

Risk Advisory | AML/CFT

Deloitte in Bermuda — helping clients implement anti-money laundering detection and compliance around the globe.

Deloitte's Risk Advisory (RA) practice takes a focused approach that can save considerable time, effort and cost, and may increase return on investment. This approach can also increase the likelihood of detection, promote stronger compliance, and reduce the risk of loss and damage to a company's reputation and people.

At Deloitte, we follow an enterprise wide approach to managing money laundering risk. This approach enables clients to manage their risk across lines of business and in multiple jurisdictions, while helping meet the expectations of local regulators, shareholders, employees and other stakeholders.

With in-depth experience and a global network composed of industry specialists, we understand the AML/CFT risks and complexities our clients face. We offer advisory services across the entire lifecycle of AML/CFT compliance, drawing on the breadth and depth of our AML capability to provide comprehensive, tailored solutions to many leading financial services providers, as well as smaller organizations. We can help your organization mitigate its risks related to money laundering and terrorist financing, and improve its ability to meet regulatory expectations for a sound AML/CFT program.

Our practitioners have diverse backgrounds and extensive experience in reviewing AML programs for small, mid-size and global institutions as well as providing training, addressing enforcement actions, and presenting at global compliance conferences.
