

Topics of the 18th Global Chemicals Think Tank

The focus will be on the interface between energy and chemicals, industry rivalry and structure triggered by three underlying drivers

“The Industrial Dynamics between Energy and Chemicals”

- The role of national players and natural owners
- Asset intensity
- The new “Verbund”
- Forward and backward integration

- “Energiewende”
- Renewables
- Energy storage and Power to X
- Climate change and CO2 pricing
- Taxation and regulation

- Circular economy, incl. recycling
- Plastic waste
- Regulation, especially in EU
- Innovation
- Resource efficiency
