

# R&D Connect for Life Sciences

A BUSINESS-CENTRIC TECHNOLOGY SOLUTION

R&D Connect is a digital, cloud-based suite of clinical apps supporting clinical trial execution and monitoring, mobile innovation, and collaboration and project management. This industry offering provides Life Sciences Research and Development organizations the ability to transform their business operations in an ever changing healthcare landscape.

## Major Trends Transforming Life Sciences R&D

R&D and Clinical organizations face a number of technology-related challenges that ultimately increase costs, increase cycle-times and increase regulatory risk.

- **Limited Configurability** - Many clinical technologies lack the flexibility to configure capabilities to meet evolving business requirements
- **Multiple, Siloed Solutions** - The breadth of capabilities required for effective clinical operations currently requires multiple, siloed solutions that require significant effort to integrate
- **Limited Scalability and Extensibility** - Most existing clinical technologies are limited in their ability to enhance and extend capabilities to address new business processes
- **Reporting, Metrics & Insights** - Many clinical applications have limited reporting and analytics capabilities to perform proper data analysis, which can lead to poor clinical insights

Deloitte has created R&D Connect to address these challenges by developing a collection of apps that can reduce cost and time to market.

## R&D Connect Capabilities

R&D Connect is built on Salesforce's Force.com platform, providing configurable and customizable capabilities that Life Sciences clients can select from and tailor to meet their individual needs.

Site Contracting

Site Monitoring

Issue & Risk Management

Wearable Solutions

Quality Management

Investigator Collaboration

Site Feasibility

Study Management

Trial Transparency

## R&D Connect Potential Benefits

The benefits of the clinical accelerator can be realized by sharing of cloud resources, minimizing future integration costs and improving end-user adoption.

- Integration of core capabilities that enable digital transformation of clinical operations
- Streamlined business processes with workflows
- Enables coordinated, cross-functional, global collaboration
- Reduction in implementation time
- Improves data quality
- Lowers costs of ownership
- Increases regulatory compliance with XML generation capabilities for regulatory submission
- Intuitive user interface
- Mobility for access to data from any device, anytime, and anywhere

Deloitte Digital is a global, full-service digital agency that combines serious creative chops with trusted business sense. With a unique blend of strategy, creative, and technology, we build beautiful digital experiences for the world's leading brands. Whether it's B2B, B2C, or B2E, we're driving the future of digital.
