

Exponential potential

Deloitte and SAP® collaboration delivers innovative portfolio of next-generation digital offerings powered by SAP® Leonardo

Tomorrow's digital challenges are immense. As you look to bolster your digital core while also accelerating innovation, comprehensive digital solutions become essential. Building innovation into business processes and making systems intelligent can help you get a jump on tomorrow's demands. But how do you get started?

To help your organization rapidly address some of tomorrow's most complex challenges and deploy the next generation of intelligent capabilities, Deloitte and SAP have teamed to offer a new portfolio of services and programs for enabling digital transformation.

The power of new

Through the Deloitte Accelerated Value co-innovation initiative, Deloitte and SAP are collaborating on new offerings that can help you leverage the SAP® Leonardo Digital Innovation System, including SAP® Leonardo Machine Learning, Internet of Things (IoT) offerings, advanced analytics solutions, big data, blockchain, and the SAP® Cloud Platform, in conjunction with the digital core.

The **Deloitte Exponential Platform (DXP)** offerings can help you boost your organization's ability to:

Automate processes

Radically improve insights for decision-making

Deliver exponential value throughout the enterprise

Introducing our SAP Leonardo Reference Architecture: Deloitte Exponential Platform (DXP)

As the **launch partner for SAP Leonardo**, we offer the ability to get a head start on addressing tomorrow's challenges and innovating at scale. We combined the power of SAP Leonardo with our industry experience, technology expertise, and ecosystem of strategic alliances to provide the Deloitte Exponential Platform (DXP). To help organizations like yours accelerate innovation and digital transformation, DXP focuses on three key areas:

Finance

Supply chain

Software-as-a-service (SaaS) for the digital core

A new family of offerings for unlocking exponential value

The Deloitte Exponential Platform (DXP) focuses the combined strengths of Deloitte and SAP on three key areas that are central to tomorrow's digital business environment

Finance innovation

KEY OFFERINGS:

-  **"Lights Out" Finance**
Massively automate financial processes, including shared services
-  **Cognitive Finance Insights**
Leverage cognitive technologies to help the finance organization react quickly to dynamic conditions inside the enterprise and in the marketplace
-  **Cognitive Controllership**
Automate compliance and controls, including exception handling

Supply chain innovation

KEY OFFERINGS:

-  **Live Enterprise**
Build an ecosystem of shop floor sensors, embedded analytics, automation capabilities, and visualization tools to enable predictive decision-making
-  **Cognitive Manufacturing Insights**
Provide a "brain" to bring higher-level analytics and predictive decision-making to the many moving pieces of manufacturing operations
-  **Future Supply Network**
Make the supply network more nimble, more autonomous, more forward-looking, and more able to navigate disruption

SaaS innovation for the digital core

KEY OFFERINGS:

-  **Industry Cloud Acceleration**
Jump-start an industry-specific cloud journey and extend the capabilities of SAP S/4HANA® beyond its natural boundaries
-  **Cloud²Core**
Unify on-premise and public cloud capabilities in a "two-tier" environment that can provide one consolidated view of information and processes

KEY ENABLER:

SAP Leonardo Digital Innovation System

Let's talk

Getting ahead of tomorrow's challenges requires more than technology and a vision. It requires an ability to deploy comprehensive digital solutions that can evolve as challenges—as well as your need for value—grow exponentially. It also requires a strategy and industry-specific guidance. Deloitte can help.

Whether you simply want to explore insights on managing digital disruption or find out how Deloitte Exponential Platform offerings can help you tap new potential, we're ready to talk. Contact us to get the conversation started.
