The Adaptable Organization
Harnessing a networked enterprise of human resilience
The Adaptable Organization is a fundamental shift in operating and management philosophy that enables large-scale global organizations to operate with a start-up mindset and drive modern people practices that enable enterprise agility through empowered networks of teams.
The leader

As organizations pivot and adapt to shifting contexts, the adaptability of leaders becomes essential. Leaders should be versatile, able to energize, empower and connect people across the ecosystem and to lead any team in any context.

In the Adaptable Organization, leaders exist at all levels and are inclusive orchestrators who foster an environment for high-performing teams.

To be able to transition successfully to the Adaptable Organization, leaders must drive change. Leadership has traditionally been hierarchical and somewhat monolithic; leadership roles have conventionally been bestowed upon those considered most expert or experienced. But flattening hierarchy to a distributed, team-based model demands leadership at every level and allows leaders to emerge in the “hidden networks.”

This represents a shift to multi-focus, multi-context leadership, in which individuals lead regardless of function, technical discipline or hierarchy. Direction, vision and inclusivity define leadership rather than just technical knowledge. The leader demonstrates inclusiveness by words, actions, and priorities and measures success differently. And when they possess commitment, curiosity, cultural intelligence and cognizance of bias they can be nimble in the face of diverse talent, customers, ideas and emerging markets.

In a model that puts the team at the center, it is tempting to view leadership as distributed, collective and somehow shared. But leaderless teams do not generally function effectively. As the context in which leaders operate becomes more complex, it is more important than ever that organizations invest in developing leaders, and more people need to become skilled in aspects of leadership.

Complexity demands leadership and versatility.

In an adaptive context, three leadership capabilities become paramount: the ability to Energize, Empower and Connect.

Where change is constant and disruption rife, oftentimes skill sets are increasingly redundant and fear and apprehension are prevalent. Leaders should Energize their people, articulate a compelling vision, instill a common sense of purpose, and provide belonging. To build and sustain an Adaptable Organization, leaders should be able to energize all people, regardless of personality, background or motivation (see figure 8). With Deloitte’s support, leadership at the aforementioned organization took their teams through structured exercises to build a collective mission and define working norms.

The Adaptable Organization also requires a culture of innovation and flex to respond to shifting customer, environmental and market needs effectively; thus, leaders should Empower others. It is unrealistic and inaccurate to expect a handful of people at the top of an organization to always have the best answers and ideas. Instead, a major predictor of creativity is subject matter expertise. Those closest to challenges and opportunities often have the greatest potential to innovate. Leaders should delegate responsibility and relinquish control to leverage the collective abilities of the entire organization. Encouraging experimentation, continuous learning, and instilling a fail-fast mentality in those they lead should become their role.

The ability to Connect means encouraging collaboration across boundaries, connecting silos and unlocking potential synergies to cultivate and strengthen networks of teams. It’s important for leaders to be optimistic about the capabilities of others, drive collaboration, be inclusive and value the contribution of a diverse range of individuals to unlock latent potential.

The influence of leadership style on an organization’s adaptability can be illustrated through Deloitte’s recent work with a well known US based organization. The organization had previously been rooted in a culture of fear and avoidance, where decisions were escalated to the CEO by default because leaders (at all levels) feared making mistakes for their decisions. It was only after the CEO stood on stage in front of employees and shared a story of personal failure, that this mindset began to shift. Leaders in the organization began to recognize the need for vulnerability, risk-taking, inclusivity, and the breaking down of traditional role barriers. This ultimately led to more empowered teams who were comfortable with autonomous decision- making, which is an integral component of an agile, constantly-adapting organization.
How leaders lead is the key factor determining the transition to an Adaptable Organization. Effective leaders must embrace change, navigate ambiguity and complexity, and harness an increasingly diverse workforce.

Identifying and developing leadership qualities at all levels of the organization drives adaptive potential.

With the shift to purpose-driven teams in an Adaptable Organization, it is critical that talented leaders exist at all levels. Therefore, organizations should focus sharply on developing the ability to Energize, Empower and Connect in their leaders and leadership pipeline. Identify individuals who are naturally ‘wired’ to lead in this way and who have the raw material to develop these capabilities at speed – and then invest in initiatives that focus on their development.

**Figure. 8:** The adaptable leader requires capabilities stripped back to the core elements of people leadership — the return of the psychological leader

**Personal Factors**

(accelerators or derailleurs)

- Social Flexibility
- People Regard
- Drive
- Self-Belief
- Challenging
- Risk Taking
- Conceptual Thinking
- Breadth of Perspective
- Resilience
- Experimenting
- Decisiveness
- Emotional Intelligence
End notes

This paper has been developed through a global open network of cross-functional Deloitte team members.

**Initiative Leads and Co-Authors**

The Adaptable Organization initiative was guided under the leadership of Amir Rahnema and Tara Murphy who co-authored and edited the perspective.

**Amir Rahnema | Deloitte Consulting BV**

Amir is a Canadian Partner based in Amsterdam. He is Deloitte's global head of Organization Design. He is focused on working with organizations as part of large-scale transformation typically tied to shifts in strategy, new technology implementations and complex workforce transitions. He has spent the last few years working with consumer business companies, retailers, banks, energy companies and governments in exploring adaptability in leadership teams and operations.

**Tara Murphy | Deloitte Canada**

Tara is a Manager in Deloitte Canada's Human Capital consulting practice. She focuses on helping clients architect new organization designs to adapt to changing markets and shifts in business strategy. Tara has a keen interest in understanding and developing methods to help large organizations inject agility into their designs, capabilities and processes. She has worked on reorganizations and major operating model transformation initiatives across industries and leads Deloitte's global Adaptable Organization methodology development.

**Expert Advisory Group and Co-Authors**

An Expert Advisory group of cross-functional leaders from around the world co-authored the paper and brought their client experiences on Adaptable Organizations.

**Dimple Agarwal | Deloitte MCS Limited**

Dimple is a Partner in the London office and is the Global Leader of Deloitte's Organization Transformation & Talent practice. She has over 23 years of experience in organization and people consulting. Her functional expertise includes leadership, cultural change, talent strategies, change management, capability development, designing and implementing operating models and workforce transition in the context of large scale business transformations primarily in the consumer business sector.

**Don Miller | Deloitte Consulting LLP**

Don has more than 16 years of industry and consulting experience. In his current role, he serves as the US Analytics leader for Deloitte's Human Capital Organization Transformation & Talent practice and also serves on Deloitte's Global Organization Design and Decision Solutions Leadership team. Don is focused on helping clients improve performance by building operating models and organization structures to execute new capabilities through their people, aligning the capabilities, metrics, processes, and culture of a business to its structure, leadership, roles, and talent. Don also helps clients solve some of their top business challenges by creating tailored culture, leadership development, and employee engagement solutions to better execute organization transitions as well as mergers, acquisitions, and divestitures.

**Jessica Eden | Deloitte Canada**

Jessica is an expert in agile organizational transformation and a leader in Deloitte's Canadian organization design consulting practice. Her work focuses on helping clients decide on and implement organizational changes that elevate the customer experience and address the pressures of disruption. She has extensive experience bringing together leaders at all levels to re-imagine and transform how work gets done, by addressing customer, talent, process and technology issues from an integrated perspective.

**Kat Lee | Deloitte Canada**

Kat is a subject matter expert in Transformational Change, specifically in designing and sustaining Agile and Digital leadership, learning culture, mindsets and new ways of working within Financial Services in North America. She is also an accomplished business author and was the lead writer for the NY Times/USA Today Bestseller on leadership and culture, As One: Individual Action, Collective Power published in 2011.
Contributors

We are indebted to a broad team of practitioners who contributed content and used their own Adaptable Organization experiences to help shape our thinking:

Persis Mathias | Deloitte MCS Limited

Persis is part of Deloitte’s Human Capital Practice in the UK and has over 20 years of in-depth experience consulting with organizations across the globe on various areas of Organization Design, Leadership and Talent. She has led large scale transformation projects for organizations going through mergers & acquisitions, organizational & cultural transformation. Persis is passionate about helping organizations explore and leverage opportunities presented by Future of Work to build and maintain adaptable, nimble and sustainable organizations that will enable them to better positioned to drive exponential growth, value and impact.

Peter Sloan | Deloitte MCS Limited

Peter heads up the Deloitte Leadership practice in the UK and works with large global organizations to ensure leadership is a key enabler of organizational performance. A chartered psychologist, he helps clients to ensure they have the leaders they need to deliver their strategy and he advises on succession planning, executive talent programs and leadership development. Peter’s current focus is on supporting organizations to develop ‘future leaders’ for a disrupted world, and on the pivotal role leaders play in enabling transformation.

Robert Myatt | Deloitte Canada

Robert is a chartered business psychologist with over 20 years’ experience of enabling global companies to build the leadership they need to transform and achieve their strategic goals. He possesses a deep expertise leadership strategy, assessing leadership potential and developing leadership expertise for a wide range of organizations including financial services, public sector, utilities, construction, retail, pharmaceutical, technology and manufacturing companies.

Sarah Rogers | Deloitte Consulting BV

Sarah works with large global organizations to help them define and deliver their future workforce. She focuses on helping clients to define the critical capabilities and workforce investments required to deliver their business strategy in rapidly changing competitive environments. She works with organizations to ensure their talent system and enabling technology investments enable adaptability and responsiveness to future of work disruptors. Originally from Australia, Sarah has worked with clients across Europe and APAC regions, and currently leads the Netherlands Talent practice.

Shivani Maitra | Deloitte MCS Limited

Shivani is a Partner in North West Europe’s Organization Transformation and Talent practice. She leads the Organization Design practice in the UK and is the Life Sciences leader for Human Capital in the UK. Shivani is part of core team partners in Deloitte who are developing solutions for clients on Future of Work and impact of emerging technologies and ways of working on workforce.

Tiffany McDowell, PhD | Deloitte Consulting LLP

Tiffany has expertise in all areas of organizational behavior and leads Deloitte’s Organization Strategies Market Offering. Tiffany focuses on delivering operating model, organization design, talent strategies, and global change management solutions for large-scale transformation projects. She has recently brought organizational network analysis and adaptable organization design thinking to help her clients build networks of teams and unleash their organizations energy.

Tom Alstein | Deloitte Touche Tohmatsu

Tom is a global thought leader on Next Generation organizations. He guided multiple organizations globally on their journey to truly anchor their organization in customer centricity, adaptability and a digital world. He has extensive experience in designing and implementing strategies and transformations, designing high impact business and operating models, building (new) business capabilities and innovation programs and successfully deploying improvements and solutions to bring strategies to life and to deliver business benefits.

Yves Van Durme | Deloitte Consulting

Yves is a global leader in Deloitte’s Human Capital practice. He leads our global strategic change offering, EMEA organization transformation & talent practice and heads up the Belgian Human Capital team. After some 10 years of experience in high performance coaching in sports, he switched to consulting some 20 years ago to people & organizational matter where he built a track record on organizational and leadership development as vehicles for strategy execution with a specific affinity for a holistic approach caring for the balance between processes, structures and systems on the one hand and the more cultural and people-related elements on the other hand.
