

The only robotic accountant for invoice processing companies need.

Fully automated end-to-end solution for processing of incoming invoices. dInvoiceBot saves capacity or even eliminates the need of having an accounts payable accountant and helps reduce time from receipt of an invoice until its full posting in the accounting system.

Who should be interested in our solution?

Companies with high volumes of received invoices that are willing to increase efficiency of their processes

Companies looking for AI use-case, struggling with the invoicing process

Companies fed-up with BPO invoice processing, that want to take back control of the invoicing process

Companies with already implemented RPA however, non-utilized potential of End-to-End automation for invoice processing

Solution design

dInvoiceBot comparison to other solutions

Solution	Component		Total*
	Gathering data	Processing data	
Technology + inhouse accountant	0.5 EUR + 5 min of human validation	3 - 6 EUR	~ 4 - 7 EUR + 5 min of human validation
BPO	1 EUR	3 - 6 EUR	~ 4 - 7 EUR
dinvoiceBot	1 EUR		1 EUR

* All prices are calculated per invoice

Business case

Assumptions

- Implementation cost **€25,000**
- Cost of **1 AP** accountant **€2,000/month**
- Cost per invoice **€1**
- **2 AP** accountants needed

Model scenario: 1 000 invoices per month

Results after implementing dInvoiceBot

- Payback period of **9 months**
- Savings in the **1st** year **€11,000**
- Saving in the **2nd** and following years **€36,000**
