

SAM OPEN SOURCE – LEGAL AND REGULATORY REQUIREMENTS

Get to know the necessary legal basis regarding the handling of Open Source Software and its usage in Software Asset Management (SAM).

The Deloitte SAM Academy offers a comprehensive training program for all key activities relating to Software Asset and License Management (SAM). The content of the SAM Academy has evolved from Deloitte's long-term SAM experience in diverse customer projects and covers the entire software lifecycle. We offer impartial guidance and training independent of any software vendor or tool provider.

The use of Open Source Software (OSS) is very common in companies. However, OSS products are not license-free. A number of legal requirements must be observed under the respective license conditions of GPL, LGPL, Apache, etc. The copyleft effect requires special attention if OSS is to be distributed or commercialized. The training considers the licensing side of using OSS and shows possible approaches how OSS can be established in license management.

- I. Legal basics in dealing with OSS**
 - Copyright Basics
 - Rights and obligations of the licensee
 - The copyleft effect: prerequisites and legal consequences
- II. Most important OSS license types in detail**
 - GNU General Public License (GPL) 2.0 & 3.0
 - GNU Lesser General Public License (LGPL) 3.0
 - Apache License 2.0
- III. Software Asset Management (SAM) for OSS**
 - Aspects of SAM Governance (definition of SAM responsibilities and roles)
 - Possible internal company processes for the use of OSS
- IV. Current developments around OSS**
 - Popular legal cases
 - Active interest groups

The interactive training combines the necessary theory with practical examples and is aimed at software/IT managers, developers and decision makers in the field of software/IT management at all levels.
