The rise of the social enterprise

2018 Deloitte Global Human Capital Trends
Deloitte's Human Capital professionals leverage research, analytics, and industry insights to help design and execute the HR, talent, leadership, organization, and change programs that enable business performance through people performance. Visit the Human Capital area of www.deloitte.com to learn more.

Experience Deloitte’s *Global Human Capital Trends* like never before. Access the new HC Trends app featuring exclusive content.
This year’s 10 trends

The 2018 Deloitte Global Human Capital Trends report, drawing on a survey of more than 11,000 HR and business leaders globally, describes the emergence of the social enterprise as a response to heightened societal expectations and rapid technological change—and the human capital implications for organizations to address today.

THE SYMPHONIC C-SUITE: TEAMS LEADING TEAMS
Senior leaders can’t afford to work in silos in today’s complex, dynamic environment. The goal is to act as a symphony of experts playing in harmony—instead of a cacophony of experts who sound great alone, but not together.

THE WORKFORCE ECOSYSTEM: MANAGING BEYOND THE ENTERPRISE
The composition of the workforce is changing dramatically. As alternative work arrangements become more common, how can organizations appeal to, engage with, and drive value through workers of all different types?

NEW REWARDS: PERSONALIZED, AGILE, AND HOLISTIC
Why have rewards remained stuck in the past, when almost every other aspect of HR has undergone transformative change? Leading companies are now undertaking the hard work of creating personalized rewards programs based on understanding each individual’s needs.

FROM CAREERS TO EXPERIENCES: NEW PATHWAYS
Rather than an orderly, sequential progression from job to job, 21st-century careers can be viewed as a series of developmental experiences, each offering the opportunity to acquire new skills, perspectives, and judgment.

THE LONGEVITY DIVIDEND: WORK IN AN ERA OF 100-YEAR LIVES
People are living longer, and organizations are shifting their attitudes toward older workers as a result. Organizations that can turn advancing worker age into an asset could gain a competitive advantage.

CITIZENSHIP AND SOCIAL IMPACT: SOCIETY HOLDS THE MIRROR
Stakeholders today are taking an intense look at organizations’ impact on society, and their expectations for good corporate citizenship are rising. In an effort to meet these expectations, leading organizations are making citizenship a core part of their strategy and identity.

WELL-BEING: A STRATEGY AND A RESPONSIBILITY
Many employers are putting in place innovative programs for financial wellness, mental health, healthy diet and exercise, mindfulness, sleep, stress management, and more. The aim? To both increase worker productivity and meet new social expectations.

AI, ROBOTICS, AND AUTOMATION: PUT HUMANS IN THE LOOP
As AI and other advanced technologies permeate the workplace, skills such as critical thinking, creativity, and problem-solving gain in importance. Leading companies are recognizing that these technologies are most effective when they complement humans, not replace them.

THE HYPER-CONNECTED WORKPLACE: WILL PRODUCTIVITY REIGN?
Workplaces are being flooded with new and exciting communications tools, each promising to improve productivity. But management must still make important decisions about which tools to use and how to use them—including, perhaps, the decision not to use certain tools at all.

PEOPLE DATA: HOW FAR IS TOO FAR?
The use of workforce data to analyze, predict, and help improve performance has exploded over the last few years. But as organizations start to use people data in earnest, new risks as well as opportunities are taking shape.

The rise of the social enterprise
New rewards
Personalized, agile, and holistic

For decades, designing rewards programs was a relatively straightforward exercise of finding the right mix of compensation and traditional benefits such as health insurance and vacation time. Those days are over. Leading organizations now understand that a personalized, agile, holistic rewards system is essential to attracting, motivating, and developing talent. So why are so many companies falling short, even as they realize their rewards programs are outdated?

Rewards are in the midst of a transition from the strictly standardized to the highly personalized. Companies at the forefront of this wave are creating rewards programs that are delivered more continuously, aligned more closely with individual preferences, and based more fully on an employee’s whole contribution—to the team and the organization. These companies understand that effective rewards programs require a personal relationship with each worker. Done correctly, this new approach to rewards can become a huge competitive advantage.

Yet our research indicates that few companies are making this transition successfully. Yes, they understand the need; 76 percent have reinvented performance management to be more continuous. However, 91 percent of companies still follow the utterly conventional practice of conducting salary reviews only once a year—or even less often.1 Even worse, organizations rate their rewards program with a net promoter score of -15, and only 21 percent would recommend their program to others.2

Many business as well as HR leaders recognize the problem. In this year’s Global Human Capital Trends survey, 37 percent of respondents rated rewards as very important, yet only 9 percent indicated that they were “very ready” to deal with this challenge.

From this low baseline, we did additional research to try to understand how well rewards systems are driving business outcomes. The results are shockingly poor (table 1).3

These low numbers point to a serious problem. While other talent strategies have evolved, rewards practices are lagging behind.

What is wrong with rewards?

We see three major areas where today’s rewards programs are out of line with employee preferences.

First, employees respond favorably to agile compensation programs that provide raises, bonuses, or other incentives more often than the traditional
AN ALIGNED REWARDS STRATEGY CORRELATES WITH HIGH GROWTH EXPECTATIONS

Respondents from organizations whose rewards strategies were highly aligned with organizational goals were the most likely to anticipate growth of 10 percent or more.

Companies at the forefront of this wave are creating rewards programs that are delivered more continuously, aligned more closely with individual preferences, and based more fully on an employee’s whole contribution—to the team and the organization.

First movers: Aligning rewards with preferences

Companies that fundamentally revamp their rewards programs to make them more varied and personalized are seeing positive results. Some of these companies are taking creative approaches to achieving greater alignment among rewards strategy, individual preferences, and company goals.

For example, a major apparel manufacturer now offers people three elements of remuneration. Each element is based on a different set of criteria: Increases in base pay reflect an employee’s alignment and growth in core values; bonus amounts are entirely tied to the achievement of specific goals; and incentives and long-term stock options are awarded based on leadership activities and 360° feedback. This flexible system empowers employees to decide if they want to focus on core teamwork, achieve stretch goals, or move into leadership roles.

Or consider a European consulting firm that gives new employees a range of rewards options when they accept an employment offer. The new hire can choose salary or stock options; an extra week of vacation or higher pay; and a higher bonus based on results or a more modest increase in base pay.

Topics such as pay for performance, pay fairness, and pay equity are nothing new; HR departments have debated them for decades. What makes things different today are workers’ increased expectations—for transparency and flexibility around rewards—and their greater access to information, including salary data via websites such as Glassdoor, Fishbowl, LinkedIn, and others.

What makes things different today are workers’ increased expectations—for transparency and flexibility around rewards—and their greater access to information, including salary data via websites such as Glassdoor, Fishbowl, LinkedIn, and others.
Patagonia has an innovative compensation and rewards model that aligns with its culture and identity. It goes beyond the historic mix of traditional benefits by adopting an unconventional approach to rewards that caters to employees’ lives both inside and outside of work. This includes 26 three-day weekends per year, a surfing policy that allows employees to surf or do other exercise during work hours, and extensive family benefits such as on-site day care to support parenting and breastfeeding. Patagonia strongly believes in hiring passionate and motivated people who stand behind what they believe, and has seen a rise in performance and productivity when they are rewarded accordingly. The company encourages employees to treat work as play and regards its own workers as the ultimate customers, which means it places a special emphasis on how it treats and rewards them.

Supporting continuous performance management

Changing talent management approaches are a key driver of the evolution in rewards. A 2016 study found that three-quarters of employees said that their companies should change performance management practices, and less than 40 percent of corporate leaders said that these practices helped achieve business objectives. In a 2017 study, more than 70 percent of companies reported designing “continuous performance management” practices.

A few pioneers have begun to create “continuous rewards” to match. For example, one consumer finance firm now both pays out its broad-based cash incentive plan and processes promotions twice a year, aligning with its semiannual approach to performance reviews and ratings.

Cisco’s head of rewards favors an approach of continuous experimentation that involves listening to employee needs as well as understanding competitive benefits and rewards in the market. To promote transparency and trust, the company regularly benchmarks its total compensation against that of competing firms and gives employees a view of how each job family is paid compared to competitors.

Keeping it personal

Surprisingly, rewards are perhaps the last area of human capital to become personalized, even though personal preferences may be the most important in this area. As a result, companies that personalize rewards—or better yet, create an individual relationship around rewards with each worker—can seize a distinct advantage in the talent market.

Our view is that a system that offers a variety of rewards and a way to personalize them is the only structure with the required flexibility to meet the diverse needs and desires of today’s variegated workforce. Talent today wants a custom rewards experience that reflects how they live, work, and communicate—not a one-size-fits-all approach rooted in the past.
THE BOTTOM LINE

Most organizations now recognize the need to reshape rewards with a more personalized, agile, and holistic approach, matching other talent management strategies. The few organizations that have translated recognition into action have expanded their definition of rewards and looked beyond traditional approaches to design and delivery. The field remains wide open for organizations to experiment and test new tools in the effort to boost rewards’ efficacy by establishing a personalized relationship with each worker.

Table 2. What role does the C-suite play in capitalizing on new rewards? How can individuals adjust?

<tr>
<th>Role</th>
<th>Role Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHRO</td>
<td>Recognize that overhauling talent management is not complete without a corresponding overhaul of rewards. Use analytics to determine what workers value in their rewards to appropriately align rewards programs and generate a market advantage for your organization. Revisit your rewards approach on an ongoing basis to reflect the continuing evolution of the workforce and their priorities.</td>
</tr>
<tr>
<td>CIO</td>
<td>Work with HR to expand your organization's analytics capabilities in the rewards space, and promote ways to use people analytics more broadly across the organization. Rewards will continue to be an area where employee insights can be incredibly beneficial.</td>
</tr>
<tr>
<td>CFO</td>
<td>Collaborate early and often with HR to understand how changes in rewards structures can affect the workforce’s overall cost, as rewards make up a significant portion of the human capital balance sheet.</td>
</tr>
<tr>
<td>Chief risk officer</td>
<td>Monitor regulations in the rewards space to understand how new laws and policies could impact your organization’s rewards strategy—especially with respect to rewards for gig workers.</td>
</tr>
<tr>
<td>Individuals</td>
<td>Tell your employer what you want and expect in your relationship with the organization. Many organizations are now open to new ideas for a variety of different rewards. It’s up to you to make your voice heard.</td>
</tr>

AUTHORS

DIMPLE AGARWAL
Deloitte MCS Limited | dagarwal@deloitte.co.uk

Dimple Agarwal is the global leader of Organization Transformation and Talent for Deloitte’s Human Capital practice, and also leads Deloitte Consulting’s own talent agenda in the United Kingdom. She consults at the C-suite level on operating models and organizational design, HR and talent strategies, leadership strategies and development, and major transformation programs in the space of M&A, culture, and digital. In her 23 years of consulting, she has worked in the United Kingdom as well as in many Asian, African, and European countries. Agarwal holds a bachelor’s degree in psychology and a master’s degree in human resources.

JOSH BERSIN
Deloitte Consulting LLP | jbersin@deloitte.com

Josh Bersin founded Bersin & Associates, now Bersin, in 2001 to provide research and advisory services focused on corporate learning. A frequent speaker at industry events and a popular blogger, he has been named one of HR’s top influencers by multiple commentators. Bersin spent 25 years in product development, product management, marketing, and sales of e-learning and other enterprise technologies. He has a BS in engineering from Cornell, an MS in engineering from Stanford, and an MBA from the Haas School of Business at the University of California, Berkeley.

GAURAV LAHIRI
Deloitte India | gauravlahiri@deloitte.com

Gaurav Lahiri leads Deloitte India’s Human Capital consulting practice. He works with clients to align their organizations with their strategic agenda, including reviewing strategies, designing organization structures, implementing talent management programs, and formulating reward strategies to drive performance and motivation. Lahiri co-authored the 2007 book The Indian CEO: A Portrait of Excellence and has authored several papers on post-merger integration and change management. He graduated with honors in mathematics from Delhi University and holds an MBA from the XLRI School of Management.
JEFF SCHWARTZ
Deloitte Consulting LLP | jeffschwartz@deloitte.com

Jeff Schwartz, a principal with Deloitte Consulting LLP, is Deloitte's global leader for Human Capital Marketing, Eminence, and Brand and the US leader for the Future of Work. He is the US leader of the Innovation Tech Terminal (ITT), linking the Israeli start-up ecosystem with global clients. Schwartz is an advisor to senior business leaders at global companies, focusing on business transformation, organization, HR, talent, and leadership. He has lived and worked in the United States, Russia, Belgium, Kenya, Nepal, Sri Lanka, and India, and was based in Delhi and Mumbai from 2011 to 2016. He launched Deloitte's Global Human Capital Trends research in 2011. Schwartz has an MBA from the Yale School of Management and an MPA from Princeton's Woodrow Wilson School of Public and International Affairs.

ERICA VOLINI
Deloitte Consulting LLP | evolini@deloitte.com

Erica Volini is the US Human Capital leader for Deloitte Consulting. Throughout her 20-year career, Volini has worked with some of the world's leading organizations to link their business and human capital strategies. She is a frequent speaker on how market trends are impacting HR organizations and the HR profession as a whole. Within Deloitte, she is a member of Deloitte Consulting's management committee. Volini has a bachelor of science in industrial and labor relations from Cornell University.

ACKNOWLEDGEMENTS

The creation of Deloitte's 2018 Global Human Capital Trends report was a team effort involving many practitioners from around the globe. The report leverages not only the results of our survey of more than 11,000 business and HR leaders, but also the insights from our many Human Capital partners from their interactions with business and HR leaders throughout the year.

We would not have been able to produce this report without the energy of our dedicated team:

Julia Epstein and Julie May, who helped to lead this program from the US and Global, and their team of Daniel Baicker, Tracy Martin, and Joycelyn Finley, who coordinated and executed all of the program initiatives and worked tirelessly with our global team.

Amy Farner, who led a flawless data design and analysis effort that generated our largest response in history. Her guidance and coaching was unwavering and we are forever grateful. Shivank Gupta and Mukta Goyal for their efforts on the survey and analytics, together with their colleagues: Udita Arora, Ushasi Bandyopadhyay, Archana Bhat, Saylee Bhorkar, Ananshi Chugh, Srishti Dayal, Ankita Jain, Rachit Jain, Bhumi Jain, Shruti Kalaiselvan, Ashish Kainth, Yasmine Kakkar, Sania Motwani, Sahana Nabaneeta, Anjali Naik, Divya Patnaik, Sangeet Sabharwal, Vrinda Sarkar, Sonia Sharma, Goral Shroff, Taneet Singh Ranhotra, and Manan Vij.

Christy Hodgson, who drove the marketing strategy and app branding and helped to bring together how the Human Capital Trends story was told. Her strategic mind and flawless coordination allowed us to increase the power of the story and the company videos. Melissa Doyle and Steve Dutton for their leadership in public relations.

Andrew Pollen and the Deloitte Digital team who partnered with us to lead the design and development of the new HC Trends web app. Nidal Haddad for his executive sponsorship from Deloitte Digital.

The Deloitte Insights team that supported the report's publication, including Junko Kaji, who provided editorial guidance; Sonya Vasilieff, our Deloitte Insights art director; Sarah Jersild, who created the Deloitte Insights introductory video; Alok Pepakayala, who assisted the app development team; and Amy Bergstrom and Alex Kawecki, who led Deloitte Insights’ deployment efforts.

Sue Ostaszewski, Karen Miklic, Laura Elias, and MaryKate Reese, who created the marketing assets, and Shannon Pincus, Caroline Regan Williams, Ayushi Agarwal, Christina Anderson, Maggie Godleski, Caroline Levy, and Devina Vimadalal, who drove the development of the company videos in the app. Deepti Agarwal, Angela Ayton, Bob Hughes, Lucy Matthews, Reuben Paul, and Gloria Viedma Navarro, who worked on the client-facing materials for this year’s report.

Mia Farnham, Alejandra Arrue, and Dany Rifkin for their support in conducting research to support the trends.

Jennifer Fisher, Michelle Machalani, and Susanna Samet for providing their expertise in diversity and inclusion and in public policy.

Jeffrey Winn and Elaine Loo for providing their expertise in cyber.

Vivek Katyal for providing his expertise and input on the people data chapter.

Stacey Philpot, Jeff Rosenthal, and Pushp Deep Gupta for their expertise and input on the C-suite chapter.

Walt Sokoll, Chetan Jain, and Leendert van der Bijil for their expertise in the HCM technology space.
