

Deloitte.

Operational Assurance
Services overview

“We chose Deloitte to review the logistics and inventory processes at a number of manufacturing facilities. We were impressed by the team’s dedication, thorough understanding of our processes and valuable input. This positive experience evolved into extra projects such as the organization of our first global logistics conference and the definition and implementation of global standards. Our logistics and inventory processes are finally receiving the attention they deserve, resulting in operational improvements and financial gains worldwide.”

Global Supply Chain Manager
of a company in the Automotive Industry
