Data Governance

Keeping an eye on the big picture with Data Governance

4 March 2021 – Virtual Seminar

Deloitte
Academy

Keeping an eye on the big picture with Data Governance

Description

Data Governance is an end-to-end approach for enabling Data Management. It is a collaborative framework of roles and responsibilities, processes and technology that facilitates decision-making and accountabilities for managing, using, improving, maintaining, monitoring, and protecting information across the enterprise.

The more important data is for a company's business model, the greater the necessity for Data Governance. In line with the management of other assets such as financial capital or human resources, Data Governance ensures value driven management of the business asset data.

While in the past, high quality data mainly ensured smooth operations and regulatory compliance, high quality data is nowadays a key asset with an inherent value that is leveraged via analytics based decision making.

This seminar describes how Data Governance can be implemented based on the Deloitte Data Governance Framework. While traditional Data Governance structures are also the basis for Data Governance in the age of Big Data, some considerations apply.

Who should attend the course?

The virtual seminar is addressed to Chief Data Officers, Chief Information Officers, Chief Technology Officers and Data Privacy Officers.

Programme

Joining time: 09:45 a.m. - 10:00 a.m.

Workshop: 10:00 a.m. - 11:30 a.m.

Facilitators

Panicos Papamichael

Panicos is leading the Risk Advisory Department of Deloitte in Cyprus. He is a business professional with over 30 years of business experience in internal audit, IT audit, risk management, reengineering of business processes, information systems implementation, development of strategies, evaluation and selection of systems, organization and operational planning and long-term business planning for clients in all major industry sectors. He is also an approved internal auditor for CIFs by Ministry of Finance.

Panicos graduated from the London School of Economics and Political Science in 1981 with a BSc in Mathematical Economics and Econometrics and joined one of the “big five” Accounting Firms in London where he trained and qualified as a Chartered Accountant in 1984. Panicos is also now one of the very few people in Cyprus that is Certified in the Governance of Enterprise IT (CGEIT). He is also Certified in Risk and Information Systems Control (CRISC).

Giorgos Ermogenous

Giorgos Ermogenous is a Manager in the Risk Advisory department. He specializes in information and communication systems implementation, management and security. His areas of expertise include IT audit, information security, data analytics, and enterprise risk management.

Giorgos is an IT specialist, with years of experience in governance and internal controls. He has assisted clients in private and public sectors by managing their risk, evaluating the design and effectiveness of their internal controls related to information security.

He is also part of the Cyber Risk Services team offering Information security services i.e. Information Security Consulting, Penetration Testing and eDiscovery. He has very good knowledge over many technical fields such as cryptography and machine learning.

Giorgos holds a five year Diploma from University of Aegean in Information and Communications System Engineering and an MSc from University of Aegean in Information and Communication Systems Security.
