Non-financial and integrated reporting
Real value, real cost, real profit

“We offer clients support throughout the entire life cycle of the reporting process, from defining the basic assumptions to the graphics and external communications.”

According to the guidelines of the Global Reporting Initiative (GRI), the most internationally recognized non-financial reporting guidelines, the report should present management’s links between CSR activities and business strategy, achieved results, and plans for the next reporting cycle.

“Real value, real cost, real profit”

What is a non-financial report?
Reporting on sustainability and corporate social responsibility (CSR) means the disclosure of non-financial data. These may include, among others, customer relationships, product liability, ethics and anti-corruption, employees, the environment, dialogue with stakeholders and social engagement.

The new regulation will apply to large public interest entities and groups of companies with a balance sheet total of over 20 million EUR or net revenues of over 40 million EUR.

The average non-financial reporting process in accordance with the guidelines of the GRI involves about 20 people in the organization. On average, about 60–80 indicators are collected.

It is a valuable experience to try non-financial reporting as soon as 2016 in order to implement the data collection process, assess any gaps, and to have enough time to implement good practices in relevant areas of CSR which can be presented in a report issued in 2018. Non-financial data should be included in a separate section of the report on the activities of the company (statement on non-financial information) or may be presented in a separate report: GRI report, integrated report, impact report, etc.

Preparation of the first non-financial report takes about 4–5 months.

The average non-financial reporting process in accordance with the guidelines of the GRI involves about 20 people in the organization. On average, 60–80 indicators are collected.

The new regulation will apply to large public interest entities and groups of companies whose parent company is a unit of public interest.

The 2017 report must be in accordance with the guidelines of the new Directive. The 2017 report must be in accordance with the guidelines of the new Directive.
