Forge a
supply chain
that can take
the pressure

Your supply chain is your company’s lifeline. Supply chain costs dominate the income statement, and related assets pepper the balance sheet. So even one faulty link in the chain can result in crisis, preventing you from meeting customer needs or achieving your growth targets.

It seems simple: get your product where it needs to be, on time and on budget. But the solution sets, specialized tools and IT resources required to make this happen – software, systems and networks, risk management, outsourcing and more – continue to grow in number and complexity.

The effectiveness of the supply chain touches every aspect of your business. It takes big-picture thinking and an end-to-end organizational strategy to make it work – and make it hold.

Start with a strategy

Supply chain issues can be a constant source of frustration, but a project for every problem isn't the answer. Supply chain systems are too complex for a scattershot approach to achieve consistent, sustainable results. Begin instead with a comprehensive strategy – one that aligns effort across the organization and leads to end-to-end solutions. Whether you need to develop a global supply chain strategy, implement a suite of integrated management services or plan and execute a one-time project, we have the solution for your challenge.

Plan

A synchronized, demand-driven supply chain provides the right level of customer service while optimizing costs, assets and flexibility.

Supply chain planning services:

- Global SC strategy
- Tax-advantaged SC network design
- Supply chain planning processes & systems strategy, selection and implementation
- Supply chain organization strategy and training
- Supply chain performance metrics, analytics and benchmarking
- Sustainable/"green" supply chain strategies
- Supply chain integrity and risk management

Source

It's impossible to achieve world-class, cost-effective supply chain performance without a strong and reliable global supply base.

Sourcing & procurement services:

- Global sourcing (direct materials) and commodity management
- Strategic sourcing (indirect materials)
- Tax-efficient sourcing
- Supplier relationship management
- Procurement transformation
- Purchasing & spend management solutions strategy, selection and implementation
- Product innovation and lifecycle management
- Sustainable/"green" procurement

Make

Combine lean manufacturing principles with 6-Sigma tools to improve the efficiency and reliability of all core business processes, including the supply chain.

Production services:

- Lean 6-Sigma production operations
- Production planning and scheduling systems selection and implementation
- Production flexibility
- Overall equipment effectiveness
- Maintenance operations and service parts management
- Contract manufacturing advisory

Deliver

Distribution and logistics operations that improve product and information flows are critical to customer order fulfillment – and to achieving the "perfect order."

Distribution and logistics services:

- Inventory and working capital management
- Customer order management
- DC design and turnkey implementation
- DC operations improvement & WMS systems
- Transportation strategy, planning and execution
- Reverse logistics & service operations
- Customer "cost-to-serve" and product profitability analysis
- Product portfolio strategy
- Outsourcing advisory services

We have the goods

Deloitte understands the promise of performance. We work to fulfill it. An efficient, integrated supply chain operation provides a powerful competitive advantage for companies that do it right.

With more than 100 Canadian supply chain specialists, part of a global network of over 2,000, Deloitte delivers cross-industry knowledge and experience across all areas of supply chain management, from strategy through implementation.

We serve thousands of clients around the world, from middle-market businesses to the Global 1,000, helping them improve their supply chain performance and increase shareholder value. Contact us to learn how we can help you too.

"It [Deloitte] is the strongest in integrating supply chain and overall enterprise risk management."
