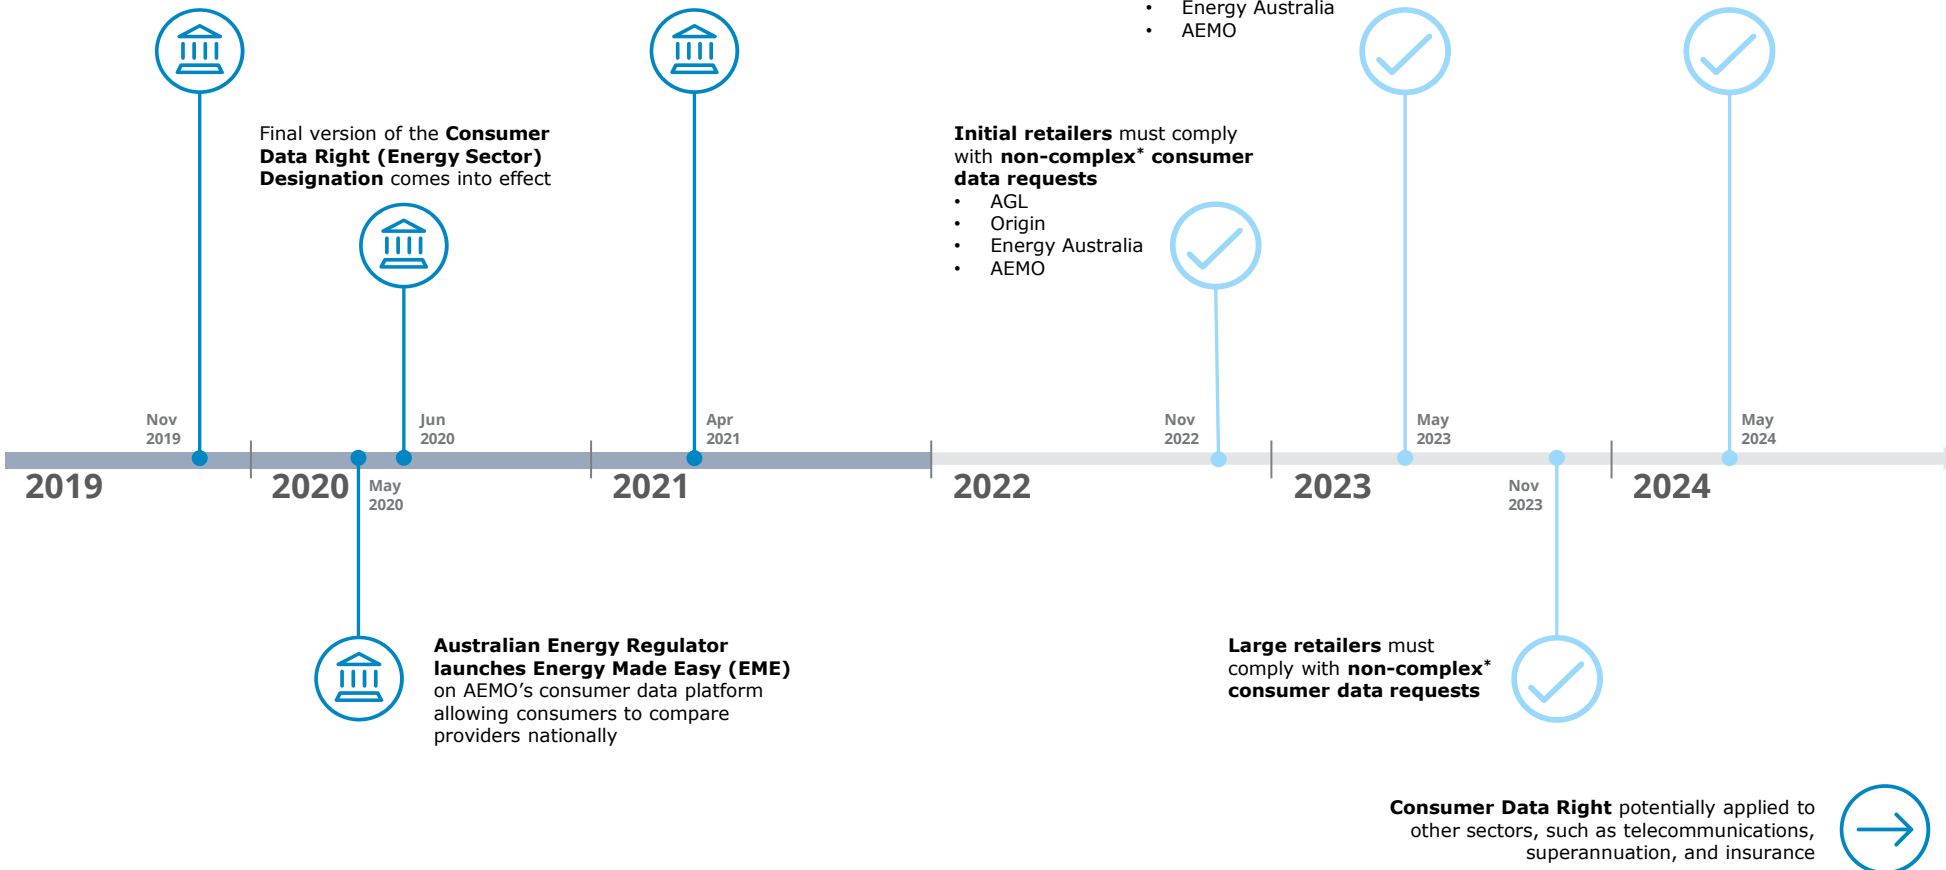

Victorian government updates the **Victorian Energy Compare website (VEC) to take usage data from AEMO's consumer data platform**

Treasury announces that a **peer to peer model (P2P) will be adopted for sharing consumer data** in the energy sector

Initial retailers must comply with **complex* consumer data requests**

- AGL
- Origin
- Energy Australia
- AEMO

Large retailers must comply with **complex* consumer data requests**

* A complex request is a request; made on behalf of a large customer, made on behalf of a secondary user, or relates to a joint / partnership account. In this context a large customer refers to a retailer subject to the Electricity Industry Act 2000 (Vic) or a large customer per the National Energy Retail Law.
