Deloitte.

This communication contains general information only not suitable for addressing the particular circumstances of any individual case and is not intended to be used as a basis for commercial decisions or decisions of any other kind. None of Deloitte GmbH Wirtschaftsprüfungsgesellschaft or Deloitte Touche Tohmatsu Limited, its member firms, or their related entities (collectively, the "Deloitte network") is, by means of this communication, rendering professional advice or services. No entity in the Deloitte network shall be responsible for any loss whatsoever sustained by any person who relies on this communication.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee ("DTTL"), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to clients. Please see www.deloitte.com/de/ueberUns for a more detailed description of DTTL and its member firms.

Deloitte provides audit, risk advisory, tax, financial advisory and consulting services to public and private clients spanning multiple industries; legal advisory services in Germany are provided by Deloitte Legal. With a globally connected network of member firms in more than 150 countries, Deloitte brings world-class capabilities and high-quality service to clients, delivering the insights they need to address their most complex business challenges. Deloitte's approximately 286,000 professionals are committed to making an impact that matters.

Issue 01/2020

Navigate to Process Excellence with Process Mining
Center for Process Bionics

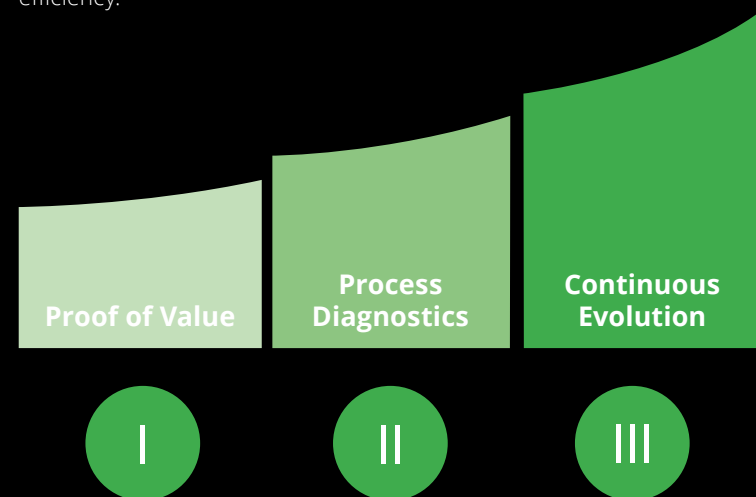

Challenges

State-of-the-art business operations are largely process-driven, often supported by a variety of IT systems. Their ever-growing complexity poses tremendous challenges for process transparency, control and efficiency.

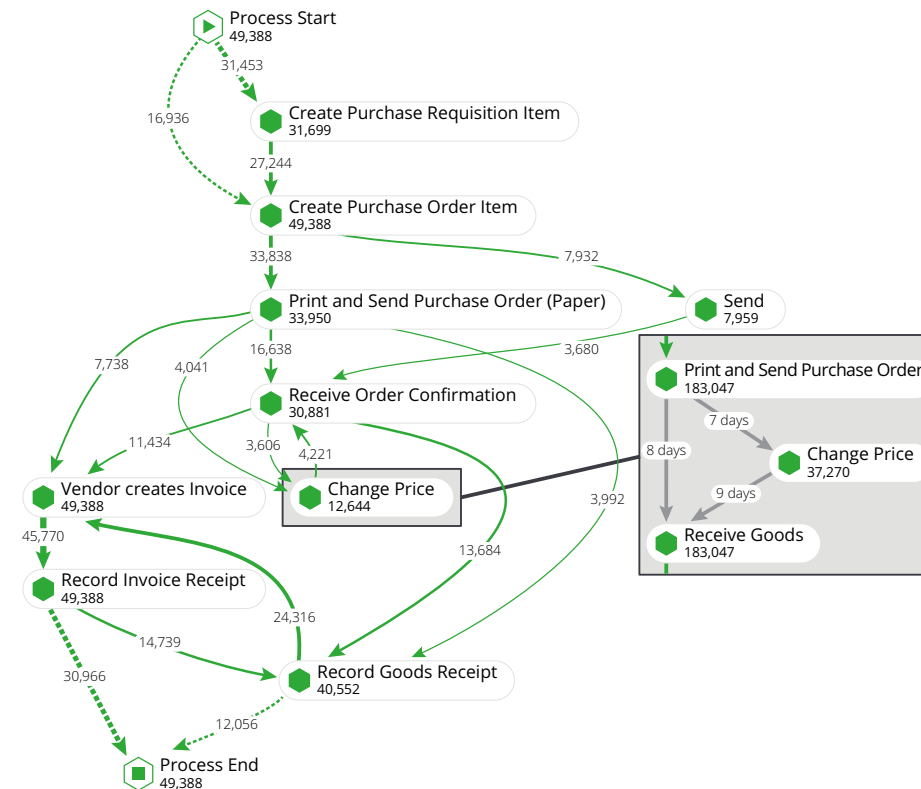

The Deloitte Center for Process Bionics utilizes Process Mining to capture your end-to-end business processes. Transforming this next-level transparency into tailored, interactive cockpits which allows an unprecedented handle on process diagnostics and optimization.

Leveraging Deloitte's cross-functional expertise in lean management, machine learning, robotics process automation (RPA) and neuroscience, we are your partner of choice to reach Process Excellence in the digital era.

Beyond transparency, Process Bionics provides a greater understanding of organically grown process landscapes, including the behaviour shown by involved entities, and applying proven patterns to boost efficiency.

Value-add of Process Mining

-  **Comprehensive Transparency** of actual process flow
-  **Actionable Insights** on bottlenecks and inefficiencies
-  **Real-time Control** of individual process instances
-  **Adherence Checks** against defined process-models
-  **Process Evolution** to create quantifiable results

Our service offering

-  **Proof of Value** provides a thorough understanding of the vast potential of Process Mining based on your existing data
 - Quick prototyping of one process in focus by leveraging standardized building blocks
 - Hands-on workshops with our Process Mining and lean management experts
 - First insights on hidden optimization potentials

-  **Process Diagnostics** yields highly-quantified and actionable improvement measures targeted at substantial impact and a fast return
 - Deep-dive analytics on processes and associated behaviour across systems boundaries
 - Lean and industry expertise is utilized to fix deficiencies, creating best-in-class process landscapes
 - Detecting potentials for robotics process automation (RPA) and system reconfiguration

-  **Continuous Evolution** embeds Process Bionics into the DNA of your organization, striving for holistic and continuous process optimization
 - Gapless integration of Process Bionics capabilities and analysis blueprints into the corporate core
 - Setting up dedicated governance structures for Process Excellence, thereby owning Process Bionics
 - Comprehensive training strategy for key practitioners and lean experts to preserve best-in-class competitive advantage
