

Smart Building Management (Magnet)

Function:

Office Real Estate

Processes:

Space Utilization

Industry:

Cross-industry

Business Driver

Office hoteling is redefining the workplace, by helping

- Maximize productivity
- Enable social connectivity
- Improve the customer experience
- Drive enhanced space utilization

Solutions Overview

The Magnet mobile application utilizes predictive technology and an advanced space recommendation engine to help employees connect and collaborate with colleagues, while securing and utilizing space within their company's offices.

Features

- Auto-detect colleagues in the office based on employee's organization or project team
- Make social connections and work near your colleagues
- Add colleagues to your network and quickly contact them
- Receive automatic seating recommendations based on the location of your colleagues
- Automatically check-in to your reservations based on your location
- Reservation reminders and easy updates help you free up space for your colleagues
- Open seating heat maps tell you where to find available space

Potential Benefits

- Increased productivity
- Improved networking
- Offers travel concierge
- In addition to maximizing productivity, social connectivity, and collaboration for individual users, Magnet helps maximize utilization of office space for an extremely mobile workforce.

IoT

- Turnstile badge readers
- Mobile devices
- Cisco Wireless Access Points

Core SAP

- SAP S/4HANA®
