Leadership message¹

The past year has brought much challenge and uncertainty. Global markets were faced with increased economic instability, geopolitical tension, and climate emergencies among other issues. These challenges require us to increase our professional skepticism and remain agile to adapt to the everchanging and challenging environment.

It is during these times that we must strengthen the critical role that we play in protecting investors and enabling the capital markets with an unwavering commitment to integrity and ethical behavior. Our Global Principles of Business Conduct and our Shared Values support our pursuit of excellence, our mutual accountability to support each other's success, and our commitment to being leaders in improving society.

We continue to see developments in environmental, social, and governance ("ESG") initiatives with investors and regulators seeking more transparency in corporate strategies related to ESG. We have taken strategic actions to align with stakeholders' expectations and to hold ourselves accountable on our promise to make an impact that matters to our people, our clients, and society.

Our journey towards achieving the highest standard of quality is dependent upon our most valuable asset- our people. Our ability to attract, train, and retain the best people across a broad and diverse range of skills and perspectives is the key to our success. Our investments in diversity and inclusion enable us to continuously evolve the breadth of our services to meet the changing needs of the clients we serve. An inclusive workplace that embraces innovative ideas and diversity of thought enables us to deliver high-quality audits and provide added value to our clients.

Technology is rapidly transforming the way we work. Our investment in innovation also gives us the competitive edge to work smarter and revolutionize our audits. We are committed to enhancing audit quality using advanced technologies and data-analytic driven tools to gain a deeper understanding of our clients' businesses, perform robust risk assessments, and drive quality audit execution.

On behalf of Brightman Almagor Zohar & Co. ("Deloitte Israel"), a firm in the Deloitte Global network, we are pleased to present our 2023 Transparency Report for the fiscal year ended May 31, 2023. This report is published in accordance with the requirements of the European Union's Regulation 537/2014 on specific requirements regarding statutory audits of public-interest entities.

Our 2023 Transparency Report takes a deep dive into our structure, governance, and approach, which is grounded in a strong system of quality controls. We appreciate the opportunity to share the actions we are taking that demonstrate our unwavering commitment to audit quality, culture of integrity, professional excellence, and accountability in this report.

¹ Throughout this report, the terms "Deloitte, we, us, and our" refer to one or more of one or more of Deloitte Touche Tohmatsu Limited, its network of member firms, and their related entities. For more information about the Deloitte network, please see page 3 or [About the network \(deloitte.com\)](#).

Deloitte network

Deloitte Israel: legal structure and ownership

Brightman Almagor Zohar & Co. ("Deloitte Israel") is an Israeli partnership owned by its partners and is a firm in the Deloitte network (see network description below).

Deloitte Israel entered agreements dated as of June 2, 2019 (as amended and restated), with an affiliate of Deloitte & Touche LLP ("D&T"). D&T is a PCAOB registered audit firm in the United States that is part of the Deloitte network. The agreements provide for, among other things, licensing of intellectual property and the right of Deloitte Israel to use the Deloitte name and logo in Israel, and certain responsibilities for the protection and enhancement of the Deloitte brand. Neither D&T nor its affiliate have any ownership interest in Deloitte Israel, and vice versa.

Network description

The Deloitte network

The Deloitte network (also known as the Deloitte organization) is a globally connected network of member firms and their respective related entities operating in more than 150 countries and territories across the world. These separate and independent member firms operate under a common brand.

Deloitte Touche Tohmatsu Limited (DTTL or Deloitte Global)

Deloitte Touche Tohmatsu Limited is a private company limited by guarantee incorporated in England and Wales. DTTL serves a coordinating role for its member firms and their related entities by requiring adherence to policies and protocols with the objective of promoting a consistently high level of quality, professional conduct, and service across the Deloitte network. DTTL does not provide professional services to clients, or direct, manage, control, or own any interest in any member firm or any member firm's related entities.

"Deloitte" is the brand under which approximately 457,000 dedicated professionals and practitioners in independent firms throughout the world collaborate to provide audit and assurance, consulting, financial advisory, risk advisory, tax, and related services to select clients. These firms are members of DTTL. DTTL, these member firms and each of their respective related entities form the Deloitte organization. Each DTTL member firm and/or its related entities provides services in particular geographic areas and is subject to the laws and professional regulations of the particular country or countries in which it operates. Each DTTL member firm is structured in accordance with national laws, regulations, customary practice, and other factors, and may secure the provision of professional services in its respective territories through related entities. Not every DTTL member firm or its related entities provides all services, and certain services may not be available to attest clients under the rules and regulations of public accounting. DTTL, and each DTTL member firm and each of its related entities, are legally separate and independent entities, which cannot obligate or bind each other in respect of third parties. DTTL and each DTTL member firm, and their respective related entities, are liable only for their own acts and omissions, and not those of each other. The Deloitte

organization is a global network of independent firms and not a partnership or a single firm. DTTL does not provide services to clients.

Deloitte Israel: governance – leadership in action

Deloitte Israel operates as a partnership, established under Israel law, with registered office at 1 Azrieli Center, Tel Aviv, Israel, 6701101 and registration number 557934692. The firm has offices throughout the country, in Tel Aviv (Main Office), Haifa, Jerusalem, Nazareth, Eilat, and Beit Shemesh, enabling accessibility and responsiveness to our clients.

Ilan Birnfeld serves as Deloitte Israel's Chief Executive Officer. Yigal Dor, Deputy CEO, and Sharon Shtevy-Cohen, Audit and Assurance Leader, develop and implement the strategy for the Audit practice, including related policies and procedures.

In all of their activities, Deloitte Israel senior leaders are responsible for the overarching objective of audit quality, including compliance with applicable professional standards and regulatory requirements. Deloitte Israel strategy is developed in alignment with the overall strategic direction established for the Deloitte network.

Deloitte Israel Audit & Assurance leaders participate in Deloitte network groups that set and monitor quality standards, and from which a number of audit quality initiatives emanate.

Our purpose and commitment: instilling trust and confidence

At Deloitte Israel, our purpose is to make an impact that goes beyond the expected. For Audit & Assurance, this means constantly evolving audit and assurance processes, leveraging leading-edge technology, applying a diversity of skillsets, knowledge, and experience to deliver high-quality services. We take great pride in instilling confidence and trust in the capital markets and are committed to relentlessly raising the standards of quality and always acting with integrity, independence, and transparency. We are continuously building our capabilities to support the delivery of high-quality audits and other assurance engagements and making leading contributions to shaping the future of the audit profession.

Deloitte Audit & Assurance: Our commitment to serving the public interest

A focus on audit quality

Deloitte's commitment to audit quality permeates everything we do. The independent audit is a central element of the corporate reporting ecosystem, in place to enhance the confidence and trust of investors and other stakeholders, as well as to promote the effective functioning of the capital markets. Deloitte is keenly aware of our obligation to deliver audit services that meet the challenges and complexities of the current environment, while complying with professional and regulatory standards. For the corporate reporting ecosystem to function as intended, it is vital that the auditor's role be executed effectively.

Deloitte is committed to doing more than simply meeting regulatory requirements and conforming to expectations. Deloitte is going beyond the expected to set the standard of excellence for the profession. In keeping with that objective, our commitment to audit quality is unequivocal.

Deloitte Global leadership

The Deloitte Global Audit & Assurance Executive, which includes the Audit & Assurance Business Leaders from the member firms is led by Jean-Marc Mickeler, the Deloitte Global Audit & Assurance Business Leader, whose responsibilities include defining and driving the Deloitte Global Audit & Assurance strategy, with a particular focus on:

- Driving key audit and assurance initiatives across the Deloitte network to accomplish quality outcomes.
- Leading transformational initiatives to innovate the way our audit and assurance engagements are executed to meet the evolving needs of our stakeholders.

Entities Deloitte audits

As part of Deloitte's Audit & Assurance commitment to supporting the capital markets, we are focused on auditing entities where it serves the public interest and where we have the capabilities to perform a quality audit with objectivity and in compliance with applicable

professional standards and laws and regulations, including those relating to ethics and independence.

Deloitte Israel has detailed policies and procedures in place for the acceptance of prospective clients, the continuance of existing engagements and the assessment of engagement risk. These policies and procedures are designed with the objective that Deloitte Israel will only accept or continue with engagements where it:

- Is able to perform the engagement and has the capabilities, including time and resources, to do so.
- Can comply with all relevant professional standards and laws and regulations, including those relating to ethics and independence and conflicts of interest assessments and considerations.
- Considers the client's management team to act with integrity and in alignment with our shared values.

The company we keep is a critical foundational aspect of our Audit & Assurance strategy and global shared values that guide our behavior to lead the way, serve with integrity, take care of each other, foster inclusion, and collaborate for measurable impact. The question we ask ourselves is: what type of entities do we, as a global network, want to be associated with? In order to answer this question, an audit and assurance risk appetite statement has been developed to serve as the foundation for the company we want to keep. The risk appetite statement can be used as a tool to promote robust discussion of risk, and as a basis upon which acceptance and continuance decisions can be debated and challenged effectively and credibly. The statement, as shown below sets the tone for our risk culture and aims to drive global consistency in the engagement acceptance and continuance decision making process:

"Deloitte's Audit & Assurance portfolio risk appetite underpins our purpose led agenda and reinforces our Principles of Business Conduct, which articulate the standards to which we hold ourselves, wherever in the world we live and work, in order to build and maintain a sustainable business for current and future generations.

Consistent with our commitment to purpose and to act in the public interest, we recognize that taking on a degree of risk is a natural consequence of doing business. In order to deliver high-quality audit and assurance services, we proactively identify and manage risk through our quality management processes, policies and procedures to make informed decisions aligned to our strategy and values.

We aspire to have a portfolio of clients that aligns with our shared values, respects our people, recognizes emerging issues and societal responsibilities, and is committed to providing transparency to stakeholders in the corporate reporting ecosystem. We endeavor to have a portfolio that does not include clients that lack integrity, engage in illegal activities, disregard the authenticity of financial accounting and reporting, or are unwilling to establish and maintain sufficient internal controls and related processes.”

At Deloitte, meeting expectations is where our Audit & Assurance services begin.

Our people’s commitment to integrity, to serve the public interest, and to deliver high-quality assurance over the areas that matter most to our stakeholders is at the core of everything we do.

Our unwavering dedication to quality drives our sustained quality leadership position. We remain focused on excellence across people, process, and technology. Each of these core components helps us to deliver our vision for a better future, creating an impact that not only meets expectations but goes beyond them.

What does this look like? A constantly evolving audit and assurance practice, leveraging bright minds, effective processes, and world-class technologies from across our global organization while drawing on our years of experience. We deliver high-quality services in an efficient and effective way that upholds integrity, builds confidence, and drives value by focusing on what really matters.

Audit & Assurance transformation is an important shift across the network in the way Deloitte practitioners work and includes:

The Deloitte Way: standardization of audit processes supported by our global technology suite	Real-time audit quality monitoring
Enhanced talent model which includes learning, rewards and recognition, centers of excellence, and delivery centers	Agile deployment of technology solutions to respond to changing environments

quality into the core of how our audits are executed: with automation that improves routine tasks and analytics that support audit execution—yielding a deeper and more insightful view into the available data. As a result, we are improving the quality of the audits we deliver to clients while also creating a richer talent experience for our people, providing a streamlined, digital audit experience, that provides greater transparency and insights.

Innovation and technology enablement are an expectation in today’s fast-changing business environment, and this expectation holds true for the audit profession as well. Today’s complex business environment requires that the audit be dynamic, multidimensional, and insightful. There is a demand for real-time, relevant information, and we need to evolve our audits as the clients we audit innovate their businesses and processes. Leveraging evolving technology and data, a Deloitte audit delivers deeper insights to create more consistent and transparent audit and assurance for our stakeholders. Deloitte brings bright minds, effective processes, and world-class technologies from across the global organization to deliver an impact beyond expectations.

We are enhancing the way they work by making more use of data-driven analytics, as well as cognitive and cloud-based technologies. This is due, in part, to the increased automation and effectiveness these provide, but also the need to stay abreast of technological advances used by the clients that we audit.

Deloitte is committed to the continued investment in emerging technologies and diversity of thought that enables the delivery of enhanced quality, insights, and value to our clients and the markets. Deloitte’s global audit platform, Deloitte Omnia, demonstrate our commitment to delivering digital, high-quality audits of all sizes and levels of complexity. Deloitte Omnia is our cloud-based, end-to-end audit delivery platform for larger and complex audits. Development, enhancement, and deployment of the Omnia platform will continue over the next few years. Deloitte is also developing and implementing innovative global data and analytics solutions, and our integrated suite of enabling innovation technologies which are all connected in the cloud.

Delivering audit excellence through process, people, and technology transformation²

With The Deloitte Way, Deloitte is bringing standardization, consistency, and efficiency to drive

² For more information about Deloitte audit innovation, please refer to Deloitte [Global Impact Report](#) and [Audit innovation](#) and [Audit & Assurance: the Deloitte way](#) pages on Deloitte.com.

Auditing in disruptive times

In the wake of tremendous global disruption marked by public health, political, and social uncertainties over the past few years, the profession, along with all corporate reporting ecosystem stakeholders, has been affected. Deloitte's response to the uncertainties and disruptions has included efforts to continue advancing the profession, while prioritizing the wellbeing of its people.

Particularly in the current environment, a sharpened awareness regarding the heightened risk of fraud, the presence of emerging or evolving risk factors, and the need for effective internal control environments remains critical. Although the existing accounting frameworks have provisions for uncertainties, financial statement users and regulators should continue to expect a higher degree of market and economic volatility in the near term.

Deloitte has consistently welcomed public statements and guidance issued by regulators that recognize uncertainties and emphasize the importance of high-quality, forward-looking corporate disclosures. Greater transparency benefits the public, just as raising awareness about these issues, especially when all corporate reporting ecosystem stakeholders participate. More clarity about the unique and complementary responsibilities of management, audit committees, entities, auditors, regulators, and other stakeholders enables the investing public to hold accountable these parties in a way that effectively serves the public interest.

The value of high-quality audit and assurance services is not diminished in the midst of global unrest. Rather, investors and other stakeholders continue to call for professional services based on independence and objectivity-based principles and practices to engender trust and inspire confidence in the capital markets—and Deloitte is committed to leading the way.

Deloitte Israel's commitment to serving the public interest—especially as it relates to behaving according to the highest standards of ethics, integrity, independence, and transparency is steadfast. Deloitte is keenly aware of the gravity of responsibility that comes with meeting professional obligations and discharging its role as auditors within the corporate reporting ecosystem globally. The following principles remain at the forefront and are continuously reinforced with Audit & Assurance practitioners:

- Exercise professional skepticism and due professional care
- Critically evaluate the quality of audit evidence obtained and determine whether it is sufficient and appropriate to address relevant risks
- Make well-reasoned professional judgments supported by clear documentation
- Foster a culture of excellence and consultation
- Demonstrate commitment to integrity and ethical behavior, including compliance with regulatory and professional obligations
- Stay connected and support one another

Multidisciplinary model (MDM)

Deloitte's robust multidisciplinary business model comprises audit and assurance, tax, consulting, and risk and financial advisory practices and is an important contributor to the organization's ability to deliver high-quality audit and assurance services. Specifically, the scope of corporate reporting has begun to expand and it is expected to transform drastically in the near future; financial statements and corporate disclosures will continue to become more complex due to environmental, social, and governance ("ESG") considerations and other matters (cyber, artificial intelligence ("AI"), data privacy, etc.). In addition, as big data and other digital advances become routine, the demand for data analysts and information technology specialists will grow accordingly.

The MDM remains foundational to Deloitte's cross-disciplinary services globally. Deloitte prides itself on having a deep bench of independent specialists who can be deployed around the world on engagements to provide subject matter expertise and new, insightful perspectives. Deloitte believes that the current MDM helps the organization deliver high-quality audits and assurance engagements in the public interest and reinforces the resilience of the audit and assurance practice. The strengths of the MDM include:

- The possibility to develop industry or thematic insights (e.g., climate, governance, corporate strategy, etc.) through multiple lenses, which enhances auditors' understanding of business risks relevant to conducting audits.
- The MDM enables access to functional specialists and industry experts who are independent, and who provide audit support helping to deliver high-quality audits. This will become more important as we move towards broader corporate reporting.
- The breadth of the MDM is attractive to candidates who may not want to limit their career options to providing audit and assurance services only.
- The scale of the MDM brings greater resilience to each Deloitte business line, including audit and assurance, allowing continued investment in technology, methodology, and process to support delivery of high-quality services.

Deloitte leadership recognizes that each Deloitte business line is important and critical to the organization's ability to deliver on its public interest responsibilities. Management's attention and investment allocation are not limited to the business lines with the highest growth rates.

Deloitte acknowledges the possibility and perception of conflicts of interest, and therefore has robust conflicts and independence policies and systems to help ensure that Deloitte's strategy is executed in alignment with regulatory and professional requirements. In some areas, Deloitte policies are more stringent than professional standards, laws, or regulations.

ESG reporting³

The foundations of business are changing rapidly—long-term resiliency and the ability to create enduring value is directly linked to alignment with the values and expectations of society. Market participants and other stakeholders are calling for greater insight into how organizations are building, protecting, and enhancing enterprise value over time, and are specifically demanding enhanced transparency around climate-related and broader ESG impacts and the dependencies of an entity's business model and strategy.

Specifically, Deloitte recognizes that climate change poses a risk to financial stability and impacts businesses in many sectors with increased disclosure and reporting expectations from various stakeholders.

Deloitte is taking strategic actions to educate our people on climate change and the potential impact on audited entities to support the execution of high-quality audits, thereby giving appropriate consideration to climate-related risks and opportunities. This includes the deployment of materials and related guidance to consider climate-related matters as part of the audit.

Broader corporate reporting

Traditional financial reporting is beginning to evolve into broader corporate reporting. To support this evolution, there are standard setting and rulemaking efforts regarding sustainability by the International Sustainability Standards Board (ISSB) and others around the world.

These standards emphasize the need for better connectivity between financial and non-financial reporting and will help users of corporate disclosures better understand and compare information about entities. Further, these standards will enable greater transparency, consistency, and comparability globally, as well as shift the requirements for climate-related reporting from being voluntary to mandatory.

When fully adopted, these standards will contribute to corporate reporting which is comparable, based on the global baseline, and supplemented by local considerations where warranted. These standards, and other developments in standard-setting and rulemaking make clear that alongside the information in financial reporting, information on sustainability and ESG topics more widely, are essential inputs to inform a stakeholder's view of an entity's value. There is a growing demand for companies to integrate climate-related and other ESG considerations into internal control policies and procedures, enhancing the maturity of systems, processes, and governance over climate-related and other ESG information. As a result, those charged with governance (e.g., audit committees, boards) are increasingly incorporating ESG considerations in their oversight responsibilities of an organization's management, its reporting, and their data-collection processes and controls.

Deloitte understands that given the increased risks associated with climate change, it is important for climate-related factors to be properly incorporated into corporate reporting. Today some stakeholder's expectations may not be met by financial statements prepared in accordance with current accounting frameworks. As corporate reporting continues to evolve and stakeholders accommodate and adapt to market shifts and public sentiment, it is important to allow for appropriate due process in order to develop robust standards applied consistently across the globe and to drive reporting that is responsive to the growing asks of investors and other stakeholders.

Deloitte remains committed to engaging in meaningful and transparent conversations with investors, standard-setters, regulators, and other relevant stakeholders. We also look forward to supporting reduced standard and regulatory fragmentation and to greater market confidence as consistency in standards is realized globally.

The local ESG regulatory landscape is dynamic. Under financial industry requirements in Israel, institutional investors must incorporate ESG related considerations in their investment policies and risk management frameworks, and insurance companies are required to address ESG considerations in their products. In addition to requiring robust non-financial disclosure on ESG related topics, banking regulators have addressed the consideration of climate risks in

³ For more information about Deloitte's alignment with ESG, please refer to Deloitte [Global Impact Report](#).

banking institutions' credit processes and are increasing the requirements related to climate risk management and disclosure in line with global trends.

Assurance

With the increased focus and scrutiny of this information also comes the increased need for confidence over the quality of the information being disclosed, which may be achieved through assurance over ESG information. Providing assurance on ESG information should be expected to follow a professional framework including competence, independence, a system of quality management, and be subject to oversight and inspection as well as professional liability mechanisms to ensure that credible assurance is delivered to the market.

Below are specific actions that Deloitte is undertaking to support execution of high-quality assurance that appropriately address ESG voluntary reporting and regulatory requirements:

- A task force, consisting of leaders of Audit and Assurance Quality and ESG Services is working to address transformation processes regarding assurance services related to climate regulation.
- Building capacity through global and localized learning, educating Deloitte professionals on ESG developments and their potential impact on audit entities with a strong focus on climate change and its risks and opportunities.
- Engaging in the global debate on sustainability reporting tied to enterprise value through collaboration on climate and ESG standard setting reporting, and assurance initiatives, such as the IFRS Foundation, the International Auditing and Assurance Standards Board, and the International Ethics Standards Board for Accountants and actively participating in various global platforms such as the World Economic Forum and the 2022 UN Framework Convention on Climate Change (COP27).
- Deloitte Israel has established a task force, consisting of leaders of Audit and Assurance Quality and ESG Services, to address transformation processes regarding assurance services related to climate regulation.

Deloitte supports the continued collaboration of all participants in the corporate reporting ecosystem, working together to develop and implement common standards upon which to measure, disclose, and ultimately assure ESG information.

Deloitte's commitment

Further, to help the world achieve the goals of the Paris Agreement⁴, Deloitte has launched [WorldClimate](#), a strategy to drive responsible climate choices within the Deloitte network and beyond.

⁴ The [Paris Agreement](#) is a legally binding international treaty on climate change. It was adopted by 196 parties at the United Nations (UN) Climate Change Conference (COP21) in Paris, France, on 12 December 2015 and was entered into force on 4 November 2016. Per the UN, its overarching goal is to hold the increase in the global average temperature to well below 2°C above pre-industrial levels and pursue efforts to limit the temperature increase to 1.5°C above pre-industrial levels.

Shaping the future of the audit profession

The provision of relevant and reliable financial and, increasingly, non-financial information is critical to both the capital markets and broader society. Policy makers, regulators, investors, company directors, audit committees, and auditors all have an important role so that users of corporate information have a clear and robust picture of uncertainties and risks in a company's business model to help support their informed decision making.

Uncertainty and complexity are set to remain a central theme over the coming years, driven by heightened global challenges and the rapid advancement of technology.

Deloitte is committed to establishing a meaningful vision for the future of the profession which addresses the shifting needs of society.

We are continually innovating to address the challenges of efficiency and effectiveness through technology, data, and ways of working. In parallel, the role of audit and assurance in the corporate reporting ecosystem, its responsibility to act in the public interest, and its evolving contribution to societal value remains at the forefront of our work in this area. Through proactive engagement with a range of stakeholders, we seek to understand today's rapidly developing issues faced by society (e.g., ESG, cyber, AI, data privacy, etc.) and the role that audit and assurance can play in responding and driving change for the better.

We strive to engage with these parties, both formally and informally, to share, offer, and debate ideas that foster our collective ambition to ensure the ongoing and growing relevance of audit and assurance to the capital markets.

Professional development and performance management

Deloitte's culture of excellence and the design of learning programs place people at the forefront⁵. Deloitte practitioners are technically proficient with high levels of ethics, integrity, professional skepticism, and objectivity, applying their judgment and experience with passion and commitment. We are continuously enhancing our skillsets, knowledge, and experience to go beyond the expected and deliver meaningful impact.

Deloitte is committed to delivering an unrivalled talent experience, developing practitioners, and furthering their careers by creating a life-long learning environment—advancing audit education, skillsets, and flexible career options that appeal to auditors of today and tomorrow.

Deloitte practitioners bring diverse backgrounds, knowledge, and skills that enhance capabilities as an organization in delivering the highest quality audits. We support and empower our people to achieve their full potential by valuing and demonstrating diversity, equity, inclusion, and wellbeing. In addition, operational discipline, effective management of the business, and our singular approach to doing audits known as The Deloitte Way provide global consistency to our audits.

Deloitte recognizes and rewards its Audit & Assurance practitioners and professionals and makes meaningful investments in their futures.

⁵ For more information about Deloitte's commitment to its people, please refer to [Audit & Assurance People page](#) on Deloitte.com.

Learning and development initiatives

Deloitte's transformed approach to audit delivery is changing the audit experience for practitioners. Audit teams are empowered by advanced tools and technologies and more extensive use of data and analytics within a guided workflow to execute the end-to-end audit. For Deloitte practitioners, this means focusing on how the engagement is planned, executed, and managed consistently across the globe using our innovative techniques and capabilities. It also offers opportunities to enhance their technical and professional skillsets and competencies. For example, the following skills remain as important as ever—enhanced data analytics, project management, critical thinking, communication, professional judgment, and the application of accounting and auditing principles to work more effectively and deliver high-quality engagements. As capabilities and skillsets are enhanced, we build greater confidence and become ever-better evaluators of risk.

Deloitte has made substantial investments in talent and learning strategies and transformed the technical audit curriculum to build the refreshed skillsets and proficiency required by level:

- At the core, Deloitte has a single, global mandatory audit technical learning curriculum, tailored for learners by level, using a dynamic blend of live instructor-led, digital on-demand courses, and on-the-job activities.
- All audit professionals are required to complete at least 20 hours of learning per year and 120 hours of learning in every three-year period (i.e., an average of 40 hours per year) through structured, formal learning programs, such as internal or external courses, seminars, or e-learning covering all areas of the competency model (e.g., shared competencies, function-specific technical competencies, and competencies in areas of specialization).
- All client service practitioners have clearly defined role expectations and global Talent Standards which outline the capabilities that are required of practitioners at each level.

Deloitte has also established specific learning opportunities for specialists working on audit engagements to support their knowledge and understanding of the audit process. In addition, our assurance learning offering is being expanded to respond to emerging business needs.

The objective of the Deloitte Israel professional development program is to help partners and practitioners maintain and enhance their professional competence and ensure consistency of audit execution. To supplement on-the-job development, Deloitte Israel provides formal continuing professional development programs in relevant subject areas consistent with the Deloitte Global Audit & Assurance Curriculum.

Audit & Assurance Leadership appointments

Critical Audit & Assurance leadership roles are clearly defined. A role profile and key performance indicator framework provide a basis for consistent leadership appointments and evaluations across the Deloitte Audit & Assurance network and align member firm and Deloitte Global Audit & Assurance strategic objectives. Deloitte has introduced globally consistent standards for member firm Audit & Assurance leaders, including Audit & Assurance Business Leaders, Audit & Assurance Quality Leaders, and Audit & Assurance Risk Leaders through clearly defined roles, responsibilities, and expected success outcomes. These inform objective setting and evaluation processes and reinforce Deloitte's culture of quality and excellence. Robust monitoring of succession planning helps ensure Deloitte is developing and appointing the appropriate individuals with the capabilities to achieve these consistent standards.

Remuneration

Execution of high-quality audits is expected from all practitioners and is embedded across the Deloitte network. Audit quality is recognized through reward and recognition programs and is built into performance standards at every level, against which practitioners' overall evaluations are measured.

In accordance with global policies, Deloitte Israel's partners are evaluated on a yearly basis, and depending on the outcome of the evaluation, the remuneration of partners may increase or decrease. Specifically, partner evaluations take into account, among other things, quality factors, e.g. practice review or external inspection results.

Attraction and retention

The current environment for talent is extremely competitive and attraction and retention of our people is a strategic priority for Deloitte. We acknowledge the challenges our people are facing and recognize our part to re-establish the connections that so many have missed during the COVID-19 pandemic. Deloitte is focused on transforming the Audit & Assurance talent experience, including reimagining the ways of working to improve retention and further advance the diversity, equity, and inclusion, and wellbeing of Deloitte people. We are looking at opportunities to collectively expand the talent experience. This focus on our people and retention of top talent enhances Deloitte's ability to deliver high-quality audits.

Deloitte continues to receive recognition and awards across the globe for its commitment to delivering an unrivalled talent experience for its people [Awards and recognition | Deloitte Global](#).

Social Impact

Making an Impact Every Day

We believe human connection can help create innovative solutions and lasting impact on pressing issues of our time. By harnessing the collective power of Deloitte's network of people, clients, nonprofits, and communities, we aim to achieve lasting social impact for the greater good.

Deloitte's priority focus on audit quality

Deloitte's commitment to audit quality is central to everything we do. We consistently deliver on this commitment by instilling a culture of quality and excellence across the network, establishing business and financial priorities, and developing effective processes, tools, and technologies applied in the execution of audits. Deloitte's brand is defined by the high-quality audits delivered and by the unwavering commitment to continuous improvement of our systems of quality management. Making sure audit quality keeps pace with emerging economic, business, and regulatory conditions, as well as technological advances, is critical to the continual enhancement of Deloitte's role in protecting the public interest and supporting the effective functioning of the corporate reporting ecosystem.

Leadership commitment and tone at the top

Deloitte's culture of quality and excellence begins with strong tone from the top, starting with senior leadership through to the leaders in all our offices and audit and assurance engagements. Deloitte's focus on audit quality is evident through the direct involvement of leaders in initiatives emphasizing that quality is the highest priority for audit and assurance practitioners at all levels and consistent messaging that reinforces the importance placed on executing high-quality audit and assurance engagements. Deloitte's relentless pursuit of quality defines not just what we do, but who we are.

System of quality management (SQM)

Deloitte believes an effective system of quality management is crucial for the consistent performance of high-quality audit engagements and we continue to make significant investments in our people, processes, and technologies that underlie Deloitte's quality management processes.

Regulators and standard setters in Israel and globally are also focused on driving further improvements in firms' system of quality management. In December 2020, the International Auditing and Assurance Standards Board released its new, revised suite of quality management standards, including International Standard on Quality Management 1 (ISQM 1). Systems of quality management in compliance with ISQM 1 were required to be designed and implemented by 15 December 2022.

ISQM 1 introduced a risk-based approach to the SQM that require firms to respond to quality objectives and risks to our ability to execute high-quality audits in the following areas:

- The firm's risk assessment process;
- Governance and leadership;
- Relevant ethical requirements;
- Acceptance and continuance of client relationships and specific engagements;
- Engagement performance;
- Resources;
- Information and communication; and
- The monitoring and remediation process.

The effective implementation of ISQM 1 has been and remains a key element of Deloitte's global audit quality strategy. Deloitte Israel's ISQM 1 implementation activities were completed by 15 December 2022, building on the multi-year investments and commitment already delivered to go beyond the requirements of the existing professional standards.

As part of the implementation of ISQM 1, we formalized quality objectives, quality risks and responses and brought them together in a globally consistent technology platform to facilitate the design and maintenance of our SQM. The platform also facilitates tri-annual assessments and has reporting capabilities that support the required annual evaluation.

Deloitte Israel continues to work with leaders across the firm, as well as the broader network, to further enhance our proactive approach to managing the quality of engagements performed—identifying and addressing risks to audit quality and driving continued advancements in quality management processes serves us well into the future as the environment within which we operate continues to evolve and become increasingly complex.

Consistent with Deloitte's culture of continuous improvement and innovation, Deloitte Israel's ISQM 1 implementation efforts have provided us the opportunity to challenge ourselves—examining those areas where we can further enhance and transform our system of quality management. Audit quality is always front and center, and robust audit quality monitoring processes play an integral role in our ability to continually improve.

The first annual evaluation of the systems of quality management are required to be performed within one year following 15 December 2022. Deloitte Israel performed its first evaluation of its SQM as of 31 May 2023.

Conclusion on the effectiveness of the system of quality management

Deloitte Israel is responsible for designing, implementing, and operating a system of quality management (SQM) for audits or reviews of financial statements, or other assurance or related services engagements performed by the firm, that provides the firm with reasonable assurance that the objectives of the SQM are being achieved. The objectives are:

- The firm and its personnel fulfill their responsibilities in accordance with professional standards and applicable legal and regulatory requirements, and conduct engagements in accordance with such standards and requirements; and
- Engagement reports issued by the firm or engagement partners are appropriate in the circumstances.
- Deloitte Israel conducted its evaluation in accordance with the International Standard on Quality Management 1.

Deloitte Israel concluded that the SQM provides the firm with reasonable assurance that objectives of the SQM are being achieved as of 31 May 2023.

Reasonable assurance is obtained when the system of quality management reduces to an acceptably low level the risk that the objectives of the SQM are not achieved. Reasonable assurance is not an absolute level of assurance, because there are inherent limitations of a system of quality management.

Independence, objectivity, and professional skepticism

The execution of high-quality audits requires independence, objectivity, and professional skepticism. This means a continuous and tangible focus on Deloitte's critical role in serving the public interest, including creating a culture of quality where doing the right thing is of paramount importance. Deloitte consistently reinforces the important role of auditors as independent evaluators who must maintain a mindset of professional skepticism throughout the conduct of our work. This approach to the audit is reflected in Deloitte policies, methods, procedures, and learning, and is reinforced through quality management and accountability measures.

Audit approach

Deloitte's approach to performing a high-quality audit involves the use of an audit methodology, common across the Deloitte network, supplemented by audit tools for use by our practitioners to plan, perform, supervise, review, document, conclude, and communicate the results of each audit. Deloitte's audit approach is underpinned by professional standards, as well as requirements of applicable laws and regulations.

Deloitte's audit methodology is risk-based, focusing on the financial statement account balances, disclosures, and underlying assertions that have a reasonable possibility of being materially misstated. Our audit methodology is also dynamic—it evolves continuously to keep pace with the changing demands of investors, companies, and other stakeholders. It recognizes that advances in the availability and management of large data sets and in statistical science are relevant to continuing to enhance the quality of Deloitte audits.

Resources to support Deloitte practitioners in the execution of high-quality audits

The resources applied by Deloitte practitioners in the performance of their audits include the proprietary tools, guidance, materials, and practice aids used in conducting audits, which are available to all our practitioners in the Deloitte Global Technical Library, an extensive online library, and in our audit execution platforms. Deloitte regularly issues accounting and auditing guidance to our practitioners and communicates developments that should be factored into audit risk assessments and responses in order to maintain and drive quality audit execution.

Consultation

Quality and risk management considerations are integral to Deloitte's audit business and to the performance of audit engagements. That is why Deloitte views consultation as an essential, collaborative process—one that involves robust challenge and helps determine the most appropriate answers to complex questions. Deloitte has identified circumstances where consultation outside of the engagement team is required in order to demonstrate an appropriate level of professional judgment and the exercise of professional skepticism. Deloitte consultation policies require that conclusions are documented, understood, and implemented. Foundational to the effectiveness of the consultation process is Deloitte's investment in consultation resources who have the appropriate skills and expertise. In addition to formal consultations, whenever engagement partners and teams need additional information or perspectives, they are encouraged to seek assistance from the Audit Quality team or others in the organization with specialized knowledge.

External and internal audit quality monitoring

Monitoring of audit quality

A continued focus on audit quality is of paramount importance to the Deloitte brand. It is critical that a Deloitte audit is consistently executed and of high-quality, wherever in the world it is performed.

The objective of monitoring and remediation processes are to provide relevant, reliable, and timely information about the design, implementation, and operation of the system of quality management to leadership in order to enable appropriate and timely actions to be taken to respond to identified deficiencies. This includes the identification of deficiencies and good practices in the system of quality management and the assessment of the effectiveness of remedial actions in driving improvements in audit quality.

- A program of subject matter specific “health checks” to assist Deloitte Israel audit quality leader(s) in assessing progress and identifying potential issues on in-process engagements.
- Results of monitoring of in-process engagements are evaluated overall to determine whether additional communication and support is needed for audit engagement teams with respect to adherence to the audit methodology or updates thereto.

SQM monitoring

SQM monitoring is an integral part of Deloitte Israel’s monitoring activities and considers relevant requirements in ISQM 1, as well as evaluating the design, implementation and operating effectiveness of responses that address the quality risks that have been identified for the firm.

Audit Quality Indicators are used in conjunction with other metrics to further assist Deloitte Israel in developing and monitoring audit quality action plans and reporting on the progress in its audit quality journey.

Monitoring of in-process engagements

Continuous audit quality monitoring by Deloitte Israel involves the proactive identification of audit issues on in-process engagements in order to drive timely solutions and real time corrective actions. This is achieved through the following suite of activities:

- Deployment and monitoring of a series of core diagnostics, enabling engagement partners and teams, as well as Deloitte Israel audit quality leader(s) to continuously monitor audit quality and take immediate action.

Inspections of completed engagements

Key components of inspections of completed engagements include:

- Risk-based engagement selection and consideration of all major industries served by Deloitte Israel.
- Mandatory moderation panel to drive consistency in findings and engagement ratings.
- Network monitoring with external partners and deputies, independent of Deloitte Israel, who drive global consistency by providing input and sharing best practices for monitoring programs.
- Identifying appropriate resources (from within Deloitte Israel as well as from other Deloitte geographies) with the right experience and industry knowledge, including establishing central review teams.

External inspections

In addition to Deloitte Israel’s own monitoring of audit quality, we are subject to external monitoring by US Public Company Accounting Oversight Board, the UK Financial Reporting Council, and the Israel Peer Review Board.

Internal monitoring	External monitoring
October 20, 2022	US PCAOB – 2021, report date 15 September 2022 UK FRC – 2019, report date 6 March 2020 Israel Peer Review – 2021, report date 20 September 2022

Root cause analysis and remediation

Continuous improvement is essential to Deloitte’s culture of quality and excellence. Understanding why engagement level findings and SQM deficiencies occur is critical to being able to design effective remedial actions. When engagement level findings or SQM deficiencies are identified, whether through internal or external monitoring activities, actions are taken to identify gaps and develop appropriate remediation activities. Remediation is imperative to drive continuous improvement in audit quality and avoid future similar findings. An audit quality plan is prepared by Deloitte Israel and provides for effective implementation and monitoring of key audit quality priorities.

Independence, ethics, and additional disclosures

Deloitte Global Independence

Sets **independence policies and procedural expectations** based upon the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants and, where applicable, the independence standards of the US Securities and Exchange Commission and the Public Company Accounting Oversight Board.

Supports firms, as needed, with their ongoing SQM monitoring activities and gives insights into global areas of focus. On a three-year cycle, performs **network monitoring activities** through its monitoring program, providing recommendations and observations for consideration as part of firms' Monitoring & Remediation activities. In-depth follow-up reviews are conducted as needed.

Provides firms with **technical independence expertise**, as required, which also informs potential enhancements to global policies, procedural expectations, tools, and practice support activities.

Delivers **global systems** to provide its people with entity information to support compliance with personal and professional independence requirements, including financial interests, scope of service, and business relationship approvals.

Promotes **independence awareness** across the Deloitte network through active engagement with independence and business leadership groups, periodic communications and alerts, and development of guidance, learning, and instructions.

Deloitte Israel Independence

Deloitte Israel has quality responses that address quality objectives and quality risks as they relate to the relevant ethical requirements for independence. These responses include policies and procedures that are based on expectations set out in Deloitte Global Independence policies, and which are supplemented, as appropriate, to reflect additional national or regional requirements that may be more restrictive than Deloitte Global policies. Deloitte Israel leadership reinforces the importance of compliance with independence and related quality management standards, thereby setting the appropriate tone at the top and instilling its importance into the professional values and culture of Deloitte Israel. Strategies and procedures to communicate the importance of independence to partners, other practitioners, and support staff have been adopted, emphasizing each individual's responsibility to understand

and meet the independence requirements. The Director of Independence is responsible for overseeing independence matters within Deloitte Israel, including the design, implementation, operation, monitoring, and maintenance of the system of quality management related to independence.

As part of the firm’s system of quality management, Deloitte Israel has:

- Implemented responses to address quality objectives and quality risks it has identified for its key independence areas;
- Performed appropriate monitoring activities over its key independence areas; and
- Has appropriate independence governance in place.

The firm’s key independence areas include:

- Client, engagement, and business relationships, including use of the independence business process tools, the Deloitte Entity Search and Compliance (DESC) system, and the Service Request Monitoring (SRM) application
- Firm and personal financial relationships, including the use of the Global Independence Monitoring System (GIMS)
- Employment and other relationships
- Independence confirmations
- Independence consultations
- Independence-related policies, communications, and learning
- Breaches of independence requirements
- Disciplinary measures for failures to adhere to applicable independence requirements

DESC

Deloitte Entity Search and Compliance

Global, searchable database containing specific entity information relevant in determining personal and professional independence restrictions

SRM

Service Request Monitoring

Application integrated with DESC that provides a standard business process workflow for submitting and reviewing preapproval requests to provide services to and enter into business relationships with third parties

GIMS

Global Independence Monitoring System

Application that contains financial relationship data with relevant independence compliance indicators

Long association requirements of audit partners and practitioners

Key audit partners serving Public Interest Entities are rotated off the engagement in accordance with Deloitte policies and for partners serving banking and other financial institutions, in accordance with national professional requirements that are more restrictive than international rules.

Legal matters

Ethics

All Deloitte people are expected to act with integrity in accordance with high ethical standards as described in the Deloitte [Global Principles of Business Conduct](#) ("Global Code"). The Global Code is embedded into each member firm's Code of Conduct and defines the commitments that all Deloitte people make regarding ethical standards, as well as explaining each individual's responsibilities to their clients, colleagues, and society.

In addition to the Global Code, other foundational elements of Deloitte's ethics program include global policies, a program of training and communications, and established reporting channels supported by defined incident management protocols. For continuous improvement, regular program assessments and reviews are conducted, and feedback is collected from Deloitte people through an annual ethics survey.

Ethics at Deloitte is led by the Deloitte Global Chief Ethics Officer at the global level, and by member firm Ethics Officers at the local level, all of whom are experienced partners with direct access to the member firm's CEO and governing body. Deloitte Global and member firm ethics leaders work together to continually monitor risk and to reinforce compliance with the Global Code.

Deloitte Israel maintains policies and procedures that build on the global policies and are designed to provide

reasonable assurance that its people comply with relevant ethical requirements.

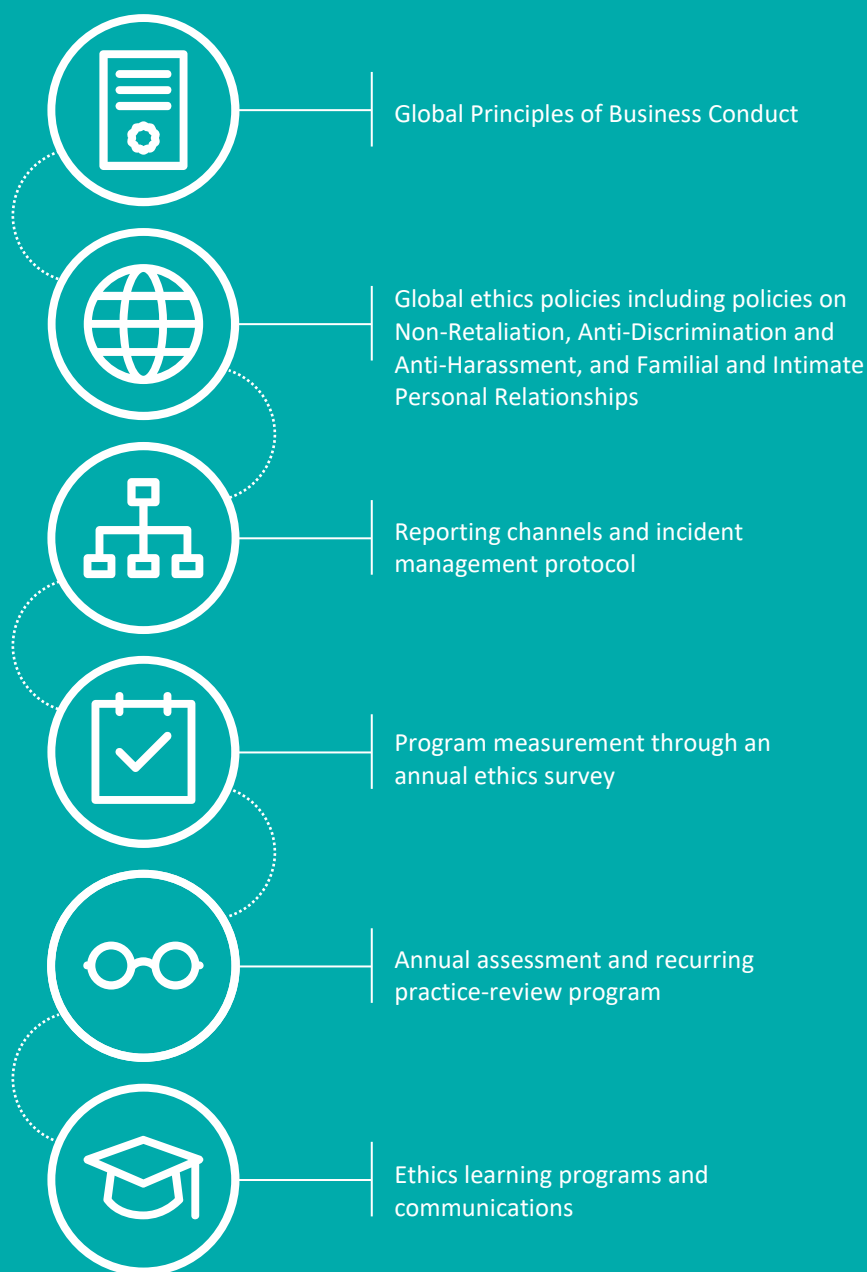

The ethical requirements for audit and related assurance services provided by Deloitte Israel are in accordance with national professional requirements. Deloitte Israel also complies with Deloitte Global policies and procedures, which align with the requirements and guidance set out in the international Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, a standard-setting body of the International Federation of Accountants. When the national professional requirements are more restrictive than the Deloitte Global policies and procedures, Deloitte Israel follows the applicable national requirements.

Deloitte Israel reinforces its commitment to ethics and integrity through communication tools, learning programs, compliance processes, and measurement systems for all people. Learning includes targeted content for onboarding, manager and senior manager promotion, partner admission, independent contractors, and refresher programs every two years. Recent global training topics have included a focus on the importance of owning up to one's mistakes, navigating personal relationships in the workplace, and demonstrating respect, integrity and professionalism on social media, and courses have included a confirmation that professionals are aware that answers should not be shared with others and doing so would constitute a violation of the Global Code. In addition, Deloitte Israel conducts ethics reviews for senior leaders and requires all partners, other practitioners, and support staff to confirm annually that they have read and comprehended the member firm's Code of Conduct and understand that it is their responsibility to comply with it.

Deloitte Global Ethics

Deloitte is committed to conducting business with honesty, distinctive quality, and high standards of professional behavior.

Deloitte's Global Principles of Business Conduct outlines Deloitte's ethical commitments as a network and expectations for Deloitte's approximately 457,000 people, giving a strong, principled foundation. The foundations of the network's ethics program is comprised of the following elements:

Disclosure in accordance with Article 13.2 (b)(iv) of the EU Audit Regulation

The total turnover achieved by the audit firms that are members of the network, resulting from the statutory audit of annual and consolidated financial statements: €2.3- billion⁶

⁶ Amount represents an estimate determined based upon best efforts to collect this data. Certain Deloitte audit firms registered to perform statutory audits in respective member states provide statutory audit services as well as other audit, assurance, and non-audit services. While Deloitte endeavored to collect specific statutory audit turnover for each EU/EEA Deloitte audit firm, in certain cases turnover from other services has been included. The turnover amounts included herein are as of 31 May 2023, except for a limited number of instances where a Deloitte audit firm has different financial year-end or has not finalized its reporting for such period. In these cases, turnover amounts are for the relevant financial year or preceding financial year. Where currency other than the Euro is used in the member state, the amount in Euros was translated using an average exchange rate in effect for the period 1 June 2022 to 31 May 2023.

Appendix B | Financial information

Disclosure in accordance with Article 13.2 (k)(i)-(iv) of the EU Audit Regulation

The breakdown of the Brightman Almagor Zohar & Co.'s FY 2023 turnover:

Turnover as a percentage of total revenues of Brightman Almagor Zohar & Co. and its Israel affiliates:	
(i) Revenues from audit services for audits of financial statements of non-EU companies with transferable securities admitted to trading on regulated markets in the EU	Less than 1%
(ii) Revenues from permitted non-audit services of non-EU companies with transferable securities admitted to trading on regulated markets in the EU	Less than 1%
(iii) Audit service revenues, excluding revenues reflected in line (i)	31%
(iv) Nonaudit service revenues, excluding revenues reflected in line (ii)	69%
Total	100%

Appendix C | Public interest entities

Disclosure in accordance with Article 13.2 (f) of the EU Audit Regulation

Public interest entities audited for statutory purposes by Brightman Almagor Zohar & Co.'s in the financial year 2023:

Name	FYE
BATM Advanced Communications Ltd.	31 December 2022

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited (“DTTL”), its global network of member firms, and their related entities (collectively, the “Deloitte organization”). DTTL (also referred to as “Deloitte Global”) and each of its member firms and related entities are legally separate and independent entities, which cannot obligate or bind each other in respect of third parties. DTTL and each DTTL member firm and related entity is liable only for its own acts and omissions, and not those of each other. DTTL does not provide services to clients. Please see www.deloitte.com/about to learn more.

Deloitte provides industry-leading audit and assurance, tax and legal, consulting, financial advisory, and risk advisory services to nearly 90% of the Fortune Global 500® and thousands of private companies. Our professionals deliver measurable and lasting results that help reinforce public trust in capital markets, enable clients to transform and thrive, and lead the way toward a stronger economy, a more equitable society and a sustainable world. Building on its 175-plus year history, Deloitte spans more than 150 countries and territories. Learn how Deloitte’s approximately 457,000 people worldwide make an impact that matters at www.deloitte.com.
