Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee ("DTTL"), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to clients. Please see [www.deloitte.com/about](http://www.deloitte.com/about) for a more detailed description of DTTL and its member firms.

Deloitte provides audit, tax and legal, consulting, and financial advisory services to public and private clients spanning multiple industries. With a globally connected network of member firms in more than 150 countries, Deloitte brings world-class capabilities and high-quality service to clients, delivering the insights they need to address their most complex business challenges. Deloitte has in the region of 225,000 professionals, all committed to becoming the standard of excellence.

This publication contains general information only, and none of Deloitte Touche Tohmatsu Limited, its member firms, or their related entities (collectively, the "Deloitte Network") is, by means of this publication, rendering professional advice or services. Before making any decision or taking any action that may affect your finances or your business, you should consult a qualified professional adviser. No entity in the Deloitte Network shall be responsible for any loss whatsoever sustained by any person who relies on this publication.

“We help your organization achieve it’s objectives towards patients, regulators and partners within digital and strongly regulated environments.”

**Deloitte’s Risk Advisory Life sciences & Healthcare services are focused on**

- building trust and compliance related to quality of products and services,
- successfully executing regulatory transformations
- creating value by reducing cost of quality and compliance and applying risk intelligence.

**Quality Management**

Patient safety can only be achieved through adequate quality management on products and services

Organizations are increasing focus on the Quality systems and many agencies and organizations recognize Quality systems as a cornerstone to comply with quality and compliance requirements and achieve overall organizational objectives such as process efficiency and cost containment.

**Regulatory Compliance**

Gain oversight and detailed expertise on all applicable regulations and manage compliance therewith

In the complex regulatory environment of life sciences and healthcare industry, we help organizations to maintain oversight on all applicable regulations and the adequacy of the controls ensuring compliance with these regulations.

**Computer System Validation**

Ensuring complex technology solutions function according to their intended use.

Whether the discussion is based on computer system validation, 21 CFR Part 11 compliance, system security, privacy or data integrity, the issues are not limited to application software only, but apply even more to the performance and management of these activities in a value-added, cost-effective manner.

**Enterprise Risk Intelligence**

Streamline your risk and control management practices to secure strategic objectives

Our Global Enterprise Risk Intelligence framework for life sciences & healthcare provides principles, governance structures, methods, maturity assessments and tools to streamline your risk management activities across the board.
