IT & Digital Solutions

IT & Digital Solutions

Offering IT and digital applications to solve problems in business and production processes and help companies increase their efficiency and be more customer friendly.

Clean Tech & Energy

Clean Tech & Energy

Clean Tech: offering a diverse range of products, services, and processes that harness renewable materials and energy sources, significantly decrease the use of natural resources, and reduce or eliminate emissions and wastes.

Energy: discovering new, innovative solutions for the production and distribution of energy and monitoring of energy consumption to ensure energy systems meet the requirements of economic growth, sustainability and energy security.

Biotech, Nanotech & Medtech

Biotech, Nanotech & Medtech

Biotech: manipulating (as through genetic engineering) living organisms or their components to produce useful, usually commercial, products (such as pest resistant crops, new bacterial strains, or novel pharmaceuticals).

Nanotech: relating to the study and application of extremely small things on an atomic, molecular, and supramolecular scale that can be used across all the other science fields, such as chemistry, biology, physics, materials science, and engineering.

Medtech: developing pharmaceuticals, devices, procedures and organisational systems used in health care that may be used for safe and effective prevention, diagnosis, treatment and rehabilitation of illness and disease.

Internet, Media & Telecom

Internet, Media & Telecom

Offering innovations in communication technologies that augment human communication in both anticipated and unanticipated ways.
