

## Valuation, Actuarial, Risk & Regulatory Services (VAR2)

### Your job

As a Valuation, Actuarial, Risk & Regulatory Services Consultant (VAR2), you will work in a dynamic and dedicated team that focusses on delivering a wide range of assignments within the Financial Services Industry. Being part of the largest professional services firm in Belgium, you will work in diverse and international teams for clients that are national institutions and/or international financial groups.

You will be part of a dynamic team that draws together specialist knowledge and Financial Services Industry experience. In order to advise our clients in the banking, asset management, insurance and payment industry, we are looking to strengthen our team with different competencies.

In your role of VAR2 Consultant, you will be involved in one or more of the following services across a variety of financial industry segments:

- **Valuation, Pricing and Analytics:** as a financial instrument expert who provides expert accounting, risk management and valuation advisory services, you will participate in audits and implementations of valuation and risk models in areas such as equity or interest rate derivative pricing and review the accounting treatment and disclosures of financial instruments. With your quantitative background, you also master advanced predictive modeling techniques to help clients solve complex business problems in a variety of areas.
- **Insurance & Actuarial Services:** you will design, implement, review and audit quantitative models for the calculation of insurance liabilities and capital requirements, advise on balance sheet management issues, like stochastic reserving, economic capital, ALM, replicating portfolios and contribute to our growing number of assignments in the domain of Solvency II and IFRS.
- **Regulatory Risk & Compliance:** you provide innovative advice and solutions to financial services firms facing regulatory and compliance issues (such as MIFID, UCITS, AML). You will be involved in implementing regulations, striking the right balance between regulatory compliance and business objectives. You will help decipher an often intimidate mass of regulation so clients can adopt and implement requirements or remediate sore points / painful areas / difficulties following regulatory inspections.
- **Risk & Performance Solutions:** you will provide a wide array of services to enhance value by focusing on risks and opportunities inherent in every facet of the activities of financial institutions. You will advise our clients on risk management matters (e.g. Basel III, Solvency II, Strategic Risk, Stress Scenario Analysis, ...); assess, analyse, and improve the effectiveness and efficiency of risk governance, internal control, data quality & processes for performance and risk management.

### Your learning

When you start at Deloitte, you will learn all there is to know about valuation, actuarial, risk & regulatory consulting, how to apply this knowledge in practice, and you will develop your task management skills. During your first week as a VAR2 Consultant you will get induction training on the Tools and the Methodologies used within Deloitte. Other trainings you will receive as a Consultant are basic and advanced coaching, presentation and interviewing skills, professional service excellence and many more. As you grow in your job, you will take on a more senior role, and you will have the opportunity to learn how to delegate tasks and how to coach your colleagues. When you get more proficient in combining these various skill sets, you may take the lead on projects, deal with clients on a senior level and continue to develop your management competencies. Throughout your career, we expect you to focus on continuous learning and coaching-on-the-job. At Deloitte, you will see a lot of different clients and projects, allowing you to combine these experiences and share them with your colleagues or convert them into innovative proposals for upcoming projects.
