

Compliance outsourcing A modern compliant way to fulfil regulatory requirements while maintaining a lean organisation

At first sight, the regulatory requirements set out in the Collective Investment Schemes Act (CISA) concerning compliance seem to be insurmountable for asset managers who have not been regulated before. Art 18 CISA gives the possibility to delegate certain tasks to competent third parties.

Your compliance challenges

You were an unregulated asset manager and need to build compliance capacity and know how. Furthermore you want to stay on top of the latest compliance developments in all the markets you are active in.

Get pro-active and cost effective updates to management and the board on regulatory developments which are relevant for your business. Why don't you delegate the compliance function to a competent and reliable third party that understands your business and is close enough to effectively perform this role? You can add specialised compliance know how to your in-house resources. In the meantime you create a cost effective and efficient yet reliable and comprehensive compliance solution for your business.

Our offering includes a full compliance outsourcing package which ensures that you have the applicable regulatory requirements based on clear, automated and comprehensive system-based compliance reporting.

Of course we will also make sure that any regulatory reporting requirement, be it regular or in particular ad hoc, is adhered to. Complement this package with an annual continued education by attending one of our updates or getting specific tailored knowledge delivered to your team.
