

# Deloitte.

Technology Resources

## Deloitte Technology Resources Complementary expertise

*November 2013*

# 1 DTR (Deloitte Technology Resources)

## *Genesis of the concept*

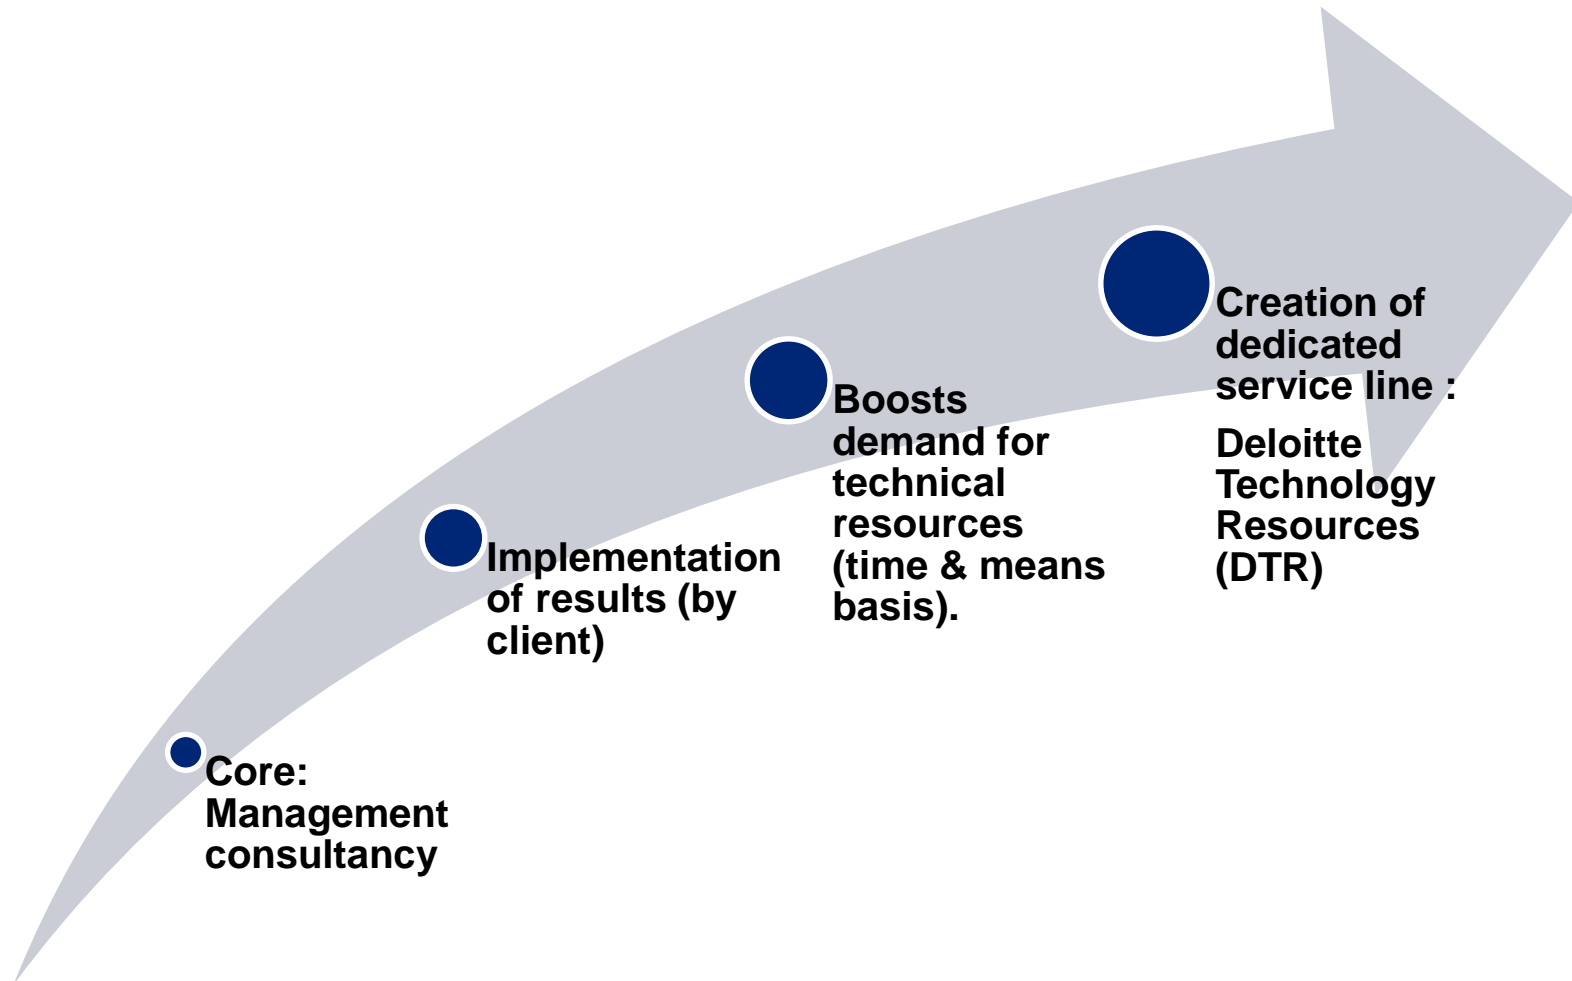

---

### Why did Deloitte create DTR?

- **Deloitte Consulting's core activities are in the management consultancy assignments and in the SAP turn key projects capabilities.**
- **Thanks to numerous projects successfully delivered by Deloitte, multiple clients expressed their willingness to extend the collaboration up to the final implementation and the implementation of our advices.**
- **Customers engage themselves further with Deloitte in the day to day technical activities in order to develop and support their IT core systems.**
- **To fulfill this market request for daily technical activities on a times and means basis, Deloitte has decided to create a dedicated service line called Deloitte Technical Resources (DTR)**
- **DTR provides technical IT services as a complementary service to Deloitte Consulting.**

# 1 DTR (Deloitte Technology Resources)

## *Genesis of the concept*
