

# The great indoors: the final frontier for digital navigation

Deloitte Global predicts  
that by 2022,  
**at least**  
**a quarter**  
of human and machine  
uses of digital navigation will  
include or exclusively be indoors

Enabled by growing availability of:

Wi-Fi hotspots

LED lighting

dense cellular  
networks

ultra-wideband  
(UWB)

beacons

magnetic  
positioning

It should have  
**the same**  
**disruptive impact**  
as outdoor navigation

It will enable:

new business  
models

improved  
existing ones

over the  
next decade

**Deloitte.**
