

IT Audit Consultant

Your job

As an IT Audit Consultant you will perform challenging projects at clients across industries. You will link business to underpinning IT systems. You will keep up with information technology trends and emerging risks that impact our clients, ranging from compliance risk and IT risks to financial risks. Client focus and an analytical mindset will help you identify and manage risks and improve IT processes and controls.

With innovation and coaching as key elements in Deloitte's DNA, together we will set the standard of excellence.

As an IT Audit Consultant you will:

- Analyse how the organisation, processes and IT systems work;
- understand business process controls, application controls and IT controls;
- audit IT organisations, IT processes and IT systems against regulations, standards and good practices such as COBIT and ITIL;
- evaluate processes, risks and controls;
- identify what & how to improve business processes and reduce the residual risk;
- propose practical solutions to the client, most likely to Management or the Board of Directors;
- work in self-managing teams and take responsibility to manage your work;
- gradually grow into taking charge of audits and coaching and leading teams;
- facilitate meetings, validate finding and obtain agreement;
- grow into commercial, recruiting, and many other challenging roles.

Your learning

When you start as IT Audit Consultant, you will learn about business processes, risk management, information technology, IT assurance, IT audit and compliance. During your first months, we foresee 2 weeks of training (in Belgium and abroad), to get up to speed and kick-start your Deloitte career. Working together in project teams with experienced professionals, you will gain access to a world of experienced people and good practices.

In order to facilitate your development as a Consultant, a clear and transparent learning path is elaborated, focusing both on technical and soft skills and allowing you to obtain several professional qualifications. For example, you will have the opportunity to become ITIL, COBIT and CISA and Prince II certified. You will also be able to practice and sharpen business skills, people management, coaching, presenting for management and interviewing, and many other skills. They will help you grow as a person and as a professional from day one and for many years to come.
