

Governance & Compliance Screening

Is your company aware of all legal risks? Have you ensured a high level of compliance? Are the company's internal processes set up correctly? Is the company's management acting with due diligence?

If you are asking yourself these and other similar questions, do not hesitate to benefit from our **Governance & Compliance Screening** services! We can help your company's top management identify existing and potential legal risks and implement effective measures.

How can we help your company?

We will identify the legal risks in the following areas:

 Due diligence and corporate governance

 Requirements for becoming a member of an elected body

 Management responsibility in relation to financial management and bankruptcy prevention

 Compliance

 Remuneration, performance of duties, posting, taxes, contributions

 Finances

 Data protection

We will then assess the situation according to legal regulations and best practices and prepare a clear report identifying the key areas that need to be targeted from a risk perspective as well as those you have addressed correctly. We will help you mitigate or eliminate the issues identified. The outcome of the screening can also serve as confirmation of the robustness of your practice, e.g. in the event of an inspection or dispute.
