Deloitte.

Omnia Al

Welcome to The Age of With™

Oceans of data are being generated each second within every organization. Humans alone cannot extract the full value of data, unravel its complex relationships, and generate transformational insights for your business without the aid of artificial intelligence (Al) and analytics solutions.

Humans working with machines, solving problems together, and building strategies faster than you could ever imagine—that's The Age of With™. It's the future of business, today.

Have you set your ambitions?

Address disruption.

What types of disruptions, including digital, do you face? What threats or opportunities do these pose? Is your organization's vision strategic and innovative enough to face the challenges?

Align tech vision to your organization's strategy.

What data, analytics, cognitive, and other capabilities do you need to future-proof your business?

Modernizing legacy technology.

Are you ready to modernize your data and analytics infrastructure and migrate to cloud-based solutions to allow you to successfully seize AI-enabled opportunities?

Build and strengthen capabilities.

Does your organization have the talent and capabilities to thrive in the digital universe and maximize the benefits while addressing cyber, regulatory, and ethical considerations?

The promises and challenges of AI

Organizations know that they must begin to harness the positive power of AI technologies or risk being left behind. Through a Deloitte survey, executives revealed that their organization:

68%

has moderate to extreme Al skills gaps

63%

believes AI is very important to company success now

56%

predicts AI will transform the business within three years

43%

has major or extreme concerns about Al risks

3/%

thinks AI will give the company a strong competitive advantage

35%

has a comprehensive, company-wide Al strategy

Talking transformation

We're entering the fourth industrial revolution, where Al-enabled technologies are disrupting the very foundations of business.

Those who prefer the status quo find the process daunting. But for forward-thinking organizations, it's an opportunity to grasp the future and shape it to their competitive advantage. Think about how analytics and cognitive technologies can transform your organization:

New levels of organizational excellence and efficiency, driven by Al-powered business models and operations.

Real-time predictions and insights that drive smarter decision-making and better results.

Capabilities to create whole new lines of Al-driven products and services to delight customers and drive growth.

Unprecedented gains in productivity through intelligent automation that detects and eradicates errors and inefficiencies, streamlines processes, and improves customer experiences.

A workforce freed from repetitive, mundane tasks and energized by opportunities to unleash their creativity and innovation.

Imagine, deliver, run

The Deloitte pathway to successful transformation

Imagine: The right focus

Set your ambition and chart a path to success by developing a roadmap to achieve those ambitions.

Deliver: The right concept

Make it tangible: Put the ambition in motion by moving forward and launching in the market.

Run: Getting to scale

Once the ambition is refined, scale it through flexible and integrated delivery teams.

"Data is growing fast and technologies—AI, ML, RPA, and so on—if applied smartly have the potential to help you validate, structure, and better use it. Deloitte sees these collectively as the next step in humans with machines collaboration. That's how you make strategic choices with insights and either become a disruptor or you end up disrupted in The Age of With™."
