

Environmental Law

Czech Republic

Our legal services

- Assistance with the compensation of indirect costs associated with greenhouse gas emissions and reflected in electricity prices as well as with follow-up queries related to the accumulation of multiple forms of compensation and government aid.
- Advice on emissions trading or carbon tariffs.
- Complex services in the ESG and sustainability areas.
- Preparation of a tailor-made workshop to give you an introduction to the basic framework of the new sustainability regulation.
- GAP analysis to determine where your company stands in terms of sustainability, and the preparation of a sustainability strategy.
- Identification of relevant ESG parameters and the definition of long-term, mid-term, and short-term sustainability goals.
- Support with the setup of non-financial reporting processes in accordance with the existing and upcoming changes to this regulation.
- Provision of thorough environmental audits (Environmental Taxonomy, ESG, Due Diligence) of your own companies or companies you plan to acquire.
- Provision of comprehensive services in all renewable energy sectors.

Our services in the areas of waste management, eco-modulation and eco-design, product labelling or recycling:

- Provision of multilateral support in areas of waste, packaging, packaging materials, and product end-of-life, also in relation to the preparation of the relevant legislation.
- Wide spectrum of legal services related to all aspects of your organisation's activities and the extended producer responsibility regulation.
- Preparation of solutions in line with trends, such as eco-modulation, eco-design, product labelling and recycling.
- Provision of comprehensive legal services in food safety, food and package labelling, correct pricing, and tax assessment.
- Representation in all administrative and court proceedings and assistance with obtaining all authorisations required.
