Deloitte Speaking Session Schedule

Move at the speed of Innovation

And Imagine Now with Deloitte + Oracle Cloud.

Cloud isn't just another technology platform, it's the future of technology. It's a catalyst for reimagining business, and helps disrupt existing systems and old ways of doing things. Deloitte professionals can help your organization drive lasting business value with personalized Oracle cloud solutions that are built and tested in an iterative and immersive way. Our team focuses on empowering clients to be innovative and thrive in the Oracle cloud long after initial go-live. We understand Oracle cloud is a catalyst, digital is the mindset and transformation is what's next.

Oracle HCM Cloud Tailor Your Application's Cloud Security for the RunWay!

Date	Monday, April 23
Time	11:00 a.m. – 12:00 p.m.
Location	Reef F
Speakers	**Amitesh Kumar,** Manager, Deloitte Consulting LLP

Session description	As we step into a world of HCM Cloud ERP that offers us great flexibility and helps us embrace technology. It is important to take a step back and build a foundation that is rest assured. Security plays a huge part in that foundation; this session will focus on some of the out of the box solutions I was able to provide to our retail centric client recently within Oracle HCM Cloud offering. I will help you breakdown the most important elements of Security and help you manage them for a successful implementation in collaboration with other modules.

Speaking Sessions

Monday, April 23, 2018

Overcome Auto Accounting Limitations With Sub-Ledger Accounting

Date	Monday, April 23
Time	11:00 a.m. – 12:00 p.m.
Location	Breakers J
Speakers	**Brendan Callahan**, Manager, Deloitte Consulting LLP **Scott Carroll**, Manager, Deloitte Consulting LLP
Session description	Despite the introduction of Sub-Ledger Accounting (SLA) in R12, Auto Accounting (AA) configuration is still required to generate account information for project based transactions. System limitations with AA cause operational inefficiencies and increase the need for customization's to correctly derive accounting information. This session provides a deep dive into overcoming AA limitations with the integration of SLA thus improving system maintenance while reducing reconciliation issues and operational costs.

Integrating Payables and Expenses Through Subledger Accounting Rules

Date	Tuesday, April 24
Time	11:00 a.m. – 12:00 p.m.
Location	South Seas Ballroom H
Speakers	**Chris DeVito**, Consultant, Deloitte Consulting LLP
Session description	Designing the SLA structure to automate accounting flow for expenses booked from different projects instead of creating multiple expense report templates. The solution will detail how these rules are designed and configured, the limitations that arose when attempting to share mapping sets across modules, and the efficiencies gained from setting up the expense module with a common expense report template for all.

Speaking Sessions

Unearth Oracle Taleo Approval Capabilities to Benefit the Entire Workforce

Date	Wednesday, April 25
Time	2:30 p.m. – 3:30 p.m.
Location	Reef D
Speakers	**Aswani Alekhya Ugranam**, Senior Specialist, Deloitte Consulting LLP
Session description	Oracle Taleo Recruiting offers many best in class Candidate Management features and Electronic Offer Management is one of them. Taleo Offer Management lets organizations create, approve, extend and track offers electronically. The general perception is that Taleo Offer Approval capabilities are better suited to professional hires than Hourly/daily wage hires. However, customers hiring high volume of hourly paid employees can also reap the benefits of existing Offer Approval rules. This session reveals how out-of-the-box product capabilities can be leveraged to customers' advantage and provide uniform hiring experience across the workforce.

I.T.'s happening in the cloud - Strategy, Choices, Execution

Date	Wednesday, April 25
Time	4:15 p.m. – 5:15 p.m.
Location	South Pacific Ballroom A
Speakers	**Sid Arya**, Senior Manager Consulting, Deloitte Canada
Session description	Most of us in the ERP implementation / consulting world have already taken our first steps into the Cloud world. However, for those in the industry, especially for IT organizations who have invested heavily and recently into legacy ERP systems, 'Cloud' is a hard sell. This presentation for Collaborate looks at some real-life scenarios and identifies strategies that decision makers should follow, the choices that are available to them and the best practices in executing their choices.On one hand, Cloud offers the flexibility and quick scalability required for most consolidations but it puts forth questions about security and control. On the other hand, on-premise systems offer proven robust functionality and full control, not to mention the cost of initial investment which is yet to be realized but they are bulky and consolidations always mean more integrations and customizations.

On-Premise Private Cloud Disaster Recovery on Oracle Cloud Infrastructure

Date	Thursday, April 26
Time	8:30 a.m. – 9:30 a.m.
Location	Breakers L
Speaker	**Navin Mudaliar,** Manager, Deloitte Consulting LLP **Taryna Varghese**, Senior Analyst , Deloitte Consulting LLP
Session description	Disaster recovery (DR) for Enterprise Systems prevents data loss & also ensures continued operation. With Cloud, DR need not be an option it can be a reality. Cloud based DR solution is an innovative alternative to the conventional On-Premise approach, minimizing CAPEX on idling resources to meet availability & compliance requirements. Oracle Cloud Infrastructure's (OCI) inherent agility and the ability to handle mixed workloads, makes it a suitable platform for a DR solution. This session will discuss the approach, planning and design of a disaster recovery site for a private cloud on OCI.

Efficient Capacity Planning Using ASCP and APCC

Date	Thursday, April 26
Time	9:45 a.m. – 10:45 a.m.
Location	Breakers G
Speakers	**Aseem Dixit**, Senior Consultant, Deloitte Consulting LLP **Kallol Kumar Kar**, Manager, Deloitte Consulting LLP **Mahesh Shankar**, Specialist Leader, Deloitte Consulting LLP **Vamsi Sreeram**, Specialist Master, Deloitte Consulting LLP
Session description	Today companies operate in an environment where demand is "golden". However, the supply chain is capacity-constrained. This paper deals with leading practices for capacity planning and developing insightful analytics using APCC (Advanced Planning Command Centre). The planner analyze the capacity information by various measures: resource availability, required hours, utilization. The ease of access to both aggregate and detail view empowers planners to make decision quickly and develop an optimal production plan.
