

Deloitte iOS Solutions for SAP

Reliability Engineer App

Reliability engineers play a pivotal role in any asset intensive industry for the upkeep of machinery and equipment in plants and in the field. This app allows clients to take their maintenance processes to the next level by predicting failures by capturing and processing real-time equipment data using IoT sensors.

This solution can help reduce operating costs by minimizing equipment downtime proactively, focusing labor on exceptions, and improving equipment health.

KEY FEATURES

- Map view of field assets
- Map view of technician locations
- Search equipment by barcode scans
- Predictive analytics for asset health
- IOT sensor integration
- Real-time notifications / work orders
- Maintenance history and KPIs

Field Sales Companion App

The Field Sales app provides the sales team with the ability to easily manage customer accounts, contacts, leads, opportunities, and interaction history. The reporting functionality provides team members insight to sales analytics and forecasting so they can closely track progress toward goals. It provides the data and tools at the point of transaction for immediate decision making.

This solution can help increase sales force effectiveness, reduce field visits, and accelerate the time to close a sale.

KEY FEATURES

- Sales analytics dashboard
- Quarterly performance graphs
- 360° customer view with maps
- Customer buying trends
- My top accounts view
- Track leads, opportunities, quotes
- Product catalog with inventory availability
- Sales order profitability calculation for up-sell / cross-sell

Warehouse Management App

Deloitte's Warehouse Management Suite is built with a design thinking approach to help empower warehouse workers and supervisors with high-productivity tools and real-time process monitoring. The solution contains complementary applications, one for the warehouse operator performing warehouse pick-pack-ship functions, and another for the warehouse supervisor to obtain real-time visibility into warehouse activity, worker locations and performance metrics.

This iOS solution will can help the warehouse business area increase employee productivity, increase logistics tracking and efficiency, reduce material waste, and reduce cost of operations.

KEY FEATURES

- | Warehouse Worker App | Warehouse Supervisor App |
|--|--|
| • Prioritize My Warehouse Queue | • Warehouse Dashboard |
| • Barcode scanning for Pick, Pack and Ship tasks | • GPS / Map View of workers |
| • Capture pictures of quality issues and bin denial | • Manage staff queues and dynamic work assignments |
| • GPS / Map View of workers | • Staff productivity KPIs |
| • Social collaboration for improvement opportunities | • Social collaboration with warehouse staff |
| • Notification for express orders | • Manage inventory levels |
| • Track materials status | • Review quality inspections |
| | • Review bin denials |
