When the external forces of disruptive technology are buffeting your business, the path to survival and growth lies in the digital disruption you can unleash from the inside.

To drive performance and long-term growth, today’s organizations need to rebuild their strategies, operations, and processes on the foundations of cutting-edge technology.

But technology alone is not enough. In the future, the most successful businesses will harness the collective power of technology, people, and performance to optimize and improve processes across the enterprise, leading to sustainable and measurable growth.

Have you set your ambitions?

**Address digital disruption.**
How can your organization deploy new technology solutions to have a competitive advantage in the ever-shifting marketplace? How will you leverage artificial intelligence (AI), the Internet of Things (IoT), cloud and other advanced technologies to improve business performance, enable talent across your internal network, and drive value from your technology solutions?

**Engage CXOs in your development lifecycle.**
Are you positioned for cross-pollination and collaboration with other business channel leaders? How are you aligning your technology roadmap and driving engagement with other executives?

**Assess legacy technology.**
Which elements of your existing systems need to be modernized, which ones replaced, and what are your organization’s priority areas? Which technologies do you need to consider to architect a multi-speed technology function?

**Enhance operational excellence.**
Are you in frequent dialogues with your CFO/COO, CHRO, CSO, and others to redefine your operational processes, finance function, and technology functions that affect people, processes, and tools?
What is stopping you from achieving your ambitions? Let’s talk.

“In the age of digital disruption and transformation, the future is technology and performance together. In the future, to be competitive and to really radically transform the business, you need technology as an enabler.”

Reap the benefits of change

Today’s enterprise technology solutions, augmented by game-changing solutions such as AI, have boundless potential to transform organizations. It’s time to realize your business aspirations with the power of technology, people and performance.

Consider some of the benefits to your organization:

- A revitalized information technology (IT) ecosystem transformed from the ground up, encompassing new IT strategies and system architectures, new platforms and solutions, a migration to the cloud, and the capability to truly harness the power of advanced technologies such as analytics, AI and IoT.

- Significant productivity and performance gains across the enterprise, driven by cutting-edge ERP solutions that are customized for your industry and augmented by advanced technologies such as machine learning, IoT, and Blockchain

- Impactful organizational improvements and 360° planning capabilities in HR, Finance, and other key operations, transforming processes and workflows.

- Powerful new capabilities to streamline and simplify complex areas of financial management, such as global finance functions, strategizing for IPOs or M&A, or optimizing operational finance.

- Digitized supply chain networks taken to new levels of sophistication and productivity, driving performance in manufacturing, logistics, distribution, product lifecycle management, and related supply-network functions across all industries.

Digital transformation—Work in progress

In a recent survey, we asked global business leaders: How close is your organization to one that is utilizing digital technologies and capabilities to improve processes, engage talent across the organization, and drive new and value-generating business models?

On a scale of 1-10:

- 6% (Very close)
- 26% (Close)
- 31% (Intermediate)
- 27% (Not very close)
- 10% (Not at all close)

Imagine, Deliver, Run

The Deloitte pathway to successful transformation

Imagine: The right focus
Set your ambition and chart a path to success by developing a roadmap to achieve those ambitions.

Deliver: The right concept
Make it tangible: Put the ambition in motion by moving forward and launching in the market.

Run: Getting to scale
Once the ambition is refined, scale it through flexible and integrated delivery teams.

“...the future is technology and performance together. In the future, to be competitive and to really radically transform the business, you need technology as an enabler.”
