Deloitte.

Exponential potential

Deloitte and SAP® collaboration delivers innovative portfolio of next-generation digital offerings powered by SAP® Leonardo

Tomorrow's digital challenges are immense. As you look to bolster your digital core while also accelerating innovation, comprehensive digital solutions become essential. Building innovation into business processes and making systems intelligent can help you get a jump on tomorrow's demands. But how do you get started?

To help your organization rapidly address some of tomorrow's most complex challenges and deploy the next generation of intelligent capabilities, Deloitte and SAP have teamed to offer a new portfolio of services and programs for enabling digital transformation.

The power of new

Through the Deloitte Accelerated Value co-innovation initiative, Deloitte and SAP are collaborating on new offerings that can help you leverage the SAP® Leonardo Digital Innovation System, including SAP® Leonardo Machine Learning, Internet of Things (IoT) offerings, advanced analytics solutions, Big Data, Blockchain, and the SAP® Cloud Platform, in conjunction with the digital core.

Targeting exponential value

To help organizations like yours accelerate innovation and digital transformation, our collaboration focuses on three key areas:

Finance	Supply chain	Software-as-as-service (SaaS) for the digital core

The new offerings can help you boost your organization's ability to:

- Automate processes
- Radically improve insights for decision-making
- Deliver exponential value throughout the enterprise

A new family of offerings for unlocking exponential value

The Deloitte Accelerated Value co-innovation initiative focuses the combined strengths of Deloitte and SAP on three key areas that are central to tomorrow's digital business environment.

Deloitte.

Finance innovation

KEY OFFERINGS:

"Lights Out" Finance
Massively automate financial processes, including shared services

Cognitive Finance Insights
Leverage cognitive technologies to help the finance organization react quickly to dynamic conditions inside the enterprise and in the marketplace

Cognitive Controllership
Automate compliance and controls, including exception handling

Supply chain innovation

KEY OFFERINGS:

Live Factory
Build an ecosystem of shop floor sensors, embedded analytics, automation capabilities, and visualization tools to enable predictive decision-making

Cognitive Manufacturing Insights
Provide a "brain" to bring higher-level analytics and predictive decision-making to the many moving pieces of manufacturing operations

Future Supply Network
Make the supply network more nimble, more autonomous, more forward-looking, and more able to navigate disruption

SaaS innovation for the digital core

KEY OFFERINGS:

Industry Cloud Acceleration
Jump-start an industry-specific cloud journey and extend the capabilities of SAP S/4HANA beyond its natural boundaries

Cloud²Core
Unify on-premise and public cloud capabilities in a "two-tier" environment that can provide one consolidated view of information and processes

KEY ENABLER:

SAP Leonardo

Let's talk

Getting ahead of tomorrow's challenges requires more than technology and a vision. It requires an ability to deploy comprehensive digital solutions that can evolve as challenges—as well as your need for value—grow exponentially. It also requires a strategy and industry-specific guidance. Deloitte can help.

Whether you simply want to explore insights on managing digital disruption or find out how Deloitte Accelerated Value offerings can help you tap new potential, we're ready to talk. Contact us to get the conversation started.
