

Brexit Learning Solutions

Why?

Economic operators are **uncertain** as to the potential impact on their supply chain

Uncertainty

Complexity

Economic operators struggle to be compliant due to the **complexity** of regulation and cross-border trade processes

Economic operators understand that there is a necessity to **adjust** very fast to new developments

Adjust

Improve

E-learnings will create an overall increase of technical awareness and proficiency and will **improve** the core business performance

Existing trainings are often too generic or too specific and **not sufficient**

Brexit Learning Solutions

Why?

Pro-active preparation for Brexit impact instead of fire-fighting

Increased knowledge and performance

Increased quality control

Reduced number of errors and reduction in fines and issues with the authorities

Training to support AEO application

Modern, efficient investment in your company's most valuable asset:
its people

Brexit Learning Solutions

How?

Technology and design: Each part of the e-learnings, including videos and other supporting materials, are made by learning solutions experts to create an engaging learning experience and an enjoyable and efficient learning journey. Our design team created a state-of-the-art, aesthetically pleasing visual and navigation experience.

Interactive: The e-learnings comprises videos, interactive graphs, animations and smart quizzes.

Platform:

The e-learnings will be hosted on the Deloitte online Learning Platform, accessible any time you have half an hour to learn

Tax & Legal Learning Hub

Learning today, leading tomorrow

Content updates:

content added based on recent developments and your needs.

Tax & Legal Learning Solutions:

The online Learning Platform is part of Deloitte Belgium's tax & legal learning solutions package.

Brexit Learning Solutions Content?

Economic operators active on the global market

Understand the required changes

- For your compliance management
- For your customs activities (import, export, special procedures, etc.)
- For your trade preference opportunities
- For your supply chain security i.e. minimizing delays and uncertainty
- For your IT systems

Deloitte Global Trade Advisory specialists, comprising a vast network of experts, who are on the edge of trends in customs and trade, and are in daily contact with customs authorities and the industry, created a clear, verified learning program comprising points of law, best in class processes and IT solutions support

Economic operators active on the EU - UK market

Understand customs formalities

- First priority actions required from your organisation
- Customs declaration and other customs paper-work
- Possible ways of filing a declaration
- How to select and manage customs brokers
- Impact of customs activities on your supply chain
- Consequences of non-compliance
- Fundamentals of Export Control

Understand the three pillars of customs

- The concept of origin (including preferential origin claims)
- The concept of valuation (EU and UK perspective and best practices)
- The concept of classification (how to perform and where to start)
