

Smart Factory Data Platform

Enabling manufacturing process efficiency gains by AI and data driven innovation

The Data & Analytics Platform for Smart Manufacturing
powered by the Snowflake Data Cloud on AWS

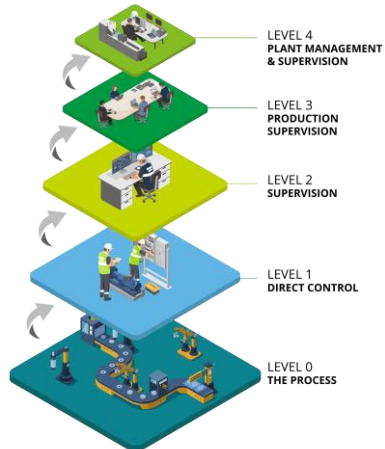

Agenda

- 01** Data-driven Potentials for Manufacturing Processes
- 02** Data Ingestion Patterns enabling IT/ OT Convergence
- 03** Smart Factory Data Platform Architecture & Capabilities
- 04** Understanding Production Anomalies with an AI Co-Pilot
- 05** Questions & Answers

Manufacturing processes bear business potentials by data utilization...

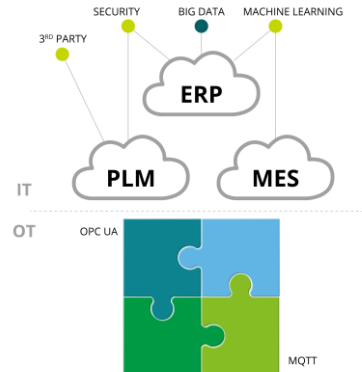

TRADITIONAL

Monolithic pyramid

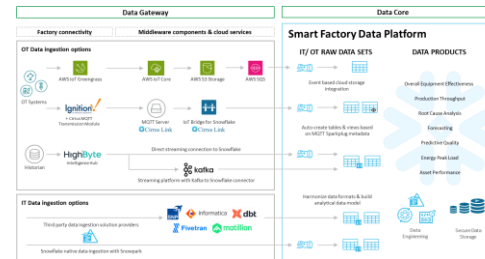

TODAY/TOMORROW

Converging IT and OT using a hybrid edge-to-cloud architecture

CENTRALIZED DATA

Unified access to manufacturing data

VALUE OF DATA INSIGHTS

Enhanced GenAI-driven manufacturing processes

Understanding Production Anomalies with an AI Co-Pilot
Streamlit Data Application for OT data visualization and GenAI interactions

PLM Data Product Sharing
BI/Visual Analytics Queries
Streamlit Data Applications
Cortex GenAI/LLM Services
Document AI Content Extraction
Data Science Notebooks

Cortex GenAI/ LLM services to co-pilot the root cause analysis for production anomalies

...but face challenges

Data acquisition and management

Manufacturing data sets are often poorly utilized and inconsistent

Data product management

Interoperability between IT and OT data sets is difficult to achieve

Access to requisite skills

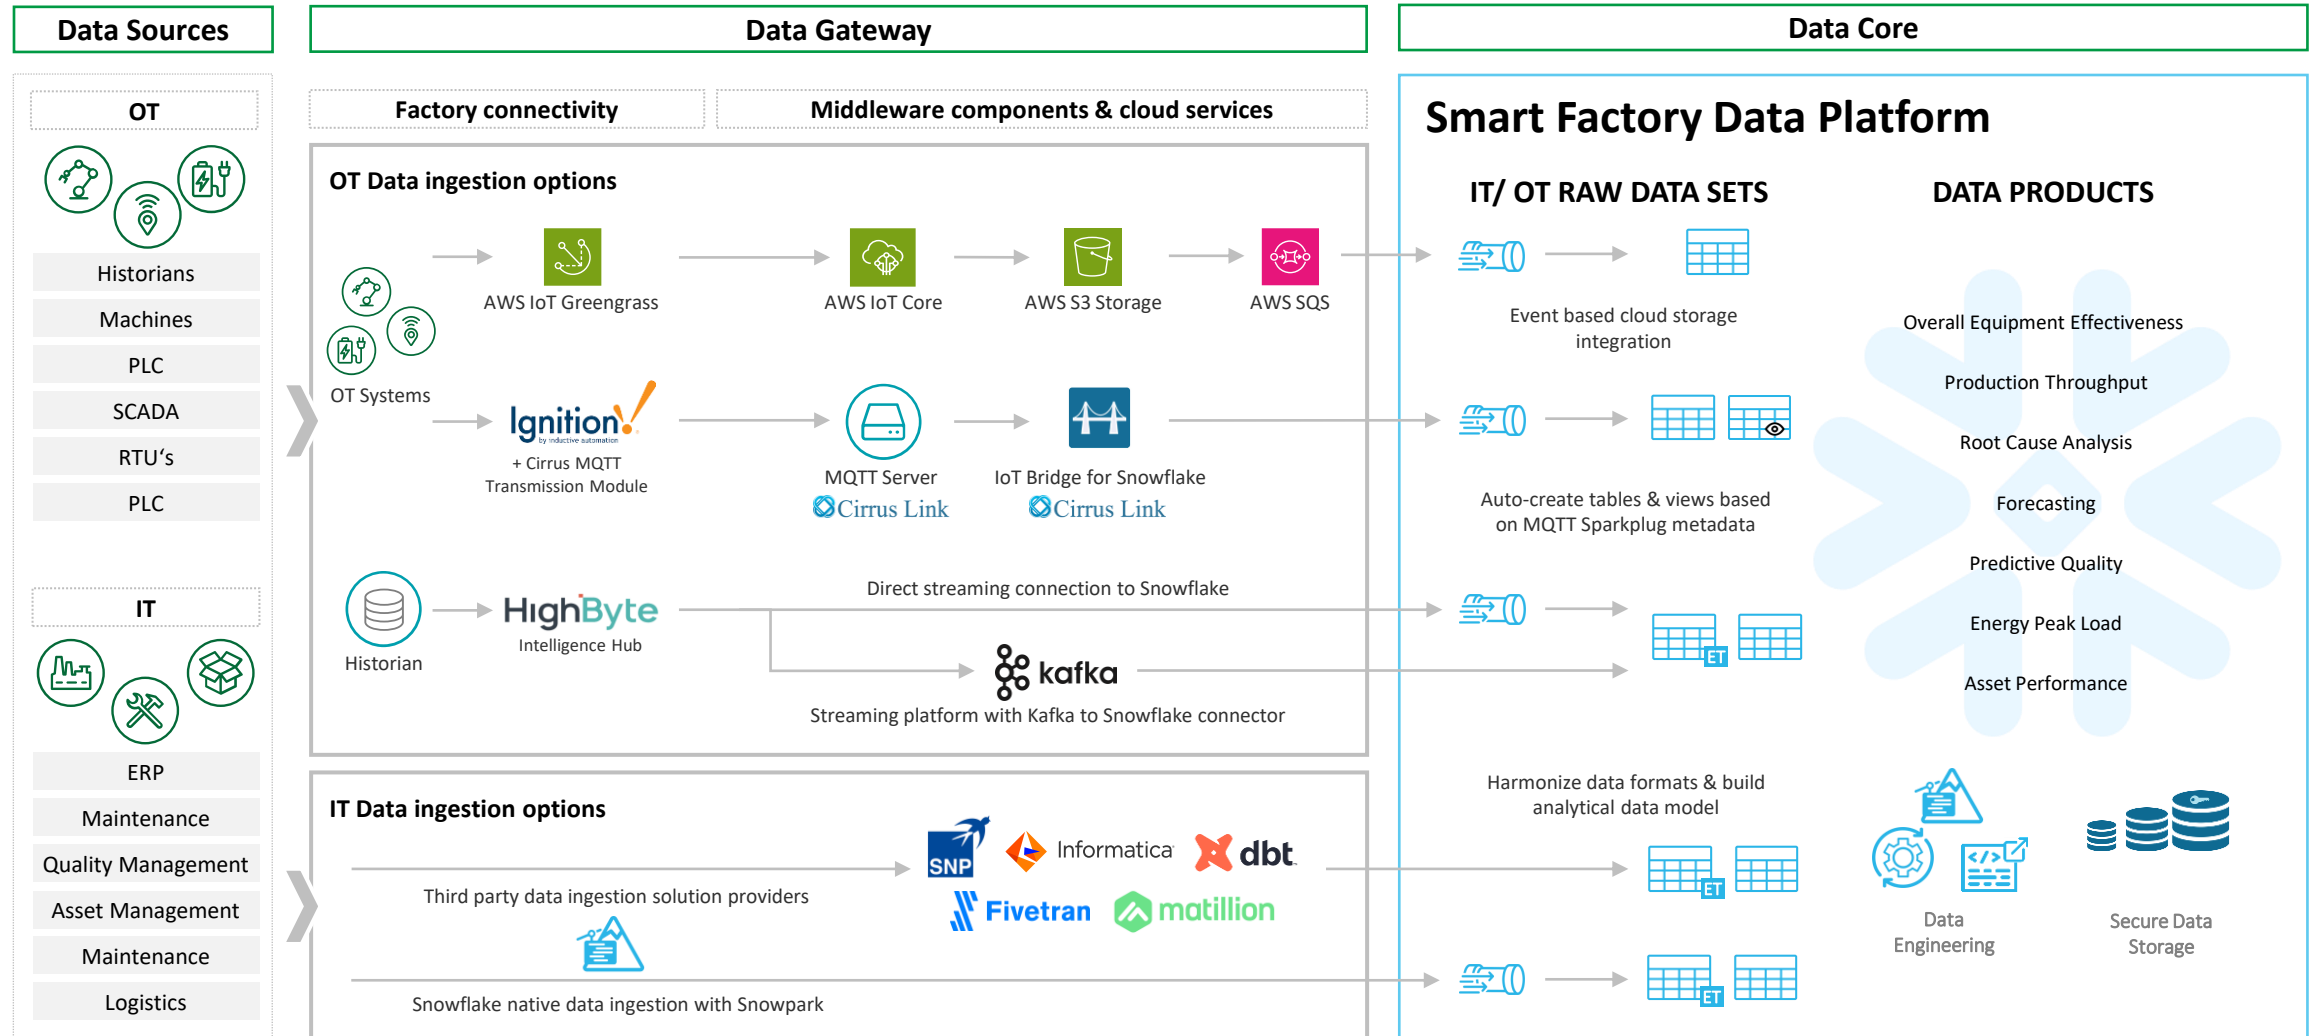

Required services that build the foundation for data & analytics

Time to value

Executives often struggle with realizing ROI on smart manufacturing initiatives

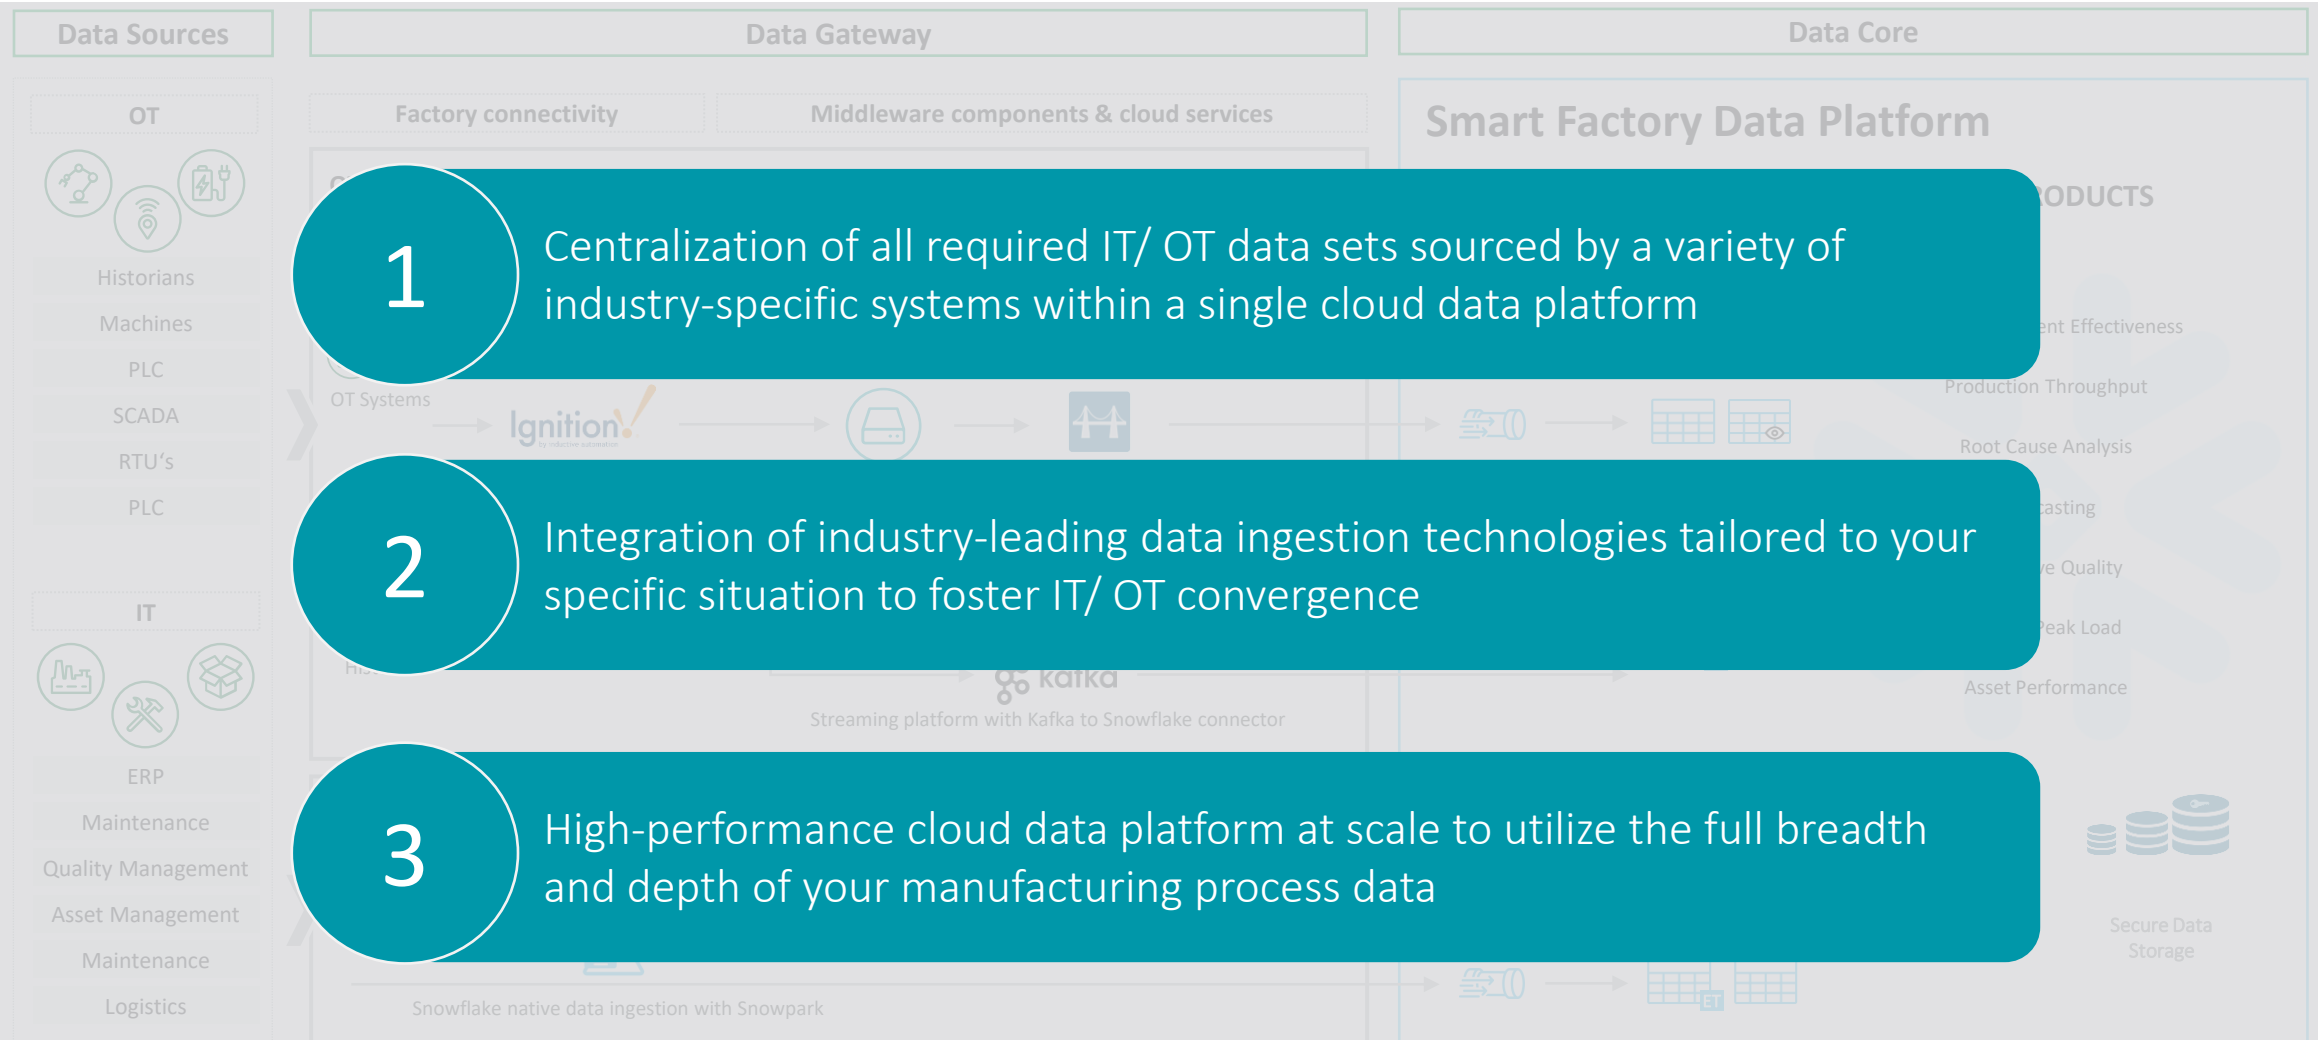

Smart Factory IT/ OT data ingestion options

Snowflake and its' ecosystem partners offer comprehensive options for IT/ OT data ingestion into a single cloud data platform

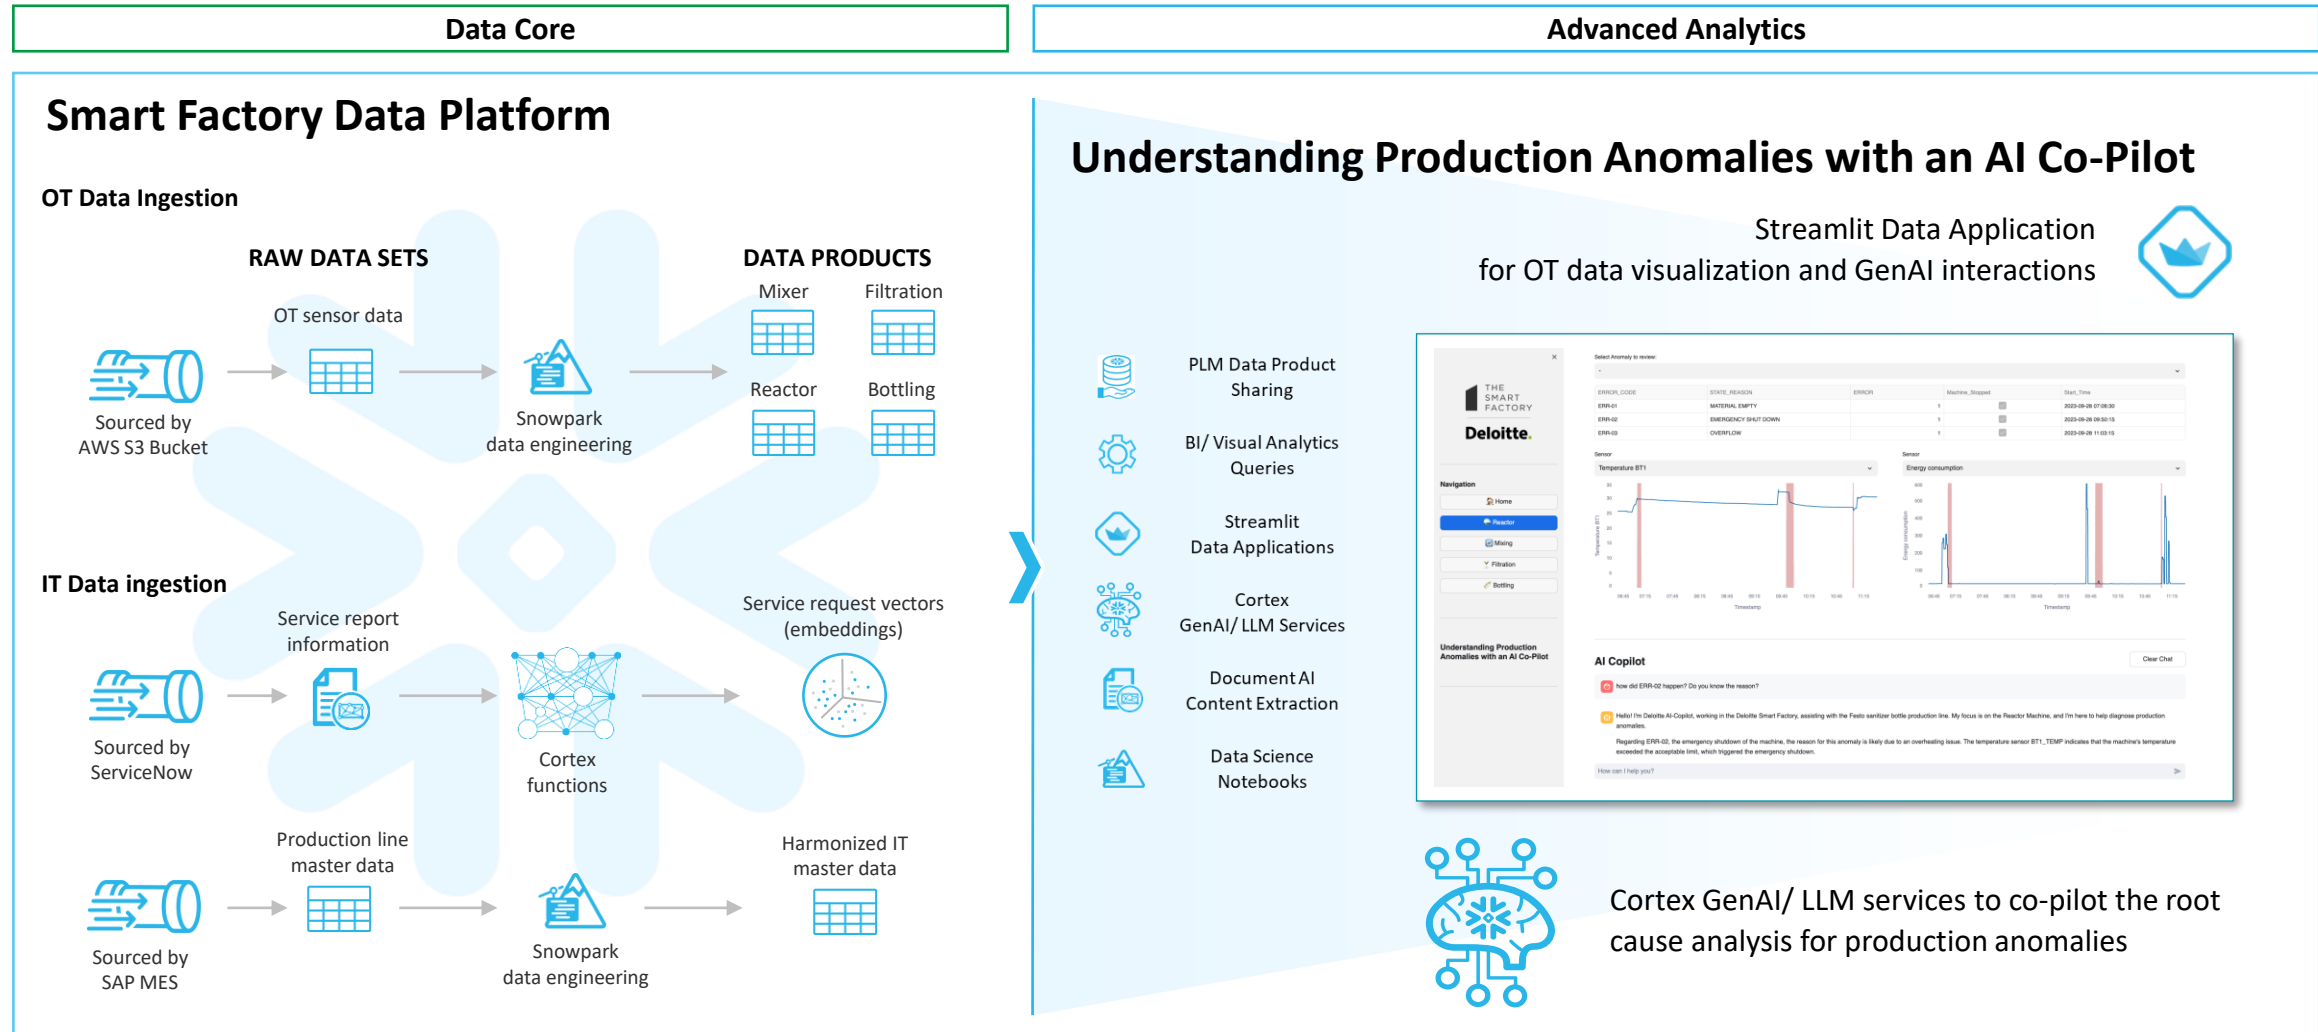

Smart Factory IT/ OT data ingestion options

Snowflake and its' ecosystem partners offer comprehensive options for IT/ OT data ingestion into a single cloud data platform

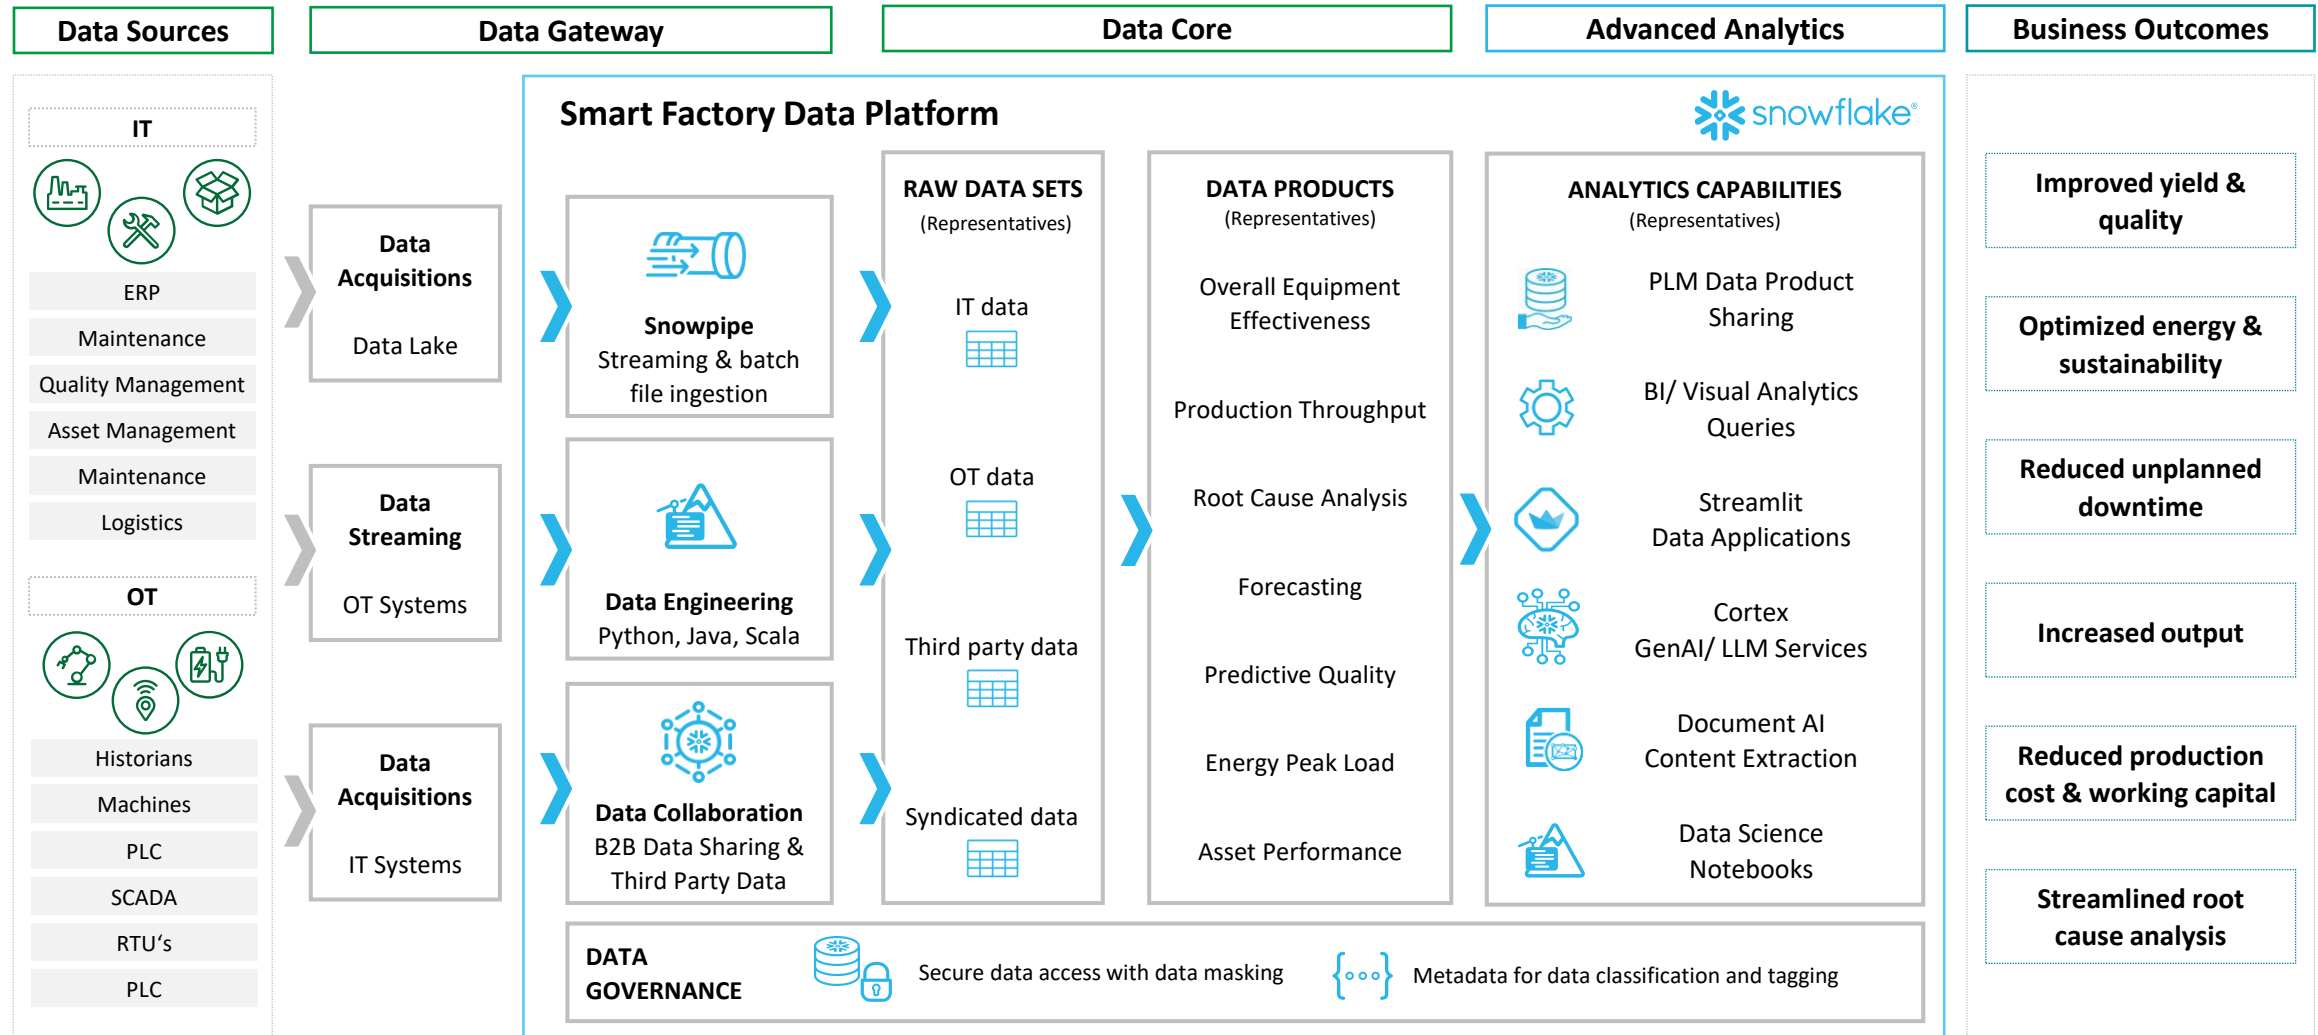

Smart Factory Data Applications

Based on Snowflake's advanced analytics capabilities we utilize GenAI/ LLM services to understand production anomalies in our use case demonstration

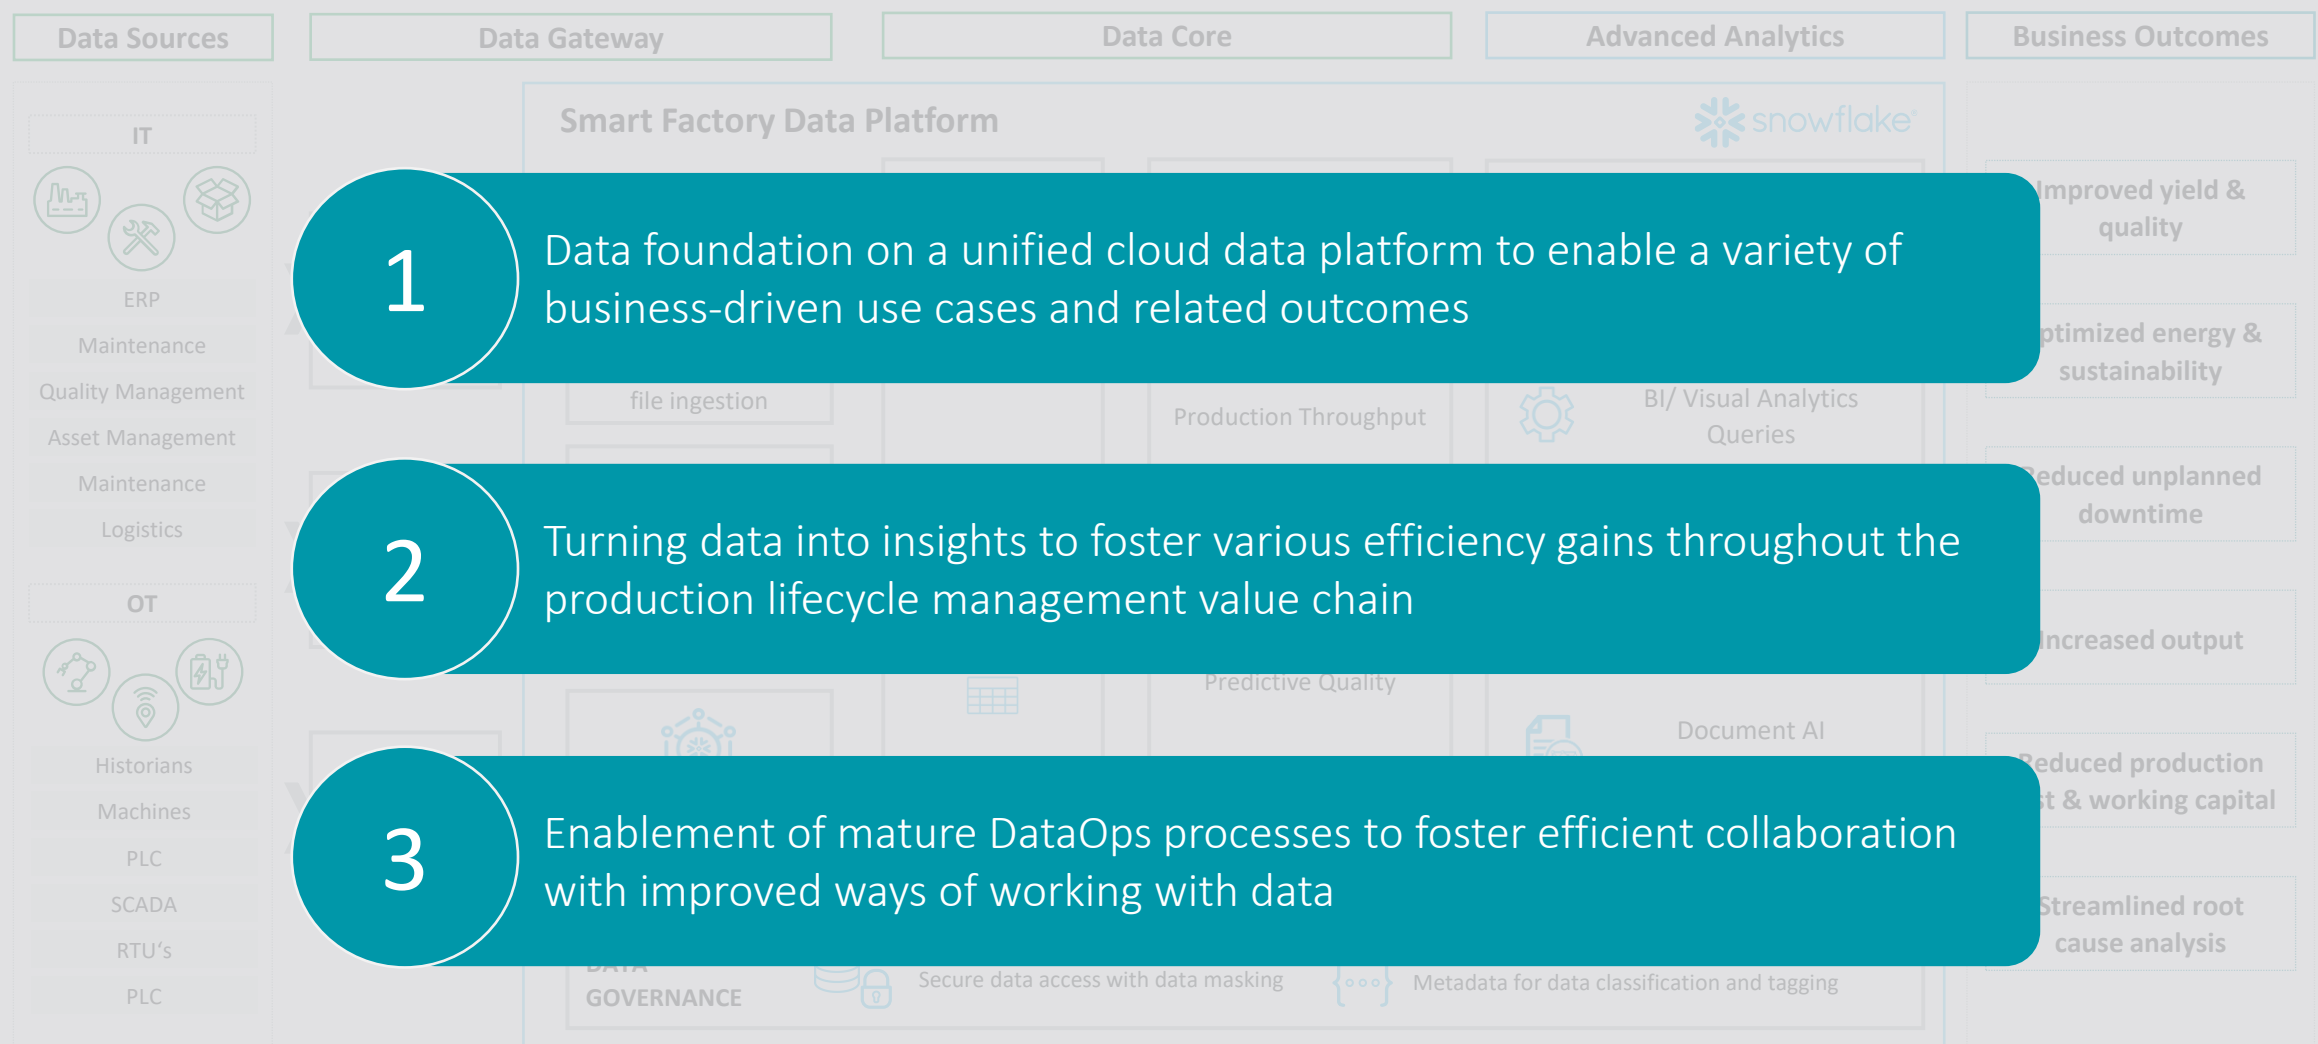

Solution architecture Smart Factory Data Platform

Centralized IT/ OT data in Snowflake's data cloud drive smart factory and manufacturing business outcomes enabled by advanced analytics capability

Solution architecture Smart Factory Data Platform

Centralized IT/ OT data in Snowflake’s data cloud drive smart factory and manufacturing business outcomes enabled by advanced analytics capability

1 Data foundation on a unified cloud data platform to enable a variety of business-driven use cases and related outcomes

2 Turning data into insights to foster various efficiency gains throughout the production lifecycle management value chain

3 Enablement of mature DataOps processes to foster efficient collaboration with improved ways of working with data

Understanding Production Anomalies with an AI Co-Pilot

01

PROBLEM

Data is kept in silos across plants and manufacturing facilities which limits innovation and analytical capabilities.

02

CHALLENGE

Variety of IT/ OT data sources with a need for different integration scenarios to scale the generation of data insights at scale.

03

SOLUTION

Data Gateway

- Cloud connectivity to enable access to production data sets

Data Core

- Unified data model for IT & OT driven data product creation and utilization

Advanced Analytics

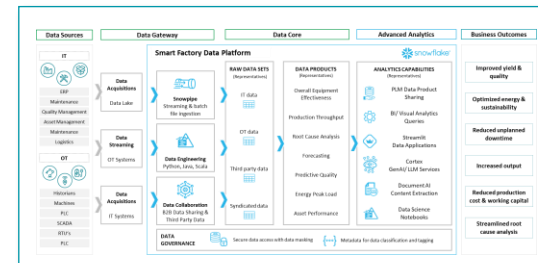

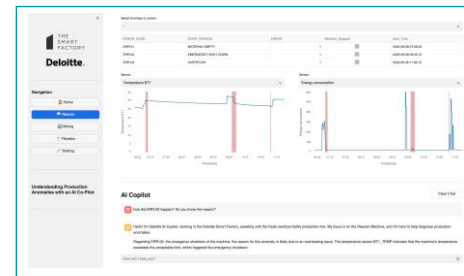

- Standardized solutions on a single platform insights generation

USE CASE DESCRIPTION

For the digitalization of industrial processes, the access to data from various departments contributing to the entire product lifecycle is crucial to realize the digital thread and to raise potentials for cost reduction and operational efficiency. An integrated data platform supporting the convergence of IT/ OT data builds the foundation for further insights generation. Our use case provides an overview for monitoring manufacturing machines and enables the automated detection of production anomalies. Generative AI capabilities act as a copilot for a guided research of historic incident data to resolve the issue in operations.

TECHNOLOGY HIGHLIGHTS

- AWS IoT Core to enable factory connectivity
- AWS S3 for raw data set storage
- Snowflake Snowpipe Streaming to gain near real-time data availability within a unified IT/OT data model
- Snowflake Data Cloud as single data platform for all manufacturing data products
- Snowflake Streamlit for easy to use and scalable standard data applications
- Snowflake Cortex to enable GenAI driven forecasting, anomaly detection & LLM service integration

IMPACT

(Near) real-time data availability of integrated IT/OT data

Scalable platform for a variety of data & analytics use cases

Standardized visualizations for fast data insights

AI assisted data analysis including GenAI enablement

SHOW CASE

Use case presentation with Snowflake on AWS platform available for demonstration

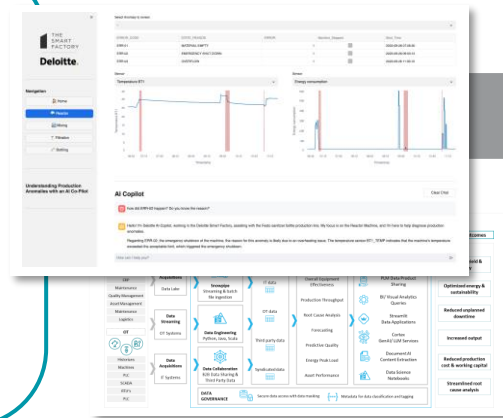

Start generating sustained value today

Smart Manufacturing transformations are about more than adding new technology. Organizations must integrate solutions into their daily operations while driving user adoption, ensuring change management, and gaining workforce buy-in.

Deloitte's value-add supporting your journey

- Manufacturing professionals and industry experts
- Proven methodology and innovative thinking
- People-first, user-centric mindset
- Scalable AI+Data solutions that fit with your existing technology, powered by our **Smart Factory Data Platform**

Our **Smart Factory Data Platform** accelerates the deployment of smart manufacturing solutions, leveraging your existing technology landscape and growing with you as your organization transforms

Our **Smart Factory Data Platform** offering provides:

- Analytics foundation to enable improved production operations and efficiency, and cost savings, at scale
- Real-time and historical data-driven actionable insights to produce measurable results
- Extendable platform to provide client-focused data visualizations and applications
- IT/OT data integration solutions to drive advanced analytics creating intelligent insights
- Integration with industry-leading technologies to drive industry expertise

We offer a growing library of ready-to-deploy use cases
