Visualize goals.

Explore possibilities.

Transform your business.

With the finance organization under increasing pressure to deliver value and make sense of growing mounds of data, getting a clear vision of where you need to go can prove difficult. We can help.

Our lab for SAP S/4HANA Finance provides finance and technology executives an opportunity to engage with Deloitte problem-solvers to address specific finance issues and start working toward value.

### Core collaboration

The new Deloitte lab offering provides an interactive one-day experience to help you develop a business-focused strategy for SAP S/4HANA Finance. It's a simple approach designed to help you simplify your finance operations and position your organization to meet evolving business demands.

More than a demo session, our lab focuses on breaking down your challenges and building a path to help you move forward with SAP S/4HANA Finance. The lab encompasses three primary acts.

- **Explore:** We collaborate to explore the art of the possible and develop a vision of your desired end state.
- **Prioritize:** We advance the discussion through live demonstrations and case studies that help you explore finance scenarios and possibilities in detail.
- **Mobilize:** We work together to understand pilot opportunities that you can take advantage of and feed these into the development of a roadmap that you can use to understand essential next steps.
- We're leaders in finance transformation, with a long track record of helping organizations get results—thanks in large part to a comprehensive set of services that focuses on challenges specific to the office of the CFO. We deeply understand the finance function, industry-specific needs, and the global issues involved.
- We start with business processes first and help you build the business case for transformation—to help ensure that your investments can deliver results that matter.
