

External Threat Intelligence Monitoring (exTIM)

Envision first signs of cyber attacks before they become crises

What is cyber threat intelligence (CTI)?

Traditional cybersecurity solutions often overlook threats that do not stem from vulnerabilities within the internal IT environment. Through following along the thought process of cyber threat actors, threat intelligence can allow organisations to detect and remediate external cyber threats as early as possible before they become cyber crises.

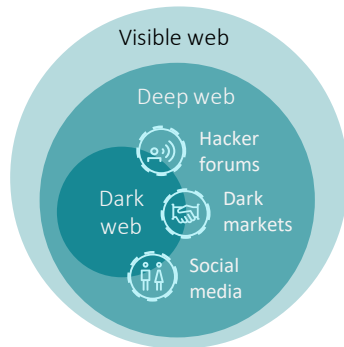

Our CTI monitoring solution—exTIM

Deloitte’s **External Threat Intelligence Monitoring (exTIM)** platform discovers indications of cyber threats directed at your organisation, by monitoring a wide range of public and commercial information and intelligence sources:

Our exTIM coverage

Monitored threats*

- Exposed Information Assets
- Exposed IT Infrastructure
- Brand Abuse
- Targeted Threats

*Refer to the next page for details

Our team

- Global cyber threat intelligence network with local insights
- Experienced local team with relevant CTI qualifications (e.g. GCTI, GOSI, CRTIA, CTIA)
- Languages supported: English, Chinese, Japanese, Russian, Spanish, etc.

Our sources

- Deloitte’s proprietary analytics platforms
- Commercial threat intelligence feeds
- Industry recognized Open Source Intelligence (OSINT) tools

How can exTIM benefit you?

- Early detection of sensitive data sold on **dark markets** or exposed by **ransomware** groups
- Prevent adversaries from **impersonating your brand** and defrauding your users
- Protect your staff and customers from falling prey to **spear-phishing** attempts
- Prevent data leakage or unauthorized access due to **insecure configurations**
- Accelerate triage of alerts** with intelligence tailored to your companies risk profile
- Maximise ROI** on cybersecurity solutions to minimise attack surface and **third party risks**

Our exTIM subscription options

We offer flexible service options to suit the intelligence requirements of different organisations:

Essential *Value for money* monitoring of dark web, repositories, leak sites, hacker forums, and DNS registrations to cover the most high-risk assets
