

Telecommunications and Media Czech Republic

Our legal services

Regulatory

We provide legal advice and assistance in the interpretation and implementation of relevant telecommunications, media regulations, and soft-law requirements. We have in-depth knowledge of issues related to the radio spectrum agenda and the provision of electronic communications services, as well as the regulation of advertising and media space.

Compliance consulting (including competition law)

We help our clients develop and implement internal compliance programmes, conduct audits and assessments to ensure compliance, and minimise legal risks.

Contract law

We assist with the preparation and negotiation of contracts in the field of telecommunications and media law, the preparation of all documentation for the contracting of TMT projects, including public procurement or merger filing.

Intellectual property protection

Particularly in the field of media law, we provide legal advice on the protection of intellectual property, e.g. in the creation of media content, drafting and reviewing contracts with artists and rights holders; drafting licensing and distribution agreements.

Representation before authorities and dispute resolution

We represent our clients in negotiations before the relevant authorities (Czech Telecommunication Office, Office for the Protection of Competition, Office for Personal Data Protection, and others) and in court disputes related to telecommunications and media law.
