### Investment basics:

**Currency** – Algerian Dinar (DZD)

**Foreign exchange control** – The National Board of Investment must approve any proposed foreign direct investment project exceeding DZD 2 billion.

Foreign investors must partner with an Algerian-owned shareholder, and foreign ownership is limited to a maximum of 49%.

Foreign contributions to a company's capital and foreign loans must be registered with the Bank of Algeria through the company's commercial bankers in Algeria. Exchange control approval also is required for the remittance of dividends, directors' fees and other related party payments. Dividends may not be remitted from trading companies.

**Accounting principles/financial statements** – Accounting principles (SCF), which are in line with IFRS, are applicable for all commercial companies.

**Principal business entities** – These are the public limited liability company (*société par actions* or SPA) and the private limited liability company (*société à responsabilité limitée* or SARL).

### Corporate taxation:

**Residence** – There is no definition of residence in Algerian tax legislation, but a corporation generally is considered resident if it is incorporated in Algeria. Branches of foreign companies and permanent establishments also are considered resident.

**Basis** – Resident and nonresident corporations are subject to tax on their Algeria-source income.

**Taxable income** – Corporation tax is computed on net profits derived from Algerian sources.

**Taxation of dividends** – Dividends paid by an Algerian company to another Algerian company are not subject to withholding tax and are exempt from tax in the hands of the recipient. Dividends paid to resident individuals are subject to a withholding tax of 15%.

**Capital gains** – Capital gains generally are taxed as ordinary income. In certain cases, 35% relief is granted where the assets have been held for up to three years, or 70% relief where the assets have been held for longer periods.

The following capital gains are exempt from tax or receive special treatment: capital gains realized within a group of companies; unrealized gains from the revaluation of fixed assets, if they are booked in a special reserve; and capital gains resulting from a merger, division or partial transfer of assets between group companies in Algeria.

Rollover relief is available where a company undertakes to acquire similar assets within three years.

**Losses** – Tax losses may be carried forward for four years. The carryback of losses is not permitted.

**Rate** – The corporate income tax rates are as follows: 19% for manufacturing activities; 23% for construction activities, public works and hydraulic activities, as well as for tourism activities (except travel agencies); and 26% for other activities.

Special tax rules may apply to the hydrocarbon and mining sectors.

**Surtax** – A 5% surtax applies for medical importers.

**Alternative minimum tax** – The minimum corporate tax is DZD 10,000 annually.

**Foreign tax credit** – Algerian tax law does not provide for unilateral tax relief. A tax treaty, however, may provide for bilateral relief.

**Participation exemption** – See “Taxation of dividends.”

**Holding company regime** – No

**Incentives** – The Investment Code is intended to encourage and stimulate productive investment in Algeria. It provides certain general guarantees and incentives. The most significant incentives are 10-year corporate tax and property tax exemptions if certain requirements are met. There also are specific incentives, e.g. for investment in certain regions and investment promoting environmental protection and the oil industry.
