## **Deloitte Real Estate Switzerland**

Combining real estate advisory  
with financial and business  
services expertise

# What strategic themes do we emphasise?

We focus on optimising and assessing operating models within the overall client business strategy and are linking HR, IT, audit, tax and real estate challenges in a holistic approach. Our strategic themes include:

## The Workplace of the Future

The world of work is evolving at an unrelenting pace. Certain trends are disrupting business areas such as talent, technology and the physical workplace itself, which in turn is changing the way companies operate. Finding new ways to improve business agility and productivity whilst reducing costs and attracting and retaining the best talent are no longer optional objectives, but are essential in shaping the workplace of the future.

## IFRS 16 Lease Accounting

As of 2019, all lease contracts (with few exceptions) need to be capitalised on the balance sheet, which may be a complex and long-lasting manual procedure. Deloitte has therefore invented a unique tool based on artificial intelligence to facilitate and automate this process. In addition, potential negative accounting impacts may be avoided and relevant changes in the real estate portfolio implemented proactively.

## Global Location Strategies

Thanks to cooperation with our tax consultants, industry experts and our globally connected network in 164 countries we are your ideal partner for location optimisation enquiries across the entire value-added chain.

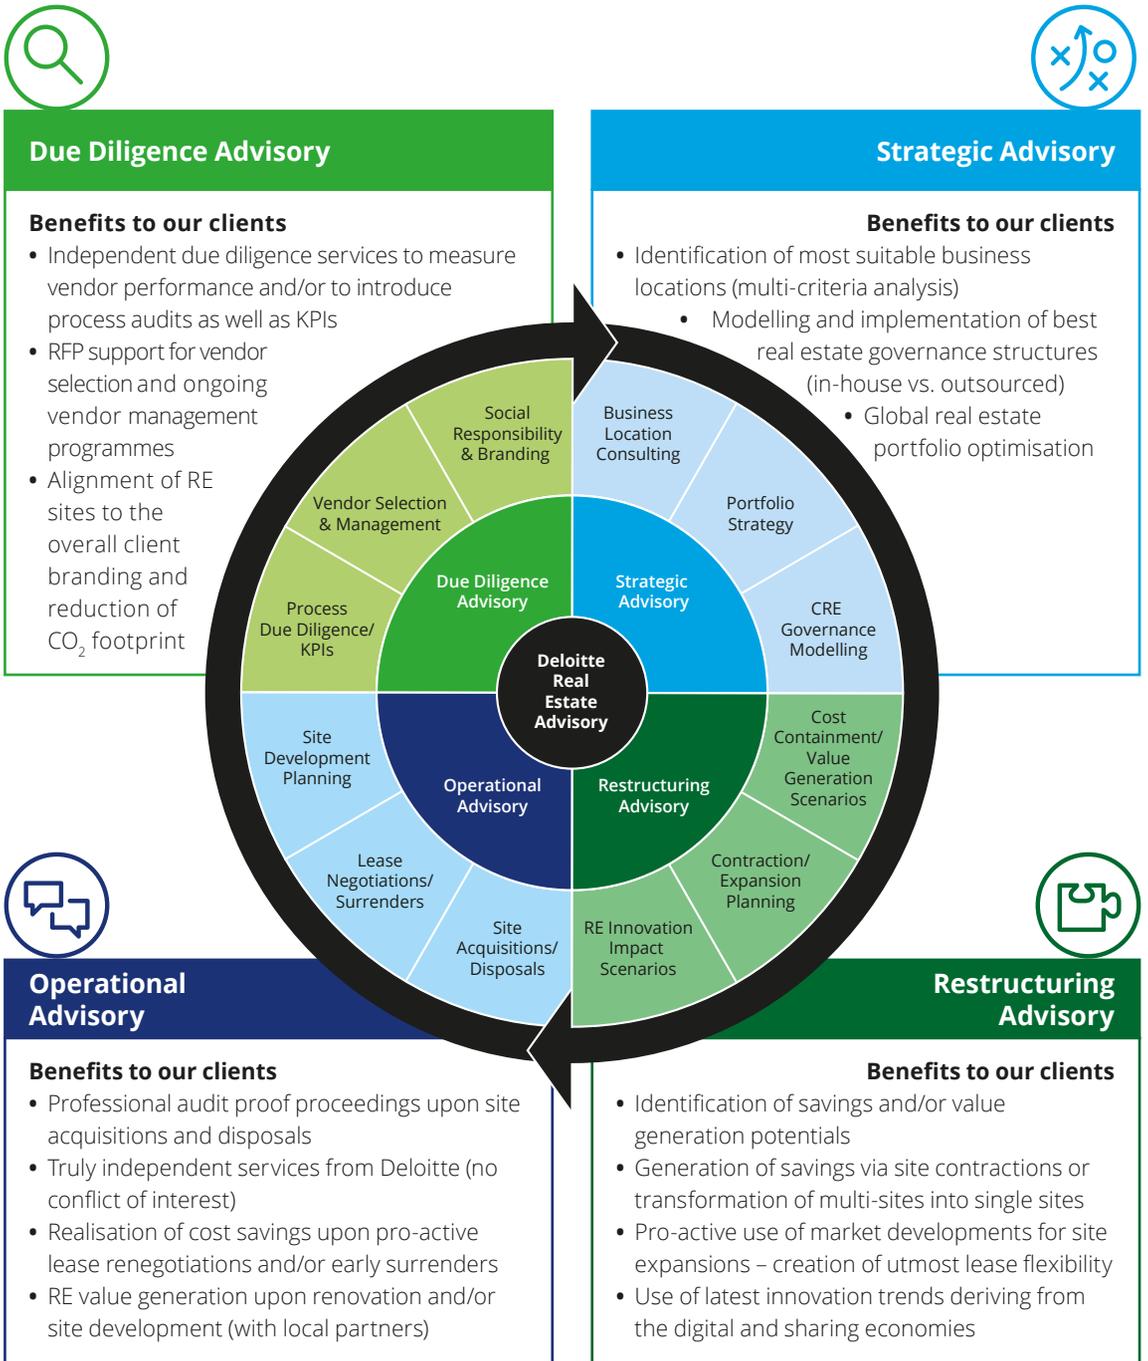

## Real Estate Transaction Services

Real estate transaction services for asset and share deals as well as related strategic work remain a key element to our holistic approach. We provide portfolio analysis and optimisation, tenant representation (site identification, lease negotiations, etc.), due-diligence expertise as well as sale and buy side advisory services for investors and occupiers with the aim of maximising operational cost savings.
