

Financial Advisory

Deloitte in The Bahamas - expertise at your fingertips

Our Financial Advisory (FA) team brings a wealth of knowledge and extensive experience across a range of services and industries

Deloitte provides financial advisory services in restructuring, valuations, M&A transactions, forensic investigations, AML compliance, and ancillary services. Our team consists of practitioners with specialist fields of expertise and deep industry knowledge, as well as significant practical experience.

Restructuring

Providing advice and support on maximizing recoveries, improving financial performance, and resolving structural or financing issues. We offer financial restructuring advice including corporate insolvency and personal bankruptcy, options and business review analysis to distressed companies and their stakeholders, and turnaround and performance improvement for businesses.

Valuation Services

Our valuations professionals can help you solve complex business and transaction issues, including analyzing alternatives and recommending solutions. We provide well-reasoned, defensible valuations and advice. Most importantly, we understand how to quantify and present valuation analyses and conclusions under prevailing accounting, tax, and regulatory codes for transaction, financing, litigation, strategic management, and compliance purposes.

M&A

We are focused on helping our clients derive the optimal value from a transaction, providing comprehensive, focused support to acquirers and vendors, assessing the strengths and weaknesses, value areas and risks of a transaction, helping our clients make informed decisions about their transactions.

AML Compliance

We take a focused approach to increase the likelihood of detection, promote stronger compliance, and reduce the risk of loss and damage to a company's reputation and people. We perform gap assessments; develop, review, and enhance policies and procedures; develop controls to ensure policies and procedures are being followed; perform independent testing and audits; and provide training for employees, management, and boards of directors.

Forensic

Deloitte works with organizations and their lawyers, giving our clients the insight and understanding they need to strengthen their case, at all stages of a business dispute, drawing on our expert witness, financial analysis, damage quantification, and discovery capabilities.

Ancillary Services

We provide accounting and bookkeeping, and compilation services based on both locally and globally approved accounting standards such as IFRS.

Global Strength. Local Delivery.

We regularly partner with other Deloitte professionals from Canada, the Caribbean, the United Kingdom and the United States. This allows us to deliver the full range of FA services where we have the experience and leverage of our global experts for particularly complex engagements.
