

ESG TRANSFORMATION LAB

POWERED BY FINANCE

ESG Transformation Lab, Powered by Finance

Overview

The ESG Transformation Lab is a full day opportunity for CFOs and their leadership team to leverage Deloitte's subject matter and industry expertise to support their ESG journey.

- Labs are a unique and personalised day at Deloitte's state-of-the-art X-Lab facilities.
- They combine leading edge technologies and creative facilitation tools and techniques to accelerate decision making and deliver faster, better outcomes to ESG challenges.
- The ESG Transformation Lab allows CFOs and their teams to understand how ESG is reshaping their roles and get clarity on collective ESG priorities.
- At the lab, finance teams will formulate an ambitious vision and develop a clear roadmap to successfully drive forward the ESG agenda in their organisation.

Why an ESG Transformation Lab?

The lines between ESG and finance are blurring, CFOs and Finance Departments have a key role to play in driving value while reducing risk.

- CFOs bring unique skills and are well placed to tackle ESG challenges, grasp opportunities and drive commercial value.
- The impact of ESG issues on Finance is vast and complex. Emerging ESG challenges presented by changing regulations, stakeholder expectations, and complex risk management can be difficult to navigate.
- Our ESG Transformation Labs makes use of the best of Deloitte to help finance teams and CFOs to navigate ESG issues to ensure they take a proactive approach to the benefit of their whole organisation.
- Post-lab our teams can help you plan backwards and facilitate the interaction model with Sustainability groups through process design, documentation, and implementation.

What are the benefits?

CFOs and their leadership team need time, space and expert input to navigate the complicated ESG landscape. Our ESG Transformation Lab provides:

- State-of-the-art technology and trained facilitators to create an interactive experience.
- An opportunity to begin transforming the Finance Department's role through an ESG profiling and pain points assessment.
- Input and support from subject matter experts across Deloitte, specific to your ESG needs. This could include sustainability, strategy, finance, tax, governance and controls.
- Experts who understand how ESG issues are impacting your industry and sector specifically.
- Clear vision and roadmap covering your specific needs and pain points, in the short and long-term.

How it works?

If you'd like to understand more about the support we can provide or would just value a conversation, please contact our CFO Advisory team.

Pre-Lab intake and preparation

Working with the CFO and their team we will assess their ESG profile and agree on three or four pain points to focus on in the Lab. Our subject matters experts will curate materials and sessions unique to the finance team's challenges.

The ESG Transformation Lab

The day itself consists of four stages:
Set the stage | Envision | Explore | Work it out.
All stages will be interactive and make use of unique materials, technology, facilitators and subject matter experts.

Post-Lab action plan

The Lab will result in a clear roadmap covering short and long-term tasks aimed at tackling key issues and pain-points and improving your finance functions ESG maturity.
