

SAM IN VIRTUAL ENVIRONMENTS

In this training course you will get to know the legal aspects of correctly license your virtual infrastructure compliant to the software manufacturer regulations.

The Deloitte SAM Academy provides a comprehensive training program for all key activities relating to Software Asset and License Management (SAM). The content of the SAM Academy has evolved from Deloitte's long-term SAM experience in diverse customer projects and covers the entire software lifecycle. We offer impartial guidance and training independent of any software vendor or tool provider.

Virtualization technologies such as VMware, Citrix or PowerVM increasingly characterize the image of today's IT-infrastructures and offer several advantages compared to physical systems. What has to be considered when using licenses within virtual systems? How many licenses would you need if you use your IT partly in a virtual environment, possibly in addition to your physical instances?

I. Virtualization – an overview

- Definition of terms and link to other Software Asset Management disciplines
- Impact of software usage in virtual environments on technical inventory

II. Licensing in a virtual environment with vendors like

- Oracle
- IBM (ILMT)
- VMware
- Microsoft

The training **SAM for Cloud-Computing** connects thematically and can be offered on the following day.

The training addresses all employees of the IT department with relation to the topic as well as software contract and license managers.

One day
