

Improvements in effectiveness of school administration and stakeholder experience

Organisation

More time to do more

- Freeing up time (teacher and non-teacher)
- Increased focus on learning outcomes.

"Educational support staff are happier as they have to spend less time cross-checking and doing administration. They can focus on the teaching."

Processing

Achieving more with greater accuracy

- Greater reporting flexibility
- Accountability and auditability
- Stock control improvements
- Focus of 'non-teacher time' (less distractions).

"Cash can get lost easily and in the office, we can get side-tracked with so many people coming in – Qkr removes that problem for us."

Security

More security in payments

- Reduced cash handling
- Backed by a trusted payments brand.

"We used to have thousands of dollars in cash at the school. I feel personally responsible with my staff having to go to the bank with that amount of money."

Convenience delivery

Convenience for stakeholders

- Increased focus on user experience (for parents)
- Time savings for parents
- Increased simplicity for parents and staff.

"The parents in our area are time poor – they want to do what is easiest and fastest"

Increase visibility of the organisation

Taking advantage of data

- Increased confidence in cash flow
- Use of data to drive engagement.

"We can see the data clearer now, which has allowed us to do customer research and test new products and see if the children like them"

Enablement

Greater capability and viability

- Increases viability of and spend in marginal service areas
- Enables non-finance staff to access data with confidence
- Easy on-boarding for new users.

"I don't think we would still have a canteen without Qkr"
