Enhance your business performance and efficiency
Business Process Solutions (BPS)
New challenges, new opportunities

Businesses today are facing a rapidly-evolving landscape from regulatory changes, continued advances in technology, and the adoption of more sophisticated approaches by revenue authorities. As a result, businesses need confidence that they have the appropriate mix of in-house and external resources to manage essential operational processes efficiently with visibility, flexibility, transparency, and control.

With a focus on quality, skills, and geographical coverage, progressive businesses are evaluating the way their work is resourced and assessing alternative operating models. Deloitte’s Business Process Solutions (BPS) and Tax practices help businesses manage their accounting, tax, payroll, and technology processes by using experienced professionals who can provide advice and practical support through a mix of outsourcing, contract personnel, co-sourcing, and project-related services.

Business operating models, organizational priorities, and corporate cultures vary from business to business, so the right solution for one organization may not be the best for another. Deloitte can help assess how your organization currently operates, determine what changes you may like to make, and assist with developing a structured, incremental path to improvement. These cutting-edge, highly flexible solutions for operational, compliance, and reporting services are augmented by technology and supported by a Deloitte network of member firms around the world.
How we help

As a global business partner, Deloitte can bring:

- Security: strong understanding of your regulatory requirements in multiple jurisdictions
- Data protection: ability to adapt to and comply with robust data security requirements
- Compliance expertise: global compliance expertise to match your geographic reach across tax and payroll. Our network of payroll compliance specialists bring expertise to a business critical compliance cycle
- Project management: strong project management skills ensuring streamlined and standard interchange of information between the outsourcing team and your teams
- Capability and capacity: ability to mobilize teams from the start, being proactive with market-leading capabilities and experience
- Technology enabled: well-established and adaptable information technology for coordination and knowledge management
- Flexibility: we can upscale or downsize to match your investment in new countries and exit from others

Why Deloitte?

**Our global network matches yours:**

Deloitte’s global network gives you access to the right skills wherever you need them. Our specialists have hands-on experience in all established ERP systems, have a large pool of know-how, international connection and networks, and specialize in your industry.

**Delivered locally, managed centrally**

Because we operate in your jurisdiction, we can respond instantly. And our centrally-managed process mean you get consistent quality and data formats throughout your organization.

**Standardized processes and consistent high quality**

Deloitte’s unique approach assists businesses to improve the management, oversight, and control of their accounting, payroll, tax, and human resources processes and statutory compliance, through a flexible mix of resources. Followed by Deloitte practitioners globally, this approach will also allow you to focus on your competitive advantage while relying on service delivery of the highest quality.
Our business process services
Financial accounting and operations

Deloitte offers a full range of finance and accounting services to growing and evolving businesses. Tax compliance and reporting

Our tax compliance and advisory methodology provides businesses with an efficient way of handling their tax compliance workload and meeting deadlines. Services are commonly bundled with finance and accounting to create a turnkey compliance and reporting solution. Extensive regional reach, supported by local depth of knowledge and experience, provides businesses the transparency and flexibility to address a full range of local and regional tax needs.

Our services can include:

### Direct tax

**Corporate Income Tax (CIT)**
Prepare, review, and file corporate income tax returns per local and GAAP statutory standards/requirements. Businesses can select the requisite level of service to fulfill their tax compliance needs.

**Regional or other tax**
Gather and review regional tax information and prepare requisite documentation and work papers to file tax returns for annual earnings of corporations and other legal entities levied by individual countries and governing bodies.

**Local or municipal tax**
Calculate, prepare, review, and file applicable local or municipal taxes.

**Other jurisdictional taxes**
Includes equity tax, payroll taxes, and other jurisdictional specific taxes.

### Indirect tax

**Value Added Tax (VAT)**
Capture and report taxes that are levied on the value (price) added at each stage in the chain of production and distribution.

**Withholding tax**
Determine and report withholding taxes applying in relation to any corporate income tax, VAT, industry and commerce tax, and other local tax requirements.

### Tax filing

Upload and electronically file tax returns or complete paper returns as required by the local taxing authority.

### Tax provision

Prepare monthly, quarterly, or annual tax provision under local GAAP, IFRS or US GAAP.

### Turnkey startup support

Provide startups and newly formed businesses with advice on evaluating growth plans, facilitating regulatory mandates, creating reporting structures, and developing internal policies and systems. We offer startup advisory services at the inception to help manage and build risk management and tax compliance capabilities, including:

- Alignment of HR/payroll, accounting, tax, and financial statements with internal and external statutory requirements
- Creation of control baselines, policies, and procedures for a business’s operating environment

### Tax data integration

Drawing on our industry insights, coupled with expertise in various tax compliance and technology platforms, we assist organizations to map policies and standards, and design solution and data model workflows on finance, accounting, and taxation management tools including SAP, Saber, and Oracle. We help to enable businesses to define, collate, deploy, and administer tax information/standards specific to services/products and industry.

### Additional services

- **Tax reporting**
- **Information request support**
- **Property tax**
  - Calculate multi-jurisdictional taxes to comply with multiple statutory requirements. Includes preparation of customized tax packages to align with internal and external statutory requirements
  - Preparation of special reports requested by local taxing authorities
  - Tax litigation services
  - Tax certification

Business Process Solutions 8
Business process technology

Using technology efficiently can help provide an integrated approach to process improvement that can help finance and accounting, tax, and HR departments substantiate and promote their strategic value to the organization. Deloitte practitioners work with businesses to design and implement operational processes, technologies, and resource models to improve value-added activities in process redesign, software implementation and enhancement, tax-sensitized technologies, and change management. In addition, cloud-based accounting system and Software as a Service (SaaS) capabilities help internationally minded businesses to strategically balance expansion, infrastructure, and mobility demands.

Our services can include:

ERP system design and implementation
Identifying specific workflows by job and function, process improvements to be implemented (perhaps even independently of the software), and roles and responsibilities within the new business processes to augment system design. While business processes requirements were likely defined during the evaluation phase, they might not take into account the functionality of the chosen software. This output can serve as the foundation to use the ERP system in producing key operational data to streamline processes.

Process mapping
Assisting organizations in becoming more efficient through creation of business process maps which help identify improvement opportunities. Business process mapping measures and compares a specific objective alongside the entire organization's goals to aid alignment with enterprise values and capabilities.

Business intelligence & data analytics
Managing data from disparate sources and converting it into consistent, actionable information that can drive competitive advantage and help functional areas to uniformly interact with each other when responding to organizational issues and opportunities. Enabling organizations to perform visual operational benchmarking, trend and data analysis, and predictive analysis on key data. This can provide deeper insight into operational processes and profiles which help in planning and forecasting as well as evaluating leading practices.

Business process reengineering
Focusing on the analysis and design of workflows and business processes, business process reengineering helps organizations to fundamentally rethink how they do their work in order to improve products and services, manage operational costs, and enhance efficiencies. Deloitte helps companies restructure operations through ground-up design of business processes in relation to objectives and day-to-day work.

Robotic Process Automation (RPA)
Design, selection and implementation of software to manage information and automate the lower-value tasks, such as transaction processing and controls testing. As the repetitive tasks are automated, it increases the speed of delivery, eliminates errors, and reduces costs of data and compliance management. Further RPA implementations improve the availability of real-time information, facilitates management decisions, and increases the confidence in the company's compliance position. RPA handles controls efficiently and establishes a rule-based platform for compliance regulations and standards.

Back-end filling (tech functions)
Providing ad-hoc finance and accounting, technology, and/or HR support to strengthen existing infrastructures, foster ownership and accountability, and coordinate services and program administration.

Operational finance relocation
Facilitating functional transition of finance operations to new locations including configuring and temporarily staffing of facilities, planning and executing infrastructure upgrades, documenting new processes and workflows, and training in-house personnel.

Program office
Linking organizational initiatives to broader strategic goals, as a standalone service or embedded in multi workstream project engagements, including resource mapping to forecast resource constraints, ongoing progress tracking and reporting, coordinating sequential status meetings, and assessing related issues, risks, and escalation protocols.
