financial
services and
accounting
solutions.

Financial resources and accounting solutions for your cross-border business

Deloitte Accounting & Compliance Solutions (Deloitte ACS) provides a spectrum of services and accounting solutions for enterprises that have an international dimension. These could be multinational firms doing business in Belgium or facing European compliance challenges. Equally, Belgian companies with activities abroad.

Services range from the provision of financial specialists on a temporary basis to supplying fully outsourced financial departments on long-term contracts. Deloitte ACS also offers accounting solutions to the specific challenges of doing business internationally, including accounting & tax compliance, reporting and establishing a business in Belgium.

Whatever your needs, you can count on international specialists that will make a difference to your business by choosing the best talent for the job, providing ongoing and in-depth training, and having access to the know-how of the entire Deloitte organisation. All this ensures that you receive a level of quality and commitment that will keep your international business one step ahead.

Financial Resources

Providing services à la carte

Today, many companies need more and more financial specialists. But they don't need them all the time. Instead, the demand for resources surges to meet the requirements of specific projects, for example, a new IT implementation, a reporting deadline or an IFRS adaptation.

Deloitte Financial Resources rapidly delivers temporary solutions according to your needs. Experienced administrative employees or specialists in accountancy and financial management will come and reinforce your team, not only executing tasks but also offering solutions and recommendations.

We are particularly flexible in the planning and timing of assignments, both national and international. Intensive screening and monitoring of our employees ensures that the right profile is matched with your job requirements. And of course, the confidentiality of corporate data is fully respected.

Co-sourcing

Key to successful sourcing

Many Belgian companies are facing shortages of financial staff these days. The number of suitable graduates has not kept pace with exploding demand. Although outsourcing can be the ideal solution, many resource suppliers see it as though it were a matter of simply ticking off an HR shopping list. The experiences of numerous companies have shown that this approach can be a recipe for disaster.

At Deloitte ACS our structural solutions are based on a "co-sourcing" approach. This is a partnership where all parties together are responsible for the success of the project. We provide you with our high quality in-house professionals, carefully choosing the right person for the right job. In our ten years of experience, we've learned that this is the key to a successful outcome.

Belgian Compliance

100% compliance

How can an effective Belgian compliance programme or solution add real value to your organisation – and not just cost? Deloitte ACS has the answer. Specialist in Belgian legislation, our compliance team offers integrated statutory compliance services covering accounting, corporate law, VAT and corporate income tax.

Advantages include one point of contact, multiple competencies and a proven standardised process guaranteeing high quality and timely delivery, as well as access to key information for compliance, reporting and planning purposes. Additional benefits are control of cost-fixed fees, flexibility and a large and well-balanced team.

European Compliance

A better solution

Slowly but surely, Europe is becoming more unified. But that doesn't mean it's getting any easier for companies doing business across the continent. European compliance continues to be a challenge for many firms.

Fortunately, Deloitte ACS has a solution. Addressing the challenges of enterprises active in multiple European countries, the ACS European compliance service offers a centralised accounting team of handpicked professionals with localised expertise, along with proven processes. Client benefits include one point of contact, availability, no difficulties with multiple languages, reduced administration, lower costs and excellent quality.

Credit & Collection

Improving the process

In your business, fewer outstanding account balances mean a better cash flow, fewer bad debts and write-offs, and enhanced profitability. Yet often the crucial task of dealing with late payments is neglected by financial departments that lack the time and special skills. Fortunately, Deloitte ACS Credit & Collection Services can step in to fill the gap.

Although companies have traditionally viewed accounts receivable as a basic function, they are now realising that improving the process can lead to significant gains. However, this vital job is often seen as a secondary task to be done by the finance department whenever there's a bit extra time. Moreover, accountants are not usually trained in the "people skills" needed to deal with late payments. So it's easy to find excuses to avoid picking up the phone.

Other Services

IFRS (International Financial Reporting Standards)

IFRS (International Financial Reporting Standards) is becoming the leading reporting framework in the European Union for listed, and increasingly, non-listed companies.

Deloitte ACS assists in the transition from Belgian GAAP to IFRS, addressing any issues of accounting, tax, communication, information systems, human resources and disclosures.

Starting a business in Belgium

Belgium is a prime location for businesses that are considering expanding internationally. As trusted advisor, Deloitte ACS assists you with choosing the best legal and tax structures, site location, acquisitions, local finance, human resources and profit repatriation.

Reporting services

Regular periodic management reporting, supplemented with more detailed financial analysis, lies at the heart of smart decision-making. Focus on your core business while Deloitte ACS manages complex financial, taxation and business reporting and provides succinct and proactive advice and recommendations.

Deloitte in Belgium

Making a difference

A leading audit and consulting practice in Belgium, Deloitte offers value added services in audit, accounting, tax, consulting and financial advisory services. In Belgium, Deloitte has more than 2,600 employees in 11 locations across the country, serving national and international companies, from small and middle-sized enterprises, to public sector and non-profit organisations. The turnover reached 334 million euros in the financial year 2012.

The Belgian firm is a member of the international group Deloitte Touche Tohmatsu Limited, with approximately 200,000 members of staff in more than 150 countries. In 2012 DTTL's turnover reached over 31.3 billion dollars.
