Transformative technologies in life sciences

**Artificial intelligence (AI)**
The potential to revolutionize diagnoses, treatment planning, patient monitoring, and drug discovery

**Internet-of-medical-things (IoMT)**
Valued at US$41.2 billion in 2017, the IoMT market is expected to rise to US$158.1 billion in 2022

**Software-as-a-Medical-Device (SaMD)**
- Allows patients to play a more active role in their own health care
- SaMD has, at times, outperformed the accuracy of diagnoses by trained clinicians
- Regulation of SaMD is expected to need to become more agile

**Blockchain**
Potential solution to more easily aggregate and share health data in a secure, trusted, automated, and error-free way

**DIY diagnostics and virtual care**
- Consumers are increasingly open to new channels of care—particularly at-home diagnostic testing
- Could help low-income or rural consumers determine if a condition warrants a visit to a doctor or hospital

**Future of mobility**
- Shifting attitudes toward mobility and changing the way people and goods move
- Could improve access to care
